

**85987MC**

## **1/4 In. x 1 In. Solid Carbide Double-Flute Straight Router Bit**

### **Benefits**

---

- Micrograin solid carbide – ensures consistently smooth finish cuts, with superior wear resistance
- Double-flute design – provides exceptional edge finish even in harder materials
- Small-diameter structure – used for smooth finishing in acrylic materials, both soft and hard plastic
- Solid carbide build – provide the best rigidity and long life, for faster feed rates and chip removal, hard-to-route materials and superior bit life
- Upgraded micrograin carbide – engineered for precise cuts and for long bit life
- Bosch-exclusive heat-treating process – provides hardness and withstands high temperatures
- Comprehensive line of bits – features hundreds of profiles for mortising, edge forming, trimming, surface forming, and cabinetry/joinery in wood, plastic and laminate
