Our Finishes

Ashley Norton

Standard

.4 Satin Nickel

.8 Dark Oil Rubbed

Our numerous finishes allow our clients to express individuality. From trendy polished nickel to a more traditional satin nickel or oil rubbed bronze... the choice is yours.

Dark and light oil rubbed bronze are dynamic. These "living" surfaces will take on unique hues as age, climate and touch work their charm, creating an ever-changing patina.

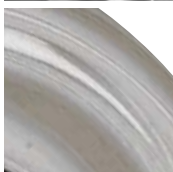

Our standard finishes are dark oil rubbed (.8) and satin nickel (.4). Seven additional finishes are custom manufactured to order.

The photos shown in this brochure give a close representation of the true appearance of these finishes, but a visit to a local dealer will allow you to appreciate the true appearance and feel of our hardware.

OUR PATINAS

Ashley Norton utilizes the finest art grade bronze alloys in the production of our hardware. Our Dark Bronze (BZ), Light Bronze (LT) and Matt Black (TC) products are produced from silicon bronze, a coppery-gold colored alloy of copper, silicon and zinc.

Our Dark and Light Bronze patinas are hand applied on the metal to create a naturally aged appearance. Our **Dark Bronze (BZ)** patina is our most popular, and allows for the greatest uniformity in shade at time of delivery. We aim to stock the most popular items in this patina.

Products in our **Light Bronze (LT)** patina are hand finished in small batches. Each batch will be similar in hue, however different batches may have slight variation in tone. Such differences are caused not only by the small variation in time for which the item is oxidized, but also environmental factors such as humidity and temperature. All Light Bronze orders are custom manufactured.

Our **Matt Black (TC)** products are created through the application of a black powder coat, emanating a look from Tudor architecture around Stratford-upon-Avon in England. Note that this finish is susceptible to chipping as a result from knocks or scratches from objects such as keys or rings. The finish may be restored in the age-old way: by applying a fresh coat of black paint to the affected area. All Matt Black orders are custom manufactured.

Our **White Bronze (WL)** products are produced from an alloy known simply as white bronze. The infusion of manganese and nickel to the copper creates a pleasing silver colored metal. All White Bronze orders are custom manufactured.

Ashley Norton applies a light coating of wax to protect our products from oxidization and wear. As the wax coating wears off, the patinas will be exposed to the environment. The effects of age, climate and touch will work in conjunction to create unique, contrasted color variations. The most frequently touched areas will highlight as the patina wears off and natural shades of bronze are exposed. Areas which are not handled may oxidize further, and the combination of colors and hues will accentuate the timeless elegance of bronze.

SOLID BRASS HINGES

Ashley Norton offers hinges to complement our Solid Bronze door hardware. Our plain bearing, full mortise hinges are manufactured from solid brass extrusions to current ANSI template specifications. Assorted finial tips are available.

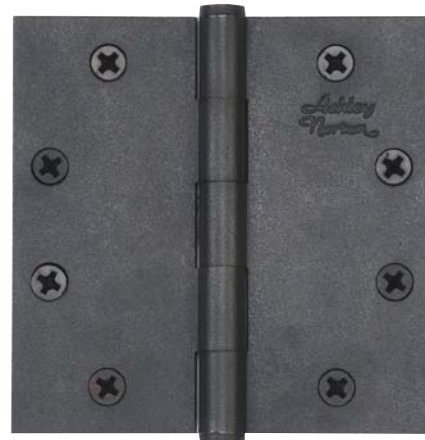

- Hinges manufactured from **solid brass** extrusions to ensure excellent strength and precision tolerance. There may be a slight variation in texture and color between the hinge and the Solid Bronze product
- Full mortise, plain bearing hinges featuring removable 304 stainless steel pin
- Hinges are not available in Matt Black (TC)
- Template screw hole location for use with wood doors and frames
