Dear Librarian/Educator,

Rosen Publishing continues its mission to engage and motivate students by providing compelling, just-right content correlated to curriculum standards. Our titles run the gamut of subjects and formats across grades 5–12+ and are devised to impact student learning and outcomes through careful editing and design. With 80 new titles, online databases (pp. 3-5), a growing collection of Interactive eBooks (pp. 8-18), and a revolutionary eBook platform, ePointPlus (p. 7), our commitment to you is stronger than ever.

Rosen Publishing is dedicated to providing prudent, authoritative information to those who may find themselves in harm’s way. Our much-admired Teen Health & Wellness (p. 2), hailed by School Library Journal as “ground-breaking,” is celebrating more than 10 years of helping librarians and educators save lives. By providing teens with up-to-date, nonjudgmental, straightforward curricular and self-help support, there is no doubt that it is THE trusted source for hard-to-ask questions.

New York Times Educational Publishing, a new imprint of Rosen Publishing, is proud to announce the publication of 12 new titles this Spring. Since its inception, New York Times Educational Publishing has already received high praise from Booklist: “Needless to say, the writing is excellent…this unique approach to a timely subject will draw readers into the multifaceted conversation.” Now with 84 titles in four subsets (p. 19–27), these expertly written introductions provide context for each curated volume, equipping readers to understand the broader narrative in which each article is situated.

In a turbulent world where authoritative, accurate, and vetted advice can be difficult to find, the new titles in our classic series Coping (p. 42–43) provide guides to the most challenging social issues faced by today’s adolescents. A new series, Be the Change! Political Participation in Your Community (p. 52), is an inspiring set that explores a wide range of opportunities to help young people get involved in public service in their own communities. These nonpartisan volumes will motivate readers to participate in the political process and create real change on issues they care about.

You can always count on Rosen Publishing to provide you with the information your students need and the customer service you deserve.

We want to hear from you. Should you have any questions while browsing through our new catalog, please call us at 800-237-9932 or visit us online at rosenpublishing.com.

With best wishes,

Roger Rosen

Thoughts and Feelings: Identifying Emotions

WHAT ARE EMOTIONS?

Think about your first day of school. Can you remember how you felt? You might have been excited to see your friends, nervous to meet your teacher, or sad to be away from your parents. Maybe you had all those feelings at once!

Feelings are very personal reactions to an emotion. Everyone has emotions, no matter how old they are or where they live. Emotions can be signals with information about the world around us. They may give us an idea about whether something will be good or bad for us.

Emotions sometimes come quickly and unexpectedly. You might experience a jumble of emotions that change the way you think, the way your body feels, the way you look, and the way you act. With practice, you can learn to slow down, think about and name your emotions, and decide what to do next.

We can recognize emotions by the way they make us look and feel. This boy’s expressions show different emotions. Can you guess what they are?

“Teens will think critically about current and historical events with the help of this media literacy-focused series... Images are predominantly black-and-white, staying true to the series’ newspaper column format, and each article stands on its own with little transition or analysis between segments. VERDICT A series that will challenge even seasoned readers.” —School Library Journal, Series Made Simple

Great Social Studies Exit Projects

New pedagogical trends encourage students to be proactive, developing and carrying out projects for in-depth curricular topics in great detail. Many states require “exit projects,” to demonstrate mastery over a curricular subject before completing middle school. This series meets that demand, offering examples of engaging, investigative projects closely aligned to state middle school social studies standards. Project examples explore critical periods of U.S. history, teaching readers how to develop an independent project to explore key questions related to their favorite unit. They will learn how to develop a project and prepare displays or presentations to share their discoveries.

• Each book provides 10 to 15 exit projects in line with project-based learning, which is an emerging trend in middle school curricular standards
• Subjects correlate closely to state social studies curricular topics on U.S. history
• Approach to projects is aligned with the mandates of the C3 Social Studies Framework

**How to Catch and Release**

There are several things an angler can do to increase his chances of survival after being released. Most importantly, if at all possible, keep the water in the water while removing the hook. As long as you don’t hurt the fish, this will help the fish recover faster. After removing the hook, gently pull the fish away from the line. Also, be gentle but firm when releasing the fish. If possible, angler can work in pairs with one angler holding the fish and the other removing the hook. Most often, the hook will not go in too deeply. It may be possible to cut the line or remove the hook using pliers. It is sometimes possible to simply put some slack in the fishing leader to show you can see right away if the fish is alive. Don’t pull or pull the fish. This causes more unnecessary damage. If possible, gently slide the line in the fish’s mouth and let it take the line under the fall. This will help the fish take the line out of the way. If possible, you can also help the fish by placing it in the water. Remember to work quickly and gently when releasing the fish.

Ace Your Résumé, Application, and Interview Skills

Now you can more clearly figure out what skills you have. Look at your accomplishments. What skills did you use to achieve them? For example, if you worked as a fry cook, you might describe the experience in terms of these accomplishments:

- Prepared meals for an average of eighty customers per day
- Kept track of and prepared multiple orders at a time
- Maintained high-quality food service in fast-paced environment
- Coordinated with other team members to deliver fast, accurate customer service

Do you see how these accomplishments show that you have critical skills? “Prepared meals” shows you have cooking as an “important and useful skill” on your resume.

WHAT DO YOU WANT TO OFFER?

WEB DESIGN

When we first imagine creating design or interactive media, we design in the form of an image or text. We imagine a website with our ideas. However, we use code to create the design. Our Code is a series of instructions that define the layout, style, and content of the site. The code is essentially the design that defines what the site will look like. The website is a collection of files that are stored on a server that the user can view through a web browser. Our Voices: Spanish and Latino Figures of American History

Few know about the Cuban woman who, disguised as a man, fought for the Confederates in the American Civil War. Or the 1947 federal court case brought on by a Mexican–Puerto Rican woman that desegregated schools in California—seven years before Brown v. Board. Or the Spanish general whose decisive victories against the British in the American Revolutionary War ensured the Colonies’ success. - Ties each figure to an important historical episode featured in state curricular standards for social studies
- Provides students with positive depictions of Spanish and Latino figures to look up to and learn about
- Timelines contextualize the life of each subject within a broader historical period

“This biography offers a rare perspective and is recommended for all nonfiction collections.”

The Giants of Comedy™

Comedian Jordan Peele’s Get Out confused many film festival leaders and moviegoers. Was it a comedy, drama, or horror flick? Peele answered them that it was a documentary. For hundreds of years, satire has provided an honest critique on society, making the artful comedian someone to celebrate. This series provides insightful biographies of some of the most talented and influential comedians working today including Jordan Peele, Tiffany Haddish, and Trevor Noah. Each biography covers the comedian’s childhood, how they became interested in making people laugh, and the steps they took to make a career out of comedy. Readers will learn about each comedian’s rise to prominence and their influences on popular culture. Comedians are often walking a fine line between political correctness and a creative license that can offend, shock, or critique and challenge prevailing personal and social assumptions and orthodoxies, this series uniquely celebrates that fact.

- Timelines of each comedian’s work
- Samples from critical reviews
- Presents sophisticated comedy, which is the medium through which teens view, interpret, experience, interrogate, and debate with the wider world and society
- Sidebars and Further Information sections encourage further exploration
