

INSTALLATION INSTRUCTIONS

MIGHTY-MITE and SUPER-MITE

Mighty-Mite®

No. 326 - Dual Double Pole

Super-Mite®

No. 327 - Dual Triple Pole

CASE INSTALLATION

Place front of case approximately $\frac{1}{8}$ " in from outside edge of door stop. Case can be either surface mounted (See Fig. A and C) or mortised into stop (See Fig. B). Where there is no stop, place case on frame to act as stop. Be sure floating screw holes are in center of elongated slots. Set but do not tighten screws.

STRIKE INSTALLATION

To help properly locate, place strikes on magnets,

prongs facing door. Then close door and prongs will mark correct location.

SINGLE DOORS

Apply long strike to inside face of door (See Fig. C).

PAIRS OF DOORS

On light pairs of doors where the full power of the catch is not needed, place case on stop in center of meeting doors using a short strike on each door (See Fig. A). For maximum power, use a separate catch with the long strike on each door.

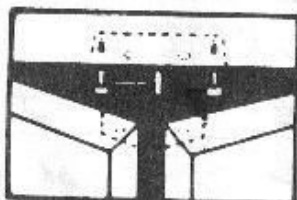

Fig. A

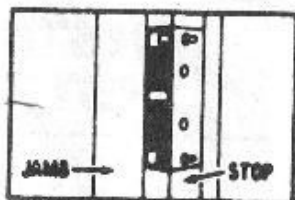

Fig. B

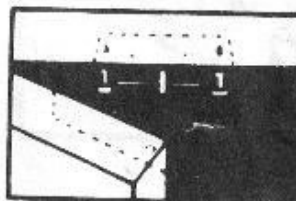

Fig. C

When final adjustment of case has been made, tighten screws.
