ABOUT ME

_____

I'm a web developer and a Linux lover. I like to participate in innovative projects in a startup environment. I'm interested in personal finance and how we can use it to reach our goals.

EXPERIENCE

_____

Software Engineer

Rackspace → (2020 - Present)

Working with Golang and Kubernetes in the Kubernetes-As-A-Service product by Rackspace for customers.

Software Engineer

Digitt → (2018 - 2020)

Build friendly applications for our fintech startup. Developing both in Frontend using ReactJS with Redux, HTML5, CSS/Sass; and the Backend with NodeJS using RESTful, Koa, and PostgreSQL. We use a microservice architecture using gRPC and Docker containers orchestrated by Kubernetes and Rancher. Usage of Gitlab CI/CD, Mocha for unit testing, and Nightwatch for e2e tests. Usage of AWS technologies such as EC2, S3, CloudFront, Lambda functions and RDS. Use Scrum as a development methodology.

Front-End Developer

Agave Lab → (2017 - 2018)

Build a web application for a portfolio startup using ReactJS and GraphQL. After that, work together with a San Francisco company to build a complete web application to migrate data to the Cloud. We built it using microservices. Technologies used: ReactJS, HTML5, CSS/Sass, NodeJS, PostgreSQL, ExpressJS. Usage of CircleCI as CI/CD, Mocha for unit testing, and TestCafe for e2e tests. Use Scrum as a development methodology.

Software Developer

Agave Lab → (2017)

Give support to a Python web application for an insurance company using Python, Flask, and Bash scripts.

Technical Support Engineer

Micro Focus / Novell → (2016 - 2017)

Configure, monitor and give support to Linux Servers (SuSE). Manage Identity and Access of thousands of users using Novell software solutions. Develop Java and Bash applications to automate DevOps processes.

EDUCATION

B.S. in Computer Systems

Escuela Superior de Cómputo, IPN → (2011-2016)

SUSE Certified Administrator

SUSE → (2016)

LANGUAGES

Spanish → Native

English → Professional

OTHER ACTIVITIES

Co-Founder and organizer of the Golang Community in Guadalajara, Mexico. We organize a meetup to bring people together to attend two talks related to Golang, to share their personal projects and to have networking.

I am steeped in meetups and hackathons related to development, entrepreneurship, and new technologies.
