RE: HCSS HeavyBid Training

Scott,

Thanks for the remote training/implementation this week on HCSS HeavyBid. Although I'm an experienced user, I was able to learn a number of new things from you. Your ability to communicate the processes and their importance will definitely enhance my estimates moving forward.

Qayaq Construction will benefit greatly from the advice and assistance in the development of the material and activity codebooks. It is obvious that the full development of these "libraries" will dramatically increase the number of estimates we can get out to our clients.

Again, we appreciate the assistance and feel free to have anyone contact me to hear more about the quality of your service.

Sincerely,

Kodi Long
