AMERICAN CRAFTED SINCE 1972

MAGNETIC TOUCH LATCH

MAGNETIC TOUCH LATCH

The **MTL23 Magnetic Touch Latch** is designed for spaces where clean lines and intentional design take priority. Offering smooth push-to-open functionality, it allows doors to open effortlessly without the need for visible hardware—perfect for modern interiors, concealed doors, and minimalist cabinetry. A strong magnetic hold keeps doors securely closed, even in environments where movement is a factor, such as boats or RVs. When opened, the latch responds with ease and confidence, making it well-suited for larger or heavier doors where standard touch latches may fall short.

DOOR OPEN

DOOR CLOSED

Magnetic Touch Latch

- Strong magnetic holding force for a secure, positive door closure
- Large 1" travel allows smooth engagement and reliable release
- High spring force delivers greater ease when opening
- Engineered to perform on larger or heavier doors than standard touch latch mechanisms

Magnetic Touch Latch Specifications

STRIKE PLATE

NOTES:

1. SPRING FORCE: 10 Lbs
2. MAGNETIC PULL: 6 Lbs
3. TRAVEL REQUIRED TO UNLOCK: .08"
