

73A00-4ZB

Load Control Modules

Item Description

5A Wireless Load Control Module.

Features and Benefits

- Controls low voltage circuits in outdoor air conditioning units, pool and spa heaters & pumps, generators, and more
- Features Ultra low standby power and current measurement for instantaneous demand information
- Can be used outdoors
- The 73A00-4ZB LCM can be controlled locally by placing the magnet near the magnetic sensor momentarily to toggle the state (On/Off) of the controlled device
- Use a MicroControl (81A00-2WHZB) as a standalone solution for coordinating and controlling this unit
- The MicroControl functions as an energy management coordinator to control selected thermostat and load control functions, including scheduling and manual on/off capabilities
- Integrating with a Leviton Omni or Lumina control system? Utilize the ZigBee Interface Module (81A00-3WHZB)
- For best results, mount to non-metallic surface
