SUMMARY

Experience as a Java backend Developer and application support work. Extensively worked on Core Java Serialization and Collections. Worked as a Technical support and handled L1 tickets for Java-based support projects. Knowledge and experience in Spring Core, and Spring MVC. Experience working on architectures like Model-View-Controller (MVC). Good hands-on experience with databases like MySQL. Knowledge of Maven for integration and deployment of applications. Working experience on Ticket handling tools like JIRA, and Service now. Experience using version control tools like GIT. Experience in AGILE/SCRUM and Software Development Life Cycle (SDLC) based development environment and participating in SCRUM sessions that include Analyzing, Designing, Coding, Testing, Implementation & Production

SKILLS

- Technical Requirements
- Software Design
- Software Applications
- Software Development Life Cycle (SDLC)
- UX Design Principles
- UI/UX
- Requirements Documentation
- Testing and deployment
- Database Management
- Database Management Software
- Project Management
- Software testing
- Agile Methodologies
- Feature and Application Implementation
- Java SE 8
- Servlets
- JSP
- Eclipse
- VS Code
- STS
- AspectJ
- Netbeans
- IntelliJ
- Spring 4.x
- Hibernate
- Apache Tomcat 9.0
- REST(JAX-RS)
- Maven
- Git
- Junit
- Selenium
- FindBug
- MySQL
