

To Whom It may concern:

Devyn has shown an interest in science this year by doubling up on science courses. He is currently taking Chemistry and Environmental science. Devyn has achieved great marks in both of these courses and completed all of the assigned tasks. Devyn is a fun kid to be around and works well with others.

Devyn has done high school track the last three years. This year he decided he wanted to really push himself and try to run a very difficult race., the 400 m dash. This would require him to work extra hard and push himself in practice. He didn't back down from the challenge and is currently working on being his best at this race and also working towards a school record.

Devin in general is just a great kid and I feel he would be a great addition to the health care camp. He has shown a strong interest in this area and you would enjoy having him.

Mark Tims (Science teacher/Track Coach).
