Carr Narcotics Locker Installation, Operation & Maintenance Manual No. 371 Revised 4/13

Model NL10

Installation

1. Check local codes before beginning installation.
2. Drill holes in back of cabinet in locations shown to attach to backing. If backing is not used and instead you choose to screw directly into studs (if possible), drill holes in back of cabinet at appropriate locations.
3. Place cabinet on wall and secure with screws appropriate for type of wall material.
4. Check that cabinet is level.

Operation

Cabinet can be unlocked using provided keys. Keys cannot be removed in the unlocked position. If key is lost or locks need to be changed, contact Carr.

Maintenance

The cabinet is maintenance free. To clean, use a mild detergent with water and a soft cloth. Wiping cabinet with a mineral oil on a soft cloth will make the stainless steel shine.
