d line is a leading Danish design brand that conceives and hand crafts enduring architectural hardware, sanitary ware and solutions for barrier-free living.

that endures

Design

About d line

Since we began, we have believed that the best ideas respond to a need. This started in the 1960s when the Danish designer Knud Holscher was working under Arne Jacobsen on St. Catherine's College, Oxford. It was his need for a high-quality, coordinated line of stainless steel architectural products that led him to design one.

The d line sanitary range by Knud Holscher combines cleanness in its lines with cleanliness in its function. This series consists of fittings that form a cohesive whole.

Complementary to our Knud Holscher bathroom accessories is our selection of taps and shower fixtures from the recently launched Qtoo collection. Realised in the same quality stainless steel and with the same precision designed, minimalist aesthetic, The Qtoo collection is an unparalleled match to the original launch pieces dating back to 1971.

Wherever they appear, our sanitary products can be flexibly combined yet always provide the same uniform impression. In their technical design, installation and maintenance are key focuses, to meet the need for impeccable hygiene no matter how long they live in a space.

To the spaces they occupy, they bring a sense of unity – they are often the finishing touches, yet they are never an afterthought.

The industry's first circular system that will prolong the life of products up to 100 years

d line will now take in original products to be Re-handled. We fix, replace and brush them to work good as new. With each Re-handle®, we save the environment up to 90% CO₂ emission.

Re-handle®

Sometimes good as new is better

Low quality is a waste of resources. we challenge you to Re-handle® the same product up to four times. With each Re-handle® the 20-year product warranty period is renewed, securing 100 years of use. With an asking price for a Re-handled product that is 60% lower than a newly produced item, it is straightforward to make the enduring choice and reuse instead of buying new.

Designed to never become waste

Long before global warming became an issue of concern, d line made a promise that we would create things that are timeless in their design and enduring in their strength, so that they wouldn't need to be bought for a purpose more than once. It is this uncompromising approach to design and our complete supply chain control, that makes Re-handle® the most revolutionary circular system in our operating industry.

d line ————— Re-handle

A – repolish

B – replace

Reuse in order to reduce

We know that every new product put into the world has severe CO₂ impacts. By choosing to Re-handle our products instead of producing new, you will dramatically reduce the carbon footprint between 54-91%, depending on the product.

We know this, because we have documented our products complete Global Warming Potential (CO₂ emission) across the entire life cycle, based on internationally recognized Environmental Product Declarations (EPDs executed and verified by third party).

- 20-year product warranty, renewed at every Re-handle.
- EPDs with full declaration on 40% of our portfolio.
- Re-handle possibility on 250 items.
- Reduce the Global Warming Potential between 54-91% with each Re-handle.
- 100% recyclable AISI 316 stainless steel.
- Recycled and recyclable packaging.

81% less emission

Average kg. CO₂ emission per category.

Though many d line products can be classed as industrial in both their design and their look, none of them are industrially made. They are hand crafted in our factory by our dedicated specialists.

Craftsmanship

Tube cutting, welding, bending, grinding, polishing, assembly and packing – all of these stages of our production are undertaken by people, with the help of specialized machines, and each is carried out by one person before being passed on to the next.

These tasks are truly specialized. To achieve each tiny detail in a d line product, for example, special stamping and cutting tools have been developed just to create that single element. Meanwhile, to execute the grinding and polishing that results in our signature d line satin finish, a product is gently held by hand against a spinning wheel at specific angles and with equal pressure applied to every millimetre of the whole. This is carried out as four different steps before the product is wrapped for transportation to the next station.

Labour-intensive processes such as these are critical for the achievement of precision and perfection. We think they're worth it because the resulting products are truly enduring.

After our pieces are carefully crafted, they are packed and shipped in cardboard boxes made from recycled and recyclable cardboard. We purchase our boxes locally, not only from a subsidiarity principle to avoid unnecessary transport, but also to support our local communities and businesses.

Colours and finishes

Stainless steel

PVD charcoal

PVD brass

PVD copper

Solid metals

AISI 316 stainless steel have long been our metal of choice, because it never dates and meet our exacting quality standards. Grinding and polishing are what create our signature d line satin finish. For our method, a product is gently held by hand against a spinning wheel at specific angles, and with equal pressure applied to every millimetre of the whole. This is carried out as four different steps.

Choose between steel in either satin or polished finish.

PVD finishes

Physical vapour deposition (PVD) creates an extremely high-quality, high-durability finish when applied to stainless steel. With it we can now create our pieces in a brushed

satin or a polished finish, in Copper, Charcoal and Brass. This treatment allows for our AISI 316 stainless steel to take on a new metallic hue, while staying resistant to the humidity and cleaning materials typical to bathrooms. Besides our 20-year product guarantee, we offer a 5-year guarantee on the PVD finish.

Qtoo collection

The Qtoo Collection was launched in 2020, to further leverage d line's ability to achieve complete cohesion within architect-designed spaces. The collection brings to the market 100% recyclable stainless steel taps and shower fixtures, which share our precision-designed, minimalist aesthetic.

d line — Qto collection

Qtoo makes use of marine-quality, non-corrosive AISI 316 stainless steel favoured by d line, utilising steel for both its internal and external parts.

Precision, minimalistic and innovative

Created through an established collaboration with Danish design studio Hans Thyge & Co., each Qtoo piece blends a simple silhouette with innovative ideas, balancing soft, feminine shapes with perfectly composed geometric lines.

The Qtoo pieces are available in brushed and polished stainless steel, as well as brass, copper and charcoal. With these same finishes applicable to our sanitary ware by Knud Holscher, this means a more comprehensive range across the d line bathroom category.

Sustainable thinking

All materials within a Qtoo product are 100% recyclable. Stainless steel is favoured because the amount of heavy metals are also

much lower in stainless steel, when compared to normal chrome products. Simultaneously, in the production of stainless steel no chemicals are used, nor any contaminating surface treatments.

The Qtoo products further utilizes integrated air mixers as standard to reduce water consumption. The products are CSA certified and conform to California Code, which mean that our products live up to strict water saving standards. Healthy drinking Qtoo products also prioritise health, promising extraordinarily clean water from every tap, each of which is lead-free, allergy-friendly and GDV- and NSF/ANS161-certified, to ensure lower levels of heavy metals in water. Each also comes with a 20-year guarantee and is leakage- tested at 15 bar.

QS3200-340WM

Built-in two-way shower set in satin stainless steel.

For washbasin

Whether counter- or wall-mounted, the Qtoo Collection washbasin taps are all about balanced proportions. Each minimalist tap is operated with a single lever that moves softly to turn the water on, and manoeuvres just as seamlessly to adjust temperature or flow.

As with any Qtoo wall mounted piece, our taps come with pioneering multi-adjustable built-in units for safe and easy installation.

Staying true to the Qtoo sustainability principles, all stainless steel parts are 100% recyclable and comes with a 20-year guarantee.

Built-in tap,
190mm spout

In an exclusive villa in Klampenborg just outside Copenhagen, this astonishing bathroom has been gently renovated by Danish Interior Designer and influencer Emil Thorup.

It's Scandinavian minimalism at its best, the natural stone and the light oak lead the mind to the raw materials that exist within the nordic nature. The bathtub set and the built-in tap from the Qtoo collection are in perfect harmony with the alluring, oval bathtub and the eggshaped washbasin.

For shower and bathtub

The Qtoo Collection shower and bathtub system of showerheads, spouts and control unit combinations are for mixing and matching to personal taste and need. Each element of the system is perfectly minimal, with every detail precision-designed around function.

The collection is designed to be wall-mounted and built in the wall. The control units operate the water and flow, and adjust the temperature, with an optional thermostat that offers smart antiscald function to safeguard families with children.

- Built-in depth: 69 mm
- 400 mm projection
- Rose diameter: 90 mm
- Flow rate limited to max. 5.7lpm
- Spare flow regulator included 9.5lpm
- Anti lime scale
- Lead free compliant

A year ago, Johanne Landbo and her little family took the big leap and moved from a rooftop apartment in Barcelona to an original 70's house the small Danish village Thy. Though it was a major change, they were never in doubt that this gem in Northern Jutland was their new home.

The greatest inspiration for the bathroom and the rest of the house came from old interior books from the 1970's, but since the materials from that decade can be quite remarkable Johanne wanted to combine them with clean wooden furniture and contemporary steel and charcoal elements.

The taps, showers and sanitary ware in the bathroom are steel pieces from the Qtoo and Knud Holscher collection. To create a contrast to the steel elements, Johanne chose the inflated Fat lever handle in charcoal from our collaboration with Tom Dixon.

Flushing plates

Joining our Qtoo collection of taps and shower fixtures is our take on the perfect flushing plate for your wall hung cisterns.

Staying true to our design principles ours is crafted in AISI 316 stainless steel. This is not only to uphold our 20-year product warranty, but also to offer our flushing plates in the d line colour palette to mix and match with our other collections and products.

We always prefer AISI 316 stainless steel for products in bathrooms, as they can endure high humidity and increased maintenance levels that are often required in these types of spaces. Our flushing plates are compatible with Geberit Duofix Sigma solutions.

Knud Holscher collection

“Architects have a mind for unity.
In terms of design, coherence is the
word; the series forms a unity in
concert with the architecture”

– Knud Holscher

The d line sanitary range combines cleanness in its lines with cleanliness in its function, and unlike our hardware collection of individual yet complimentary items, this series consists of fittings that form a cohesive whole.

Functionality, simplicity and quality

Holscher graduated from the Royal Danish Academy of Fine Arts School of Architecture in 1957, having studied under Arne Jacobsen. Only three years later, he found himself working for his professor on St. Catherine's College, Oxford, and thumbing through stacks of brochures to piece together its finishing touches.

As a result of this frustrating exercise, Holscher came to design a series of award-winning, minimalist architectural hardware for d line, starting with the iconic U and L levers, whose characteristic bend would influence the entire product range. This also marked the first time AISI 316 stainless steel was used for hardware, and with it Holscher and d line pioneered the category's first truly enduring products.

Dispensers and bins, bathroom accessories, touchless options and barrier-free solutions make up the sanitary range, which

sits as comfortably in the interior design of private homes as in high-functioning, high-traffic public buildings.

Simple and modular, the d line sanitary range's AISI 316 rust-resistant, non-corrosive, marine quality steel stands up to the high humidity levels of the bathroom, while its subtle curved edges and functional circular hole details are a nod to the bend in our first ever products, the L and U lever handles.

Holscher has won over 70 awards for his designs, including several iF Design Awards that recognise design excellence and date back as far as 1978 and those first lever handles and doorstops for d line, many of which are exhibited at the Design Museum Denmark in Copenhagen.

Bathroom accessories

Like so many of our pieces, the bathroom accessories are characterised both by straight angles and round detailing. Each piece robustly stands up to humidity, cleaning products and years of use.

That sense of timelessness sums up our products and how their design is enduring. Because they're minimal and clean-lined enough to fit anywhere – whether a palace privy or a modern-day personal sanctuary.

d line — Knud Holscher collection

Dispensers and waste bins

Every piece of our modular dispensers and waste bins features curved edges and hole details a nod to the original bend in the L lever handle that d line is renowned for.

But because our design is not about decorative details, the hole of course has a practical purpose: it's an indicator of when supplies of whatever the piece is holding are running low.

Soap dispensers

Our line of sanitary ware by Knud Holscher is a cohesive group of products in AISI 316 stainless steel, to mix, match and assign various jobs to.

The soap dispensers, traditionally used by bathroom sinks, can also be lined up and wall-mounted in the shower for shampoo, conditioner and shower gel, for a clean, bottle-free bathroom aesthetic.

Our new Touchless soap dispensers by Knud Holscher merges technology with heritage. Realised in AISI 316 stainless steel, these are already-loved pieces from our sanitary ware line, that have been given new functionality and an amplified hygiene factor by being fitted with motion-activated technology. The result? A clean look with cleaner functionality.

Features:
Certified according to:
EN 60335-1:2012,
EN 60335-2-23:2003.

Barrier-free

d line's move into barrier-free is about enabling people, and as with many of the products we design, our leap into this important new area started with a need.

The range serves both the disabled community and helps the elderly remain in their homes in a way that is discreet and understated. Like our other categories, our barrier-free products fuse aesthetics and functionality.

Extensive user testing has shown a great need for products in this category that look good, so we have created them with features such as user-friendly operation; different colour options for easy detection by the visually impaired; and warmth to their touch to avoid causing pain to arthritis sufferers (the foldable seat).

Our solutions within barrier-free further extends into hardware and taps and shower fixtures. Combine our pieces from the Knud Holscher and Qtoo collections of barrier-free items to create safe spaces for the less abled.

Max. load: 150 kg.

Sanitary panels

For the panel system, elements are combined within a single frame. Choose between 11 standard combinations, that offer a variety of solutions required to maintain a fully functioning, high traffic washroom. It's why everything is created in AISI 316 rust-resistant, non-corrosive, marine quality steel, which stands up to the high humidity levels of the bathroom – and its daily maintenance.

Installation of the system, pioneered over years of technical design development, takes a maximum of 20 minutes and its onepoint locking mechanism allows for cleaning and refilling every module at the turn of a single key.

Now there are even more variations to the system's design, as each panel is available in our PVD and powder coated finishes.

Luke Arthur Wells, British interior designer and DIY expert, has created a stunning bathroom setup with pieces in charcoal from the Qtoo and Knud Holscher collections. The result is understated, yet impactful balancing soft shapes, natural materials and graphic contrasts to the interior.

Luke has great attention to detail and the sand coloured, rounded sink paired with the off-white walls creates a beautiful tone-on-tone effect. The rich charcoal hue of the built-in tap and sanitary ware is a refreshing contrast and the light background makes them pop a little extra.

d line is available in 40-plus markets across the world, and we maintain close links with our distributors to ensure they always have the very latest details of our products, both new and existing. Because of this, we have total confidence that each of those distributors can completely support you and your

project with a full knowledge of our products and their possibilities.

We have hundreds of distributors all over the world, the latest list of which is always available at dline.com

We always name our collections after their designers, because without our designers, we simply wouldn't exist. And we work with more designers and product categories than what is represented in this book, including

**lever handles,
door stops,
cabinet handles,
and more.**

**By Arne Jacobsen,
Tom Dixon, and
Bjarke Ingels.**
