This catalog contains products that currently comply with Buy America/Buy American and Trade Agreements Act requirements imposed by the federal government through the Buy America/Buy American Act (BAA) and Trade Agreements Act (TAA), respectively. The catalog is reviewed and updated on a semi-annually basis, to verify continued compliance. Please be sure to visit http://us.allegion.com/industries/government/resources for the most current catalog revision.

It is our goal to make it as easy as possible to supply Allegion products for projects subject to Buy American ("BAA") requirements and Trade Agreements Act ("TAA") requirements. A brief description of some of the federal requirements can be found below. Please keep in mind that there are exceptions, exemptions and waivers to many of these requirements. Understanding all the factors that can affect a particular product or project can be confusing,which is why Allegion has a Government Services team to assist you. We are often able to provide product solutions based on these factors. Please direct product or project related inquiries by contacting us at st-govtservices@allegion.com.

To obtain product certification forms, e-mail your request to st-govtservices@allegion.com, and your request will be forwarded to the proper location.

All items in this catalog are subject to the prices, terms and conditions listed in the respective current product price books.

What is the BAA?
The Buy American Act establishes a preference for the federal government, when purchasing supplies for use in the United States, to purchase products mined, produced, or manufactured in the United States. Under the BAA, there is a two part test to determine whether an end product is domestic: (1) it must be "manufactured" in the United States; and (2) the cost of domestic components must exceed 50 percent of the cost of all the components. Neither the statute nor the regulations define "manufacture' however, , the Government Accountability Office (GAO) has stated that manufacturing necessitates that the "completion of the [end product] in the form required for use by the Government be carried out domestically." Where an end product being sold to the federal government is a commercially available off-theshelf (COTS) item, meaning the product is sold in substantial quantities in the commercial marketplace in the same form, without modification, as it is offered to the U.S. government, the components test is waived. Most Allegion products are COTS items and exempt from the component test; products must be manufactured and assembled in the United States.

When could BAA apply?
The BAA applies generally to federal acquisitions exceeding $3,000. However, under the Trade Agreements Act (TAA), the Government has waived the BAA restriction for products from countries that have signed an international trade agreement with the United States ("designated countries"), or that meet certain other criteria, such as being a least developed country. In acquisitions covered by the TAA, offers of designated country products receive equal consideration with domestic offers.

State contracts with federal funding
Domestic preference restrictions may apply to state and local government acquisitions funded with federal dollars. For example, any project funded by the American Recovery and Reinvestment Act of 2009(ARRA) is subject to a Buy American restriction similar to the BAA.

37 states have signed on to certain international agreements opening up procurements to products from certain designated countries (e.g., Taiwan), where the construction contract value exceeds the applicable threshold (e.g., currently $7,864,000 for the WTO GPA). The below 13 have not signed on to any of the international agreements and therefore only domestic products are compliant where the ARRA Buy American requirement applies:

Alabama	Indiana	New Mexico
Ohio	West Virginia	Alaska
Nevada	North Carolina	South Carolina
Georgia	New Jersey	North Dakota
Virginia		

At this time none of the 50 states recognize or have agreed to participate in the NAFTA Trade Agreement, which includes Mexican products.

The Government Strategic Accounts team is available to assist in determining what products are compliant for a specific state or local opportunity funded by federal dollars.

The following named entities have agreed to give equal consideration to products substantially transformed in WTO-GPA countries, including Taiwan. Port Authority of New York and New Jersey Port of Baltimore.

TAA - Trade Agreements Act
The U.S. has entered into a number of international trade agreements, under which the U.S. agrees to waive the BAA and other discriminatory provisions for products from countries that are parties to the agreement. These agreements include the World Trade Organization Government Procurement Agreement (WTO GPA), a plurilateral agreement to which Taiwan, among other countries, has acceded, the North American Free Trade Agreement (NAFTA), and a number of other bilateral and multilateral free trade agreements (FTAs).

When could TAA apply?
The value of the acquisition is a determining factor in the applicability of the TAA, as the various international agreements set forth a dollar threshold for when they apply. In some cases, such as the WTO GPA, the threshold is periodically adjusted.

The below chart sets forth the current thresholds (as of January 2015) for applicability of the trade agreements most relevant to Allegion.

Trade Agreement	Supply contract (equal to or exceeding)	Construction contract (equal to or exceeding)
WTO GPA	$204,000	$7,864,000
NAFTA - Mexico	$79,507	$10,335,931

For purchases made through U.S. General Services Administration Schedule contracts, all acquisitions are covered by the TAA, dollar value of the individual order nothwithstanding.

FARS - Federal Acquisition Regulations
A section of the U.S. Code of Federal Regulations detailing purchasing/procurement policies for the federal government.

DFARS - Defense Federal Acquisition Regulations
A section of the U.S. Code of Federal Regulations detailing purchasing/procurement policies for the Department of Defense (DoD).

Construction project
Any federally funded new construction or renovation work involving a General Contractor is generally considered a construction contract. Often, the word "construction" is noted in the contract.

COTS - Commercially available Off The Shelf
Any item, other than real property, that is of a type customarily used by the general public or nongovernmental purposes, and that 1) Has been sold, leased or licensed to the general public; or 2) Has been offered for sale, lease or license to the general public. Does not apply to Mexico end-products, as assembly and packaging is required in the United States.

Manufacturer's certification of Buy America Compliance
Certificate of Compliance with 49 U.S.C. 5323(i)(1) Allegion can certify that the manufactured products listed within this catalog with a country of origin USA comply with the Buy America requirements of 49 U.S.C. 5323(j)(1) and the applicable regulations at 49 CFR Part 661 as of the date of this catalog. Allegion can provide a Buy America Certification letter for any of our brands within this catalog that are identified country of origin USA.

Information required prior to requesting assistance

Your request for a BAA certification letter should include the following:

1. Project name: _____

2. Solicitation # (if applicable): _____

3a. Total project size (dollar amount): $_____

3b. Total Allegion value for project (dollar amount): $_____

4. Does the above project total size exceed the $7.864 M threshold for BAA/WTO?   ❑ Yes   ❑ No

5. Is the project a DOT FAA (department of transportation or federal aviation authority)?   ❑ Yes   ❑ No

6. Does the above project total size exceed the $10,335,931 threshold for NAFTA?   ❑ Yes   ❑ No

7. Federal project: ❑ Yes   ❑ No

8. State project: (If yes, specify the state)   ❑ Yes state: _____   ❑ No

9. City project: ❑ Yes   ❑ No

10. HUD project: ❑ Yes   ❑ No

11. US EPA project: ❑ Yes   ❑ No

12. ARRA funded project: ❑ Yes   ❑ No

13. List of specified products
(Attach separate sheet if required. Project take-offs and quote request forms are acceptable for product descriptions.)

Submit completed form to: st-govtservices@allegion.com

Please note this is only a worksheet to help provide and gather all necessary information for Buy American Act certification.

Order transmittal cover letter

Buy America/Buy American Act (BAA) and Trade Agreements Act (TAA)

Note that orders requiring BAA/TAA compliant products MUST include this cover letter to be properly identified.

Failure to include a Order Transmittal Cover Sheet or properly marking the order PRODUCTS REQUESTED WITH BAA COMPLIANCE or include the BA/BAA suffix when required could result in the customer receiving non-BAA compliant product with no recourse for an RMA or refund.

Additional costs and order requirements

Locks

Schlage	Up charge	BAA transmittal required	Note on order
A Series	$25 per lock	x
