Specifications:

The Chief Fire Extinguisher Cabinet

Chief 105-5 WWC

10008
Breaker Bar Assembly

10011R
Red Hammer Assembly

10011W
White Hammer Assembly

FEATURES:

- Made in the U.S.A.
- Can not rust
- Will not fade
- No sharp corners
- No glass to shatter
- No paint to chip
- Pitched drainage
- Natural ventilation
- Fire retardant
- Dent-proof
- Lower freight cost
- Less storage space
- Less shipping damage
- Easily cleaned
- No padlock required
- High density injection molded
- All sizes in red or white
- Lower replacement costs

HIGHLIGHTS:

- Surface or recessed installation
- Chromium plated brass cylinder lock with two keys
- Red or white injection molded plastic protective lock cover
- Red or white injection molded plastic hammer with brass impact surface with flexible torsion and ribbed grip
- Stainless steel type 304 clear nylon jacketed mechanical cable
- Custom colors available
- Protective frame
- Lower maintenance cost
- Optional battery-operated alarm
- Optional signage on panel
- Manufacturing Chief fire extinguisher cabinets since 1984

CATO CHIEF - SECOND TO NONE

Cato has been providing the quality Chief fire extinguisher cabinets since 1984 and is the world's largest manufacturer of plastic fire extinguisher cabinets and protective covers. The Chief cabinets protect the extinguisher from weather and any ambient conditions that might jeopardize its use. The elimination of metal reduces the chance of personal injuries and reduces the possibilities of product liability insurance claims. The unique design of the Chief cabinets also reduces vandalism and theft.

CATO Presents ToughStor Cabinets

TS-3 Extinguisher Cabinet

TS-3 EXTINGUISHER CABINET FEATURES:

- Rotationally molded of medium density plastic
- Can not rust
- Will not fade
- No glass to shatter
- Break seal for easy access
- Can accommodate carbon dioxide (horn-type) extinguishers
- Can accommodate 2 standard ? lb. extinguishers

DIMENSIONS:

30 1/4" x 23 1/4" x 11 3/4" (Height x Width x Depth)
Door opening: 23 1/2" x 19" (Height x Width)

TS-2 VEHICLE EXTINGUISHER CABINET FEATURES:

- Rotationally molded of medium density plastic
- Can not rust
- Will not fade
- Break seal for easy access
- Designed to attach to outside of vehicle for convenient storage
- Can accommodate many different sizes of extinguishers

DIMENSIONS:

25" x 9 1/4" x 10" (Height x Width x Depth)

TS-2 Vehicle Extinguisher Cabinet

SPECIFICATIONS:

Cato is pleased to introduce ToughStore products from Jo Bird & Company, the United Kingdom's leading manufacturer of top quality, highly durable fire and life safety cabinets. These attractive cabinets are made tough to protect extinguishers and life safety equipment from harsh environments.

TS-100 Escape Set Cabinet

TS-100 ESCAPE SET CABINET FEATURES:

- Clear door and security seal facility allows easy visual inspection
- Precision inspection molded polycarbonate for improved performance
- Universal capability will accommodate a variety of EEBA's or other equipment
- Easily installed - horizontal or vertical fixings allow flexibility of location
- Door seats designed to provide long-term weather protection
- Quick release door catches ensure rapid access
- Maintenance-free construction

DIMENSIONS:

30 ¼" x 23 ¼" x 11 ¾" (Height x Width x Depth)
Door opening: 23 ½" x 19" (Height x Width)

TS-101 Extinguisher Cabinet

TS-101 EXTINGUISHER CABINET FEATURES:

- Clear door and security seal facility allows easy visual inspection
- Precision injection molded in polycarbonate for improved performance
- Universal capability will accommodate a variety of fire extinguishers
- Door seats designed to provide long-term weather protection
- Quick release door catches ensure rapid access
- Maintenance-free construction

DIMENSIONS:

30" x 11" x 8 ¼" (Height x Width x Depth)

SPECIFICATIONS:

Fire Extinguisher Cabinet, as manufactured by Cato, Inc., with body and frame injection molded of red or white virgin high-impact crystal polystyrene of .110 wall thickness with ultra-violet inhibitors, crystal polystyrene scored panel of .100 wall thickness, chromium plated brass cylinder lock, and key with weather-proof protective lock cover and polypropylene plastic injected molded hammer with brass impact surface, flexible torsion, ribbed grip surface, and clear nylon-jacketed type 304 stainless steel mechanical cable.

OPTIONS:

GERONIMO ALARM (A) – The alarm is battery operated and will sound when the magnetic field is broken. Geronimo's battle cry should be loud enough to virtually eliminate any vandalism.

Red bodies shipped with red hammer.

White bodies shipped with white hammer.

Red frames shipped with red protective lock covers.

White frames shipped with white protective lock covers.

CATO Semi-Recess Flange

Specifications:

CATO Presents The Home Fireman

FEATURES:

- Made in the U.S.A.
- Can be easily installed
- Connects to standard residential water lines (1/2" to 3/4")
- Compact – fits between standard 16" studs
- Matches any décor (White, Paint or Stain Grade available)
- Fits new or existing homes
- Gives coverage of over 100 feet (When centrally located)
- Includes BC extinguisher for grease and electrical fires
- Has a kink resistant fire hose for ordinary flammables
- Has a 5 year limited warranty

OPTIONS:

May be purchased without the non-rechargeable extinguisher if it is replaced with a U.L. listed rechargeable extinguisher when installed.

DIMENSIONS:

Wall Opening	19" Height (to allow for the attached water pipe to fit) 14 1/2" Width (inside distance between 16" on-center wall studs)
Back Box	17 1/2" Height x 14 1/2" Wide x 3 3/4" Depth
Frame	20"Height x 17 1/2" Width

SPECIFICATIONS:

Cato is proud to be the exclusive NAFED distributor for an exciting new product from SafeHome Industries, The Home Fireman residential fire extinguishing system. The Home Fireman is a beautiful, easily - installed semi-recessed cabinet containing an extinguisher and a kink resistant fire hose.

We believe The Home Fireman is a product which offers our distributors significant opportunities in the largely untapped potential of the residential fire safety market.

SPECIFICATIONS:

Labels and signs are silk-screened with U.V. automotive grade pigmented inks on 4 mil vinyl with acrylic adhesive.

CATO Protective Covers

Cato 220-SB

FEATURES:

- Made in the U.S.A.
- Can be installed in a very few minutes
- Can be installed with a screwdriver
- Mounting screws and anchors provided
- Cannot rust
- Have rounded corners for maximum safety
- Are easily kept clean
- Are opened quickly for inspection or maintenance
- Have greater impact-resistance than metal
- Lower shipping/handling costs than metal
- Are water-resistant for outside installation
- Are injection molded of high density plastic
- Are individually labeled and packaged

HIGHLIGHTS:

- Are shipped completely assembled
- Underwriters' Laboratories HB94 Burn Rating
- Cover remains open during inspection/maintenance
- Pull handles are designed to A.D.A. specifications
- Breaker bars can be installed on either side
- Breaker bar is vandal-resistant
- Available with breaker bar or unsecured pull handle

SPECIFICATIONS:

Protective covers, as manufactured by Cato, with body and hinged cover injection molded of high-density red polyethylene with optimum impact and tensile strengths and appropriate elongation and flex modulus and Underwriters' Laboratories HB94 burn rating, unless other color specified, glass panel with appropriate silk screen message on inside of panel. If model with breaker bar is specified, the bar is galvanized steel attached to cover with steel cable. Covers with pull handles designed to A.D.A. specifications. Cato protective covers with unsecured covers and without breaker bar are furnished in integrally molded one-piece copolymer cover, eliminating problems encountered with glass panels.

Easy to install in minutes

Easy to use

1 – Yellow identification and Safety Vest	LSS – V2
2 – 4 Oz. Bottles of Purified Water	LSS – W1
2 – Red 6 Hour Light Sticks	LSS – S1

LSS-K Kit

OPTIONS:

GASKET (X) - The gasket is uniquely extruded with an air packet, which allows water-tight installation on stucco and other rough, uneven surfaces.

Cross section of gasket

GERONIMO ALARM (A) - The alarm is battery operated and will sound when the magnetic field is broken. Geronimo's battle cry is loud enough to virtually eliminate false alarms.

CATO TEMPORARY PROTECTIVE COVERS:

We believe the taxpayers will save the most money in the direct ratio to the number of protective covers installed (more covers mean fewer false alarms). CATO introduces the 220-RT and 220-ST, designed to prevent false alarms as inexpensively as possible. These covers are formed with clear PETG (Polyethylene terephtalate glycol) with nylon hook and loop corner mounts with high shear pressure sensitive adhesive. These units can also be installed or replaced in seconds.

MODEL	DESCRIPTION	DESCRIPTION	MOUNTING

GENERAL SPECIFICATIONS

- **SIZE** - Unfolded: 14" x 23", Folded in carton: 6" x 3" x 4"
- **WEIGHT OF HOOD** - Ready to wear: 9 ounces
Shipping weight: 14 ounces
- **SHELF LIFE** - 5 years if vacuum seal is not compromised.
- **DISPOSABLE** - THIS CAN ONLY SAVE YOUR LIFE ONCE!
- **BREATHING RESISTANCE** - Oral and nasal breathing is not impaired.
- **VISIBILITY** - Transparent hood provides unrestricted visual range.
- **COMMUNICATION** - Verbal ability is not impaired.
- **HEARING** - Auditory senses are not impaired.
- **EFFECTIVENESS** - 20 minutes or more, depending on ambient conditions.

FILTER CARTRIDGE SPECIFICATIONS

- A) PARTICULATE STAGE** - 95% High Efficiency Particulate Air Filter (HEPA). (Particles and contaminants as small as 0.1 micron)
- B) DESSICANT STAGE** - Dehumidification increases effectiveness of filter.
- C) CO CATALYST** - Converts lethal carbon monoxide (CO) into breathable carbon dioxide (CO₂).
- D) ACTIVATED CHARCOAL STAGE** - Highly absorbent coconut shell activated charcoal which is effective on over 150 different gases and contaminants.
- E) BODY OF CARTRIDGE** - Polycarbonate and flame retardant ABS polymers resistant to high temperatures.

HOOD ASSEMBLY SPECIFICATIONS

- **FIRE RESISTANCE** - The customized NyPro clear, hand-soft material used in the hood is manufactured using a dual-layered process combining nylon with polypropylene. This unique combination provides chemical, puncture and tear resistance as well as the heat resistance required to exit safely.
- **EXHAUST VALVE** - Polycarbonate with a Buna "N" Rubber diaphragm. Maintains positive air pressure inside the hood, reduces breathing resistance, prolongs effectiveness of the filter and reduces fogging. Enclosed in a tamper-proof polycarbonate case.
- **NECK STRAP** - 1" width elastic "hook and loop" style adjustable strap. The strap has quick-connect "buckle" style release mechanisms, which allow for tightening or loosening of the protective neck seal in a few seconds.

Take hood out of package

Pull straps towards back
of head
