
ASP Inc. and The Pierce LockCraft Company

Working together as Partners, Working together to be Your Partner

ASP Inc. has supplied replacement automotive locks and lock service parts to the locksmith market since 1980. In the beginning ASP specialized in parts for European and Japanese vehicles that were not otherwise available to the locksmith market.

In 1996 ASP expanded its range to include locks and parts manufactured by Hurd Lock and Manufacturing Inc., a subsidiary of Avis Industrial Co. Inc. Hurd products consisted primarily of original equipment replacements for Ford vehicles. ASP served as the master distributor for Hurd automotive lock products to the locksmith market.

In 2005 Avis Industrial Co. Inc. acquired Candados Universales de Mexico S.A. de C.V. (CUMSA), which was the factory that manufactured the Lockcraft range of automotive locks and parts. In December 2006 the decision was made to close the Hurd factory in Greeneville, Tennessee, and consolidate all manufacturing at the CUMSA factory in Matamoros, Mexico. The new consolidated operation was renamed The Pierce LockCraft Company, Inc., and remains a subsidiary of Avis Industrial Co. Inc.

Since ASP had been serving as master distributor for Hurd products since 1996, it was only natural that the role of ASP be expanded to include the Lockcraft product range manufactured by CUMSA. On January 1, 2008, the Lockcraft product range became part of the ASP product range. Locksmith distributors now have access to the complete ASP, Hurd, and Lockcraft product ranges all being shipped from the ASP warehouse.

One of the first duties of ASP was to produce a complete catalog including all ASP, Hurd, and Lockcraft parts. One problem was that much of the existing Lockcraft product information was incomplete or inaccurate. Many hours which turned into days, weeks, and months were spent verifying the application information for each part in the range. Information was checked and double checked so that this catalog would be as complete and accurate as possible.

This catalog is the first major result of the partnership between ASP and Pierce LockCraft. For various reasons there will probably never be one company with the ability to supply every part for every vehicle on the road. But the combination of the ASP, Hurd, and Lockcraft product ranges covers more makes and models of vehicles and more part numbers under one roof than any other company.

The Pierce LockCraft Company is dedicated to continuous improvement of quality and expansion of the product range for original equipment markets. ASP will continue to do its job in bringing these products to you through our distribution system. ASP and Pierce LockCraft – working together as partners, working together to be YOUR partner.

DISCLAIMERS

LIMITATION OF LIABILITY AND WARRANTY POLICY

LIMITATION OF LIABILITY. In no event shall The Pierce LockCraft Company, Inc., or ASP Inc., be liable to the purchaser of any products listed for sale in this catalog or any third party (including such purchaser's customers), whether in contract, in tort, under any warranty, in negligence, in strict liability or otherwise, for indirect, special, incidental, or consequential damages, including, without limitation, loss of anticipated profits or revenues, loss or damage to other property or equipment, cost of capital, or of purchased or replacement goods, or any expense, inconvenience, or any claim of any kind resulting from any products purchased from The Pierce LockCraft Company, Inc., or ASP Inc., (including sale, use or inability to use such products). The Pierce LockCraft Company, Inc.'s, or ASP Inc.'s, sole liability for any defective product shall be its repair or replacement. Notwithstanding the foregoing, in no event shall The Pierce LockCraft Company, Inc.'s, or ASP Inc.'s, total liability with respect to any product exceed the amount of the purchase price paid by the purchaser for such product. The price quoted for each product herein is based in part on this limitation respecting The Pierce Company, Inc.'s, or ASP Inc.'s, liability.

No liabilities for any use of the information in this catalog are assumed whatsoever for any costs, claims, or damages filed for or caused by correct or incorrect use of the information contained in this catalog. Techniques used are solely the responsibility of the user.

The Pierce LockCraft Company, Inc., and ASP Inc., are not responsible for changes, corrections, omissions, typographical errors or erroneous information contained in this catalog.

Names of manufacturers of locks and keys, along with vehicle manufacturers' names and models, are used in this catalog as a common reference point and for no other reason. The Pierce LockCraft Company, Inc., and ASP Inc. make no claims for or against said manufacturers. All other trademarks are the property of respective owners

Product information and descriptions are accurate to the best of our knowledge at the time of printing this catalog. Future changes in product specifications beyond our control may sometimes be required. Such changes include but are not limited to changes in packaging, color, appearance, and other minor non-critical changes that do not affect the ultimate function or usability of the product for the appropriate application.

How to read the Vehicle Identification Number (VIN) of the car you are working on:

You can find the Vehicle Identification Number (VIN) in several places on the car. This number can usually be seen by looking through the windshield where the dash meets the firewall and the bottom of the windshield, forward from the steering wheel. The number is mounted on a plate so that it can easily be viewed from the outside of the car. The number can also usually be found on a plate or sticker in one or more locations around the car. Popular places to find this plate or sticker are under the hood or on one of the door jambs visible when the door is open.

The vehicle identification number is 17 characters, but the most important information that you need will be found in 2 positions:

Position 1 identifies the country of manufacture of the vehicle. This is important for some models such as Toyota where the lock used may be different depending upon whether the car is made in USA or made in Japan.

Position 10 identifies the model year of the car. Consider this the final authority on the model year of the car. Some cars have a data plate attached somewhere on the car with a "date of manufacture" field that may be confusing. For example, the "date of manufacture" plate may say something like "02 04" which may be interpreted as "February 2004" but may actually mean "February 4" without the year. Always check position 10 of the VIN number to be sure!

Character in pos. 1	Country of manufacture
1 or 2	USA
3	Mexico
4	USA
6	Australia
9	Brazil
J	Japan
K	Korea
L	Taiwan
M	Thailand
S	England
V	France
W	Germany
Y	Sweden, Finland, or Belgium
Z	Italy

Character in pos. 10 Model year

A	1980
B	1981
C	1982
D	1983
E	1984
F	1985
G	1986
H	1987
J	1988
K	1989
L	1990
M	1991
N	1992
P	1993
R	1994
S	1995
T	1996
V	1997
W	1998
X	1999
Y	2000
1	2001
2	2002
3	2003
4	2004
5	2005
6	2006
7	2007
8	2008

Check this sample VIN number:

JT2AE09W3P1234567

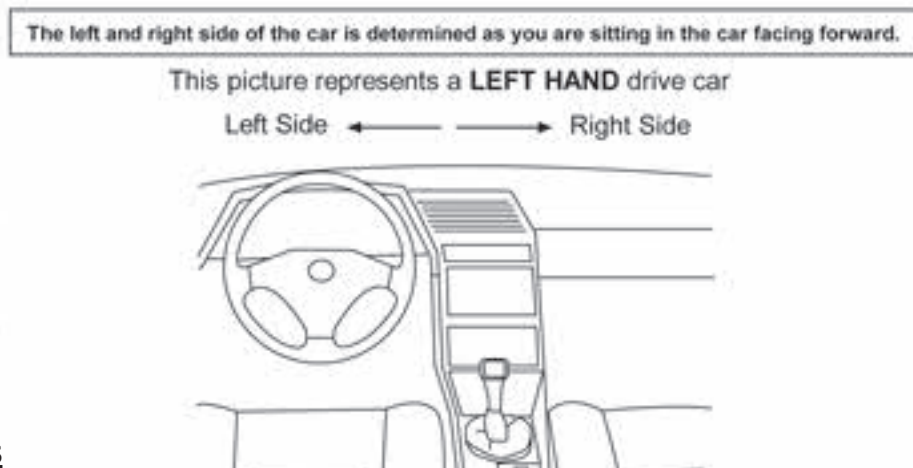

The character in position 1 is "J" which means the car is made in Japan

The character in position 10 is "P" which means the car is a 1993 model year.

The last 6 digits are the sequential production number. Sometimes mid-year production changes are identified by this part of the VIN.

Terminology

Which is the left side of the car and which is the right side?

Coded and uncoded locks

We have always tried to provide you with as many choices as possible to make your work as easy as possible. This led to some cases where several different part numbers could be used to service the same vehicle year and model application.

As our range has grown to thousands of part numbers for hundreds of applications, we have been forced to reevaluate our ability to offer multiple choices for the same application. As such in this catalog we have consolidated some part numbers in an effort to create a balance between full coverage and improving the availability of products through our distribution system.

One area which we have consolidated part numbers is in coded and uncoded versions of the same replacement lock. There is a definite value to uncoded service packages for some design locks such as General Motors and Ford sidebar locks. But for some locks the difference in labor time for rekeying between coded and uncoded locks is very small.

Please note the following designations which you will find in this catalog:

Complete lock - a fully assembled lock with at least 1 working key, and with the correct pawl for the designated application. (In some cases a complete lock may be supplied unassembled but including all of the parts to assemble and create a complete lock coded to the original car key.)

Coded lock - a fully assembled lock with at least 1 working key, not necessarily including the pawl.

Uncoded service pack - this is an unassembled package of parts to be assembled to the original car key. A coded lock may be substituted for the unassembled package of parts depending upon future availability of stock. For any lock designed where the face cap must be removed and destroyed in order to disassemble the lock for rekeying, if a coded lock is substituted for the unassembled package of parts, a spare face cap will be included in the package. Pawls are not included in an uncoded service pack unless noted.

Lock service package - this is a coded lock including a spare face cap for rekeying (if necessary), not including pawl unless noted. An unassembled package of parts may be substituted for the coded lock depending upon future availability of stock.

Availability of Parts

On the line for each specific application, the right column lists the tumbler series used for that application, along with the face cap or other parts needed for rekeying the lock. Unless noted otherwise, this information applies to both the locks supplied by ASP and the locks originally installed on the car when it was new. If the lock originally installed on the car may use different parts from replacement locks, that information is also included to the best of our knowledge.

If no face cap reference is listed for a specific application, that means we do not offer a face cap for that application. In most cases this means that either that the lock is disassembled without removing a face cap, or the lock can be disassembled without destroying the face cap. For applications where a face cap must be removed to disassemble the lock and that face cap is not available from ASP, we warn you about that to the best of our knowledge.

We have tried to list all vehicle brands and models normally sold in the USA and Canada, including those for which ASP has no parts available. If we do not have parts for the model you are working on, we try to tell you to the best of our knowledge where you may be able to find the parts you need. We hope that this feature helps make this catalog more useful.

We also list some parts which are no longer available from ASP. Even though a particular part number may be out of stock at the ASP warehouse and future stock is no longer available, some distributors and locksmiths may still have stock of those items. We have tried to note each of these items as “Discontinued When Out” or “DWO”. However even the status of discontinued items is subject to change. Over the years we have discontinued several part numbers which we were able to reinstate later.

With thousands of part numbers in our range, originating from many different sources, there will certainly be changes in availability, specifications, prices, etc., at any time during the course of time. We will do our best to inform you of changes on www.carlocks.com. The information published in this catalog is accurate to the best of our knowledge at the time of printing.

Where to buy the parts listed in this catalog

ASP products are sold through the network of locksmith supply distributors located throughout the USA and Canada.

With over 4,000 different part numbers in our range, it is impossible and impractical for distributors to keep every part number in stock. Thus we have assigned each of our part numbers a popularity rating to assist distributors in keeping stock. We have implemented new distributor stocking programs based on these popularity ratings.

Distributors who make a commitment to keep stock according to our recommendations are listed on www.carlocks.com. This list is subject to change at any time. Distributors who do not keep the stocking commitment will be removed from the list.

Your distributor can also arrange drop shipment of parts not in stock, subject to stock on hand at the ASP warehouse. (All orders must be placed through your distributor, not directly to ASP.)

See pages 213-240 for explanations of the product popularity ratings and substitutions for items that are no longer available.

IGNITION LOCKS

Infiniti	Ignition locks identified by the casting number		Nissan / Infiniti ignition locks have a casting number on the outside of the lock housing. There are many different minor variations in this range of locks, mostly in the electrical connections. In order to simplify the availability of replacement parts we have grouped the locks available from ASP by casting number. Future sales of complete locks will be the housing and cylinder of each casting number without electrical switch. Electrical switches will be sold separately whenever possible. Also cylinder repair kits will continue to be available whenever possible.

MERCEDES-BENZ MODEL TO CHASSIS TYPE CROSS REFERENCE: Mercedes-Benz uses many different car model number designations based upon the engine size of the car. This can often be confusing if the actual chassis type of the car is not known. Because there are so many different model number designations it is much more practical to organize the sections in order of chassis type instead of the model number designation. This chart is designed so that when a customer tells you the model number designation you can find the chassis type and make sure you look in the correct section. The chassis code may also be present in the vehicle identification number of some models. SPECIAL NOTE: This information applies only to cars that were sold as new cars in the USA and Canada. Cars that were sold new in Europe or other countries and sold in the USA or Canada as grey market imports may vary from the information provided in this chart and in this catalog.

MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY	MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY

Mitsubishi Fuso	Other models	All	Replacement locks available from Mitsubishi truck dealers only				

IGNITION LOCKS

Nissan	Ignition locks identified by the casting number		Nissan / Infiniti ignition locks have a casting number on the outside of the lock housing. There are many different minor variations in this range of locks, mostly in the electrical connections. In order to simplify the availability of replacement parts we have grouped the locks available from ASP by casting number. Future sales of complete locks will be the housing and cylinder of each casting number without electrical switch. Electrical switches will be sold separately whenever possible. Also cylinder repair kits will continue to be available whenever possible.

Toyota	Celica liftback	1990-93	Uncoded service pack	C-30-149	Use tumbler series P-30-151/157		
Toyota	Celica	1994-99	Previously available as C-30-144, discontinued when out. Replacement choices as follows: a. Use coded cylinder C-30-139 which cannot be rekeyed to match the original car key (this is the lock now sold by Toyota dealers for 1994-99 Celica) b. Use C-30-068 which can be rekeyed to the original car key - WARNING: C-30-068 is for Japan specification cars and does not have the metal face cap which guards the cylinder, and thus may be considered lower security than the design with face cap as used on most USA specification cars.

Yugo	GV	1989-90	Complete lock	C-39-102	Discontinued when out, may be available from classic Yugo or Fiat / Italian car parts specialists only.

INSTRUCTIONS FOR USING ORIGINAL 10-CUT FORD SERVICE IGNITION LOCKS

The original Ford service ignition lock method is a convenient way to install a new factory assembled ignition lock in a car using 10-cut keys, and preserve the original matched lock system where the same key will operate the ignition and door locks same as when the car was new.

Check the original car key and identify the depth of the cut in position 5 counting from the head of the key, (same as position 6 counting from the tip of the key) - see the illustration below:

The keys supplied with the new lock are uncut in positions 1, 2, 3, 4, and 6 counting from the head of the key. (All future references in these instructions will refer to cut positions counting from the HEAD of the key only.)

New locks are supplied with position 5 of the key pre-cut to either #1, #2, #3, #4, or #5 depth. Order new locks according to the following descriptions:

Small ears chrome (applications using C-42-110 random coded lock or C-42-117 uncoded lock)

- C-42-111 - #1 depth in position 5 of the key
- C-42-112 - #2 depth in position 5 of the key
- C-42-113 - #3 depth in position 5 of the key
- C-42-114 - #4 depth in position 5 of the key
- C-42-115 - #5 depth in position 5 of the key

Small ears black (applications using C-42-120 random coded lock or C-42-127 uncoded lock)

- C-42-121 - #1 depth in position 5 of the key
- C-42-122 - #2 depth in position 5 of the key
- C-42-123 - #3 depth in position 5 of the key
- C-42-124 - #4 depth in position 5 of the key
- C-42-125 - #5 depth in position 5 of the key

Chrome dome face (applications using C-42-130 random coded lock or C-42-137 uncoded lock)

- C-42-131 - #1 depth in position 5 of the key
- C-42-132 - #2 depth in position 5 of the key
- C-42-133 - #3 depth in position 5 of the key
- C-42-134 - #4 depth in position 5 of the key
- C-42-135 - #5 depth in position 5 of the key

Check www.carlocks.com for the most up to date information

INSTRUCTIONS FOR USING ORIGINAL 10-CUT FORD SERVICE IGNITION LOCKS

Large ears black (applications using C-42-140 random coded lock or C-42-147 uncoded lock)

- C-42-141 - #1 depth in position 5 of the key
- C-42-142 - #2 depth in position 5 of the key
- C-42-143 - #3 depth in position 5 of the key
- C-42-144 - #4 depth in position 5 of the key
- C-42-145 - #5 depth in position 5 of the key

Large ears chrome (applications using C-42-150 random coded lock or C-42-157 uncoded lock)

- C-42-151 - #1 depth in position 5 of the key
- C-42-152 - #2 depth in position 5 of the key
- C-42-153 - #3 depth in position 5 of the key
- C-42-154 - #4 depth in position 5 of the key
- C-42-155 - #5 depth in position 5 of the key

NOTE: *This system will not work on Mercury Villager and Nissan Quest. You must use the uncoded ignition lock C-42-157 and rekey to the original car key, or use C-42-150 random coded ignition lock.*

Contour / Mystique (applications using C-42-160 random coded lock or C-42-167 uncoded lock)

- C-42-161 - #1 depth in position 5 of the key
- C-42-162 - #2 depth in position 5 of the key
- C-42-163 - #3 depth in position 5 of the key
- C-42-164 - #4 depth in position 5 of the key
- C-42-165 - #5 depth in position 5 of the key

NOTE: *C-42-161 through C-42-165 are discontinued when out. You must use the uncoded ignition lock C-42-167 and rekey to the original car key, or use C-42-160 random coded ignition lock.*

After identifying the proper lock series to use, and identifying the depth of the cut in position 6 of the original car key, select the part number that you need from the list above.

Transfer the cuts from positions 1, 2, 3, 4, and 6 only of the original car key to those same positions of the keys supplied with the new lock. Position 5 of the keys supplied with the new lock should be pre-cut to the same depth as position 5 of the original car key. **DO NOT TOUCH POSITIONS 7, 8, 9, and 10 OF THE KEYS SUPPLIED WITH THE NEW LOCK.** Upon doing this the keys supplied with the new lock should operate both the new ignition lock and the door locks. (The original car key will continue to operate the door locks but will not operate the new ignition lock.)

Install the new ignition lock in the car and give the customer the new keys that will operate the new ignition lock and the door locks.

IGNITION SWITCHES

Electrical connector only without lock cylinder.

Ford	Mustang	1964-66	Uncoded lock	D-42-202	Use tumbler series P-42-181/185		
Ford	Mustang	1967-80	Uncoded lock	D-42-201	Coded pair	DL1550	Use tumbler series P-42-131/135
Ford	Mustang	1981-93	Uncoded lock chrome	D-42-231	Coded pair	DL1590	Use tumbler series P-42-131/135
			Uncoded lock black	D-42-232	Coded pair	DP-42-148	Use tumbler series P-42-131/135
			Uncoded lock black cap chrome dust cover	D-42-242	Coded pair black cap chrome dust cover	DP-42-104	Use tumbler series P-42-131/135
Ford	Mustang (10-cut locks)	1994-95	Uncoded service pack	D-42-241	Coded pair	DP-42-141	Use face cap P-42-202 Use tumbler series P-42-141/145
Ford	Mustang (8-cut locks)	1996-04	Uncoded service pack	D-42-257 DL6178U	Coded pair	DL6178	Use face cap P-42-265 Use tumbler series as follows: Hurd (D-42-257) - P-42-141/145 Lockcraft (DL6178) - P-42-061/065
Ford	Mustang	2005-08	Replacement locks available from Strattec Use tumbler series P-42-061/065				
Ford	Pinto	1971-80	Uncoded lock	D-42-201	Coded pair	DL1550	Use tumbler series P-42-131/135
Ford	Probe	1989-92	Replacement locks previously available as D-20-109 (single lock) or DP-20-109 (keyed alike pair) – disc. when out Now use D-20-101, to match original car trim replace the D-20-101 face cap with P-20-209 black face cap and P-20-232 black dust cover. D-20-101 (single lock) or DP-20-101 (keyed alike pair) can be installed on the car with no changes but will not match the original car trim. To service the locks originally installed on the car use the following parts: Use face cap P-20-209 Use tumbler series P-20-111/164				
Ford	Probe	1993-97	Replacement locks previously available as D-20-126 (single lock) or DP-20-126 (keyed alike pair) – disc. when out. Exact replacement locks may be available from Ford dealers (also listed as discontinued when out by Ford). Option from ASP: Use D-20-110 and reuse the pawl from the lock originally installed on the car – HOWEVER the central locking function will not unlock both doors when turning the key as when the car was new. The modified D-20-110 will lock and unlock only the door on which it is installed. Use face cap P-20-216 Use tumbler series P-33-101/105

MERCEDES-BENZ MODEL TO CHASSIS TYPE CROSS REFERENCE: Mercedes-Benz uses many different car model number designations based upon the engine size of the car. This can often be confusing if the actual chassis type of the car is not known. Because there are so many different model number designations it is much more practical to organize the sections in order of chassis type instead of the model number designation. This chart is designed so that when a customer tells you the model number designation you can find the chassis type and make sure you look in the correct section. The chassis code may also be present in the vehicle identification number of some models. SPECIAL NOTE: This information applies only to cars that were sold as new cars in the USA and Canada. Cars that were sold new in Europe or other countries and sold in the USA or Canada as grey market imports may vary from the information provided in this chart and in this catalog.

MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY	MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY

VOLKSWAGEN DOOR LOCK PARTS

Replacement Triggers for Door Handles

These parts allow you to replace a broken trigger instead of replacing the entire door handle.

P-31-701 - For Beetle and Karmann Ghia 1968-79 (D-31-104 door handle).

P-31-704 - For Type 3 Fastback & Squareback, 411, and 412 models (D-31-104 door handle).

P-31-705 - For Type 2 vans 1968-79 (D-31-105 door handles).

P-31-706 - For 1973-75 Dasher, mid - 1970's Rabbit, Scirocco, Porsche 924, and others (D-31-106 door handle).

P-31-707 - For most models approximately 1978-up (D-31-109, D-31-110, D-31-111, and D-31-112 door handles).

Replacement Trim Strips for Door Handles

These trim strips must be removed in order to gain access to one of the screws holding the door handle to the door, on the handles such as D-31-109, D-31-110, D-31-111, D-31-112, and others. These strips break easily, and the original black strips are often discolored with age. The following part numbers are exact replacements for the strips originally installed on the vehicle.

P-31-807 - Chrome metal strip

P-31-808 - Black plastic strip

P-31-809 - Black metal strip

Other Repair Parts

Used on 1994-99 Cabrio, 1993-99 Golf, and 1993-99 Jetta

These parts are included with the D-31-113 complete lock and handle and are also available separately as described below:

Eccentric tailpiece which fits with D-31-226 plug - order no. P-31-310

Eccentric tailpiece which fits with D-31-227 plug - order no. P-31-307

(NOTE: The correct tailpiece must be used as listed above or it will not connect with the end of the plug.)

Drive cam (connector) fits with D-31-227 only - order no. P-31-308
(This part is not available separately for older models using D-31-226 plug.)

Parts kit - contains 2 pressure springs and seal gasket - order no. P-31-309 (These parts work with both D-31-226 and D-31-227 plugs.)

DOOR HANDLES

NOTE: The parts in this section are door handles without lock cylinder only. Door handles including the lock cylinder are listed in the DOOR LOCK section. The handles in this section are used when the original handle is damaged. Use with the original lock cylinder or a new lock cylinder as listed in the door lock section. (Lock cylinders are not used with rear door handles.)

Mazda	Tribute	2001-06	Replacement locks available from Mazda dealers only. Use tumbler series P-42-151/155		

MERCEDES-BENZ MODEL TO CHASSIS TYPE CROSS REFERENCE: Mercedes-Benz uses many different car model number designations based upon the engine size of the car. This can often be confusing if the actual chassis type of the car is not known. Because there are so many different model number designations it is much more practical to organize the sections in order of chassis type instead of the model number designation. This chart is designed so that when a customer tells you the model number designation you can find the chassis type and make sure you look in the correct section. The chassis code may also be present in the vehicle identification number of some models. **SPECIAL NOTE:** This information applies only to cars that were sold as new cars in the USA and Canada. Cars that were sold new in Europe or other countries and sold in the USA or Canada as grey market imports may vary from the information provided in this chart and in this catalog.

MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY	MODEL NO.	YEAR	CHASSIS TYPE	TYPE OF KEY

EXOTIC BRANDS

Aston Martin

For ignition locks with non-locking steering column using 62FS key blank, try C-14-301 plug (or C-14-302 plug with turn knob).

For ignition locks with non-locking steering column using 62FT key blank, try B-14-210 plug.

For ignition locks with locking steering column using F81E / FT6R key blank, try C-14-215 ignition lock cylinder.

For ignition locks with locking steering column using S51HFP or S30YSP key blank, try C-23-202 ignition lock cylinder.

For door and luggage locks using key blanks such as 62FS and 62FT, try various British plugs including B-14-202, B-14-203, B-14-205, B-14-205, B-14-206, or B-14-209.

Citroen

Citroen was officially imported into the USA up to approximately 1974. Many different models of Citroen have also been privately imported into North America in very small quantities.

For models such as Citroen DS and Citroen SM, replacement locks are not available from ASP, may be available from Citroen general parts specialists.

The models privately imported into the USA have been mostly Citroen 2CV, Citroen BX, and Citroen CX. If parts are needed for one of these models, the best way is to contact ASP by e-mail using the address:

info@carlocks.com

Please be as specific as possible about the year and model of the car, and the key blank used (if known). Also if possible take a digital photograph of the lock you need to replace and e-mail to ASP. That information will be helpful in identifying the lock that you need.

DeLorean

Exact replacement locks are no longer available except possibly from some DeLorean general parts specialists.

The closest known substitute to repair the original ignition lock is C-14-202 plug. You may need to slightly reduce the diameter of the C-14-202 plug so that it will fit into the original lock housing, using a file or sandpaper.

Ford / Merkur door locks D-18-213 and D-18-214 (or keyed alike pair DP-18-113) are known to have been modified to replace the original DeLorean door locks.

DeTomaso (Pantera)

For ignition locks using X86/FC7 key blank, use C-18-102.

Door locks are not available from ASP, for door lock tumblers use the Fiat tumbler series P-17-121/123.

Ferrari

Ferrari locks are variations of Fiat locks, some of which are still available from ASP and some of which are discontinued when out.

For tumblers use the Fiat P-17-111/113 for locks using key blanks F72V, F72W, F72X, or F72Y, or P-17-121/123 series for locks using F79-1 or F79-3 key blanks.

If lock cylinders are needed for a Ferrari, the best way is to contact ASP by e-mail using the address:

info@carlocks.com

Please be as specific as possible about the year and model of the car, and the key blank used (if known). Also if possible take a digital photograph of the lock you need to replace and e-mail to ASP. That information will be helpful in identifying the lock that you need.

Jensen

For ignition locks with non-locking steering column using 62FS key blank, try C-14-301 plug (or C-14-302 plug with turn knob).

For ignition locks with non-locking steering column using 62FT key blank, try B-14-210 plug.

For ignition locks with locking steering column using F81E / FT6R key blank, try C-14-215 ignition lock cylinder.

For door locks with the lock cylinder separate from the door handle, use the following:

D-14-211 single lock – DP-14-211 pair – using 62FS key blank (discontinued when out).

D-14-213 single lock - DP-14-213 pair – using 62FT key blank.

Note D-14-211/DP-14-211 and D-14-213/DP-14-213 are interchangeable except for the keyway.

For door locks with the lock cylinder installed in a paddle type handle, using 62FT key blank, use plug D-14-219.

Lancia

The information in the Ferrari section also applies to most Lancia cars.

Lamborghini

The information in the Ferrari section also applies to Lamborghini.

Lotus

Several different types of locks have been used on Lotus cars, depending upon who owned the company that manufactured the Lotus cars at the time.

Lotus *(continued)*

MANY MODELS USE BRITISH LOCKS:

For ignition locks with non-locking steering column using 62FS key blank, try C-14-301 plug (or C-14-302 plug with turn knob).

For ignition locks with non-locking steering column using 62FT key blank, try B-14-210 plug.

For ignition locks with locking steering column using F81E / FT6R key blank, try C-14-215 ignition lock cylinder.

For door locks with the lock cylinder separate from the door handle, use the following:

D-14-211 single lock – DP-14-211 pair – using 62FS key blank (discontinued when out).

D-14-213 single lock - DP-14-213 pair – using 62FT key blank.

Note D-14-211/DP-14-211 and D-14-213/DP-14-213 are interchangeable except for the keyway.

For door locks with the lock cylinder installed in a paddle type handle, using 62FT key blank, use plug D-14-219.

For other door and luggage locks using key blanks such as 62FS and 62FT, try various British plugs including B-14-202, B-14-203, B-14-205, B-14-206, or B-14-209.

SOME 1980'S MODELS USED TOYOTA LOCKS:

Lotus cars that used Toyota locks used T80R / T61C key blank, try the following lock cylinders:

Ignition lock cylinder - C-30-114

Door lock right side - D-30-116

Door lock left side - D-30-117

Lotus *continued on the following page*

EXOTIC BRANDS

Lotus *(continued)*

SOME MODELS USE GM EUROPE / OPEL LOCKS:

Ignition lock cylinders as follows:

Locks using B61 key blank - C-23-109

Locks using YS31/YM28 key blank (reverse of B61)
– C-23-118

Locks using S30YSP or S51HFP key blank (2-track key)
– C-23-202

Door locks as follows:

Locks using S30YSP or S51HFP key blank (2-track key)
– right side lock D-23-202

Locks using S30YSP or S51HFP key blank (2-track key)
– left side lock D-23-204

If the lock you need does not match one of the descriptions above, we probably do not have it.

Maserati

The information in the Ferrari section also applies to Lamborghini.

Pantera - see DeTomaso

Panther

For ignition locks using X86 / FC7 key blank – use ignition lock cylinder C-18-103.

For door locks with the lock cylinder separate from the door handle, use the following:

D-14-211 single lock – DP-14-211 pair – using 62FS key blank (discontinued when out).

D-14-213 single lock - DP-14-213 pair – using 62FT key blank.

Note D-14-211/DP-14-211 and D-14-213/DP-14-213 are interchangeable except for the keyway.

For other door and luggage locks using key blanks such as 62FS and 62FT, try various British plugs including B-14-202, B-14-203, B-14-205, B-14-205, B-14-206, or B-14-209.

TVR

FOR CARS USING BRITISH LOCKS:

For ignition locks with non-locking steering column using 62FS key blank, try C-14-301 plug (or C-14-302 plug with turn knob)

For ignition locks with non-locking steering column using 62FT key blank, try B-14-210 plug.

For some ignition locks with locking steering column, try C-00-101 (some modification may be necessary)

For door locks with the lock cylinder separate from the door handle, use the following:

D-14-211 single lock – DP-14-211 pair – using 62FS key blank (discontinued when out).

D-14-213 single lock - DP-14-213 pair – using 62FT key blank.

Note D-14-211/DP-14-211 and D-14-213/DP-14-213 are interchangeable except for the keyway.

For door and luggage locks using key blanks such as 62FS and 62FT, try various British plugs including B-14-202, B-14-203, B-14-205, B-14-205, B-14-206, or B-14-209.

FOR CARS USING EUROPEAN FORD LOCKS (key blank X86 / FC7)

Use ignition lock cylinder C-18-103.

Use door lock plug D-18-105 (discontinued when out).

Autocar - see White**Brockway****For lock using 1098M / B1 or similar keyway:**

use tumbler series P-43-101/105

Other series may be used, further information not currently available

Eagle - see International**Ford**

Most models of Ford heavy truck are listed in the main body of the catalog. As there are variations found in heavy truck models and usage, the following information will be helpful. If you are not sure of the exact model of the truck, or for specific models not listed elsewhere, you can usually identify the lock needed by description and keyway, as follows:

IGNITION LOCKS

5 pin tumbler single sided keys (1127DP / H27)
small face - use C-42-400
large chrome face - use C-42-401

5 pin tumbler double sided keys (1167FD / H51)
non-locking steering column - use C-42-402
locking steering column, no key warning buzzer - use C-42-408
locking steering column, with key warning buzzer - use C-42-406

10-cut locks with locking steering column
chrome small ears - C-42-110 (coded lock) or C-42-117 (uncoded lock)
black small ears - C-42-120 (coded lock) or C-42-127 (uncoded lock)

8-cut locks - LC6177 (coded lock) or LC6177U (uncoded lock)

DOOR LOCKS

5 pin tumbler single sided keys (1127DP / H27)
"tear drop" design door locks with flap over keyway:
right side door lock - D-42-170
left side door lock - D-42-171
door lock pair - DP-42-170
(pawls not included and not available, you must reuse the original pawl)

5 pin tumbler single sided keys (1127DP / H27)
round door lock - D-42-202

(Ford continued)**DOOR LOCKS**

5 pin tumbler double sided primary keys (1167FD / H51)
round chrome door lock - uncoded cylinder - D-42-201
round chrome door lock - keyed alike pair - DL1550 (DP-42-101)
round door lock black face cap with chrome dust cover - keyed alike pair - DP-42-172

5 pin tumbler double sided secondary keys (S1167FD / H50)
round chrome door lock - uncoded cylinder - D-42-231
round chrome door lock - keyed alike pair - DL1590 (DP-42-102)
round black door lock - uncoded cylinder - D-42-232
round black door lock - keyed alike pair - DP-42-148
round door lock black face cap with chrome dust cover - uncoded cylinder D-42-242
round door lock black face cap with chrome dust cover - keyed alike pair DP-42-104

10-cut locks

round chrome door lock - uncoded service pack - D-42-221
round chrome door lock - keyed alike pair - DP-42-122
round black door lock - uncoded cylinder - D-42-222
round door lock black face cap with chrome dust cover - uncoded cylinder D-42-208
round door lock black face cap with chrome dust cover - keyed alike pair DP-42-106

8-cut locks (round door lock separate from the door handle)

chrome door lock - uncoded service pack - DL5886U (D-42-251)
chrome door lock - keyed alike pair - DL5886 (DP-42-180)
door lock black cap with chrome dust cover - uncoded service pack - DL5887U (D-42-252)
door lock black face cap with chrome dust cover - keyed alike pair DL5887 (DP-42-182)

8-cut locks (door lock installed in the door handle)

uncoded service pack - DL5885U
door lock pair - DL5885

For all Ford locks use the tumbler series and other service parts according to the keyway of the lock being serviced.

HEAVY TRUCKS

Freightliner

For locks using 1098M / B1, 1098DB / B5, or similar keyways:

use tumbler series P-43-101/105

For locks using 1970AM / RA4 keyway:

use tumbler series P-43-101/115

For locks using double bitted keys (1629P), use the following locks:

C-56-101 - ignition lock plug

DP-56-101 - door lock pair
(Columbia and Coronado models, Century Class)

DP-56-102 - door lock pair (M2 model)

Hino

For locks using T80R / T61C keyway:

Door lock 28.5mm / 1.12 inch diameter – T80R / T61C keyway
single door lock - D-30-101
keyed alike pair - DP-30-101
use face cap P-30-201

use tumbler series P-30-141/144

Door lock 30mm / 1.18 inch diameter - T80R / T61C keyway
single door lock (lock service package) -
D-30-106 / D-30-206
keyed alike pair - DP-30-106
use face cap P-30-211

Ignition locks are available from Hino dealers only

Use tumbler series P-30-141/144 for ignition and door locks.

For locks using X174 / TR40 keyway:

Door lock 30mm / 1.18 inch diameter - X174 / TR40 keyway
single door lock - D-37-102
use face cap P-30-211

Ignition locks are available from Hino dealers only

Use tumbler series P-30-161/164 for ignition and door locks

International (Navistar)

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

For locks using RA4 / 1970AM keyway:

ignition lock plug - C-43-101 (fits all models using RA4 / 1970AM keyway)
door lock service package - D-43-203 (36.5mm / 1.44 inch diameter face)
door lock pair - DP-43-103 (36.5mm / 1.44 inch diameter face)
(other design door locks using this keyway are not currently available from ASP)
use tumbler series P-43-101/115

For locks using double bitted keys (P1794 / Y157 type):

use tumbler series P-44-101/104

Other series may be used, further information not currently available

Iveco

Ignition locks - replacement locks are available only from Iveco truck dealers or parts distributors

Door locks using F79-1 / F79-3 (FT37 / FT38) keyway
– use tumbler series P-17-121/123

Replacement locks are available only from Iveco truck dealers or parts distributors

Kenworth

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

complete door lock - D-57-101

For locks using double bitted keys (K1994):

use tumbler series P-44-101/104

For Mid-Ranger models, use the following locks and parts:
Ignition lock - C-31-107

Door lock pair - DP-31-116 (complete door handles with lock cylinder, available as a keyed alike pair only)

Other series may be used, further information not currently available

Mack

For locks using 1098M / B1 keyway:

use tumbler series P-43-101/105

For locks using X147 / RN30 keyway:

Trucks using this keyway are based on French Renault trucks. Full information about these locks is not available at time of printing, check www.carlocks.com for update on these locks to be available soon.

For Mack Midliner model, replacement locks and parts are available from Mack truck dealers only. Other series may be used, further information not currently available

Mercedes-Benz

See the illustrations below for locks available from ASP:

Ignition lock cylinder assembly - C-21-101

Door locks:

D-21-002

D-21-101

Navistar - see International

Oshkosh

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

For locks using RA4 / 1970AM keyway:

use tumbler series P-43-101/115

Other series may be used, further information not currently available

HEAVY TRUCKS

Peterbilt

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

For locks using double bitted keys (K1994)

use tumbler series P-44-101/104

For Mid-Ranger models, use the following locks and parts:

Ignition lock - C-31-107

Door lock pair - DP-31-116 (complete door handles with lock cylinder, available as a keyed alike pair only)

Other series may be used, further information not currently available

Sterling - see Ford

Volvo

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

For locks using RA4 / 1970AM keyway:

use tumbler series P-43-101/115

For locks using VL6 / VL8 keyway:

use tumbler series P-32-101/104

Door locks use face cap P-32-201, dust cover P-32-231

For locks using 2-track keys (S59HFP):

use tumbler series P-32-171/174

Other series are used, further information not currently available

Western Star / White / Autocar

For locks using 1098DB / B5 keyway:

use tumbler series P-43-101/105

For locks using RA4 / 1970AM keyway:

use tumbler series P-43-101/115

Other series may be used, further information not currently available.

P-49-203 RP6916	Saturn door locks 1991-96	

KEY BLANKS BY ASP

The key blanks listed in this section are unique to ASP and are not offered by most traditional key blank manufacturers.

Cadillac Catera

KB-23-101 - fits all models 1997-01 (same as Ilco HU46T2 except with different transponder)

IMPORTANT: Some Catera key blanks on the market will work only on 1997-99 models. This key works on ALL models 1997-01 models. This key cannot be cloned. It must be programmed using T-Code, MVP, CodeSeeker, or other similar programming machines with GM Europe programming capability.

Chevrolet Aveo

KB-50-118 - normal head (non-remote) transponder key blank

RK-50-101 - 2-button remote control head key for cars without transponder system

RK-50-102 - 2-button remote control head key for cars with transponder system

IMPORTANT NOTES:

a. The transponder keys cannot be cloned. They must be programmed using T-Code, MVP, CodeSeeker, or toher similar programming machines with Daewoo programming capability.

b. For the remote control keys, you must use the RK-50-101 for cars without transponder system. Logically you would think that it would be possible to substitute the RK-50-102 transponder key for the RK-50-101 non-transponder key, but because of other differences that will not work.

Lexus

All Lexus part numbers listed below have the TOY48 key profile with 4D transponder and 3-button remote control head.

RK-30-101 - for SC430 2002-08

RK-30-102 - for ES330 2004-06

RK-30-103 - for RX330 / RX350 2004-08
(without power tailgate)

RK-30-104 - for RX330 / RX350 2004-08
(with power tailgate)

RK-30-105 - for LS430 2001-06
(except cars with Smart Access)

RK-30-106 - for IS200 / IS300 sedan 2002-05

RK-30-107 - for IS200 / IS300 station wagon 2002-05

RK-30-109 - for GX470 2003-06 and LX470 2003-06

Scion

RK-30-111 - 3-button remote control head key for Scion TC (TR47 / X217 / TOY43 key profile)

Toyota

All Toyota part numbers listed below have the TR47 / X217 / TOY43 key profile

RK-30-108 - 3-button remote control head key for Land Cruiser 2003-06

RK-30-110 - 3-button remote control key for RAV4 2007-08 with transponder (this key will also work on cars without transponder)

RK-30-112 - 3-button remote control key for Land Cruiser 2007 and FJ Cruiser 2008

RK-30-113 - 4-button remote control key for Camry 2007-08 (all models)

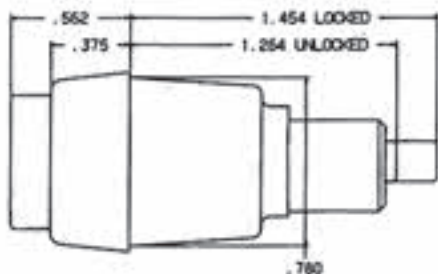

RK-30-114 - proximity remote with emergency key blade for Prius 2004-08 (WITHOUT Smart Entry only)

MISCELLANEOUS LOCKS

HURD Display Case Lock

Designed for use in sliding door display cases.

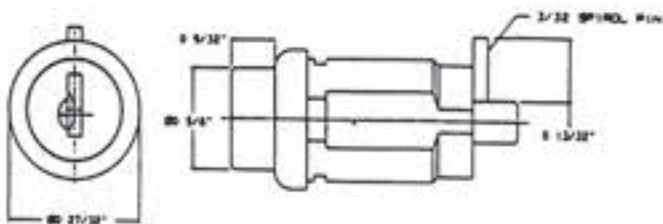

Order no. H-2300

Pushlock

Designed for use as an independent catch and primarily used for hinged lid applications, it can also be used for many other applications. Supplied in keyed alike pairs.

Order no. H-2200

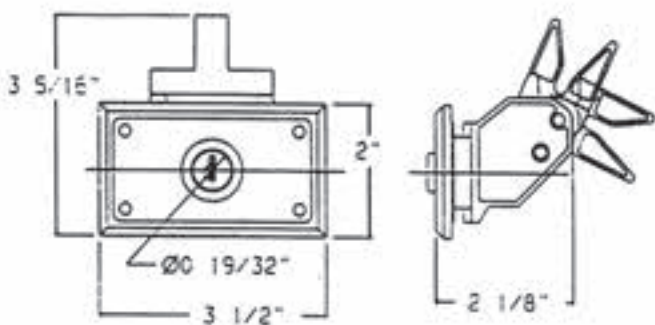

Self-Adjusting Latch Lock

Designed for use with hinged lid applications and features a catch that accommodates variations within the lid. Supplied in keyed alike pairs.

Patent #4,635,454.

This lock has been used on molded tool boxes made by Delta, Truck-Mate, Contico, and others.

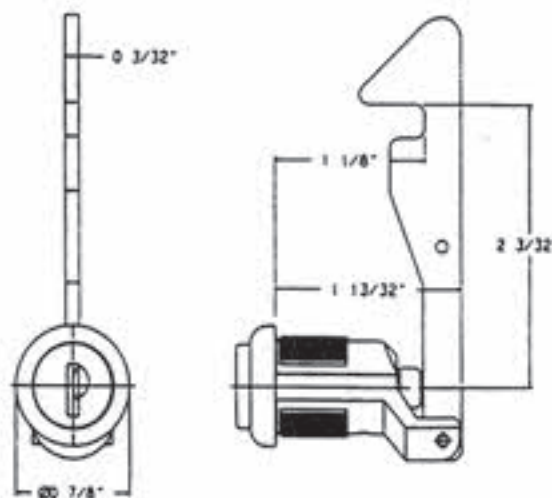

Order no. H-0200

Preslock

Designed for use on hinged-lid or sliding door applications. The push-button design permits security in the locked position and access in the unlocked position. Supplied in keyed alike pairs. Patent # 3964280.

Order no. H-1500

Recreational Vehicle / Motor Home Door Lock

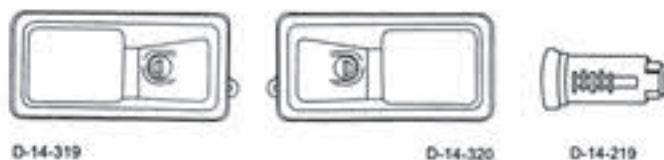

Paddle handle with lock cylinder used on many Class A motor homes, including some models of Pace Arrow, Allegro Bay, Allegro Bus, Raven, and others. These locks use F68YT / 62FT key blanks. (Locks made in England).

Order part numbers as follows:

D-14-319 - right side lock and handle

D-14-320 - left side door lock and handle

D-14-219 - plug only

ASP PART NUMBERING SYSTEM

The ASP Part Numbering System

Working with the ASP part numbers is easier if you have a basic understanding of the part numbering system, explained here:

The first letter or letters of the part number identify what type of product the part number is:

A	Keying kits and parts assortments
B	Luggage compartment locks
C	Ignition locks
D	Door locks (including complete locks that include the door handle)
DH	Door handles (except complete locks that include the door handle)
DP	Door locks (keyed alike pair)
E	Engine compartment locks
F	Fasteners (including lock retaining clips, shear-head bolts, door panel fasteners, etc.)
G	Glove compartment and stowage locks
KB	Key blanks
P	Lock service parts (including tumblers, face caps, and other parts)
RK	Remote head key blanks
S	Lock sets
T	Fuel tank locks
W	Ignition switches (wiring assembly only without lock cylinder)

The second two digits of the part number tell you the PRIMARY brand of vehicle that the item is used on:

00	Various cars
11	Alfa Romeo
12	Audi
13	BMW
14	British Cars (Austin, Jaguar, Land Rover, MG, Range Rover, Triumph)
15	British Chrysler (Plymouth Cricket, Sunbeam, Hillman)
16	Nissan / Datsun / Infiniti
17	Fiat
18	European Ford (Capri, Fiesta, Merkur)
19	Honda / Acura
20	Mazda
21	Mercedes-Benz
22	Mitsubishi
23	GM Europe (Cadillac Catera, Pontiac Lemans, Opel)

24	Isuzu (including General Motors brands)
25	Peugeot
26	Porsche
27	Renault
28	Saab
29	Subaru
30	Toyota / Lexus / Scion / Hino truck
31	Volkswagen
32	Volvo
33	Suzuki
34	Lada
35	Lancia
36	Hyundai
37	Daihatsu
38	Citroen
39	Yugo
40	Kia
41	General Motors USA (Buick, Cadillac, Chevrolet, GMC, Oldsmobile, Pontiac)
42	Ford / Lincoln / Mercury (USA)
43	American Motors (including some Heavy Trucks and Jeep)
44	Chrysler / Dodge / Jeep / Plymouth
45	Skoda
49	Saturn
50	Daewoo (including Chevrolet Aveo, Saturn Vue, other General Motors brands)
55	Renault truck (including some Mack trucks)
56	Freightliner truck
57	Kenworth truck
93	Harley Davidson Motorcycle
94	Honda Motorcycle
98	Yamaha Motorcycle

For example, if you have part number C-30-107, by understanding the part numbering system you will know that the part is an ignition lock (first letter C), which fits a Toyota (second two digits 30).

There are exceptions to this system created by the same part being used on more than one brand of car. Also some parts are used in more than one place on the car – for example, B-14-210 is numbered as a luggage compartment lock, but also is used as an ignition lock or door lock on some cars.

ASP PART NUMBERING SYSTEM

The same part being used on more than one brand of car is explained by lock families, as follows:

Audi - also found on some Porsche and Volkswagen

Ford USA – also found on some Mazda and Nissan

Honda / Acura - also found on some Isuzu

Mazda – also found on some Chrysler imports, Ford imports, General Motors imports, GEO, Mitsubishi, Suzuki

Nissan - also found on some Subaru and Isuzu truck

Toyota – also found on some Chrysler imports, Daihatsu, General Motors imports, GEO, Hyundai, Isuzu, Kia, Mazda, Mitsubishi, Suzuki.

Volkswagen - also found on some Audi and Porsche (tumblers also used on BMW)

You will also find some parts that are used among the brands of the following groups of cars:

British cars - Aston Martin, Austin, English Ford, Jaguar, Jensen, Land Rover, MG, Morgan, Range Rover, Rover car, Sterling car, Triumph, TVR, Volvo.

French cars - Peugeot, Renault, Citroen

German cars - Audi, BMW, Daewoo, General Motors (Cadillac Catera, Chevrolet Aveo, Pontiac Lemans, others), Mini, Porsche, Mercedes-Benz, Volkswagen

Italian cars - Alfa Romeo, Bertone, Ferrari, Fiat, Iveco, Lada, Lamborghini, Lancia, Maserati, Pininfarina, Yugo

Lockcraft Part Numbers

The first two letters of the part number identify what type of product the part number is:

DL	Door lock
LC	Ignition lock
LS	Lock set
RP	Lock service parts (including tumblers, face caps, and other parts)
SK	Keying kits and parts assortments
TL	Luggage compartment locks

Lockcraft part numbers that end in “U” are uncoded locks.

There have been many changes to the Lockcraft part numbers over the past years, explained as follows:

Most old Lockcraft part numbers had no letter prefix. For example, old part number 1426 was changed to LC1426 to identify the type of product.

Some old Lockcraft part numbers had a letter prefix “A”, which was changed to “RP”. For example, part number A6001 was changed to RP6001. This could be confusing if you have an old Lockcraft or All Lock keying kit or parts assortment which identified the parts inside by the letter prefix “A”. When reordering simply change the “A” to “RP”.

Some old Lockcraft part numbers had a digit “3” at the end of the part number, which designated poly bag packaging. For example, part number LC14263 designated the LC1426 ignition lock in a poly bag. The currently used part numbers now eliminate the “3” at the end and using the example LC14263 is now simply LC1426.

Some old Lockcraft part numbers had a digit “8” at the end of the part number, which designated that it was an uncoded lock. For example, part number LC14268 designated the LC1426 ignition lock in uncoded form. The currently used part numbers now use “U” at the end of the part number instead of the “8”. Using the example LC14268 is now LC1426U.

PART NUMBER LISTING and POPULARITY RATINGS

Part Number Listings and Popularity Ratings

Pages 214-233 contain a complete listing of ASP part numbers, with the 2008 popularity rating for each part number. The popularity ratings are explained as follows:

A = Most popular items (lock cylinders and replacement parts)

B = Second most popular group of lock cylinders

Y = Replacement parts (keying kit refill tumblers, face caps, etc.), popularity equivalent to B-rated lock cylinders

C = Third most popular group of lock cylinders

Z = Replacement parts (keying kit refill tumblers, face caps, etc.), popularity equivalent to C-rated lock cylinders

H = Items not recommended for stock by distributors, these parts are normal stock items for the ASP warehouse and available for drop shipments (HI-SPEED delivery). Orders must be placed through your distributor, and are subject to stock on hand at ASP. Some distributors may have selected H-rated items in stock.

S = Special order items only, may not be in stock at ASP. These items may be subject to minimum order quantities if needed. Some distributors may have selected S-rated items in stock.

DWO = Discontinued when out. Some items may still have limited stock at ASP or at some distributors, but will not be restocked when existing supplies are sold out.

ASP products are sold through the network of locksmith supply distributors located throughout the USA and Canada.

With over 4,000 different part numbers in our range, it is impossible and impractical for distributors to keep every part number in stock. Thus we have assigned each of our part numbers a popularity rating to assist distributors in keeping stock. We have implemented new distributor stocking programs based on these popularity ratings. Please check www.carlocks.com for the most current information about our distributor stocking guidelines. ASP is working closely with our distributors to provide you the fastest delivery possible at the lowest possible cost.

Distributors who make a commitment to keep stock according to our recommendations are listed on www.carlocks.com. This list is subject to change at any time. Distributors who do not keep the stocking commitment will be removed from the list.

Explanation of other notes on the part number listing

a. Some items have (now use ...) to the right of the part number, with a rating of DWO.

For example: A-13-105 (now use A-31-110) – this means that A-13-105 has been superseded by A-31-110.

b. Some items have (substitute ...) to the right of the part number, with a rating of DWO.

For example: B-19-154 (substitute B-19-155) - this means that you can substitute B-19-155 for B-19-154, but there is some difference between the two parts. A complete listing of these part numbers with a brief explanation of the difference between each superseded part and the replacement part is provided on pages 234-237.

c. Some items have (see ...) to the right of the part number, with no popularity rating.

For example: B-16-105 (see B-16-205), with no popularity rating. Then go to B-16-205 and you will see it listed as B-16-205 (B-16-105) with the popularity rating of B. This is a result of our consolidating some similar interchangeable part numbers. In this example, whether you order B-16-105 or B-16-205, you will get the same part at the same price. A complete listing of these part numbers is provided on pages 238-239.

LIST OF SUBSTITUTIONS FOR DISCONTINUED PART NUMBERS

The part numbers on this list are discontinued items where an alternate item may be substituted. For these items the alternate item will be slightly different than the discontinued item. This list contains the discontinued part number, the part number to substitute for each one, and a brief explanation of the difference between the two.

B-16-132 (substitute B-16-131)	Must reuse the original pawl.
B-19-155 (substitute B-19-154)	B-19-154 uses a different keyway
B-19-164 (substitute B-19-364)	B-19-164 is an uncoded plug only
B-29-105 (substitute D-16-206)	Must reuse the original pawl.
B-30-149 (substitute B-30-150)	must reuse the original pawl and return spring
B-33-112 (substitute D-22-310)	D-22-310 is an uncoded plug only
B-42-124 (substitute B-42-147)	must reuse the original shaft
B-42-125 (substitute B-42-147)	must reuse the original shaft
C-14-101 (substitute C-14-201)	C-14-201 is uncoded plug only
C-14-222 (substitute C-14-238)	must reuse the original wiring and solenoids
C-14-223 (substitute C-14-238)	must reuse the original wiring and solenoids
C-16-116 (substitute C-16-110)	C-16-110 uses a different keyway
C-16-212 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-213 (substitute C-16-402)	must reuse the original wiring and solenoids
C-16-226 (substitute C-16-403)	must reuse the original wiring and solenoids
C-16-227 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-230 (substitute C-16-403)	must reuse the original wiring and solenoids
C-16-231 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-232 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-233 (substitute C-16-403)	must reuse the original wiring and solenoids
C-16-234 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-235 (substitute C-16-401)	must reuse the original wiring and solenoids
C-16-236 (substitute C-16-402)	must reuse the original wiring and solenoids
C-16-237 (substitute C-16-405)	must reuse the original wiring and solenoids
C-16-238 (substitute C-16-406)	must reuse the original wiring and solenoids
C-16-239 (substitute C-16-404)	must reuse the original wiring and solenoids
C-16-240 (substitute C-16-407)	must reuse the original wiring and solenoids
C-16-241 (substitute C-16-408)	must reuse the original wiring and solenoids
C-16-243 (substitute C-16-402)	must reuse the original wiring and solenoids
C-16-244 (substitute C-16-409)	must reuse the original wiring and solenoids
C-16-245 (substitute C-16-410)	must reuse the original wiring and solenoids
C-16-247 (substitute C-16-405)	must reuse the original wiring and solenoids
C-16-248 (substitute C-16-406)	must reuse the original wiring and solenoids
C-16-249 (substitute C-16-405)	must reuse the original wiring and solenoids
C-16-250 (substitute C-16-406)	must reuse the original wiring and solenoids
C-16-251 (substitute C-16-411)	must reuse the original wiring and solenoids
C-16-252 (substitute C-16-412)	must reuse the original wiring and solenoids
C-20-121 (substitute C-42-120)	C-42-120 uses a different keyway
C-21-126 (substitute C-21-123)	C-21-123 uses a different keyway

Check www.carlocks.com for the most up to date information

LIST OF SUBSTITUTIONS FOR DISCONTINUED PART NUMBERS

C-22-101 (substitute C-22-301)	C-22-301 is a plug only
C-22-111 (substitute C-22-110)	remove the spring loaded lever on the side of C-22-110
C-24-104 (substitute C-22-301)	C-22-301 is a plug only
C-25-208 (substitute C-25-008)	must reuse the original wiring
C-27-209 (substitute C-27-222)	must reuse the original wiring and locking bolt
C-27-210 (substitute C-27-223)	must reuse the original wiring and locking bolt
C-27-211 (substitute C-27-223)	must reuse the original wiring and locking bolt
C-27-221 (substitute C-27-223)	must reuse the original wiring and locking bolt
C-27-229 (substitute C-27-222)	must reuse the original wiring and locking bolt
C-30-112 (substitute C-30-313)	C-30-313 is a plug only
C-30-144 (sub. C-30-068 or C-30-139)	C-30-068 does not have guarded face cap, C-30-139 uses different keyway
C-30-145 (substitute C-30-174)	C-30-174 uses a different keyway
C-30-155 (substitute C-30-315)	C-30-315 is a plug only
C-30-169 (substitute C-30-168)	C-30-168 has non-transponder keys, otherwise C-30-168 and C-30-169 are the same
C-40-107 (substitute C-40-106)	remove the spring loaded lever on the side of the C-40-106
C-42-161 (substitute C-42-167)	C-42-167 is an uncoded service pack
C-42-162 (substitute C-42-167)	C-42-167 is an uncoded service pack
C-42-163 (substitute C-42-167)	C-42-167 is an uncoded service pack
C-42-164 (substitue C-42-167)	C-42-167 is an uncoded service pack
C-42-165 (substitute C-42-167)	C-42-167 is an uncoded service pack
D-12-241 (substitute D-31-126)	must reuse the original shaft
D-12-242 (substitute D-31-127)	must reuse the original shaft
D-13-227 (substitute D-13-327)	D-13-327 is a lock service package
D-13-228 (substitute D-13-327)	D-13-327 is a lock service package
D-13-229 (substitute D-13-329)	D-13-329 is a lock service package
D-13-230 (substitute D-13-329)	D-13-329 is a lock service package
D-13-231 (substitute D-13-331)	D-13-331 is a lock service package
D-13-232 (substitute D-13-331)	D-13-331 is a lock service package
D-13-233 (substitue D-13-333)	D-13-333 is a lock service package
D-13-234 (substitute D-13-333)	D-13-333 is a lock service package
D-13-235 (substitute D-13-335)	D-13-335 is a lock service package
D-13-236 (substitute D-13-335)	D-13-335 is a lock service package
D-14-211 (substitute D-14-213)	D-14-213 uses a different keyway
D-16-101 (sub D-16-201 or D-16-202)	D-16-201 and D-16-202 are uncoded service packages
D-16-123 (substitute D-16-223)	D-16-223 is without pawl
D-16-124 (substitute D-16-223)	D-16-223 is without pawl
D-18-113 (substitute D-18-213)	D-18-213 is a lock service pack
D-18-114 (substitute D-18-214)	D-18-214 is a lock service pack
D-19-103 (substitute D-19-102)	Must reuse the original pawl
D-19-106 (substitute D-19-303)	D-19-303 is a plug only

LIST OF SUBSTITUTIONS FOR DISCONTINUED PART NUMBERS

D-19-107 (substitute D-19-305)	D-19-305 is a plug only
D-20-103 (substitute D-20-101)	lighted keyhole will no longer function
D-20-109 (substitute D-20-101)	must replace the face cap to match original
D-20-117 (substitute D-20-151)	D-20-151 is without pawl
D-20-119 (substitute D-20-151)	D-20-151 is without pawl
D-20-125 (substitute D-20-158)	D-20-158 is without pawl
D-20-126 (substitute D-20-110)	central locking will no longer operate
D-20-130 (substitute D-20-158)	D-20-158 is without pawl
D-20-131 (substitute D-20-158)	D-20-158 is without pawl
D-20-132 (substitute D-20-159)	D-20-159 is without pawl
D-20-133 (substitute D-20-159)	D-20-159 is without pawl
D-20-137 (substitute D-20-129)	use D-20-129 + P-20-503 or P-20-504 alarm switch
D-20-144 (substitute D-20-159)	D-20-159 is without pawl
D-22-104 (substitute D-22-103)	Must reuse the original pawl
D-22-130 (substitute D-22-230)	D-22-230 is without pawl
D-22-131 (substitute D-22-230)	D-22-230 is without pawl
D-24-108 (substitute DP-16-106)	DP-16-106 uses different keyway
D-24-113 (substitute D-24-213)	D-24-213 is without pawl
D-24-114 (substitute D-24-213)	D-24-213 is without pawl
D-24-117 (substitute D-24-118)	Must reuse the original pawl
D-24-121 (substitute D-24-201)	factory alarm will no longer operate
D-29-110 (substitute D-16-223)	D-16-223 is without pawl
D-30-125 (substitute D-30-114)	D-30-114 uses a different keyway
D-30-126 (substitute D-30-115)	D-30-115 uses a different keyway
D-30-160 (substitute D-30-339)	D-30-339 is a plug only
D-30-161 (substitute D-30-339)	D-30-339 is a plug only
D-31-119 (substitute D-31-126)	Must reuse the original lock housing and shaft
D-31-120 (substitute D-31-126)	Must reuse the original lock housing and shaft
D-32-111 (substitute D-32-244)	Must reuse the original pawl
D-32-112 (substitute D-32-244)	Must reuse the original pawl
D-33-103 (substitute D-33-203)	D-33-203 is without pawl
D-33-105 (substitute D-33-205)	D-33-205 is without pawl
D-33-106 (substitute D-33-205)	D-33-205 is without pawl
D-33-107 (substitute D-33-207)	D-33-207 is without pawl
D-33-108 (substitute D-33-207)	D-33-207 is without pawl
D-42-247 (substitute D-42-249)	Must cut the end of the shaft to same length as original
D-42-248 (substitute D-42-250)	Must cut the end of the shaft to same length as original
DP-14-211 (sub. DP-14-211)	DP-14-211 uses different keyway
G-42-202 (substitute G-42-203)	G-42-203 is a dummy turn knob to operate the latch only, does not lock

Other Superseded Parts

Ford 10-cut locks:

Now that Hurd and Lockcraft products are being manufactured at the same factory, there became some duplicate items between the two product ranges, especially for Ford applications. Many of the parts are equivalent with regard to design and quality and can be interchanged without hesitation. One group of parts which we believed should not be considered equivalent are the Ford 10-cut ignition locks.

Hurd 10-cut ignition locks are original equipment parts that are still supplied to Ford Motor Company. The Lockcraft versions of these locks are not Ford original parts. We now offer only the original equipment versions of these locks to the locksmith market.

As a result of the consolidation between Hurd and Lockcraft, there may be component consolidation where some minor Lockcraft component parts may now be used in Hurd original equipment locks. All such component substitutions have been approved by Ford Motor Co. All locks supplied through the ASP distribution system under the ASP part numbers are the same locks as being supplied as original equipment to Ford, and are supplied to the locksmith market under license of Ford Motor Co.

If you look up the Lockcraft part numbers on page 225, you will find the ASP part number for the original Ford version of each corresponding lock.

Toyota Ignition Locks with Unsecured Face Cap Rivets:

For many years we have been able to supply some Toyota ignition locks with the face cap rivets unsecured so that the lock may be more easily rekeyed. Unfortunately some of the locks which were previously supplied unsecured are no longer available to us in that form. We will continue to offer locks with unsecured rivets as long as possible, but for some designs we will be forced to substitute locks with secured rivets in the future. We regret that this substitution will be necessary but this is due to factors beyond our control.

Locks that may be affected by this change are as follows:

C-30-116
C-30-119
C-30-120
C-30-124
C-30-129
C-30-130
C-30-131

Other Discontinued and Superseded Parts:

We have been forced to discontinue or supersede some parts because they are no longer manufactured. But some must be discontinued because of very low sales volume compared to the quantity required to restock. And we have been forced to discontinue some items because of cost increases to us to the point where we can no longer be competitive with the car dealers. As all of these situations are subject to change, we will post changes in availability on our website www.carlocks.com. Note that these changes may be for products that are available now that must be discontinued in the future, and for products that were previously discontinued and are now available again.

EXACT INTERCHANGES

The part numbers on this list are exact interchanges. Most of these are as a result of the consolidation of the ASP/Hurd and the Lockcraft product ranges, where similar items were offered by both companies. For each of these items you can order either part number and you will receive the same part at the same price.

LIST OF SUBSTITUTIONS FOR ACTIVE PART NUMBERS

The part numbers on this list are all active numbers in the ASP range with alternate part numbers that may be substituted. The alternate part numbers may be different color, use different keyways, or have other minor difference that will not affect the functionality.

In some cases getting the car repaired and back on the road quickly is more important to the customer than matching the exact original keyway or trim color. If the exact part number needed for a job is temporarily unavailable, this list will help you find a substitute part that will finish the job.

REFERENCE and EDUCATIONAL MATERIALS

Knowledge is power, without knowledge you are lost. Listed here are some very useful reference and educational materials that will give you access to the knowledge you need to improve your business. Many of the materials listed here are available from ASP distributors, and we are also listing some worthwhile materials that we do not sell. There is no way anyone can know everything about every car. That is why you need to know where to find the information that you need.

The materials listed here cover automotive lock servicing and key cutting. There are also many good reference materials available about car opening which are not listed here. If anyone has or knows of good material that should be included in this listing, we apologize and please send us the details for inclusion in the next edition of this catalog.

Autodata Key Programming and Service Indicators Manual

Provides step-by-step instructions for programming keys and remote controls, including alarm, central locking, and immobilizer systems.

For more information about this book see: www.autodatapubs.com, and click on "Key Programming"

AVAILABLE FROM ASP DISTRIBUTORS - order AUTODATA

Autosmart 2008

One of the most comprehensive manuals listing key blanks, code series, code locations, spaces and depths, tumbler locations, progression charts, and other information to help you generate keys by code. Also includes basic information about making first keys, retainer types, airbag information, transponder information, and other information that helps you when you are at the car. A 2-volume set written and published by Michael Hyde.

AVAILABLE FROM ASP DISTRIBUTORS - order AS2008SET

Autotel

A very useful computer program to make it easier for you to look up the ASP or Strattec part that you need for a job, along with the proper key blanks, code series, labor time estimates, parts price estimates, and other useful information. Autotel also includes an feature where you can create your own job estimates including entering your own labor rates and pricing.

Autotel *(continued)*

AVAILABLE FROM ASP DISTRIBUTORS

order AUTOTEL-CD for the full program

If you already own the Autotel program, get the 2008 update by ordering AUTOTEL-UP-08

Even if you have owned an Autotel program for a few years and never updated it (version 4 X or higher), order the 2008 update and that will bring you completely up to date. (If you have version 3 X or lower you will need a new complete program.)

IMPORTANT: If you purchased a new Autotel program on or after May 1, 2008, and you register your program according to the instructions provided with the program, your 2008 update will be FREE.

For more information about Autotel see www.autotel.info

Nissan Super Code

Not exactly a reference manual, but this CD is necessary if you use transponder key programming equipment. This CD provides you the PIN code from the Body Control Module on most 2003-up Nissan and Infiniti vehicles. This PIN code is necessary in order to program new keys to the car when all of the keys are lost or when programming additional keys using programming equipment such as T-Code, MVP, Code Seeker, TKO, SDD, etc.

AVAILABLE FROM ASP DISTRIBUTORS - order NPC-03

Service Manuals for American Car Locks – by Jerry Levine

These books provide good information for basic understanding of the various designs of locks.

Service Manual for American Car Locks Volume 3
- order no. JLB-1

Servicing Ford 8-cut Locks - order no. JLB-2

Servicing GM 10-cut Locks - article no. JLB-3

THESE BOOKS CAN BE ORDERED THROUGH YOUR ASP DISTRIBUTOR

REFERENCE and EDUCATIONAL MATERIALS

The following items are not sold by ASP, please contact the respective companies listed for more information.

Fast Facts

A useful book containing information about key blanks, code series, code locations, spaces and depths, lock service parts references, and other information to help you with automotive lock servicing.

Contact Sieveking Products Co., P.O. Box 6993, Rockford, IL 61125 or see www.sievekingprodco.com

Instacode

A complete code program with an optional section of vehicle lock information.

For more information see www.whsoftware.com

Sold in the USA by The National Locksmith - see www.thenationallocksmith.com

The National Locksmith

In addition to Instacode, The National Locksmith also offers many more publications about automotive and motorcycle lock servicing. See www.locksmithdownloads.com for information about all that they have to offer.

Here are the titles of some of the most useful publications offered by The National Locksmith. Some of them are available in both print and CD format.

The Car Book
 NLAA Guide to Domestic Auto Servicing (2 volumes)
 NLAA Guide to Foreign Auto Servicing (2 volumes)
 Revised GM Steering Column Course
 Foreign & Domestic Auto Service
 Japanese High Security Auto Servicing
 GM Sidebar Lock Decoder System
 The National Locksmith Guide to Motorcycles (6 volumes)

The Locksmith Ledger

The Locksmith Ledger has been a worthwhile source for information for many years. Check out their website www.locksmithledger.com for more information about everything that they have to offer.

www.keypro.info

Every automotive locksmith should go to www.keypro.info and sign up as a member. Check it out for yourself, and best of all, it is FREE.

Motor Interior Panel Manual

This very useful book will show you step-by-step instructions on how to remove and replace interior door panels in order to access the door lock for service.

Available from Lockmasters Inc., telephone 800-654-0637, or www.lockmasters.com (may be available from other sources)

Pro-Lok Automotive Lock Service Encyclopedia

Pro-Lok no. MALSET is a 5-volume set covering Honda, Mazda, Toyota, and Nissan, including exploded lock views and step-by-step instructions for disassembly of many locks. Available through Pro-Lok distributors, also for more information see www.pro-lok.com. Pro-Lok also offers an excellent selection of car opening manuals, described on their website and available through distributors.

Check www.carlocks.com for the most up to date information
