Platinum Incorporations and LLC Services (sm) for businesses who want the ultimate incorporation services.

July 9, 2010, Santa Ana, California. Merhab Robinson & Jackson has launched a Platinum Incorporations and LLC Services (sm) for businesses that are looking to form or change a business entity.

This service is aimed at entrepreneurs that want personalized service and desire a comprehensive analysis of their business needs. With Platinum Incorporations and LLC Services (sm) the firm will create and maintain your legal entity and guide you through the entire process. Protect your personal assets and position your business for success by establishing the proper structure from the beginning.

When starting a new business, or changing the form of an existing business, a business owner should seek the assistance of a qualified business attorney to assist in choosing the most appropriate form of entity for the business activity. In addition to ensuring that your entity is properly formed and organized, our attorneys will be able to discuss and provide advice on the form of the entity, such as sole proprietorship, corporation, LLC, partnership or limited partnership, as well as entity structure, financing, tax election, employment relationships and insurance coverage.

When asked why the firm launched the new service, Marla Merhab Robinson, Partner said; "We have been engaged by many business owners to correct or finish the work done with an internet document service, such as Legal Zoom. It is less expensive for the client in the long run to pay for the services of an experienced attorney up front."
