

MORTISE AND RIM CYLINDER

ED211 Mortise Cylinder Wrench

The Best mortise cylinder wrench and test handle is an essential double-purpose tool. It is used primarily to install or remove Best mortise cylinders without marring the cylinder surface finish. It is also used to align throw pins, and as a testing tool when installing mortise or tubular units. The single end may be used to test the lock operation.

To order specify:

ED211 mortise cylinder wrench.
