Capacity

Two dispensers; one per compartment. Each holds two standard core toilet tissue rolls through 5" in diameter.

Operation

Each cabinet holds two rolls of 4-1/2" x 5" standard core toilet tissue, one above the other. When first roll is used-up, fresh roll automatically drops down for use. Unique retaining mechanism prevents use of spare roll until first roll is completely used. Spindles non-removable by user. Hinged door permits access to storage compartment for servicing of unit. Serves two toilet compartments, dispensing one roll to each side of partition, while holding a second roll in reserve.

Installation

Verify all rough-in dimensions prior to installation. Requires partition opening 10-5/8"H x 11-3/8"W. Flanges adjustable for partitions from 1/2" to 2" thick. Remove one flange and install cabinet in partition opening. Draw flange tight to partition and secure with screws. Replace flange on opposite side, draw tight to partition, and secure with screws.
