High Security Solid Steel Padlock

ASSA ABLOY, the global leader
in door opening solutions

ASSA KIK & SFIC Padlocks Interchangeable Core Padlock

- Double ball bearing locking mechanism
- Every lock with a set screw for changing to key retaining
- One key can open both door locks and padlocks
- Clever shackle change design [Patented]
- Brass body with blue bumper and super tough Moly steel shackle
- Each lock with KIK driver, bible cover, retainer screw
- No core, no key
- With Shackle Seal

ASSA High Security Solid Steel Padlock KIK & SFIC Interchangeable Core Padlock

- Double ball bearing locking mechanism
- Every lock with a set screw for changing to key retaining
- Clever shackle change design [Patented]
- Solid steel duplex nickel plated lock body
- Each lock with KIK driver, bible cover, retainer screw
- No core, no key

ASSA LFIC Schlage® Padlocks LFIC Schlage® Brass Interchangeable Core Padlocks w/o Core

- Brass body or chrome plated brass padlock available in 1-3/4"
- Padlock is supplied without cylinder and accepts Schlage® #23-030 series cylinder
- Bumper for protection

- Double ball bearing locking feature provides superior pull and pry resistance
- Clever shackle change design, With Shackle Seal
- All products come non-key retaining

Cabinet Locks

Auxiliary Locks

ASSA ABLOY, the global leader
in door opening solutions

ASSA cabinet and desk locks feature our high security U.L. 437 listed cylinders. These versatile locks can be keyed into any ASSA master key system. The cylinder can be easily rekeyed by removing the set screw on the side of the cylinder housing.

Benefits:

- ASSA U.L. 437 high security cylinder
- Setscrew for easy rekeying
- Two independent locking mechanisms to ensure security and optimum pick resistance
- Inactive "false" gates in side pins designed to increase pick resistance

Technical Information:

- Available with plastic spacer and strike
- Cabinet lock available with horizontal or vertical bolt and deadlatch
- Desk lock available in 7/8" and 1-3/8" mounting thickness
- Bolt material high quality brass
- Stainless steel top pins
- Bottom pins and master pins are nickel silver

Warranty:

- ASSA warrants its cylinders against defective workmanship or wear resulting from defects for one year.

Maximum + Restricted

ASSA®
ASSA ABLOY

Patented 2030

ASSA ABLOY, the global leader
in door opening solutions

Mortise and Rim | IC | Cam Locks | KIK/KIL

Introducing ASSA Maximum+ Restricted lock cylinders based on Maximum+ patented key profile. These non UL437 cylinders gives customers the flexibility to install a low cost conventional cylinder in openings that do not require a High Security lock cylinder. The Maximum+ Restricted cylinder is less expensive providing cost savings where key control is the main feature.

Customers have the flexibility to deploy conventional cylinders internally with the option of utilizing the UL437 high security cylinder for perimeter doors where risk of physical attack to the door is greatest. Both cylinders are operated by the same Maximum+ patented key.

Competitive with all patent restricted key systems and featuring one of the longest legally enforceable utility patents valid to 2030 makes Maximum+ Restricted one of today's most valuable key systems. The added advantage of 9 cut depths provides exceptional master keying expansion.

Maximum+ Restricted Cylinders Benefits:

- Cylinder housing and plug are made of high quality brass
- Stainless steel top pins
- Bottom pins and master pins are nickel silver
- Counter mill in each chamber position to enhance pick resistance
- ASSA's generous keying capabilities allow over 160,000 change keys under a single master key

Maximum+ Keys Benefits:

- Two sets of key cuts designed to operate independent locking mechanisms for High Security cylinders
- Innovative key design protected by U.S. and international utility patents
- Patented key control offers the ultimate protection from unauthorized duplicate keys
- Top cuts can be generated on standard, quality code cutting equipment
- Special key stamping and custom coining available

Certification:

- ASSA's patented key systems are legally protected against unauthorized key duplication through rights granted by the utility patent
- Maximum+ key listed under U.S. Patent number 8,205,473

Warranty:

- ASSA warrants its cylinders against defective workmanship or wear resulting from defects for one year
- ASSA warrants that if a key should break under normal usage, ASSA will replace it at no charge

Technical Information:

- High quality nickel silver material
- Key combination is read from tip to bow
- No. 1 cut is deepest, No. 9 is shallowest

SRB36 and SRB37

Deadbolt

ASSA®
ASSA ABLOY

ASSA High Security

ASSA ABLOY, the global leader
in door opening solutions

7000 Series Deadbolt

Benefits:

- Security Guard to prevent physical attack
- Free spinning guard collars to prevent wrenching
- High security solid brass cylinders
- 1/4" Aircraft strength steel mounting bolts
- Hardened Fire rated bolt with full 1" throw
- Non-handed

Certification:

- All ASSA 7000 Deadbolts are U.L. 437 Listed
- All ASSA 7000 Series Deadbolts are Fire Listed R38765

Technical Information:

- Cylinder shell and plug made of high quality brass
- Stainless steel top pins
- Bottom pins and master pins are nickel silver

M90 Series Deadbolt

Benefits:

- **Security Shield** - Guards against ice pick attacks
- Can be keyed alike or master-keyed with other ASSA High Security products
- Deadbolt: UL fire rated
- Door thickness: 1-3/8" (35mm) to 1-3/4" (45mm)
- Available as single cylinder (with thumbturn) or double cylinder
- Adjustable 2-3/8" (60mm) or 2-3/4" (70mm) backset
- Steel hardened bolt pin
- Steel core rosette

ASSA M90 Deadbolt - ANSI/BHMA A156.5 Grade 2 & UL 3 hours fire rating certified Commercial Deadbolt Design for commercial building with Heavy Traffic Applications:

- High abuse areas, High traffic areas
- Multi family housing
- Retail complexes
