

BLAZEMASTER® FIRE SPRINKLER SYSTEMS LEAD THE INDUSTRY

Stronger from end to end, BlazeMaster can help make installations easier and more profitable by connecting superior engineering, customer support, training and product performance.

1

The BlazeMaster Fire Sprinkler Systems team pioneered the use of nonmetallic pipe in fire sprinkler systems and continues to lead through pressure-rated compounds, state-of-the-art processing, rigorous product testing and by partnering with industry-leading manufacturers.

2

Installing a long-lasting, trouble-free BlazeMaster Pipe & Fittings System is the best way to ensure reliable, effective fire protection. Listed by UL for all light hazard occupancies, as defined by NFPA 13, 13R and 13D. Approved by FM Global and LPCB and certified by NSF and WRAS.

3

BlazeMaster Fire Sprinkler Systems supports the industry with in-person and online training for installers, contractors, engineers and construction managers to ensure installation is done correctly, efficiently and profitably. Any questions? Our localized consulting program provides answers.

4

FBC
SYSTEM COMPATIBLE Our exclusive FBC™ System Compatible Program lets manufacturers of ancillary construction products determine chemical compatibility with BlazeMaster Pipe & Fittings. This program is independently tested to ensure accuracy.*

*The FBC System Compatible Program is only applicable to the chemical compatibility of ancillary products with the brands of FlowGuard®, BlazeMaster, and Corzan® piping systems.

The BlazeMaster Fire Sprinkler Systems team is entrenched in the fire sprinkler industry. It serves on the boards and technical committees of trade associations such as AFSA, NFSA, NFPA, CASA, IFSA, EFSN and BAFSA.
