INSTALLATION

Surface Mounting - (Recommended)
- For solid surfaces that do not have a pre-drilled hole, use wall anchors. Use #8 screws or #8 lag screws through the holes in rear wall. Use #10 screws or #10 lag screws through the holes in front wall. See INSTALLATION BOLTS AND SCREWS chart.
- Insert #10 or #8 lag screws (or other fasteners appropriate for wall conditions) through mounting holes in rear wall. Tighten securely. See INSTALLATION BOLTS AND SCREWS chart.
- Reconnect all wiring. If necessary, replace wall receptacle cover(s) and any wall fixture that may have been removed.

Surface Mounting - (Alternative)
- For surfaces that do not have a pre-drilled hole, use wall anchors. Use #8 screws or #8 lag screws through the holes in rear wall. Use #10 screws or #10 lag screws through the holes in front wall. See INSTALLATION BOLTS AND SCREWS chart.
- Insert #10 or #8 lag screws (or other fasteners appropriate for wall conditions) through mounting holes in rear wall. Tighten securely. See INSTALLATION BOLTS AND SCREWS chart.
- Reconnect all wiring. If necessary, replace wall receptacle cover(s) and any wall fixture that may have been removed.

Surface Mounting - (Alternate)
- For surfaces that do not have a pre-drilled hole, use wall anchors. Use #8 screws or #8 lag screws through the holes in rear wall. Use #10 screws or #10 lag screws through the holes in front wall. See INSTALLATION BOLTS AND SCREWS chart.
- Insert #10 or #8 lag screws (or other fasteners appropriate for wall conditions) through mounting holes in rear wall. Tighten securely. See INSTALLATION BOLTS AND SCREWS chart.
