Versatility Has a New Name.

The Connect Clamp System from Crescent®.

- Clamps with 500 lbs of holding force
- Integrated pipe clamp holds round objects securely
- Unique connect ends enables clamps to combine for maximum flexibility
- Easily converts from a clamp to a spreader

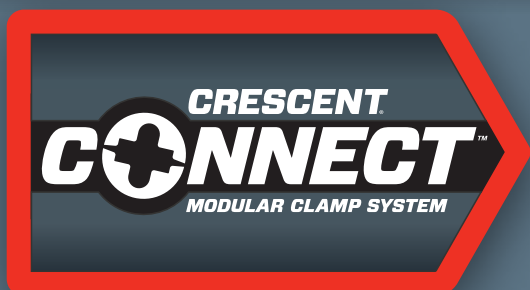

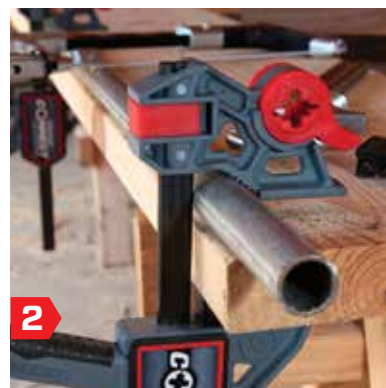

Clamps connect to work pieces and to each other for ultimate versatility.

No matter what odd angle, difficult corner or multiple joints you run up against, the Crescent® Connect Clamp System holds jobs tight. The Twin Lock Connector accessory that enables the connection of multiple clamps at any angle, rotation, or height. The system is ideal for a variety of applications including furniture building and assembly, cabinet installation, and wherever a vise style clamp would be useful.

- 1** 500 lbs. CLAMP FORCE - provides better leverage with less strain
- 2** PIPE GRIP - integrated teeth prevent twisting OR slipping when cutting round materials
- 3** CONNECT ENDS - enables clamps to combine for maximum flexibility
- 4** BAR LOCK - lever quickly converts clamp to a spreader

The Original...and Still the Best

 **CRESCENT**
BRAND

The Crescent® Brand Adjustable Wrench

After completing his historic solo transatlantic flight, Charles Lindbergh was quoted as saying he carried only “gasoline, sandwiches, a bottle of water, and a Crescent wrench and pliers.” The Crescent® brand adjustable wrench was already widely recognized as an essential part of every toolbox. The year was 1927, just 20 years since the Crescent adjustable wrench had been introduced.

Today, Crescent brand adjustable wrenches are just as essential as they were back then. They are now part of a full line of quality hand tools that proudly wears the Crescent brand name. And as always, there is only one original Crescent brand. If it doesn't say “Crescent” on the handle, it's not a genuine Crescent brand adjustable wrench.

The Crescent Advantage:

Special alloy steel is heat treated for strength. Matte finishing provides exceptional resistance to corrosion.

The Crescent Advantage:

Handle is up to 71% wider than conventional wrenches...lets users comfortably apply more force.

The Crescent Advantage:

Jaws open up to 25% wider than conventional wrenches to fit more fasteners.

A wide selection to suit a variety of needs

With over 50 different sizes and types to choose from, there is a Crescent brand adjustable wrench for nearly every application.

Small sized wrenches, designed for close-in work on small fasteners, and well as large sizes suited for millwright work, are available in black phosphate or chrome finishes.

Selected models come with extra comfort cushion grip handles. Adjustable construction wrenches with tapered tangs designed to align mating parts are also available.

Apex Tool Group is one of the largest producers of industrial hand and power tools, tool storage, drill chucks, chain, and electronic soldering products in the world. The company serves a multitude of global markets, including automotive, aerospace, electronics, energy, hardware, industrial, and consumer retail. Apex markets its products under its own brand names in addition to being the principal manufacturer for several key private label products for certain retailers for many years. Additional information about Apex Tool Group and its many brands is available at www.apextoolgroup.com.

***A ready market. Unique new products.
An outstanding opportunity.***

The demand is there...

With home values dropping or stagnating, and forecasts of the same for years to come, many homeowners are opting to stay in their homes rather than sell at a loss. As a result, many are expected to invest in remodeling and refurbishing existing homes to increase their value or to simply enjoy upgraded features until the market improves.

According to the 2011 Home Improvement Research Institute, the top home improvement projects last year included replacement of cabinets, carpet, windows and doors, hardwood floors, fences, decks, and tile floors. These projects all have one thing in common: the existing materials must first be torn out and removed.

To explain and support the increase in renovation projects and the growing demand for demolition/renovation (demo/reno) tools, the institute has shown that existing home sales are on the rise, up 10% since 2006 compared to new home sales.

Existing vs. New Home Sales 2009

- Existing Home Sales (92%)
- New Home Sales (8%)

Existing UP 10%

DURABILITY

Forged steel head and handles create a durable tool with rubber grips for comfort and control.

FUNCTIONALITY

Allows users to easily extract nails regardless of the size or if the head of the nails is damaged or removed.

PARALLEL JAWS

Create maximum grip on fastener and prevents slippage

CODE•RED
SERIOUS RENOVATION

Nail Pulling Pliers

SPEED

Dual handles make it quick and easy to grip, roll, and remove nails and staples.

NP11 Nail Pulling Pliers

Designed to pull

- Finishing nails
- Floor staples
- Wire and coaxial staples
- Headed nails
- Brads
- Damaged fasteners
- Pin nails

Innovative new Crescent® products are ready to fill the need.

Industrial Users - Concrete, framing, bridge and roadwork, general demolition

We asked a crew of industrial pros what they could do with a Crescent® Adjustable Pry Bar and an Indexing Flat Pry Bar. They suggested tearing forms from concrete with the adjustable pry bar, removing long nails and spikes with the extendable puller, hammering boards and nails with the striking face, using the nail remover to dig and chisel nails out of boards, and loosening and removing nuts and fittings with the adjustable jaws.

After showing them the Adjustable Pry Bar, we asked them to rate the concept from 1 to 5, with 5 being the best. The result was a very strong 4.5!

Tradesmen - Roofing, siding, framing construction, flooring, walls, cabinets

Tradesmen said they would use the indexing flat pry bar to access nails, pry boards apart, tear up tile and subflooring with the help of a hammer hitting the striking surface on the back of the bar. They also said it would be perfect for removing wood and vinyl siding, and for removing shingles, nails, eaves, and gutters from roofs.

When shown the Indexing Flat Pry Bar, 80% of tradesmen said they would use this tool daily or at least once per month.

Do-It-Yourself Enthusiasts - Ceilings, paneling, framing, shelves, flooring, and molding/trim

DIYers said they would use the adjustable pry bar to take off molding and trim around doors and ceilings, to pull down ceiling tiles and metal suspension framing, to pull up old countertops, and to tear cabinets from walls. They said they could use the adjustable jaws to unscrew fittings from plumbing fixtures and straighten boards during stick construction. They would use the indexing flat pry bar to tear out tile floors and bath surrounds, remove deck boards, and pull out screws and nails.
