**TECHNICAL BULLETIN
TB2012-004
ISSUE DATE 04/06/2012**

VMC1 System Integration with Garage Monitor and Remote Garage Door Activation

VMC1VDS-BZ

VMC1 Master Station

Garage Door Opener

The VMC1 Video Security Intercom system effectively displays the view of the garage door as it opens and remotely closes from any interior station. This Technical Bulletin provides wiring instructions on how to provide this solution with components from Linear connected to the VMC1 Master Station Control Output Switches.
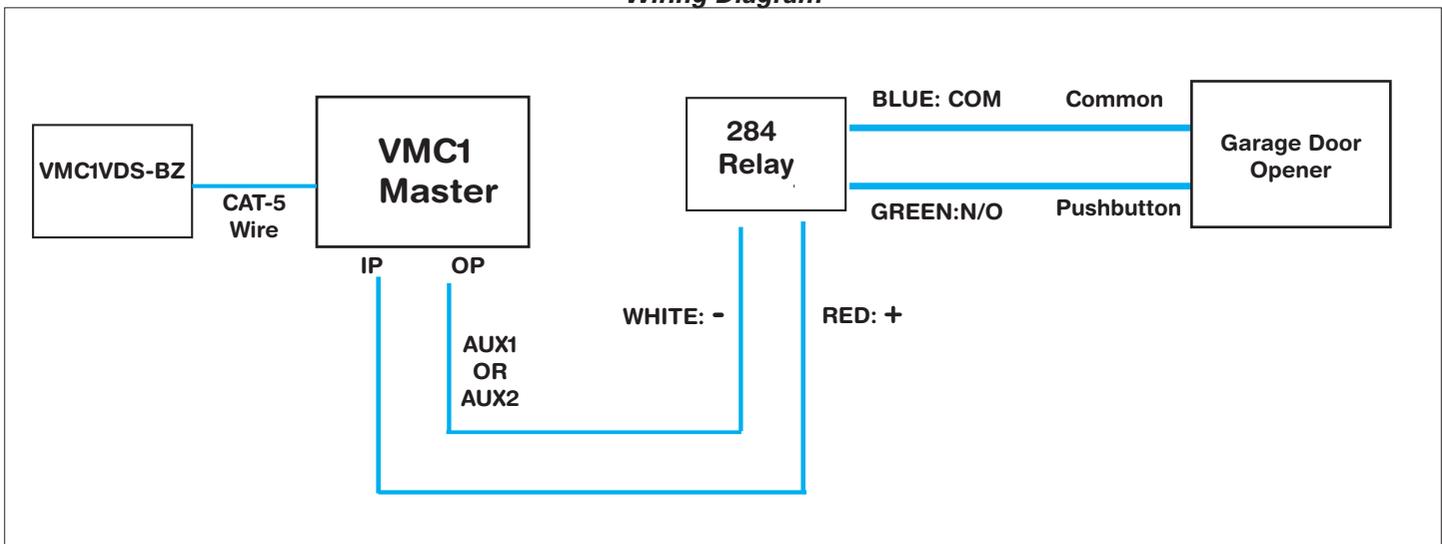

Wiring / Installation Instructions:

**284
Form C Relay**

1. Install the VMC1VDS-BZ in the garage with full view of the garage door opening. With a Wide-View 120º horizontal / 80º vertical viewing angle, the VMC1VDS-BZ is ideal for this application.

2. Connect the Red wire (+) on the Relay to IP COM+ on Master Station.

3. Connect the White wire (-) on the Relay to OP AUX1 or AUX2 on the Master Station.

4. Connect the Blue wire (Com) to the WALL STATION COMMON terminal on the Garage Door Operator.

5. Connect the Green wire (N/O) to the WALL STATION PUSHBUTTON terminal on the Garage Door Operator.

6. Program the connected AUX output to Timer Mode, one-second activation as instructed in the Finish-Out Guide.
