

## CRL Glass Jack

- Use With Vacuum Lifters
- A Simple and Affordable Tool That Makes Adjusting Large Glass Panels Easy
- Great for Smaller Glass Shops

The CRL Glass Jack makes adjusting (or lifting) large glass and mirror panels a simple, one-person job. Used in conjunction with your vacuum lifter (not included), this precision machined tool lets you adjust and set your glass, while getting a better view of what you are doing without any interference. At the same time, you reduce your risk of back injury.

The CRL Glass Jack is set on a solid surface while you position it's cradle under your vacuum lifter. Then by simply attaching your vacuum lifter to the glass and turning the center adjustment bar by hand, the glass will raise or lower accordingly. The turnbuckle mechanism lets you move glass panels in the smallest of increments, without sudden movements.

Made from the highest quality aluminum, the CRL Glass Jack is built for years of service. **NOTE:** Never exceed the recommended weight limit of your vacuum lifter. Minimum order is one each.

Vacuum Lifter Sold Separately

## CRL Carrymate® Door Lifter

- For the Installation of Doors Including Fire Doors, Windows, Furniture, Dry Walls, Partitions, Etc.
- Easy Foot Operation; Lifts, Swivels, and Lowers
- For Doors Weighing Up To 264 Pounds (120 kg)

CRL Carrymate® Door Lifter is a panel and board swivel lifter which makes installation of doors a breeze. Includes an integrated tilt compensating lever to prevent the door from falling towards you. Lifts, swivels, and lowers up to 264 lbs. (120 kg). Also ideal for partitions and to align furniture. A rubber pad is included so no glass-to-metal contact is made when working with glass panels. A must-have tool for joiners, glaziers, painters, and locksmith's. Minimum order is one each.

CAT. NO. 0553

## CRL Door Jack

- A Combination Jack, Dolly, and Vise That Eases Transport and Installation of Doors

The CRL Door Jack is an "extra hand" that makes removing, moving, installing, or repairing doors a one person operation. Door Jack clamps to the strike side of most standard commercial and residential doors. Adjustable height casters make aligning the door and frame easy. For transport, just tilt the door back on the Door Jack's dolly wheels and move out. A support caster allows easy movement without lifting the door back to an upright position. Another accessory support holds the door in an upright position for hinge work. Door Jack handles doors and other materials in thickness from 1/2" to 2" (12 to 51 mm), and weighing up to 300 lbs. (136 kg). Minimum order is one each.
