

# 5017 Wood Door Deadlock/Deadlatch

WOOD

GRADE 2  
EB292

The 5017 Wood Door Deadlock/Latch provides the strength and deeper backset required to secure sliding wood doors.

## Function

For wood framed sliding doors, the 5017 Wood Door Deadlock/Latch provides the same thousand pound strength that the MS1847 Deadlock/Latch provides for metal stiles. A deeper backset clears the recessed jamb used with wood doors. The bolt throw is easily adjusted by means of a screw in the faceplate. Mounting is by through-bolts, which also secure the inside turn and outside cylinder when installed.

## Operation

45° rotation of turn or key throws or retracts bolt. Bolt is self-protecting: if door is shut while bolt is extended, it will retract, preventing damage or accidental lock-out.

## Specifications

### BACKSET

- 1-3/16" (1-1/4" including faceplate).

### CASE

- Stainless steel, measures 1/2" x 4" x 1-19/32" deep. Bolt is laminated stainless steel (specify 5015 for zinc plated steel case and faceplate).

### FACEPLATE

- Stainless steel, 5/8" x 4-1/2" with radiused ends.

### 1015 TURN

- Available with 1016 blank plate shown for doors from 5/6" to 2-1/4" thickness. Without blank plate turn available (for use with cylinder pull) on doors from 1-7/16" to 2" thickness. Standard finish 130, Satin Aluminum enamel.

### 4026 CYLINDER PULL

- Five pin tumbler cylinder in zinc alloy housing. Standard finish 130 Satin Aluminum.

### OPTIONS

- Specify 5015 for zinc plated steel case and faceplate. 1015 Turn for inside operation is available alone (for use with 4026 cylinder pull on outside) or with a blank 1016 outside trimplate and binder posts (when cylinder is not required). 4810 Box Strike with wood screws available separately.

### STANDARD PACKAGE

- Cylinder pulls and/or thumbturns available separately. Shipping weight: 1/2 lb.

All measurements are approximate and are provided for informational purposes only. Refer to the product Installation Instructions.
