11

12

13

14

Remove front passenger side kick plate trim.
Retire la vestidura de la placa de rodapié del lado del pasajero delantero.
Enlevez la garniture du panneau latéral côté
passager avant.

15

Remove rear passenger side kick plate trim.
Retire la vestidura de la placa de rodapié del lado del pasajero trasero.
Enlevez la garniture du panneau latéral côté passager arrière.

16

17

Pass the wire through the grommet from the inside and into the area behind the wheel liner.

Pase el cable a través del ojal desde el interior y hacia el área detrás del forro de la rueda.

Passez le fil de l'intérieur à travers le passe-fil et dans la zone derrière la doublure d'aile.

18

19

Note: Lubricate the harness for easier pull through.

Nota: Lubrique el arnés para facilitar su extracción.

Remarque: Lubrifiez le faisceau pour en faciliter le passage.

20

Pull the hanger with the wire back through the grommet.

Tire del colgante con el cable de regreso a través del ojal.

Tirez le support avec les fils à travers le passe-fil.

21

Note: Tighten tie straps in the end after installation.
Note: Nota: Apriete las cintas de amarre al final, después de la instalación.
Remarque: Serrez les sangles à la fin après l'installation.

22

23

24

Feed ground eyelet and blue wire of harness B through bottom of grommet into passenger compartment.
 Pase el ojal de conexión a tierra y el cable azul del arnés B a través de la parte inferior del ojal en el compartimento de pasajeros.
 Enfilez le fil bleu et l'oeillet de terre du faisceau B par le bas du passe-fil dans le compartiment passager.

25

Route the main harness along right side following removal of trim.
 Pase el arnés principal a lo largo del lado derecho después de quitar la vestidura.
 Orientez le faisceau principal le long du côté droit après avoir retiré la garniture.

Note: Tighten tie straps in the end after installation.
Nota: Apriete las cintas de amarre al final, después de la instalación.
Remarque: Serrez les sangles à la fin après l'installation.

**26**

Route blue wire along sill to glovebox area.
 Pase el cable azul a lo largo del estribo al área de la guantera.
 Oriente le câble bleu le long du rebord vers la zone de la boîte à gants.

**27**

Connect the main harness to the ground (Torque: 9nm)
 Conecte el arnés principal a tierra (apriete a: 9 Nm)
 Connectez le faisceau principal à la terre (couple :9nm)

28**29****30**

31 Attach the main harness to the ECU.
Conecte el arnés principal a la ECU.
Fixez le faisceau principal à l'ECU.

Note: apply pressure for 30 seconds.
Nota: aplique presión durante 30 segundos.
Note: appliquez la pression pendant 30 secondes.

32 **Note:** Make sure the Swing Gate Hinge doesn't hit the ECU.
Nota: Asegúrese de que la bisagra de la compuerta abatible no golpee la ECU.
Remarque: Assurez-vous que la charnière du portillon pivotant ne heurte pas l'ECU.

33

34

Note: Remove lower LT and RT Rear wheel liner
Nota: Retire el forro inferior de las ruedas traseras izquierda y derecho
Remarque: Enlevez la doublure de l'aile LT inférieur et RT arrière

35

36

37

Clip to rear crossmember
Sujete al travesaño trasero
Agrafe pour la traverse
arrière

6X
