

**Ramirez & Co hires Marty Teevan to bolster fixed income trading**

Ramirez & Co. has hired seasoned industry veteran Marty Teevan as the firm continues to bolster its taxable fixed income sales and trading group.

Teevan will focus on high-yield, distressed, and special situations as a senior salesperson and joins from Clearview Trading Advisors, where he was a managing director focused on high-yield and distressed securities.

Prior to that, Teevan spent two years as the managing director of leveraged finance sales and trading at Canaccord Genuity and was formerly at Cantor Fitzgerald, as head of the company's global credit business.

Founded in 1971, Ramirez & Co. is the oldest and largest Hispanic-owned securities firm in the United States. The New-York based firm serves institutional clients and retail investors across six core areas: municipal finance, investment banking, fixed income sales and trading, institutional equities, wealth management, and asset management.

The fixed income team provides retail and institutional trading and market-making expertise in municipal bonds and taxable fixed income securities, including government bonds, agency bonds, corporate bonds, mortgage-backed securities, high-yield debt and emerging markets.
