Andersen & Truth Hardware featured throughout this catalog. We have an extensive line of hardware available.

ORDERING INFORMATION

Toll Free Express Ordering: Customers may place phone orders by calling 800-678-1919 from 8 a.m. - 5 p.m. eastern time, Monday through Friday.

Ordering Information: Our catalog has been designed to make ordering as easy as possible. It is not possible to list all of the items available through Blaine. If you need items, that do not appear in our catalog, please send a sample to our Research Department at 17319 Blaine Drive, Hagerstown, Md 21740-2394. To help expedite your orders, please use our part numbers, quantities required and include your account number, if possible, on your purchase orders.

Delivery Status: Any delivery dates set forth by Blaine Window are estimates only and are not intended as a guarantee of date of delivery. Our pledge is for quick and efficient processing of your order. However, due to the nature of our business, stock shortages may occur from time to time. Items will remain on back-order until shipped. Blaine Window Hardware will not be liable for any delay in delivery or failure to deliver any or all of the goods in case such delay results from causes beyond our control. Order status may be obtained by calling our office at 800-678-1919.

Damages / Shortages: All material, in transit, is the

property of the buyer and buyer assumes all responsibility for filing claims and damages. **Please inspect all freight for visible damage prior to accepting. Do not accept cartons which show damage or are open. Claims for concealed damage must be made by the buyer, with the carrier, within ten (10) working days.**

Original shipping carton must be retained. Shortages must be reported to us at 800-678-1919 within ten (10) working days.

Returns: All returns / exchanges must be made within 30 days from receipt of material. Authorization numbers are available by calling us at 800-678-1919. All authorization numbers must appear on the outside of the carton and merchandise must be shipped prepaid to our warehouse. Shipping charges will not be credited on returns unless authorized in writing by Customer Service. Any unauthorized returns will be refused. A restocking fee of 25% will be charged for returns when the customer ordered incorrectly. We strongly urge you to send a sample to eliminate doubt when placing orders. Special order or custom made parts are not returnable unless defective.

Visit us at:
www.blainewindow.com

Terms & Conditions

Credit Policy: Terms are net 30 days for open account customers. All other orders must be prepaid or shipped C.O.D. unless otherwise specified. Partial payment in advance may be required with an order. We accept all major credit cards.

C.O.D.: Orders may be shipped on a Cash on Delivery (C.O.D.) basis. Our Accounting Department may require cash, cashiers check, certified check or money order for payment. The current U.P.S. C.O.D. charge is \$12.00 per carton plus actual freight. The refusal of a C.O.D. shipment, for any reason other than apparent damage may cause your account to be coded cash in advance only.

Special Orders: Non stock parts (special orders) may require a minimum order quantity.

Stock Parts : For orders less than \$25.00, there will be a \$5.00 processing fee.

Freight: All shipments will be made by the carrier of our choice, usually U.P.S. or Post Office., unless specified otherwise. We also offer UPS Next Day and Second Day service when requested. The customer is responsible for all shipping charges unless otherwise specified. Common carrier service is also available. An \$8.50 minimum shipping and handling charge is applied to each order. Actual shipping charges will be added when minimum is exceeded.

State Sales Tax: Customers exempt from state sales tax must provide a certificate of exemption with initial order.

Samples: Can be sent to our Research Department or e-mail photos to:

Pole hanger #00143-029

SKYLIGHT OPERATORS

Introducing Truth's next generation of power window systems. Sentry II WLS for windows and light skylights. Based on the powerful and reliable mechanics from our previous motorization system, we've added a new digital electronics package with built in power conversion. The new Sentry II WLS system truly takes over where Truth's Sentry 2000 left off.

The new electronics package provides many new features to enhance a home's comfort and its owner's peace of mind.

- **Retrofits** onto casement and awning windows and light skylights normally operated with a hand crank manufactured by Truth Hardware (see Truth Tips). The motor system drives the same input the handle is attached to.

- **Power conversion** built right into the wall mounted control package which accepts direct connection of 110 VAC power. No more transformers to complicate and add expense to the installation.

- **Power Blind System compatible.** Centralized power window system control is now possible with Sentry II's ability to accept and control most 12 VDC power blind systems. The Sentry II's remote and wall switch can be used to control both window and blind motors for convenient, centralized control.

- **Power Protected Memory** eliminates the need to "reset" or retrain the motor after a power outage. Once the installation is complete the motor never needs further service or adjustments - even after prolonged power outages.

- **RF remote** compatibility built into all motor control packages as a standard feature. Simply order the optional remote to add new and exciting control capability for the homeowner.

Rain Sensor - standard with all

- kits, automatically closes the window or skylight at the first sign of moisture. Corrosion resistant sensor decreases maintenance cleaning requirements and extends service life.

No special preparation is required by the window or

- skylight manufacturer. The kits are suitable for new construction or retrofit applications. Please consult with your electrical contractor for a retrofit evaluation.

- **ETL Listed and CE Approved.** Meets all requirements for Class II installations.

- **Safety** - Automatic motor reversal has been engineered into the system which is intended to reverse the motor should an obstruction stop the window while closing. In addition, a screen interlock is provided which, when properly installed, electrically disconnects the motor when the screen is removed. These features are intended to help prevent personal injury which could result from reaching into the window area during its operation.

Motorized Sash Locks are

- available for use with the WLS system for casement and awning windows.

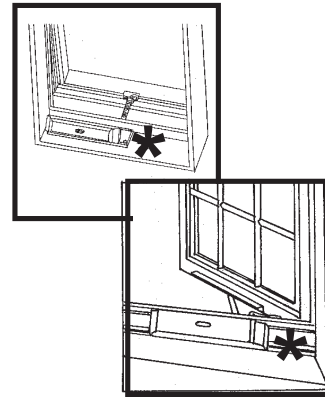

Building Automation Systems

- can easily be tied into the control electronics for virtually limitless ventilation possibilities.

SENTRY II WLS CAPACITY

When used on light skylights, Truth's Sentry II WLS is load rated at 40 lbs at the chain. This equates to a total skylight hatch weight of 80 lbs. Contact your electrical contractor for a retrofit evaluation.

When used on casement window, the Sentry II WLS is designed to work on all window systems meeting the AAMA-101 hardware load requirements (See Truth Tips).

When used on awning windows, the Sentry II WLS is designed to work on awning windows with a properly sized counter-balance hinge (See Truth Tips) and operator (Consult awning operator specifications).

Sentry II power window system is rated at 50 Watts.

CONTROL OPTIONS

The Sentry II WLS kit comes with a standard wall control panel. The same control panel can also accept and control most commercially available 12 VDC mini blinds (not provided by Truth Hardware). The panel also provides feedback to the user via a status light (LED). This small LED shows when the motor is running, or if there are any problems during window or skylights operation.

The optional **RF Hand Held Remote** is available which adds even more flexibility and convenience to a home's windows or skylights.

Important:

Electrical components are generally not returnable. However, a request for return will be evaluated on a case by case basis. Please contact Customer Service to determine whether a return authorization can be provided.

Sentry II WLS Power Window/ Skylight Systems

REMOTE FEATURES INCLUDE:

● **Infinite number** of windows and skylights can be controlled with a single remote.

● **9 Zones** or "unit codes" are available to allow units to be controlled in groups and organized to a user's needs.

● **Motorized Blinds** (supplied by others) can be controlled with the same remote.

● **Control windows and skylights** from one remote - The Sentry II HS (for large / heavy skylights) uses the same remote as the Sentry WLS for coordinated ventilation throughout the entire home or building.

● **Built in Thermostat** allows windows and skylights to open and close together, to co-ordinate a comfortable interior temperature. Takes advantage of true "chimney effect" cooling to reduce energy demands.

● **Rolling Code Technology** proven in garage door openers is built into every remote to provide high security and peace of mind.

WARRANTY:

The Sentry II family of products is warranted for one year against defects in materials and workmanship on all electronic and mechanical components.

Consumer Notice:

The Sentry II WLS power system must be installed by a qualified electrician.

PRODUCT APPLICATION ASSISTANCE:

If you need assistance with product configurations to meet your needs, please visit our website at www.truth.com. Under the "Technical Support" tab you will find all of the technical information needed to properly configure and specify all elements of an automated window installation, including installation instructions, pre-wiring and proper hardware requirements.

ORDERING INFORMATION:

Ordering of the new Sentry II systems is much easier than in the past. All hardware necessary for mounting the system on either a window or skylight is now included in the same kit.

Special Note: Motor covers are ordered separately to help keep your inventory costs down. Sentry II motor kit packaging includes additional space so cover can be added which allows the manufacturer to supply a complete kit to the jobsite.

WHEN APPLYING TO TRUTH OPERATORS - USE THE FOLLOWING:

Order (1) each per window:

43.51.00.005 Sentry II WLS System
12490.XX - Cover (.xx denotes finish

code)

Order (1) Hand Held Remote (optional):

43.53.00.002 - Hand Held RF Remote

If you are applying the Sentry II to a **PELLA** brand window you must order the following items which include special hardware and instructions.

Order (1) each per window:

43.54.00.005 - Sentry II WLS System
Pella
12490.XX - Cover (.xx denotes finish

code).

Order (1) Hand Held Remote (optional):

43.53.00.002 - Hand Held RF Remote

If you are applying the Sentry II to an **ANDERSEN** brand window with a size .350" diameter splined shaft you must order the following items which include special hardware and instructions:

43.51.00.005 - Complete Unit
32013-.365 - Complete Unit
12490.XX - Cover
43.53.00.002 - (Optional) Hand Held HF Remote

If you are applying the Sentry II to an **ANDERSEN** brand window with a size .365 dia. splined shaft you must order the following items which include special hardware and instructions:

43.51.00.005 - Complete Unit
32013-.365
12490.XX - Cover
43.53.00.002 - (Optional) Hand Held HF Remote

Finish Codes: The WLS cover is available in **02** Black, **03** Bronze, **23** Chestnut Bronze, **24** Beige, **32** White and **78** White.

TRUTH TIPS:

1. Truth Hardware does not recommend the use of Sentry II WLS on any casement window system that does not meet AAMA 101 hardware load requirements. All hardware and motor system warranties are void if the window system does not meet these guidelines.

2. Awning windows must be equipped with a properly sized counter balance hinge such as Truth Hardware's 13 series or 34 series 4-bar hinges. If an awning window is specified with butt (or continuous) hinges, a skylight operator and motor system must be used. All hardware and motor system warranties are void if these guidelines are not followed (See Tech Notes).

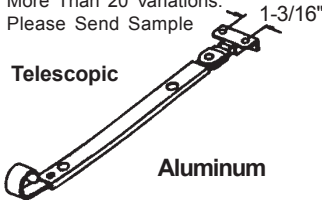

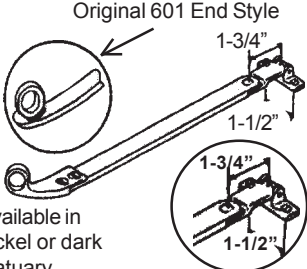

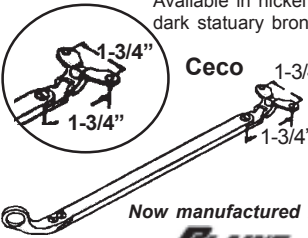

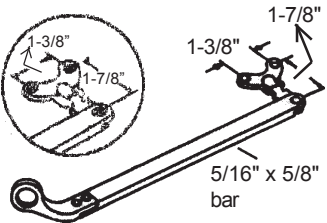

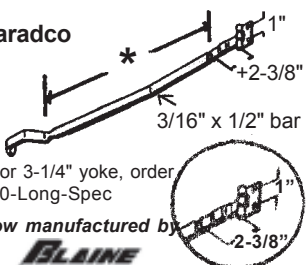

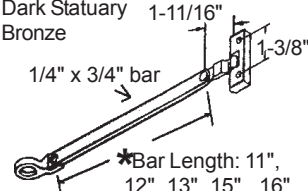

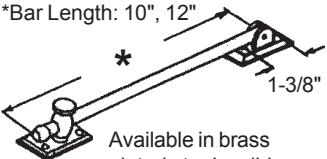

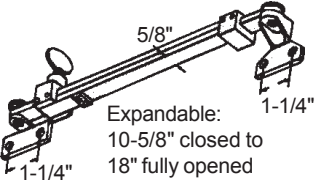

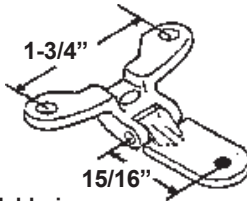

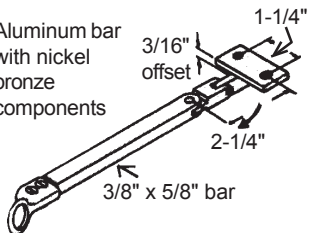

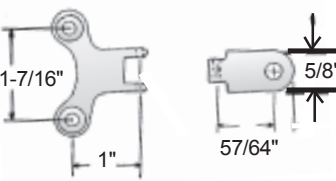

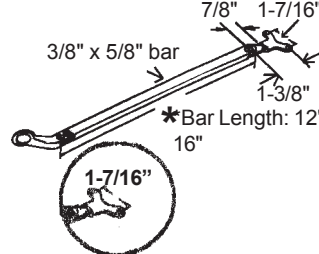

3. Unless otherwise specified, the Sentry II WLS power window system is designed to operate any properly sized rotary hardware and hinge system manufactured by Truth Hardware.

Use of the Sentry II WLS motor system on windows or skylights with manual hardware manufactured by companies other than Truth Hardware is **at your own risk**. For verification, look for the Truth logo / name stamped on the hinge and operator arm or consult with the window manufacturer.

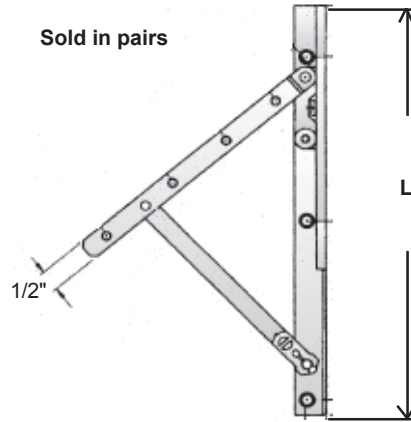

4. The Sentry II WLS system is rated for use in indoor applications only.

INCLUDE TRUTH SPECS IN YOUR NEXT SKYLIGHT PROJECT:

Denotes hinges without stops (maximum opening)

* Denotes hinges with a black acetal shoe.

PART NUMBERING SYSTEM

Product No.	Model	Finish	Assembly
34	24	00	100
4-Bar Hinge	Heavy Duty 10" length	No decorative finish	w/stop std. open (hinge feature)

- When an awning window is "under linged," (i.e., when a hinge is used on a window larger than is recommended), chatter is likely to occur when operated with a Roto Gear Awning Operator (See Truth Tips in Roto Gear Awning Operator section).
- For additional Truth Tips regarding this 4-Bar Hinge please refer to the Truth Tips section of this brochure.
- Unless otherwise specified all hinges have a brass shoe.
- The standard stack height of a Heavy Duty Hinge .625" (15.9 mm). If a shim is used, the stack height will increase by the shim thickness.
- For Heavy Duty Hinges the maximum vent weight for side hung (casement) application is 90 lbs. (41 Kg.) on hinges with a black acetal shoe and 100 lbs. (45.5 Kg.) on hinges with a brass shoe. (See Truth Tip #1).
- Since the vent slides away from the frame when opened, only dyad type operators are compatible with Heavy Duty Hinges.

4-BAR HINGE APPLICATION TABLE FOR PROJECTED & AWNING HINGES (as certified to A.A.M.A. 904.1)

Definitions:

* **Counter-Balanced:** a pair of hinges will balance or hold open the vent/sash with no added friction at the heights and weights listed in the chart.

****Ultimate:** A pair of hinges will not balance or hold open the vent/sash without added friction at the heights and weights listed in the chart.

Special NOTE: A properly counter-balanced sash may be important to obtain other important window operating characteristics such as proper operation of a rotatory awning operator

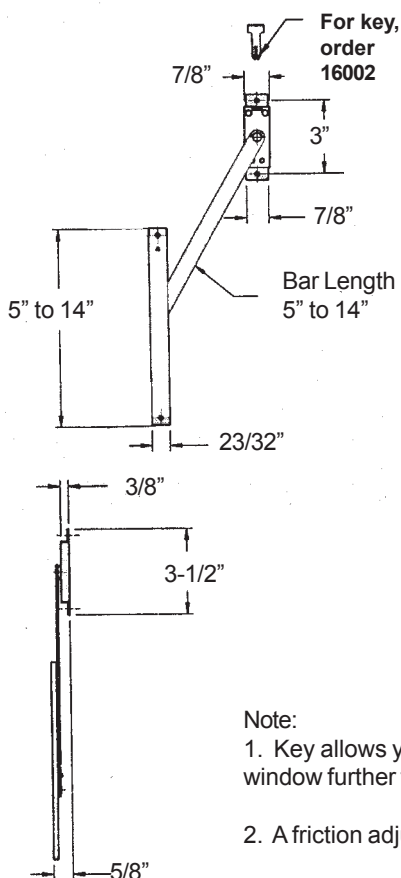

RECOMMENDED SCREWS:

STEEL: NO. 10 PHILLIPS PAN HEAD SCREWS. LENGTH AND THREAD TYPE TO BE DETERMINED BY PROFILE DESIGN. IF SCREW QUANTITIES REQUIRED FOR PROPER MOUNTING SEE TABLE BELOW

STAINLESS STEEL: NO. 10 Phillips Pan Head Stainless Steel Screws. Length and Thread Type to be determined by profile design. (For screw quantities required for proper mounting see table below)

37.33.00.202	12"	12"
37.34.00.201	14"	14"

Note:

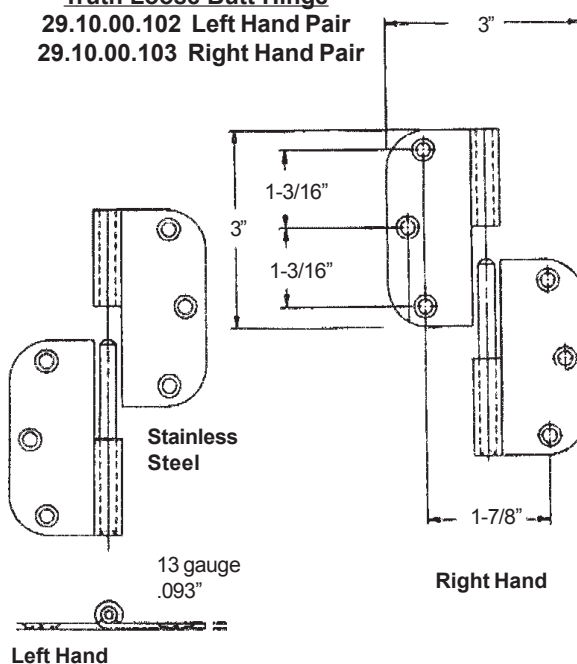

1. Key allows you to detach support arm to open the window further for maintenance.
2. A friction adjustment screw is provided in the shoe.

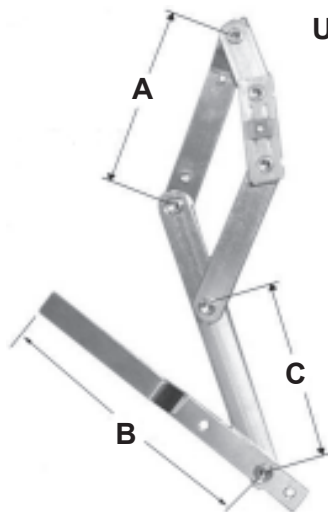

Limit Devices:

When properly installed and operated, the Limit Device will help prevent damage to casement and awning windows under high winds in high-rise applications. Two different methods of disconnecting the Limit Device from the sash for cleaning purposes - either by inserting a key, or by operating the detach clip.

COMMERCIAL DOOR CLOSERS

MADE IN THE U.S.A.

FULL 10 YEAR FACTORY WARRANTY

Blaine Door Closers provide narrow styling and installation versatility. They are ideal for use with aluminum doors and frames, yet they make an attractive installation on wood or metal doors.

FEATURES

Standard

Parallel Arm Bracket
Non-Handed
Aluminum Alloy Shell
Adjustable Closing Speed
Adjustable Latching Speed
Non-Hold Open
Adjustable Power Shoe
Adjustable Back Check

Optional

Adjustable Delayed Action Closing (ADA)
Hold Open Arm

U.L. & U.L.C. Listing

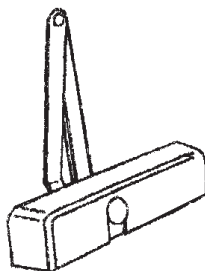

All Blaine door closers, with non-hold open arms or hold open arms, are listed by Underwriters Laboratories under their continuing re-inspection programs.

Blaine Door Closers are non handed and, for standard non-hold open or hold open applications, can be mounted on regular and top jamb installations. An optional mounting bracket is available for parallel installations.

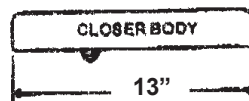

ADA Closer, shown above, available. Please call for details.

JAMB STRETCHER

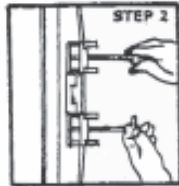

The **JAMB STRETCHER** enables you to spread a vinyl jamb pocket in order to replace balances, shoes or other components without the need to cut into the jamb or melting the vinyl with a hot air gun.

Replace components in a fraction of the time compared to other methods. This is an excellent tool for factory use or field repair!
Designed for use in vinyl jambs only!

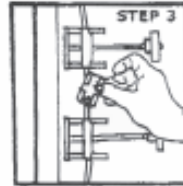

3 Easy Steps

1. Position one spreader below and one spreader above the item needing removal.

2. Turn knobs clockwise by hand or with a hex bit drill gun to spread jamb.

3. Remove / replace components

Part No. WB1449

ULTRA-LIFT®nt

A HYBRID BALANCE SYSTEM FOR HEAVY SASH 50 - 100 LBS

HIGH LIFT ASSISTANCE

MAKES HEAVY SASH EASY TO OPERATE

**For Wood Double Hung Window
With 1-3/8" Sash**

Replace old style tubular balances or rope and pulley. Designed for 1-3/8" sash. One piece jamb strip reduces air infiltration. Baked-on white enamel finish, metal "T" hangers and flocked springs. Use (1) pair to repair (1) double hung window. See chart at right.

TO ORDER:

Measure overall window height of window opening and / or glass height of sash only. Select from chart at right.

Mill Finish Only

**Absolute maximum
sash weight: 26 lbs.**

**Replacement Metal "T"
Hanger, included with
jambliner**

WB-7515	6'10"	38"
WB-7516	7'2"	40"

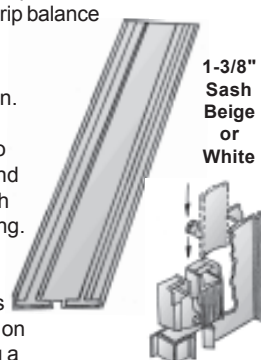

Caution: Our jambliners are cut 14 degrees on sill end.

WB7300 Series Tilt Liner was developed to provide a durable, trouble-free removable weatherstrip balance for single glazed windows.

The Liner
Rigid PVC with flex-leaf open construction. The sash is held in place solidly yet the individual leaves will move out of the way to allow for tilting. Springs are concealed and protected. Spring noise is eliminated with a sound deadener attached to each spring.

Backing Foam
Advanced foam with a closed cell edge is standard. The foam acts as a compression spring with the closed cell edge providing a superior air and water seal.

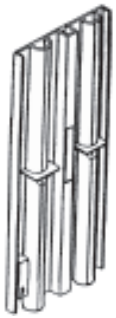

Note: Our jambliners are cut at approximately a 14 degree angle.

**1-3/8" Sash
Beige or White**

Part Number	Glass Height	Opening Height
WB-7300	12"	2'6"

WB-7311	34"	6'2"
WB-7312	36"	6'6"

The Carrier System
Simple and durable. Large one piece carriers provide easy sash installation and insure proper balancing with self-adjusting friction. Large mushroom sash pins capture the carriers to eliminate carrier fly-up.

**WB7200 SERIES*
Non-Tilt**

FOR INSULATED GLASS WITH 1-3/8" OR 1-1/4" SASH

Beige

Repair and upgrade old windows with an energy efficient vinyl or metal jambliner. These jambliners replace old tubular style balances or rope and pulley systems.

CALDWELL

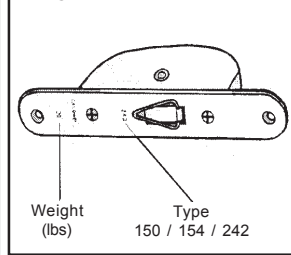

FT Style

AT Style

S Style

Weight factor based on one (1) pair

HOW TO ORDER:

1. Identify style by above drawings: FT, AT or S.
2. Identify type (type number will be stamped on the face plate).
In some cases, you may need to scrape off paint or dirt to locate the type number.

Acme - Duplex Tape Balances also available. Please inquire.

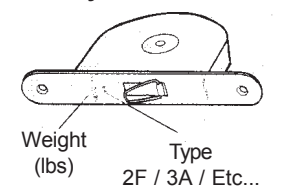

3. Identify weight (weight number will be stamped on the face plate).
4. Measure tape travel (length) for new or replacement tape balance.

Other Caldwell sash balances, not described on this page, have been developed for specific purposes, special windows or other devices and can be special ordered. Please send samples, or details, to our Customer Service Department.

ALUMINUM & FIBERGLASS MESH SCREEN WIRE

Fiberglass Screening

- 18 X 16 X .011 diameter mesh
- Will not dent, corrode or scratch
- Lightweight, yet strong. Easy to install
- Economical alternative to aluminum screening

*Quality Screening By
Phifer Wire Products*

Black Aluminum Screening

- Baked on charcoal finish reduce glare and improves visibility
- Extends life of screening
- 18 X 16 X .011 diameter mesh

Aluminum Screening

- 18 X 16 X .011 diameter mesh
- Brite-Kote exclusive dip weld finish
- Free of streaks, lays flat
- Easy to measure and fabricate

*Colors Available: Black, Gray
Widths Available: 30", 36", 48", 60"
Roll Length Available: 100'

Pet Resistant Insect Screening

- Resists damage by dogs & cats
- Excellent outward visibility
- Made of strong vinyl-coated polyester
- Easy to install

Patio Door Track / Screen Door Grilles / Weatherstripping

T0001

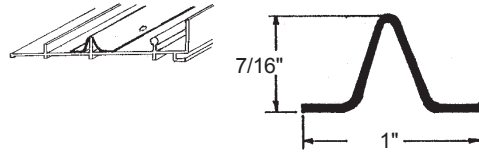

Replacement Patio Door Sill Track Cover

- Fits most track doors
- Easy to install
- Quickly replaces damaged track
- Saves time and money
- Attractive replacement for damaged or corroded track
- Available in 6 ft. & 8 ft. length

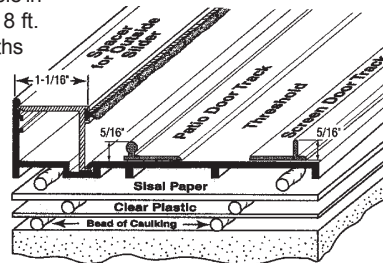

T0003

8'

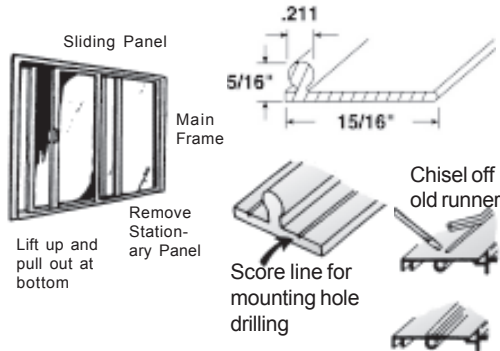

T0006 Threshold Replacements for Sliding Glass And Screen Doors

Available in 6 ft. & 8 ft. lengths

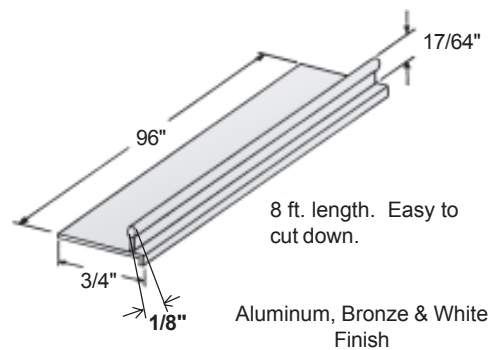

T0007

For Glass Doors

T0009

Brush Style Weatherstripping

SD0238

Specially designed to stop air, water dust and insects from entering. Silicone treated pile will not shrink, rot or absorb water and low friction sealing action allows for minimum drag during opening and closing. Can be installed around doors on top and side jamb stops where air infiltration is a particular problem. Available in aluminum and bronze finish.

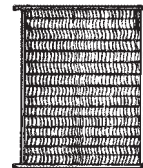

Available in 3', 6' and 12' lengths

- Attractive & Functional
- Easy To Install

Sliding Screen Door Grilles

- Sizes To Fit 28-1/4" - 49-1/4" W Doors

Made of heavy duty aluminum and strong enough to protect doors from the abuse of children and pets. These grilles save time and money by eliminating the need to constantly repair screen

Phifer Screen Wire Products

Actual color match chips for Phifer Screen Wire products available on our website at www.blainewindow.com. Refer to Phifer Wire brochure, P1.

Phifer SunTex 95 **Exterior Sun Control Fabric**

Sun Tex 95, engineered for exterior roller shade applications, is a full basketweave vinyl-coated polyester fabric that is thinner and lighter weight than tradition Sun Tex. With a 5% openness factor, Sun Tex 95 offers increased heat and glare control as well as daytime privacy. Available in Mocha, Alpaca, White, White/Gray, Dark Bronze and Black.*

Phifer Recreational Mesh

Specifically designed for track and field jump pits. Recreational Mesh is functional and durable, making it an ideal choice for jump pits' specific requirements. These fabrics are rugged enough to withstand the weather elements. Available in Royal Blue, Dark Green, Christmas Red and Black. *

Phifer Super Solar Screening - The ultimate in shading protection. Energy Saver

Phifer Super Solar Screening offers the ultimate in shading protection by blocking up to 90% of the sun's heat. This fabric also improves daytime privacy while offering excellent outward visibility. Phife Super Solar Screening works whether windows are open or closed and keeps carpets and draperies from fading. Available in charcoal and Silver Gray. *

Phifer BetterVue **"See the view, not the screen"**

BetterVue is Phifer's first fiberglass improved visibility insect screen (iVis) for windows, doors and porches. This screening product maximizes the view by making it sharper and more brilliant. Durable, flame retardant, easy fabrication, excellent for coastal regions. Better curb appeal than conventional screen and 10% more open than standard screen. 10% smaller holes than standard screen.

Phifer PetScreen - **Seven times stronger than regular insect screening**

Pet resistant insect screening resists damage by cats and dogs, provides excellent outward visibility, is made of strong vinyl coated polyester and is easy to install.

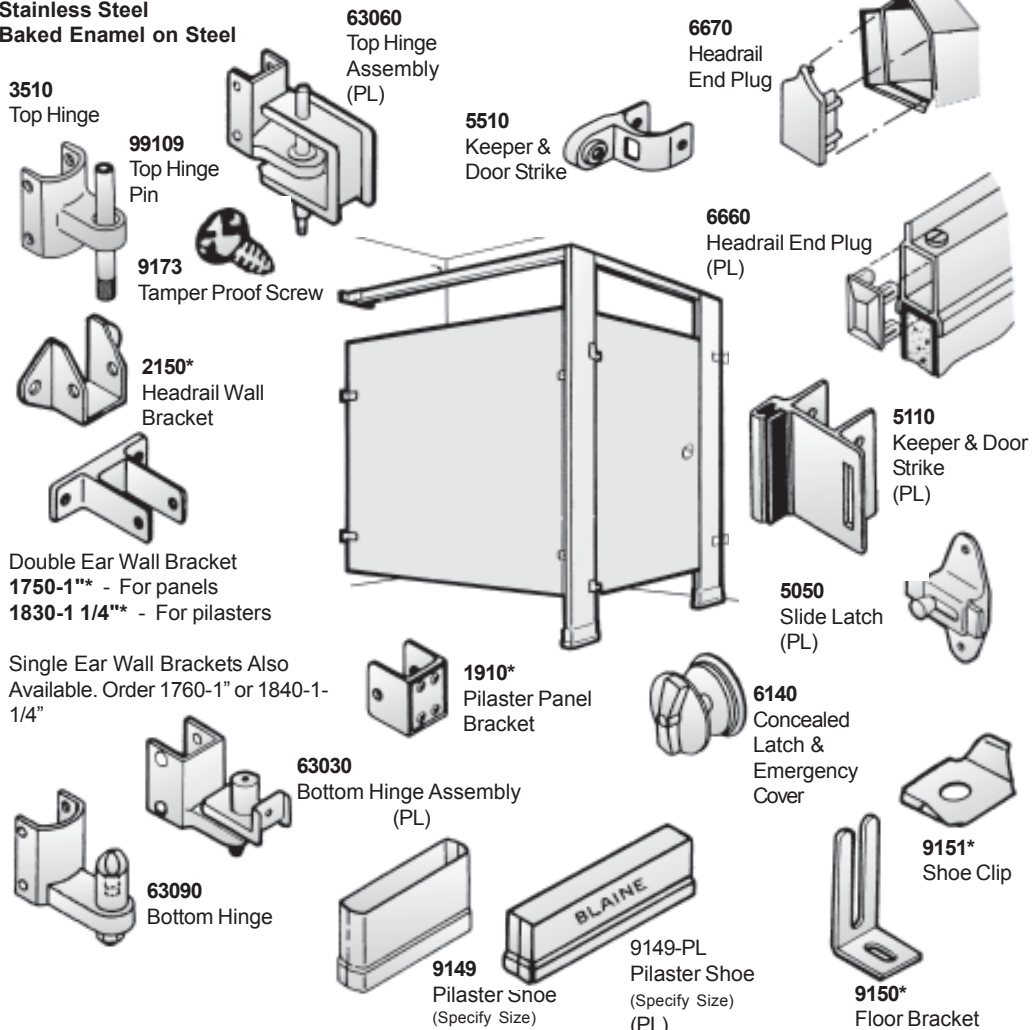

***Please contact our Customer Service Department , or visit our website at www.blainewindow.com, for color match chips.**
