

# OUR COMPANY

DoorKing, Inc. (also known as “DKS”) was established in 1948 and is one of the country's leading manufacturers of Telephone Entry Systems, Vehicular Gate Operators, Traffic Control products, and Access Control Systems in the United States. Based in Inglewood, California since its beginning, DKS operates from seven buildings and is located less than three miles from Los Angeles International Airport (LAX). These buildings include our corporate headquarters, manufacturing, engineering, sales & marketing, training, warehousing, and shipping and receiving facilities. Additionally, we maintain 13 outside sales offices located throughout the country.

# APPLICATIONS

## RESIDENTIAL, RETAIL & COMMUNITIES

### RESIDENTIAL

Design a fully customized solution for unparalleled access control to your home - providing a safe, peaceful place for your family.

### APARTMENT COMPLEX & GATED COMMUNITIES

Access control starts right at the front gate, allowing only those persons and vehicles with the proper credentials to gain access.

### APARTMENTS & COLLEGE RESIDENCE HALLS

For safety and security purposes, access into and, in some cases, within a building can be easily controlled. Granting resident access & providing communication with guests is a must.

### COMMERCIAL & INDUSTRIAL

Employers have a full range of solutions to protect employees and guests, and prevent unauthorized access with versatile access points.

### MIXED USE BUILDINGS

Design a fully customized solution for unparalleled access control to your home - providing a safe, peaceful place for your family.

### PARKING

Whether a single parking lot or a multi-floor parking structure, DKS products can help control access and manage traffic flow.

### MAXIMUM SECURITY

Ideal for airports, seaports, military bases, government buildings, and infrastructure (electric plants, water treatment facilities, dams, etc.).

### SELF STORAGE

Complete turn-key self storage solutions to help manage your property - from gate operators to access control to management software.

## GATE OPERATORS

### Solar Power Option

Solar options for light duty residential Swing Gate Actuators (6003, 6004, 6005, 6400) and full size Swing and Slide Gate Operators (6524 and 9024).

### Quiet Operation

DKS has designed some of the quietest slide and swing gate operators on the market today.

### Heavy Duty

Specific heavy duty swing and slide gate operators for moving long and heavy gates.

## TRAFFIC CONTROL

### Loop Logic

A patented vehicular/pedestrian detection system that knows when to allow the Barrier Arm to come down – or not. The system detects if a person or vehicle is present.

### Lighted Arms

A great way to enhance safety and increase visibility in Barrier Arm applications. The energy efficient LED lamps are recessed behind the red/white warning tape on the DKS round aluminum barrier arms.

### Breakaway Arms

Use the DKS breakaway hardware kit for DKS 1601 Barrier Gate Operators to prevent costly replacements if a vehicle fails to stop at a lowered barrier arm.

## ACCESS CONTROL

### Stand Alone

Full feature, single door stand-alone Access Control Systems, as a Proximity Card Reader or as a Controller only (add your own 26-bit Wiegand Device).

### Wiegand

Digital Keypad code entry, RF Controls, and Proximity Card Reader Systems for connection to an Access Controller.

## TELEPHONE ENTRY

### PC Programmable

The 1830 Series allows you to use your PC to program the system 24/7, as a complete turn-key access management solution. Each 1830 unit allows Voice and Data connection over either Cellular, VoIP, Wireless, or POTS. Simple yet powerful.

### Access Plus

PC programmable systems for smaller applications at a much lower cost. Control two entry points for up to 27 users - easily expandable to control an additional six entry points.

### Standard

Provide homeowners with two-way voice communication and access control of a door or gate. Available for a single phone number or up to 600 residents.

### Account Manager Software

Powerful, flexible and easy to use software that allows you to manage access control with remote programming and analysis on your PC. Available as a free download with simple internet registration and plug & play options.

### Access Plus Software

Computer programming and control built into each Access Plus System. Available as a free download with simple internet registration and plug & play options.

### Mobile App

Control the 1830s Entry System hold open option with your DKS app enabled mobile device.

## DKS PLUG & PLAY CONNECTION SERVICES

Voice communication and/or Data (programming) to your DKS Telephone Entry/Access Control System via the AT&T 4G LTE wireless network.

Use an internet connection for Voice and/or Data (programming). Compatible with your own VoIP provider, or use DKS's.

POTS (Plain Old Telephone Service) is still available and DKS allows you to connect and program.

FRONT AND CENTER**

## RELIABLE, STREAMLINED DESIGNS FOR SERIOUSLY SMOOTH GATE OPERATION.

Developed for intermittent and continual use in a variety of applications, from single family residential to apartment complexes, gated communities, college residence halls, and even commercial facilities. DKS Swing Gate Operators are available for locations that require column-mount, in-ground, pad, or post-mounted units to suit virtually any gate and terrain configuration. With options for single or bi-parting gates, DKS Operators are designed to withstand the elements, deliver reliable access control, and maintain the aesthetic of your gate.

## LIGHT DUTY SWING GATE ACTUATORS

### GATE MOUNTED LOW VOLTAGE COMPACT DESIGN

**Model 6003 Actuator**  
(for smaller gates)

**Model 6005 Actuator**  
(for larger gates)

DKS 6003 and 6005 Swing Gate Actuators offer convenience and reliability in a compact, aesthetic design. These Actuators mount directly to your gate and pilaster, which simplifies installation without the need for concrete pads. The powerful screw-driven pistons in these Actuators connect directly to the gate, eliminating weak mechanical connections, and they are fully enclosed to prevent dirt and other airborne corrosives from contaminating the screw threads. Plus, there is no need to worry about hydraulic leaks, check valves or pumps.

These Actuators feature built-in limit switches that precisely control the start/stop speed and travel of your gate. The microprocessor-based electronic control board provides many advanced features not typically found in Operators in this class, and with a 24 volt DC operating voltage, DKS Actuators are ideal for residential applications.

# 6004 COLUMN MOUNT LIGHT DUTY SWING GATE OPERATOR

**Model 6004**

## COLUMN MOUNTED LOW VOLTAGE WORRY-FREE

DKS 6004 is ideal to operate swing gates that are mounted on large columns. The 6004 mounts directly on the column and simplifies installation by eliminating the need to cut niches on the column, and there is no need for concrete pads. Using a strong screw drive system, there is no need to worry about hydraulic leaks, check valves, or pumps. The 6004 features a keyed release system that allows the gate to be moved by hand if a system failure should occur.

Solar Powered  
Control Box

AC Powered  
Control Box

The low-profile 6004 column mount Operator is virtually invisible from the gate entrance.

## KEY FEATURES:

- Adjustable Magnetic Limit Switches
- Slow Start/Slow Stop
- Overlap feature for bi-parting non-colliding 2-gate applications
- Motors operate on low voltage (24 VDC)
- Batteries included and built-in battery charger
- Magnetic Lock output
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Mounts directly on gate and gate post, simplifying installation and eliminating the need for concrete pads
- Battery backup provides uninterrupted operation if primary (AC) power is lost
- 115 VAC or 24 VDC Solar powered control box options

# 6400 IN-GROUND LIGHT DUTY SWING GATE OPERATOR

## THE UNSEEN GATE OPERATOR

**Model 6400**

DKS 6400 installs in-ground, making it virtually invisible – and quiet – satisfying the most sophisticated automation needs without being detrimental to the original gate design. Invisible and powerful, the motor/drive mechanism is constructed in die-cast aluminum with a special corrosion-proof treatment, and because the drive unit is gear-driven, there is no need to worry about hydraulic leaks, check valves, or pumps.

The in-ground, self-supporting foundation box is built from corrosion-proof steel and has a galvanized steel cover. A lockable manual release lever is designed so it can be operated from inside or outside the gate.

Solar Powered  
Control Box

AC Powered  
Control Box

Solar Power

# **GATE SAFETY** FOR SWING & SLIDE OPERATORS

A young child, seen from behind, is climbing a weathered wooden fence. The child is wearing a striped t-shirt and jeans. The fence is made of vertical wooden posts and horizontal rails. The background is a blurred natural setting with trees and foliage.

**PEOPLE ALWAYS  
FIND A WAY  
TO GET INTO  
TROUBLE**

## AT DKS, WE TAKE SAFETY A STEP FURTHER AND PLAN FOR THE UNEXPECTED.

In addition to meeting the new UL 325 monitored entrapment protection requirements with electronic circuits, many DKS Gate Operators are designed with a mechanical clutch system that relieves pressure on the gate. It's really quite simple - less pressure equals less damage, should an unfortunate situation arise. Don't let Murphy's Law ruin your day - plan for the unexpected.

Pad Mount

**Model 6050/6100**  
Post Mount

# 6050 | 6100 | 6300

## CONTINUOUS USE SWING GATE OPERATORS

### AESTHETICALLY PLEASING ORIGINAL QUIET DESIGN

**Model 6300**  
Pad Mount

The unique configuration of these Operators allows the gate arm to rotate from underneath the Operator, enabling the arm to attach to the bottom rail of the gate, where it is virtually unseen from outside the gate. The fully enclosed Operators prevent water from contaminating the output shaft, bearings, and electronics.

Additionally, the frame is built from G90 galvanized steel to prevent rusting. These Operators can be installed directly on a concrete pad, or post-mounted to meet any installation requirements.

With safety in mind, these Operators contain an electronic and mechanical inherent reverse system for two methods of obstruction detection.

The automatic electronic limits, along with the microprocessor-based electronic control board provide advanced features not typically found in Operators in this class.

**Model 6050/6100**  
Pad Mount

**Model 6300**  
Post Mount

Suitable for single or dual gate configurations.

## KEY FEATURES:

- Quiet operation
- Weatherproof design
- Electronic and mechanical Inherent Reverse design
- Automatic Electronic Limits (gate travel) never need adjustment
- Microprocessor Electronic Control Board
- Built-in Power and Alarm Reset Switches
- 2-piece Articulating Arm for Slow Start/Stop
- Gate overlap feature for dual (bi-parting) non-colliding 2-gate function
- Gate Tracker Reporting output
- Magnetic Gate Lock output
- Tamper-protect feature
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Keyed Release for manual operation
- Clutch can be back-driven for fail-safe operation
- External Obstruction Sensing Devices must be used with these Operators
- Battery powered Convenience Open option available on Model 6300 only. Provides a method to open the gate if AC power is lost

**QUIET  
OPERATION  
CONVENIENCE  
& RELIABILITY**

## UNIQUE DESIGN FOR SAFETY, FORM AND FUNCTION.

DKS 6500 Series Swing Gate Operators offer convenience, reliability and quiet operation in an aesthetically pleasing design. They are built around a solid steel frame with galvanized steel control panels to inhibit corrosion. The 2-piece cover simplifies installation and maintenance, and also features a keyed, easy-to-use disconnect. Unique to the 6500s, a built-in breakaway clutch protects the gearbox if the gate is struck with sufficient force, saving you hundreds of dollars in potential repair cost.

Designed with safety in mind, these Operators feature an inherent reverse system, providing you with peace of mind. The magnetic electronic limits precisely control the travel of your gate and will never wear out or break. The microprocessor-based electronic control board provides many advanced features not typically found in Operators in this class.

**Model 6550**

## CONTINUOUS USE SWING GATE OPERATORS/HD

### EASY ACCESS DESIGN LOW MAINTENANCE & QUIET OPERATION

The 6500 Series Operators are designed to operate Vehicular Swing Gates in residential, commercial and industrial applications for both single and bi-parting gates. The Operator swings gates 90 degrees in approximately 12-14 seconds.

The unique design of this Operator allows for easy access to the electronics and mechanical areas of the Operator without ever having to remove the gate arm. The electronic magnetic limits will never wear out or break and they are easily adjusted. The solid steel frame and belt-driven gear box make this operator one of the quietest on the market today.

# 6524 DC MOTOR CONTINUOUS USE SWING GATE OPERATOR

## DC SWING GATE OPERATOR BATTERY BACK-UP & SOLAR POWER

The newest DKS DC Swing Gate Operator is perfect where backup power is critical, as it will keep running even when AC power has been lost. The solar power version is ideal in applications where AC power is unavailable, allowing you to add your own solar system for power, or you can choose the DKS solar kit.

This Swing Gate Operator offers versatile and safe operation in a small, compact design, and is ideally suited for residential or commercial applications.

20 Watt  
Solar Panels

Model 6524

Solar Power  
Option

Quiet  
Operation

Solar kit available for the 6524 Swing Gate Operator. Includes two 18 Ah batteries and 10 watt, 24 VDC solar panel.

## KEY FEATURES:

- The 6524 rotates the gate 90° in approximately 12-14 seconds
- 1/2 HP Quadra Drive DC motor
- Operator mechanics are mounted on a steel frame plated for corrosion resistance
- Two-piece Articulating Arm mechanical Slow Start/Slow Stop function.
- Gate overlap feature for dual (bi-parting) non-colliding 2-gate function
- DC power shut-off switch
- Ports for plug-in Open and Reverse Loop Detectors – DKS Detectors only
- External Obstruction Sensing Devices must be used with these Operators
- Continuous operation with AC source power

# DKS SLIDE GATE OPERATORS

**FROM ONE USER  
TO THOUSANDS OF USERS**

## SECURITY AND SAFETY FOR ONE AND ALL.

When it comes to moving medium to large gates for a single resident or a mega complex our 9000 series of Slide Gate Operators are a perfect fit. These powerhouses are designed, built and tested in the U.S. to operate for thousands of maintenance-free cycles. Long considered to be the safest Vehicular Gate Operators on the market, DKS products exceed the UL 325 safety standard and offer both electronic and mechanical systems to detect obstructions in the opening or closing path of the gate. In addition, our patented "Fail-Safe" release design is preferred by fire authorities throughout the country.

# 9000 CONTINUOUS USE SLIDE GATE OPERATORS

## POWERFUL & QUIET OPERATION

The DKS Model 9000 Slide Gate Operator offers powerful and safe access control in a small, compact design. The steel frame and belt drive/gear-box reduction system provide a powerful, yet extremely quiet, slide gate operation. The 9000 uses an advanced microprocessor control circuit with outstanding features. Designed with versatility in mind, these Operators will fit most slide gate operation requirements. These Operators are ideally used in residential, commercial or industrial high-use applications.

**Model 9000**

The powerful 9000 Slide Gate Operator is suitable for residential, commercial, and industrial high-use applications.

## KEY FEATURES:

- Direct-driven Limit Nuts for precise gate limit control
- Auto-close Timer 1-30 seconds
- Selectable Loop/Reverse Input function; stop or reverse
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Gate Tracker Reporting output provides operator data to DKS Access Control System
- Steel frame provides strength and quiet operation
- Anti-tailgating feature
- Gate Overlap feature for dual (bi-parting) non-colliding 2-gate function
- Two 115 VAC Convenience Outlets

## CONTINUOUS USE SLIDE GATE

### BUILT-IN RESIDENTIAL SAFETY FEATURES

**Model 9050/9100**

DKS 9050 and 9100 Slide Gate Operators provide durability through high-cycle usage, all in a solid design. The innovative fail-safe design of these Operators significantly reduces the chance of injury or entrapment and makes these Operators the safest residential Slide Gate Operator in the market today. Designed with versatility in mind, the 9050 and 9100 Operators can be configured for front, center or rear drive applications and can be pad or post mounted. These Operators are ideally used in residential and commercial applications.

## KEY FEATURES:

- Automatic Magnetic Limits
- Built-in mechanical and electronic Reverse System
- Built-in Power and Alarm Reset Switches
- Selectable Loop Function (stop and reverse)
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Convenience Outlets

## CONTINUOUS USE SLIDE GATE OPERATORS

### THE SAFEST WORRY-FREE SELF ADJUSTING GATE OPERATORS

**Model 9150**

This Slide Gate Operator delivers the convenience of self-setting limits with the safe operation you expect from a DKS Operator.

This Operator can be used in residential, commercial or industrial high-use applications, with an innovative fail-safe design which significantly reduces the chance of injury or entrapment and makes this the safest Slide Gate Operator in the market today. Designed to work in many configurations, this Operator can be used for front, center or rear drive applications and can be pad or post mounted.

Dual 9150 Operators at the Los Angeles Harbor Fire Department.

## KEY FEATURES:

- Electronic Magnetic Limits eliminate old-style mechanical switches that can wear out, break or fail
- Automatic Self-setting Limits mean no limit switch adjustments – ever
- Built-in mechanical and electronic Reverse System
- Special Anti-tailgating feature
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Built-in Power and Alarm Reset Switches
- Convenience Outlets
- External Obstruction Sensing Devices must be used with these Operators
- Battery-powered Convenience Open option available, which provides a method to open the gate if AC power is lost

### Large Gates

Slide Gates up to 45 ft (13.7 m),  
1500 lb (680.8 kg)  
1/2 and 1 HP - 115/208/230/460 VAC

### Entrapment Prevention

Automatically assumes fail-safe mode when an entrapment condition exists

### Partial Open

Allows long gates to open 14 ft (4.2 m) for automobile traffic, or opens gate fully for large trucks or oversized vans

**Unique Design**  
Allows easy access to all mechanical parts for easy repair and maintenance

### Fail-safe Release

Never be locked out (or in) of your property

### Convenient

Built-in power switch and reset switch

# MAXIMUM SECURITY HEAVY DUTY SLIDE GATE OPERATORS

**PROTECTION  
WHERE IT  
REALLY COUNTS**

## A HIGHER DEGREE OF PERIMETER SECURITY.

The DKS 9200 and 9500 Series of Vehicular Slide Gate Operators are ideal for airports, seaports, military bases, government buildings, border fences, and infrastructure (electric plants, water treatment facilities, dams, etc.). Advanced features on these models include anti-tailgating, adjustable mid-stop, and tamper-proof internally driven limit switches.

A solid-state speed controller features slow-start and slow-stop operation and allows the user to set the speed of the gate from 1/2 to 2 ft/sec (.15 to .61 m/sec), except model 9210, and on certain models up to 4 ft/sec (1.22 m/sec). An emergency close feature at 6 ft/sec (1.83 m/sec) is also available on certain models. These Operators can handle gates up to 160 feet (48.7 meters) in length and weighing up to 25,000 pounds (11,340 kilograms).

**Model 9200**  
Series

*Ideal for large airport gates up to 160 feet.*

*Strong motors and structure design can move gates weighing up to 25,000 pounds.*

**Model 9500**  
Series

# 9200 SERIES HEAVY DUTY MAXIMUM SECURITY

## MORE APPLICATIONS MAXIMUM SECURITY MAXIMUM CHOICES WITH SPEED CONTROLS

**Model 9200**  
Series

**Model 9200 Series**  
Pedestal Mount

DKS 9200 Series Operators are designed for maximum security applications only – such as industrial locations, loading docks, factories, prisons, airport security areas, sea ports, etc. Because of the need to prioritize security in these applications, these Operators are designed for fail-secure operation and require manual operation to open the gate in the event of a power outage. To enhance security, these Operators feature an anti-tailgating circuit and an adjustable partial open feature to help prevent unauthorized vehicle access. In addition, speed controller options allow the user to adjust the gate speed from 1/2 ft/sec up to 4 ft/sec. An Emergency Close feature is available on some models which will close the gate at 4 ft/sec. This assures your security gate is open the absolute minimum amount of time necessary.

Some 9200 Models include a heavy duty pedestal.

## KEY FEATURES:

- Advanced Microprocessor Control Board features programming switches to set the mode of operation required and includes built-in diagnostics
- Special Anti-tailgating and partial open
- Selectable Loop Function (stop or reverse)
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Warn-before-operate feature
- Built-in Power and Alarm Reset Switches
- Tamper-proof Direct Drive Limit Switches for precise gate control
- Fail-secure operation to prioritize security
- Gate Tracker Reporting output
- Convenience Outlets
- External Obstruction Sensing Devices must be used with these Operators

### Larger Gates

Slide Gates up to 100 ft (30.48 m), 8000 lb (3.6 metric ton)

Minimum gate length of 10 ft (3.04 m)

1, 2, 3 HP - 1 and 3 phase - 115/208/230/460 VAC

**Adjustable  
Partial Open**  
for different  
opening distances

**Chain Drive**  
for a direct mechanical  
connection to the gate

**Gate Tracker™**  
Provides Operator data to  
companion access controller  
(DKS 1833, 1835, 1837, 1838)

**Adjustable Speed  
Motor Drive**  
for precise control

# 9500 SERIES HEAVY DUTY MAXIMUM SECURITY

## THE WORK HORSE OF MAXIMUM SECURITY WITH RACE HORSE FEATURES

DKS 9500 series of Vehicular Slide Gate Operators are designed for use on very large and very heavy gates in maximum security applications only. These Operators must never be used in applications serving the general public. These heavy duty Operators use a high tensile steel alloy roller chain as the pulling medium, which is immune to slippage and the challenges of uneven terrain – and also simplifies installation. User can set the speed of the gate up to 4 ft/sec. (1.2 m/sec.), with an electronic braking option.

**Model 9500**  
10 Gauge  
Housing

**Model 9500**  
Series

Power to move massive gates up and down hills.

## KEY FEATURES:

- Slow Start and Stop
- Adjustable Partial Open limit
- Selectable Stop/Reverse Loop function
- Tamper-proof Direct Driven Limit Switches for precise gate control
- Built in Power and Reset Switches and 3-button Control Station (open-close-stop)
- 115 volt Convenience Outlets
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Warn-before-operate function
- External Obstruction Sensing Devices must be used with these Operators
- Available with 10 gauge heavy-duty steel housing

← up to 160 ft (48.77 m) →

### Larger Gates

Slide gates up to 160 ft (48.77 m), 25,000 lb (11.3 metric ton)

Minimum gate length of 25 ft (7.62 m)

3 and 5 HP - 3 phase - 208/230/460 VAC

### Large Gates

Gates up to 160 ft (48.7 m)  
and 25,000 lb (11,340 kg)

### Gate Tracker™

# GATE ACCESSORIES

## SWING GATE HINGES & UPHILL ASSISTS

### Swing Gate Hinge Assemblies

- Heavy-duty flange bearing Hinge Assemblies for gates up to 3000 lb (1,360 kg)
- Sealed bearing Hinge Assemblies for gates weighing 2000 and 3000 lb (907 kg and 1,360 kg)
- All Hinge Assemblies include mounting hardware and brackets

### Swing Gate Torsion Rod Assembly

- Counter-balances uphill swing gates
- Includes top bracket, bottom bracket and torsion rod
- Add up to 5 additional torsion rods for heavier gates
- Helps to prevent gate runaway

### Ball Joint Pivot Assembly

- Used to connect Operator arm when the Operator has been installed horizontally level and the gate opens on an uphill or downhill slope

Counter balance for uphill swing gates.

## SLIDE GATE END RETAINER & CHAIN IDLER ASSEMBLY

The DKS Chain Idler Assembly (or endless idler) is used with Slide Gate Operators that are installed in rear mount applications. End retainers are used to provide a catch for the gate to slip into in the closed position.

### Slide Gate Idler Assembly

- Use when rear mounting Slide Gate Operators
- Chain guide is enclosed
- Easily mounts to a wall or pilaster
- Use with #40 or #41 chain

### Slide Gate End Cap

- Heavy-duty galvanized steel
- Beveled opening
- Designed for slide gates with 2" (50.8 mm) frames
- Capped to prevent gates from being lifted off the track

Gate end cap.

## SLIDE GATE GUARDED GUIDE ROLLERS

Designed to meet the requirements of the UL 325 and ASTM F2200 standards. The rollers are fabricated from UHMW material for long-lasting quiet operation.

- Single 3" (76.2 mm) UHMW Guide Roller and mounting bracket
- Dual 3" (76.2 mm) UHMW Guide Rollers and mounting bracket
- Two single 3" (76.2 mm) UHMW Guide Rollers stacked to provide a 6" (152.4 mm) surface area and mounting bracket
- Double dual 3" UHMW Guide Rollers stacked to provide a 6" (152.4 mm) surface area and mounting bracket

*Guarded Guide Rollers.*

## SLIDE GATE WEIGHT BALANCED V-WHEELS

DKS provides a full line of V-Wheel Assemblies and replacement V-Wheels to meet any slide gate application and budgetary requirements.

*Tandem Assembly for heavy gates.*

### V-Wheel Assemblies for Standard Gates

- 4" (101.6 mm) UHMW wheel with sleeve bearing – for gates up to 500 lb (226 kg)
- 4" (101.6 mm) UHMW wheel with roller bearings – for gates up to 750 lb (340 kg)
- 4" (101.6 mm) Steel wheel with roller bearings – for gates up to 1500 lb (680 kg)

### Tandem V-Wheel Assemblies for Heavy Gates

- Two 4" (101.6 mm) UHMW wheels with roller bearings – for gates up to 1500 lb (680 kg)
- Two 4" (101.6 mm) steel wheels with roller bearings – for gates up to 3000 lb (1,360 kg)
- Two 6" (152.4 mm) steel wheels with roller bearings – for gates up to 5000 lb (2,267 kg)

### Replacement V-Wheels

- 4" (101.6 mm) UHMW wheel with sleeve bearing
- 4" (101.6 mm) UHMW wheel with roller bearings
- 4" (101.6 mm) Steel wheel with roller bearings
- 6" (152.4 mm) Steel wheel with roller bearings

**1200-006**  
3-Button Exterior

**1200-017**  
Manual Control  
Interior

## CONTROL STATIONS

Gate Operator Control Stations provide complete manual control for DKS vehicular Gate Operators. The unique logic inputs found on DKS Gate Operators require only 3 wires for connection to a 3-button control station.

### Three Button Interior

#### Model 1200-007

- Open - Close - Stop gate control
- Mounts into single-gang electric box
- All switch contacts are dry contact normally open
- Available for most DKS Gate Operators (cannot be used with Model 9000)

### Three Button Exterior

#### Model 1200-006

- Open - Close - Stop gate control
- Surface or post mount
- Available for most DKS Gate Operators (cannot be used with Model 9000)

### Gate Control Toggle

#### Model 1200-017

- Three-position control toggle for automated gates
- Center position is neutral for normal operation
- Down position is momentary contact to open gate
- Up position is toggled to hold gate open
- Mounts into single-gang electric box

### Gate Control Toggle

#### Model 1200-017

- Three-position control toggle for automated gates
- Center position is neutral for normal operation
- Down position is momentary contact to open gate
- Up position is toggled to hold gate open
- Mounts into single-gang electric box

**1402 Postal  
Lock Box**

**1400 Fire Dept.  
Lock Box**

**1401 Fire Dept.  
Lock Box**

**Transformer Box**

## LOCK BOXES & ACCESSORIES

Postal and Fire Department Lock Boxes provide a convenient method to allow postal workers and fire department personnel access to a property through an automated gate system. The 1200 Transformer Box is a great way to provide a power source for accessory transformers used with Access Control Systems.

### Postal and Fire Department Lock Boxes

- 1402 accepts standard postal key
- 1401 Fire Dept. Box accepts the Knox 3501 key switch
- 1400 accepts a Fire Dept. padlock or any standard padlock

*Lock Boxes allow quick access for fire dept. personnel.*

### Auxiliary Transformer Box

- Lockable Transformer Box
- Holds up to four 20 VA transformers
- Indoor or outdoor use
- ETL Listed

# MONITORED ENTRAPMENT PROTECTION

**RG Reflecti-GUARD**  
8080-051

**IRB-RET**  
8080-056

**Enforcer**  
8080-055

**IRB-MON**  
8080-052

## TYPE B1 NON-CONTACT SENSORS

Intended to be positioned in such a way that an obstruction in a hazardous area will interrupt the light beam. An interruption of the beam will signal the Operator to either stop, or stop and reverse motion. Complies with monitored external entrapment protection as per UL325-2016.

### Reflective Photo Eyes

Reflective Photo Optic Systems consists of an emitter/receiver unit and a reflector. Since the Reflector directs the beam back to the Photo Eye, wiring to the other side of the roadway is not required. These are typically used with shorter gates.

#### RG Reflecti-GUARD

- Infrared beam range 7-30 ft (2.1-9.1 m)
- Mounting hardware included
- Available as Relay Output or Pulsed Output
- Power: 7-30 VAC (50/60 Hz) or 10-42 VDC, 75mA

#### IRB-RET

- Pulsed near infrared light beam range 60 Ft (18.3m)
- Available with or without Reflector
- Includes mounting bracket with hardware
- Operates over a wide range of 6-35 VDC and 12-24 VAC

#### ENFORCER

- Mounting bracket and Reflector housing included
- Adjustable range up to 45 ft (14m)
- 12-30V DC/AC 60Hz, 100mA

### Thru-Beam Photo Eyes

Thru-Beam Photo Eye Systems consist of one Infrared Emitter and one Infrared Receiver housed and powered in separate units. These are typically used with longer gates.

#### IRB-MON

- Infrared LED beam range 115 ft (35m)
- Includes Emitter and Receiver
- Mounting bracket, other options available separately
- Operates over a wide range of 6-35 VDC and 12-24 VAC

**Prime-GUARD**  
8080-050

## TYPE B1 NON-CONTACT SENSORS

### PG Prime-GUARD

#### Emitter:

- 50 ft (15.2 m) and 100 ft (30.5 m) battery models and 100 ft (30.5 m) wired model
- Mounting brackets and hardware included

#### Receiver:

- Available as Relay Output or Pulsed Output
- Front-mounted green LED alignment light
- Top-mounted LED lights for power, low battery, fault
- Power supply: 7-30 VAC (50/60Hz) or 10-42 VDC, 100mA
- Optional extension pedestal available

**Contact Sensing Edges**

## TYPE B2 CONTACT SENSORS

Complies with monitored external entrapment protection as per UL325-2016.

### Contact (Type B2) Sensing Edges

- A variety of edge styles for different gates
- Mounting channels included
- T2 (resistive) termination

**Monitored Gate Link**  
8080-009

## CONTACT SENSOR ACCESSORIES

### Wireless Monitored Gate Sensing Edge (Type B2) Link

Provides a wireless connection between a Monitored Safety Edge and an Operator that controls the associated gate.

- Includes Transmitter, Receiver and Antenna
- Includes Transmitter 2 AA batteries
- Receiver power 12-24 VAC/DC nominal (8-30V max); power may be supplied from the Operator or from an external supply
- Meets UL325-2016 requirements for monitored devices

**MIM-62**  
8080-079

### MIM-62

#### Multi-Input Module

Accepts up to 6 separate entrapment protection devices and connects them to either of two outputs. Is compatible with either Type B1 or B2 devices.

- Powered from any 12 or 24 volt source, AC or DC, that can supply at least 100mA

# GATE ACCESSORIES

**Single and Dual Channel  
Loop Detector Boards**

**Loop Test Meter**

**Loop Wire**

## LOOP DETECTORS

### Vehicular Loop Detector Systems

- Plug-in Detectors (DKS Gate Operators only) and hard-wired Detectors
- Single and dual channel
- Pre-fabricated loops, 24 ft (7.3 m) circumference and 50 ft (15.24 m) lead-in
- Pre-fabricated loops available, or form your own loops

### Loop Test Meter

- Megohm meter measures loop insulation value up to 1000 megohms
- Meter range is 20 to 1000 megohms
- Operates on two C batteries
- Includes test leads and vinyl case

### Loop Wire

- 18 AWG, XLPE insulation
- Available in 500 and 1000 ft (152.4 and 304.8 m) rolls, black, blue and red
- Prefabricated loops also available

## WIRE LOOM CONNECTOR

(Bi-parting gate connection cable)

- Cable provides all the necessary connections for bi-parting (dual) gate systems to sequence the primary and secondary Operators together

Connection Cable

## HEATER KIT & FAN KIT

### Heater KIT

- Ideal for Operators installed in cold weather environments. A built-in thermostat automatically cycles the heater on and off as required

### Fan Kit

- Used with the 1600 Series Barrier Operators, this fan kit should always be used when the Operators are installed in hot/humid environments

Model 1601-154  
Heater with Fan

Model 1601-093  
Fan Kit

## GEAR GREASE

### Gear Grease

- 14 oz tube of Molybdenum Disulfide (Moly D) multi-purpose grease keeps the worm gear in 6000 Series Operators lubricated

# BARRIER GATE SAFETY

**IT'S AWARE,  
EVEN WHEN  
THEY'RE NOT**

## LOOP LOGIC SAFETY SYSTEM.

In today's busy world, people often forget to pay attention to their surroundings and can inadvertently place themselves in harm's way. DKS Barrier Gate Operators (1601, 1602, 1603) offer a Loop Logic Detection System that knows when to allow the Barrier Arm to come down - or not. Protect the integrity of the parking facility and prevent those inadvertent accidents from happening. After all, you have better things to do than deal with liability issues.

*Raises if person is detected.*

*Lowers if unauthorized vehicle enters.*

JUST BECAUSE  
THEY DON'T

Lighted  
Arms

Breakaway  
Arms

## BREAKAWAY AND LIGHTED BARRIER ARMS.

The perfect solution to reduce maintenance costs, DoorKing's Breakaway Hardware Kit for Model 1601 Barrier Gate Operators prevents costly Arm replacements by allowing the Arm to swing out of the way in the event that a vehicle fails to stop at a lowered Arm. The system is easily reset by simply snapping the Arm back into place.

The Breakaway Kit is designed for Aluminum Arms only and can be set to breakaway from either side of the cabinet.

The Breakaway Hardware Kit can be used in conjunction with the DKS Aluminum Lighted Barrier Arm. Lighted Arms are a great way to enhance safety and increase visibility, the energy efficient LED lamps are recessed behind the red/white warning tape on the DKS round Aluminum Barrier Arms.

*Arm releases on impact.*

*Once broken away, the Barrier Arm easily snaps back into place.*

# 1601 BARRIER GATE OPERATOR

## HIGH USAGE SINGLE LANE TRAFFIC CONTROL

**Model 1601**  
Barrier Gate

The Model 1601 is for high usage single-lane vehicular traffic control. Typical applications include commercial, industrial, gated communities and apartment complexes. A quick 1.5 second rotation opening time, along with rugged construction and multiple optional features make this 1601 a versatile answer to many parking control problems.

These Operators are designed so that they can be mounted on either the left or right hand side of the roadway. A battery powered Convenience Open option is available, which provides a method to open the gate if AC power is lost.

Loop Logic

Breakaway  
Arms

Lighted

*Battery-powered Convenience Open option available, which provides a method to open the gate if AC power is lost.*

## KEY FEATURES:

- Magnetic limit control
- Up Input memory buffer
- Down Memory option
- Multiple Up commands
- Two Convenience Outlets
- Gate Tracker Reporting output
- Programming Switches
- Built-in Power On/Off Switch
- Left or right hand mount
- Fan/Heater Kits
- 40:1 gear-box running in a continuous oil bath
- 360° gear box rotation
- Barrier Arms up to 14 ft (4.26 m) available
- Aluminum Arms available with lighted and breakaway options
- Aluminum Barrier Arms available in easy-to-ship 2-piece 7 ft (2.13 m) lengths
- Wood and Plastic Arms are also available

### Standard Traffic Lane

Maximum Barrier Arm length 14 ft (4.3 m),  
1/2 HP - 115/230/460 VAC

### DKS Loop Logic

It's aware - even when they're not

### Left or Right Hand Mount

Operators are designed so they can be mounted on either the left or right hand side of the roadway

### Perimeter Access Management System

Automatic sequencing inputs for use with Slide and Swing Gate Operators

### Lighted Arms

For added visibility & safety (aluminum only)

### Breakaway Arm Option

Reduces maintenance costs (aluminum only)

# 1602 BARRIER GATE OPERATOR

## TRAFFIC CONTROL BARRIER OPTIONS THAT FIT ANY APPLICATION

**Model 1602**  
Barrier Gate

The Model 1602 is for limited-use applications such as industrial sites and loading dock areas, designed to control wide traffic lanes. The heavy-duty Harmonic Arm Linkage assures smooth and accurate Arm travel of 90° in approximately 5.5 seconds.

These Operators are designed so they can be mounted on either the left or right hand side of the roadway. Battery-powered Convenience Open option available, which provides a method to open the gate if AC power is lost.

Loop Logic

Lighted  
Arms

The 1602 covers massive lanes up to 27 ft.

## KEY FEATURES:

- Magnetic Limit Control
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Automatic sequencing inputs for use with Slide and Swing Gate Operators
- Up Input memory buffer
- Down Memory option
- Multiple Up commands
- Two Convenience Outlets
- Gate Tracker Reporting output
- Programming Switches
- DC-powered Convenience Open option
- 3-piece wishbone style Aluminum Arms available in 20, 24, and 27 ft (6.1, 7.3, 8.2 m) lengths
- Aluminum Arms available with lighted option
- Wood 3-piece wishbone style Arm available in 20 ft (6.1 m) length

### Wide Traffic Lanes

Maximum Barrier Arm length 27 ft (8.2 m),  
1 HP - 115/230/460 VAC

### DKS Loop Logic

It's aware - even when they're not

### Left or Right Hand Mount

Operators are designed so they can be mounted on either the left or right hand side of the roadway

### Perimeter Access Management System

Automatic sequencing inputs for use with Slide and Swing Gate Operators

### Fan and Heater Kits

Several options for extreme weather conditions

### Wishbone Style Aluminum

Arms up to 27 ft (8.2 m) in length

# 1603 BARRIER GATE AUTO SPIKE SYSTEM

## FOR A HIGHER DEGREE OF TRAFFIC CONTROL

The DKS 1603 Barrier Gate Operator Automated Spike System is designed as a modular system, allowing for easy flexibility in different applications and easy installation. The 1603 Operator is designed with many advanced features and mechanically links the Spikes to the Barrier Arm. Ideal for parking lots, rental car agencies, schools, car dealerships, government agencies, or in any application where a higher degree of traffic control is preferred.

A typical system will require the 1603 Operator, a Drive Extension, Tunnel Section(s) as needed, Spike Section(s) as needed, and an end cap. A Traffic Signal and/or Warning Sign is required with this system. Contact your professional DKS system installer, or DoorKing directly, for more information on complete system requirements.

**Model 1603**  
Barrier Gate

Loop Logic

Lighted  
Arms

The above-ground Automated Spike System installs quickly and easily anywhere for flexible traffic control.

## KEY FEATURES:

- Magnetic Limit Control
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Automatic sequencing inputs for use with Slide and Swing Gate Operators
- Up Input memory buffer
- Down Memory option
- Multiple Up commands
- Two Convenience Outlets
- Gate tracker reporting output
- A Traffic Signal and/or Warning Sign is required with this System
- Programming Switches
- Built-in Power On/Off Switch
- 40:1 gear-box running in a continuous oil bath
- Barrier Arms up to 14 ft (4.26 m) available, with low ceiling Folding Arm Kit options
- Aluminum Arms available with lighted option
- Aluminum Barrier Arms available in easy-to-ship 2-piece 7 ft (2.13 m) lengths
- Wood Arms also available

### Medium Security Traffic Lanes

Maximum Barrier Arm length 14 ft (4.3 m),  
1/2 HP - 115/208/230/460/575 VAC

#### DKS Loop Logic

It's aware - even when they're not

#### Drive extension safety design

Flexible shaft drive keeps Spikes operable and eliminates down time from breakage

#### Warning Sign and Signal Light

Sign warns drivers and Signal Light (red/green) is synchronized with the Barrier Arm

#### Surface Mount

Spikes install easily without trenching and double as a speed bump

#### Fan and Heater Kits

Several options for extreme weather conditions

# 1601 HIGH SECURITY LANE BARRIER

## COST SAVINGS IF YOU DON'T NEED A CRASH SYSTEM

### Surface Mount Lane Barrier Accessory\*

The DKS Lane Barrier Accessory System is an easy add-on to the popular 1601 Barrier Gate Operator.

The Lane Barrier is ideal in applications where a higher degree of vehicle traffic control is desired, but without the expense of bollards, wedges or crash beams – making it ideal for apartment communities, gated condominiums, car rental agencies, parking lots and toll booths.

\*This Lane Barrier System is not crash rated. It is intended to provide a formidable barrier to help prevent vehicles from driving through a controlled traffic lane.

**Model 1601**  
Barrier Gate Operator and  
Lane Barrier Option

Reinforced steel helps prevent vehicle barrier runners.

## KEY FEATURES:

- Surface mount for quick, easy installation
- Integrated lighted Barrier Arm and Lane Barrier for high visibility
- Fast speed - raises and lowers in less than 2 seconds
- Simple mechanical linkage to DKS 1601 Barrier Gate Operator keeps Barrier Arm and Lane Barrier in sync - no separate motors or hydraulic valves to worry about
- Available for lane widths of 9, 10, 12 and 14 ft (2.74, 3.0, 3.66, 4.27 m)
- System includes red/green Traffic Control Signal, and Type B1 Entrapment Prevention Photo Eye
- Installs for thousands of dollars less than crash rated systems

### High Security Traffic Lanes

Maximum lane width 14 ft (4.3 m),  
1/2 HP - 115/230/460 VAC

#### Add-on

Adapts to the existing  
DKS 1601 Operator

#### Steel Barrier Arm

Rotates into Surface Mount  
Speed Bump for easy  
vehicle entrance

**Heavy-Duty**

# 1175 OVERHEAD DOOR/GATE OPERATOR

## INDUSTRIAL STRENGTH PARKING STRUCTURE LOW PROFILE

**Model 1175**  
Overhead Operator

The DKS 1175 Overhead Gate Operator is designed for high traffic underground parking applications serving gated communities, apartment complexes, commercial buildings and industrial sites. An optional cover is available. This Operator is not designed for residential applications and should never be used to operate overhead sectional garage doors.

*The solid steel frame and belt-driven gear box make this Operator one of the quietest in the market today (shown with optional cover).*

## KEY FEATURES:

- Low profile (only 9.25 inches - 23.5 cm) design makes the 1175 ideal for low clearance underground parking areas
- Advanced Microprocessor Control Board
- Ports for plug-in Open and Reverse Loop Detectors (DKS Loop Detectors only)
- Selectable Loop Function (stop or reverse)
- Auto-close timer 1-23 sec. Timer Override feature helps prevent tailgating
- Gate Tracker Reporting output
- Built-in Power Switch
- External Obstruction Sensing Devices must be used with these Operators
- Direct Driven Limit Nuts for precise gate control
- Available with or without cover

### Medium Gates

Swing gates up to 25 ft (7.6 m),  
2000 lb (907 kg)  
1/2 and 1 HP -  
115/208/230/460 VAC

*Side view showing gate retraction.*

### Plug-in Loop Detectors

Simplify wiring and make installation easy

### Keyed Manual Release

For heavy-duty trolley in case of power failure

### Direct Drive Limit Switches

Easily adjustable, no need to reset after power outage

### Shock Mounts

Greatly reduce noise & vibration

### Low Profile

For low-clearance underground parking

# TRAFFIC CONTROL ACCESSORIES

## 1610 WARNING SIGNS & SIGNAL LIGHT

Warning Signs and Traffic Signals are used with Traffic Control Spikes and Auto-Spikes to inform drivers that a one-way lane condition exists and that proceeding in the wrong direction - or before the Spikes are fully retracted - will result in severe tire damage.

Warning Signs and/or Traffic Signals must always be used in any traffic control application utilizing Traffic Control Spikes.

### KEY FEATURES:

#### Warning Signs

- Warning Sign includes Automatic Light Sensor
- 2 T8 LED bulbs, 20 watt, 700 lumens
- Floodlight LED 9 watt, 655 lumens
- Mounts on 3.5" (88.9 mm) post

#### Signal Light

- Red/Green Traffic Signal can be synchronized with most Vehicular Gate and Barrier Gate Operators
- Large 8" (203.2 mm) red/green lenses
- LED bulbs, 10 watt, 1300 lumens

## 1610 STAND ALONE TRAFFIC SPIKES

Traffic Control Spikes are ideal for controlling traffic direction and speed through a controlled entry location. Traffic Spikes prevent vehicles from proceeding through a traffic lane in the wrong direction by enforcing one-way traffic lanes. Speed bumps force drivers to slow down while driving through the controlled entry point. They are also ideal for keeping vehicular traffic at a safe speed while driving over Traffic Spikes.

Warning Sign must be installed with all Traffic Spikes.

### KEY FEATURES:

#### Flush Mount

- Spring-loaded or counterweight (non-spring) models available
- Each Spike is independently spring-loaded or weighted
- Available in 6' (1.82 m) sections

#### Speed Bump

- Solid composite material provides a long service life

#### Surface Mount

- Modular System can accommodate any traffic lane width
- Spikes are ganged 3 and 4 Spikes together
- Lock down allows for temporary two-way traffic
- Spikes are available in 3 ft (0.91 m) sections

# 1000 POWER INVERTER & BACK UP

**Model 1000**

## NO POWER NO PROBLEM

The Model 1000 Power Inverter provides backup power for a single-gated Access Control System when primary AC power fails. Maintain a fully operational Access Control System during power outages and brown-outs. Ideal for residential and commercial applications with a single-gate system.

*Model 1000 can run your Access Control system during power outages.*

*Backup power for a single-gated Access Control System when primary AC power fails.*

## KEY FEATURES:

- Can back up the whole Access Control System
- For use with 1/2 HP, or less, Gate Operators (not for use with DKS Actuators)
- Battery charger during normal operation
- Converts 12 VDC power to 120 VAC output voltage
- Cabinet contains room for two 35 Ah Sealed Lead Acid (SLA) batteries
- Low Battery Alarm
- Two models to choose from: pure sine wave, or modified sine wave

## EASY CONNECTION - YOUR CHOICE!

DoorKing's 1830 Series (1833, 1834, 1835, 1837, 1838) and Access Plus Series (1802AP, 1808AP, 1810AP, 1812AP, 1838AP) offer several methods of connection for both Voice and Programming. The DKS Standard Series of Entry Systems (1802, 1803, 1808, 1810, 1812, 1838) offer a Cellular option, along with the traditional POTS copper wire, for voice only.

## CELLULAR WIRELESS

Use the DKS Cellular Option™ for complete Programming and/or Voice service over the Cellular network! Easy to install and set up with instant access. No more phone lines or ethernet cables to run, and no more trenches to dig! Can be retrofit to existing units.

## ETHERNET

Both the DKS 1830 Series and Access Plus Systems now work with most VoIP providers. Easy set up using the DKS Internet Option™, or you can set up the service yourself. VoIP provides reliable voice communication and Programming via your internet connection.

## TELEPHONE LINE

POTS (Plain Old Telephone Service) lines provide traditional voice communication, as always. Add Programming (data) for the DKS 1830 and Access Plus Series with the DKS IM Server Modem™ interface.

Access Plus  
Software

## CONTROL YOUR ENTRY SYSTEM WITH DKS SOFTWARE.

DKS Telephone Entry Software gives you the freedom to work when and where you want. From remote bookkeeping and access, to security control on the ground - and everything in between. You can even receive confirmation so you always know when your transaction is done. Complete turn-key Access Management Solutions.

The DoorKing Software is powerful, flexible, and easy to use, which allows you to easily manage access control in a variety of applications from single access residential to complex gated communities, apartment and condominium buildings, and industrial sites. DKS software is available as free downloads.

DKS 1830s Account Manager Software is for the 1830 Series of Telephone Entry Systems, and the DKS Access Plus Account Manager Software is for the DKS Access Plus Series - both of which are PC compatible.

# DKS SOFTWARE TELEPHONE ENTRY

## Live Relay Control

Real time open with the touch of a button

## Immediate & Scheduled Data Transfers

Instant or automatic scheduled transferring and receiving of user information & event activity transactions between the software program and entry device

## Facility Counter

Indicates how many card holders are in your facility at any time

## Holiday Schedule

Scheduled Hold Open time zones can be overridden during specified holidays

## Device Association

Assigns a group label to access codes for easy identification. "Mass Enable" turns on a specified range of codes at a time

Account Manager Software

Access Plus Software

### Live Transactions

View transactions through the software as they happen

### Facility Access Codes

Assures that duplicate codes from other facilities cannot work at your facility

### Anti-Passback

Prevent multiple people from using a single card. Access Cards must enter through the IN point and exit the OUT point before being used at the IN point again

### Hold Open

Up to 8 time zones can be created to hold open a door or gate at a controlled access point

### Elevator Control

Set restrictions for elevator use, allowing residents or employees access to designated floors

## WHO, WHEN, WHERE.

The DKS 1830 Series of Telephone Entry and Access Control Systems are suited for a wide variety of applications. Simple to use, yet these PC Programmable Systems are sophisticated enough to provide service for up to 3000 users, control up to 16 entry points, and they can store the last 8000 events in their history buffer so you know the “three Ws” of access control: who, when, where. With expanded optional capabilities, you can even add true anti-passback and elevator control.

You can now program online 24/7, giving you the freedom to work when and where you want. From remote bookkeeping and access, to security control on the ground – and everything in between. You even get confirmation to your PC so you always know when your transaction is done. Each 1830 Series unit allows Voice and Data connection over either Cellular, internet, or POTS.

A complete turn-key Access Management Solution, along with a national dealer and support network of more than 4000 strong.

# 1838 PC PROGRAMMABLE MULTI-DOOR ACCESS CONTROLLER

## A SIMPLE LITTLE BOX DELIVERS SO MUCH

### Seamless access for even the most complex facilities.

The DKS 1838 Multi-door Access Controller is ideal for small businesses, office buildings, factories, industrial sites, apartment complexes, or for any application that requires access control and reporting capabilities. The 1838 is a 3000 user, 3-door Controller that easily expands to control up to 24 doors with Tracker Expansion Boards.

This flexible System allows access control to 8000 Device Codes by means of Cards, Keypads, Wireless RF Transmitters, or with almost any 26-bit Wiegand Device.

DKS Remote Call Stations can also be added to the 1838 to provide communication from an entry point to a designated phone.

#### OPTIONS FOR VOICE AND PROGRAMMING

Programmable

Account Manager  
Software

Keep access control simple with over 8000 Device Codes, for areas where voice access is unnecessary.

## KEY FEATURES:

- Can connect for Voice and Programming by any of these methods: Cellular, Internet, POTS
- Programming and transaction analysis software available as a free download
- Unlock doors and hold open gates using any DKS app enabled mobile device
- Live transactions as they happen (dependent on connection method)
- Share information across other DKS Systems
- Immediate or scheduled data transfers
- Import/Export database in CSV format
- Call Stations provide communication via the telephone network from an entry point to a designated office
- Elevator control is also an available option
- Provide voice communication from an entry point to a designated phone

Model	Phone Numbers (users)	Entry Codes <sup>1</sup>	Device Codes <sup>2</sup>	Door Control <sup>3</sup>	Max Transactions	Elevator Control
<b>1838</b>	3000	3000	8000	3	8000 Events	Up to 8 Elevators, 64 Floors per elevator

1. Four-digit entry codes grant access when entered on the System Keypad only.
2. Five-digit Device Codes refer to Entry Devices (Cards, Clickers, or Keypads) connected to an Access Controller.
3. Expands to 24 entry points with Tracker Expansion Boards.

### IP Addressable

Easily register online and begin programming right away

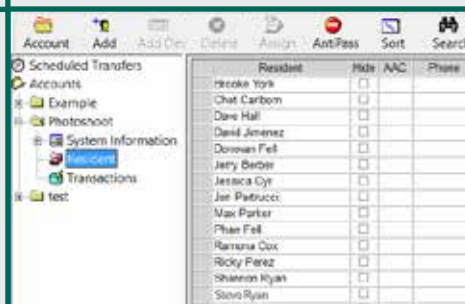

### Expandable

Up to 24 access points with Tracker Expansion Boards, wired or wireless

### Software Download

Database import/export capability

### Voice and Remote Programming

# 1830 SERIES TELEPHONE ENTRY EXPANSION

## ELEVATOR CONTROL, & ADD ENTRY POINTS

**Model 2348**  
Elevator Control

**More doors and elevators? Customize your Access Devices to your space.**

The DKS 2348 Elevator Control System provides complete elevator security typically used in high rise condominium, apartment, or office building applications to restrict which floors visitors and building residents have access to.

**Model 2358**  
Tracker Expansion

Model 2358 "Tracker" Expansion Boards are used with Models 1833, 1835, 1837 and 1838 Access Controllers to expand these Systems to control up to 24 entry points.

Wireless Tracker Expansion Boards are used with DKS Models 1833, 1835, 1837 and 1838 to expand these Access Controllers to control up to 24 entry points. Save time, labor and money by connecting Card Readers and Keypads to the 1830 Series Controllers without the need to run wiring from each unit.

Programmable

## KEY FEATURES: COMPLETE ELEVATOR SECURITY

- Restricts which floor a visitor has access to
- Programming to restrict residents to certain floors, or grant them access to all floors
- Elevator users must have a valid Access Card to access restricted floors
- Control up to eight elevators, with each elevator serving up to 64 floors
- Call function automatically sends elevator to ground floor when access has been granted

## WIRELESS EXPANSION KITS

- Provides a wireless link between Card Readers, Keypads (or almost any 26-bit Wiegand Device) and the 1830 Series Access Controller
- Secure RF Transmission with up to 500 ft (152.4 m) range
- Wireless Boards also act as a repeater, sending information to and from each other and the Access Controller
- Repeater Stations relay information to and from the Controller when greater distances are required
- 16 channels and network IDs
- Adjustable RF signal strength
- Encrypted

## TRACKER EXPANSION BOARDS

- Expand capacity as needed, control up to 24 entry points (each Tracker Board controls one entry point)
- Provides power and inputs for almost any 26-bit Wiegand Device
- Request-to-Exit input
- Door Ajar and Forced Entry Alarm outputs
- Hold Open command input
- Also used with DKS Gate Operators to provide Gate Operator data to the Access Control System

**Wireless Expansion**  
can retrofit to existing 1830 Series units

**PC Programmable**  
with the 1830 Series Account Manager Software

**Wireless Repeater**  
Stations for greater distances between the Controller and Access Device

**Elevator Capacity**  
Easily expands to control 8 elevator shafts with up to 64 floors each

# STANDARD & ACCESS PLUS TELEPHONE ENTRY

**SINGLE UNIT  
RESIDENTIAL  
TO COMMERCIAL  
MID-SIZE**

## STANDARD

The DKS Standard Telephone Intercom Entry Communication and Access Control Devices provide homeowners with two-way voice communication and access control of a door or gate. Suited for residential as well as commercial applications where visitors are easily identified by voice and can be granted or denied access directly from a telephone.

These simple and cost effective Systems are available from the very basic 1819 Information Phone with only a single phone number for direct voice communication, to the more sophisticated 1810 Model which can provide service for up to 600 residents.

1802, 1802-EPD, 1803, 1819, 1808/1810, 1812 Classic and Plus.

## ACCESS PLUS

The Access Plus Telephone Entry line offers many of the same features as a full blown Access Control System, but for smaller applications at a much lower cost. These are PC Programmable Systems that are designed for up to 27 users, can control two entry points and are easily expandable to control an additional six entry points.

PC Programming allows you to customize your access control system. After installing the Access Plus Account Manager Software (available as a free download), you can connect to the System via Cellular, internet, or copper telephone wire and begin to customize the System immediately.

Entry points are controlled with Card Readers, Keypads, or RF Controls.

Ideal for residential, small apartment, condominium, gated community and business applications. It can be used as an auto-dialer Telephone Entry System, a "no phone line" Telephone Intercom System, or as a Card Access Control System.

The DKS 1802 Series are an ideal Telephone Entry System that is suited for applications that have limited space and can be used in residential as well as commercial applications. Visitors are easily identified by voice communication and can be granted or denied access directly from a touch-tone telephone.

The 1802 Standard is best suited for applications that do not require a directory, or in applications where a separate directory exists. The DKS 1802-EPD with built-in Electronic Programmable Directory eliminates the need for external or add-on directories.

OPTIONS FOR VOICE ONLY

### 1802 Standard:

600 phone number memory  
Single-line programming display uses super-twist LCD with 5/16-inch (7.9 mm) characters. Indicates door gate has been opened.

### 1802-EPD:

100 name and number memory capacity  
Built-in A-Z scroll buttons and CALL button  
Single-line electronic directory uses super-twist LCD with 5/16-inch (7.9 mm) characters

## KEY FEATURES:

- Voice only Cellular wireless connection option
- Full-Duplex Communication
- Programmable directory codes (1-4 digits)
- 10 and 11-digit dialing capability
- Two special inputs can be programmed for relay activation or dial-out function
- Built-in clock provides automatic relay activation
- Time zone restrictions on selected entry codes
- Two relays for door/gate control
- Built-in postal lock provision

## SELF-CONTAINED TELEPHONE ENTRY SYSTEM

The DKS 1810 is an ideal Telephone Entry System that is suited for a wide variety of applications. The built-in lighted directory makes it a complete all-in-one compact unit and it is easy for managers to update by using a word processing program. Visitors are easily identified by voice communication and can be granted or denied access directly from a touch-tone telephone. Perfect for small to medium-sized apartment buildings, gated communities, condominiums, office buildings, factories and industrial sites.

OPTIONS FOR VOICE ONLY

Model	Phone Numbers (users)	Directory	Entry Codes <sup>1</sup>	Device Codes <sup>2</sup>	Door Control <sup>3</sup>	PC Programmable	Temp Codes	Holiday Schedules
<b>1810</b>	600	Paper	1000	-	2	No	5	No
<b>1810-AP</b>	27	Paper	50	100	2 <sup>3</sup>	Yes	10	Yes

1. Four-digit entry codes grant access when entered on the System Keypad only.
2. Five-digit Device Codes refer to Entry Devices (Cards, Clickers, or Keypads) connected to an Access Controller.
3. Plus six additional Card Readers, Clickers, or Keypads.

## KEY FEATURES:

- Provides service for up to 600 residents
- Built-in display indicates door/gate has been opened
- Full-Duplex Communications
- Programmable directory codes (1-4 digits)
- Two special inputs can be programmed for relay activation or dial-out function
- Built-in clock provides automatic relay activation
- Time zone restrictions on selected entry codes
- Two relays for door/gate control
- Built-in Postal Lock provision

## THE #1 SELLING TELEPHONE ENTRY

Access Plus

Standard

## FROM SIMPLE TO FULLY PROGRAMMABLE

The DKS 1812 Series includes the Classic, Plus, and Access Plus models. Introduced in 1988, the DKS 1812 revolutionized the residential Telephone Entry System market by eliminating the need for a separate telephone line for the entry system. This DKS Telephone Entry line is the best selling single family intercom system, with well over 100,000 units sold to date.

## IDEAL FOR SINGLE FAMILY & SMALL BUSINESS

The 1812 Series is a unique Telephone Intercom System that allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate without having to pay for an additional telephone line at their home. With its "intercom mode" programming feature, the 1812 can also be connected to a PBX or KSU type system, making it ideal for small businesses to control access through a single door or gate.

OPTIONS FOR VOICE ONLY

## KEY FEATURES:

- Allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate
- Connects directly to existing telephone line with no additional monthly expenses for separate lines from the phone company
- Control two doors or gates via the touch-tone telephone after voice communication is established with guest
- Calls from the 1812 are easily identified with a unique double-ring
- Built-in call waiting feature assures that incoming calls or guest calls are never missed

# 1816 | 1820 MULTI-LINE TELEPHONE INTERCOM SYSTEM

## SEAMLESS INTEGRATION FROM PHONE TO ENTRY POINT

Model 1816

Model 1820

The 1816 and 1820 Telephone Intercom Systems offer outstanding features that allow the resident to be in charge of their calls and can interface with up to 1200 phone lines. Ideally suited for apartment buildings, college resident halls, high rise condominiums, office buildings, and public housing authority projects where controlling access into the building is an essential part of a security program.

### KEY FEATURES:

#### Model 1816

- Full-Duplex communication
- Double-ring feature identifies visitor calls from regular incoming phone calls
- Programmable directory codes
- Interfaces with up to 1200 individual phone lines
- 10 programmed call out numbers (requires central office line)
- Doorman phone input, and built-in call waiting
- No reprogramming of the system is required when one resident moves out and another moves in

#### Model 1820 - All of the same standard features of the 1816 plus:

- Tenant can call to the Doorman or Concierge
- Programmable call waiting by tenant
- Enable or disable Do Not Disturb feature
- Caller ID identifies entry panel, Doorman, etc.
- Call forwarding is programmable for each tenant

#### Uses Existing Telephone System

Doesn't require dedicated central office phone line to establish communication

#### Call Feature

Simple two-button Call Down feature allows for connecting directly to the concierge (1820)

# 1819 SINGLE CALL INFORMATION SYSTEM

**Model 1819**

## ONE BUTTON VOICE COMMUNICATION

The DKS 1819 is an Information Telephone that is suited for applications that require only a single phone number to be called. Visitors simply press the single CALL button to establish communication and are easily identified by voice communication. Access can be granted or denied directly from a touch-tone telephone.

Model	Phone Numbers (users)	Door Control <sup>3</sup>
<b>1819</b>	1	1

OPTIONS FOR VOICE ONLY

**Single CALL**  
with the push of a button

**Control Access**  
with a simple push of a button on  
your touch-tone telephone

**Full-Duplex**  
High quality communication - the  
same standard that the phone  
company uses

**Manual Keypad  
Programming**

## KEY FEATURES:

- An information telephone for applications that require only a single phone number to be called
- Access can be granted or denied directly from a touch-tone telephone
- Full-Duplex communication
- 10 and 11-digit dialing capability
- Single CALL push button
- EEPROM memory
- Power transformer included
- Built-in Postal Lock provision
- Visitors simply press the single CALL button to establish communication and can be easily identified by voice communication
- Manual keypad programming

# 1838 ACCESS PLUS ACCESS CONTROLLER

## ACCESS CONTROL WITHOUT VOICE CONTACT

**Model 1838**  
Access Plus

The 1838 Access Plus is ideally suited for small businesses and mixed use buildings where visitor voice communication and Access Control is not a requirement. The 1838 AP can control up to six entry points with Card Readers, Keypads, MicroPlus RF Receivers, or Relay Boards, (allows use of existing 26-bit devices). Additionally, two Auxiliary Relays on the main control board can be activated from the PC to control other devices or access control equipment (a Gate Operator for example).

OPTIONS FOR VOICE AND PROGRAMMING

### IP Addressable

Program directly from your PC, software available as a free download

### Plug & Play Connection Services

Cellular and VoIP for Voice and Data (remote programming)

## KEY FEATURES:

- PC Programmable via Cellular, Internet, or copper POTS lines
- Ideal where visitor voice communication is not a requirement. Tenants do not need central office phone service to be connected.
- Four Hold Open time zones, schedule un-lock/lock times, email notifications, and more
- Control two doors or gates, and add six additional entry points - using Card, Keypad, or Proxy RF Devices

Model	Phone Numbers (users)	Entry Codes <sup>1</sup>	Device Codes <sup>2</sup>	Door Control <sup>3</sup>	Max Transactions	Temp Codes	Holiday Schedules
1838-AP	3000	1000	100	2	500 Events	10	Yes

1. Four-digit entry codes grant access when entered on the System Keypad only.

2. Five-digit Device Codes refer to Entry Devices (Cards, Clickers, or Keypads) connected to an Access Controller.

3. Plus six additional Card Readers, Clickers, or Keypads.

# 1816 ACCESS PLUS SYSTEM EXPANSION

## INTERCOM SERVICE FOR UP TO 23 PHONE LINES

**Model 1816**  
Access Plus

The DKS 1816 Access Plus Telephone Intercom System allows the Access Plus System to provide voice communication between the guest and the tenant in facilities without active phone service, and does not require a dedicated central office phone line. The “No Phone Line” Telephone Intercom interface can expand from a single phone line up to a maximum of 23 phone lines.

**Allows Voice Communication**  
In facilities without active phone service

### KEY FEATURES:

- This is not a stand-alone system; it must be interfaced with an Access Plus Controller
- System can interface with up to 23 individual phone lines
- Double-ring feature identifies visitor calls from regular incoming phone calls
- No reprogramming of the System required when one resident moves out and another moves in
- Full-Duplex communication
- Built-in call waiting

# MOUNTING POSTS & KIOSKS

## VEHICLE OR PEDESTRIAN

DKS offers a full range of mounting posts, whether it's for vehicular traffic or pedestrian traffic requirements. Architectural and designer style Posts are typically used with the larger Telephone Entry Systems and are available in gooseneck/offset styles for vehicular traffic or straight styles for walk-up pedestrian use. The mounting Kiosks are ideal for walk-up pedestrian applications.

**Kiosk 1200-170**

**Kiosk 1200-160**

**Kiosk 1200-175**

**Standard  
Dual Mount**

**Standard Gooseneck**

## Standard Post

The Standard Posts are used with Card Readers, Keypads, and smaller Access Control Devices; DKS 1808, 1812 Series Telephone Entry and 1504, 1506, 1520, 1524, 1515 Keypads, etc. (adapter plate available to mount DKS 1802, 1802EPD, and 1819 Telephone Entry Systems).

A dual-height style is also available for applications that have both vehicular and truck traffic using the System.

## Architectural

Mounting face for full size Telephone Entry Systems: 1830 Series, 1803, 1810.

Small mounting face for Card Readers, keypads and smaller Access Control Devices (adapter plate available to mount DKS 1802, 1802EPD, and 1819 Telephone Entry Systems).

## Kiosk

Designed for walk-up pedestrian applications, these Kiosks are for use with flush style DKS Telephone Entry Systems only; 1830 series, 1803, 1810. Ultra-bright energy-saving LEDs illuminate the Entry Systems.

## Designer

The Designer Posts have a mounting face for full size Telephone Entry Systems: 1830 series, 1803, 1810. There is also an optional light extension for exceptional illumination.

Both Designer and Kiosk units have a lockable electrical panel on back which holds four Transformers, three Surge Suppressors, and an RF Receiver.

Optional Light Assembly and Light Tower for Designer style

## ADD-ON DIRECTORIES

### Lighted Model 1710 Surface and Flush Mounts

- Create your own directory print out
- Single-sheet directory easily slips into lighted enclosure
- Number of names on the directory is dependant on type and font size used

### Non-lighted Models 1701/1702 Surface Mount

- Provides 1/4-inch slots for resident names to be inserted
- 1701 holds up to 20 names, 1702 up to 60 names

## LED LIGHT KITS

### Models 1720-080/1720-081

- Easily attach to the top of the Telephone Entry System or add-on directory
- 1720-080 is typically used with Surface Mount Systems. Use with 1803, 1808, 1810, 1833, 1834, 1835, 1837 and 1710 add-on directory
- 1720-081 is typically used with Flush Style Systems or non-lighted directories

## MOUNTING KITS

### Surface Mount Trim Ring 1803-150

- Standard Surface Mount recess box
- Use with Surface Mount 1803, 1810, 1833, 1834, 1835 and 1837 Telephone Entry Systems

### Surface Mount Ring for Flush Units 1814-152

- Surface Mount Ring is used with Flush Mount units to enable a Flush Mount unit to be mounted directly to a flat surface, but not recommended for outdoor use

### Flush Mount Kit 1814-165

- Two-part kit; the rough-in box and the trim ring
- Use with Flush Mount 1803, 1810, 1833, 1834, 1835 and 1837 Telephone Entry Systems

### Surface Mount Housing 1810-102 (not shown)

- Stainless steel for use with Surface Mount 1810, 1834, 1835 and 1837 Telephone Entry Systems

**2600-588**  
for 1802-EPD LED

**2600-588**

Wireless Adapters

**Model 2354-010**  
Weigand Converter

**Model 1814-193**  
External Speaker

## HEATER KITS

All DKS Heater Kits include built-in thermostats that automatically turns the heater on and off, as needed.

### 2600-582 for DKS 1802-EPD

- Allows the Telephone Entry System LCD display to maintain normal operation to approximately -20°F (-29°C)

### 2600-588 for 1812 Models

### 2600-584 for Telephone Entry Systems

- Heater and thermostat come equipped with mounting magnets, no mounting hardware is required

## CCTV CAMERA KITS

Kits can be added to most DKS Telephone Entry Systems. Additional CCTV equipment and cabling required.

### 1812-145/147 CCTV Camera Kits

- High resolution color camera kits include camera, mounting bracket, wire harness, and power supply

## WIRELESS BRIDGE ADAPTERS

Provides a wireless link for data and video when used with the 1830 Series and Access Plus Controllers. These "line-of-sight" units have an operating distance of up to 1000 feet.

### Model 1815-510

- One Base Unit; One Remote Unit

### Model 1815-511

- One Base Unit; Two Remote Units

### Model 1815-512

- One Base Unit; Three Remote Units

## WIEGAND CONVERTER

- Converts 26-bit Wiegand data to RS485 data, which allows for the use of almost any 26-bit Wiegand Device with the Access Plus System
- Can also be used to add a relay to the Access Plus System

## EXTERNAL SPEAKER

- An external speaker can be added to any Telephone Entry System
- Ideal for use in high-noise areas

# DKS ACCESS CONTROL

## "ONE-STOP" ACCESS CONTROL SHOPPING.

Whether you need a complex Access Control System, or a simple stand-alone device, DKS has all the products to meet your needs. Choose from a complete line of Access Devices including RF Controls, Card Readers, Keypads, Electric and Magnetic Locks, and a full line of complimentary products to meet your specific requirements.

# WIEGAND OUTPUT PROXIMITY CARD READERS

## THE 2" TO LONG RANGE ENTRY SOLUTION

DKS offers a full line of Proximity Card Readers in different mounting styles to meet your exact needs. The Readers are sealed in epoxy, making them vandal-resistant and are ideal for both indoor and outdoor applications.

AVI (or Automated Vehicle ID) Systems operate in the same manner as Proximity Card Systems, but with longer ranges - up to 25 feet. A typical AVI System places a tag on the vehicle, rather than having the user carry it. In this manner, a gate System will open automatically as the vehicle approaches with a properly credentialed tag.

A variety of Transmitter options available

AVI (Automated Vehicle ID) Long Range Vehicle Tag System is adjustable from 8 to 25 feet.

## KEY FEATURES:

- Not for stand-alone operation and must be connected to an Access Controller
- Passive Card technology provides an unlimited number of "card reads" with no battery to wear out
- Full line of Proximity Card Readers and Cards, Clickers, and Key Tags
- Mullion, wall, and post mount models
- Read ranges from 2 inches up to 30 inches (50.8 mm to 762 mm), and long range readers up to 25 feet (7.6 m)
- 2 color LED (red/green), Piezo Beeper
- 100% weatherproof
- 26-bit Wiegand format
- Reverse Polarity protection
- DKS offers the following Proximity Card Reader products: DK Prox, HID and AWID, all of which are compatible with the 1830 Series Access Controllers

### Indoor Use

Indoor applications to control access to secure areas

### Headlight AVI

Low visibility vehicle tag

**Up to 25 feet**  
Long range adjustable from  
8 ft - 25 ft (3.6 m - 7.6 m)

### Key-Fobs

Small size and easily fit on key chain

# 1520 | 1524 STAND ALONE CARD READER & SINGLE DOOR CONTROLLER

## THE STAND ALONE UNIT INTEGRATES WITH FACILITY WIDE PASS CODES

**Model 1520 Card Reader**

**Model 1520 Controller**

The 1520 provides users with a full feature, single door, stand-alone Access Control System. The 1520 is available with a built-in Proximity Card Reader, or can be ordered as a single door Controller, allowing the user to add their own 26-bit Access Control Device.

The 1524 can be programmed with a handheld programmer or with programming cards, and is available only with a DK Prox Card Reader.

**Model 1520 Single Door Controllers**

**Model 1524 Card Reader, Remote, and Add/Delete Cards**

Control a single door, or easily integrate a remote door or gate into the central system.

## KEY FEATURES:

- Single door/gate Access Controller
- Stores up to 1000 Card or other Access Device codes

### Model 1520 Single Door Controller Deluxe

- Available as a stand-alone Card Access System or as a Wiegand Controller (add your own 26-bit Wiegand Device)
- Internal Keypad for easy programming
- Available with DK Prox, AWID, HID Readers

### Model 1524 Single Door Card Reader

- Program with a handheld programmer or programming cards
- Add/delete single Card codes or a block of Card codes
- Available as a mullion mount or with an outdoor enclosure

#### Model 1524

Available as a mullion mount or with an outdoor enclosure

#### Clicker and a Card

Proximity allow use as a Clicker and a Card

**Built-in Keypad**  
For easy programming

#### Simple Wiring

Designed for easy installation

#### 1000

Stores up to 1000 Card codes

# 1515 SERIES KEYPADS

## SOLAR AND SMARTPHONE COMPATIBLE

**Model 1515**  
Surface Mount  
Mobile Phone Compatible

This smartphone-enabled Keypad is ideal for controlling doors or gates. The simple to install and use DKS Manager and User Apps make this Keypad a sure bet for either stand-alone use or as a Telephone Entry controlled Access Device.

Surface Mount

**Model 1506**  
Flush Mount

**Model 1504-086**  
Surface Mount with  
Built-in Intercom (also  
available as flush mount)

The DKS 1500 Series family of Keypads provides access control for virtually any application where digital code entry is desired, and they are available for stand-alone applications or for connection to an Access Controller. The 1504 model adds an Intercom Substation to the 1506 Series, allowing voice communication via connection to a master Intercom Station.

**Lighted Keys**  
For easy nighttime operation

**Digital Keypad  
Code Entry**  
Enter 4 or 5-digit unique PIN to gain  
entry, up to 1000 4-digit entry codes

## KEY FEATURES:

- Rugged steel cabinet with stainless steel faceplates and metal Keypads
- PIN (Personal Identification Number) codes are programmable from the Keypad
- EEPROM memory will not lose programmed codes during power outages
- Secondary Keypad capability for controlled entry/exit applications (1506 only)
- Ideal for controlling doors or gates
- "Hold" codes to latch open a door or gate
- Stores up to 1000 4-digit entry codes, 6 5-digit entry codes

# ACCESS CONTROLLER KEYPADS

## ACCESS KEYPADS CONTROLLED BY TELEPHONE ENTRY SYSTEMS ONLY

**Model 1815-250**  
Keypad with DK Prox  
Card Reader

Otherwise known as “26-bit Wiegand output” devices, the DKS 1500 Series family of Keypads provides access control for virtually any application where digital code entry is desired with connection to an Access Controller. These Keypads are not designed for stand-alone operation, and must be connected to an Access Controller.

## TELEPHONE ENTRY SYSTEM CONTROLLED OR STAND ALONE

These DKS Interior Door Control Stations can be used in a variety of applications to meet basic stand-alone door access, or for automated gate and door control requirements. Standard & Piezoelectric (electricity resulting from pressure) Exit Switches provide a release device for doors secured with a magnetic lock or electric strike.

**Model 1211-91**  
Mullion Mount

**Model 1211-080**  
Single Gang

**Model 1211-081**  
Mullion Mount

**Model 1211-083**  
No Touch Single Gang

**Stainless Steel Faceplates**  
Designed to mount into a single gang electrical box, or mullion mount

**Door Jam Mount**  
Model 1211-081 exit button can be mounted into the door jam

## KEY FEATURES:

- Exit push buttons are typically used as "request to exit" devices in Access Control applications
- Lighted Exit Buttons provide free exit, while Key Switches and Keypads are used to control entry
- Piezoelectric Switches models 1211-090/091 have selectable illumination status (red, green)

# 1200 KEY SWITCH ACCESS

## THE SIMPLE SOLUTION THAT GRANTS YOU ACCESS

**Model 1209**  
Built-in Intercom

The DKS 1207 and 1209 are Momentary Contact Devices, utilizing a mortise cylinder that can be re-keyed by your locksmith to match other access keys. The DKS 1209 includes a built-in eight ohm speaker, push button, and is lighted. The 1209 is designed to be connected to an existing Intercom System and used as a sub-station to the System. The DKS 1210 uses an ACE Key Cylinder that can be turned on for constant contact applications, such as holding an electronic gate system open.

**Model 1206**  
Key Switch

**Model 1207**  
Standard Key

**Model 1210**  
Ace Key for High  
Level Security

Stand  
Alone

*Simple, vandal-resistant Key Switch entry control.*

## KEY FEATURES:

- Provides convenience and security for basic access control applications
- Designed for outdoor or indoor use
- Can be post or surface mounted
- Steel cabinets and stainless steel faceplate
- Two keys supplied with each unit
- Mortise cylinders used on 1207 and 1209 models, Ace cylinder used on 1210 model
- Intercom option on Model 1209 includes a speaker and push button for connection to an existing intercom system
- Each Key Switch is housed in a rugged steel cabinet with a stainless steel faceplate, making these switches vandal-resistant

### Mounting Options

1207, 1209, 1210 can be surface or post mounted for indoor or outdoor use

### Construction

1206 ready for easy wall installation

### Economical

Stand-alone Key Switches offer value and a variety of Keyed Entry Devices to control access

### Stainless Steel

faceplate with a rugged steel cabinet make these switches vandal-resistant

# MICROPLUS® RF CONTROLS

## HIGHEST LEVEL OF SECURITY

MicroPLUS® RF products provide you with the highest level of security available. Our coding and encryption schemes are not shared with other producers (such as automobile manufacturers), resulting in Transmitter codes that cannot be duplicated or copied.

**8040**  
Receiver

**8054**  
Receiver

**Transmitters**

### Model 8040 Receiver

This Receiver can be programmed to receive a signal from the MicroPLUS or MicroCLIK Transmitters, which allows the homeowner to choose their type of Remote.

The 8040 Receiver is also a low-power draw unit designed specifically for the solar application. It remains in a “sleep” mode until it receives a signal from a Transmitter, thus drawing about 1 milli-amp of power.

## KEY FEATURES:

- Provides remote operation of vehicular access gates from the safety and convenience of a vehicle
- MicroPLUS® Transmitter codes cannot be copied
- Over 286,000,000 Transmitter codes available plus an encrypted “sync” code that changes every time the Transmitter is used
- PROXmtr™ combines a built-in Proximity Card with the MicroPLUS Transmitter into a single unit
- Transmitters available with 1, 2 or 3 buttons
- MicroPLUS® RF controls may be used as a stand-alone Access Control System or can be interfaced with 26, 30 or 31-bit Wiegand Controllers

### Codes Cannot Be Copied

Assures that only the original intended transmitters will activate the system

### Safety

Provides remote operation of gates from inside your vehicle

# MICROCLIK® RF CONTROLS

## COPY THE CODES TO YOUR CAR'S BUILT-IN TRANSMITTERS

MicroCLIK® RF Controls are designed to provide convenience and security, but do not have copy-proof encoding schemes found in the MicroPLUS® product line. This allows MicroCLIK® Transmitter codes to be copied into the built-in Transmitters found in many luxury automobiles, however we do not guarantee this commonality or functionality.

**Transmitters**

**8057**  
Receiver

**8040**  
Receiver

### Convenience

HomeLink® compatible: copy your codes to your vehicle's built-in system

### Antenna Options

Directional yagi antenna for improved range, and antenna amplifiers

## KEY FEATURES:

- Provides remote operation of vehicular access gates from the safety and convenience of a vehicle
- Over 1,000,000 Transmitter codes available
- PROXmtr™ includes a built in Proximity Card with the MicroCLIK® Transmitter combining both RF and Card Access Control into a single compact unit
- Transmitters available with 1, 2 or 3 buttons
- MicroCLIK® RF Controls may be used as a stand-alone Access Control System or can be interfaced with 26 or 31-bit Wiegand Controllers
- HomeLink® compatible

# DOOR & GATE MAGNETIC LOCKS

## 1200 LB OF HOLD- NO MOVING PARTS TO WEAR OUT

**DKML-S12**

**DKGL-S6**

The DKS series of Door (DKML) and Gate (DKGL) Locks offers a wide range of high-quality electro-magnetic Locks and Brackets to accommodate most access control locking requirements.

Door Locks can be ordered in surface or mortise mount styles, with special options such as LED Lock Status Indicators and a built-in timer for automatic lock reactivation after a preset time.

Gate Locks are designed for outdoor applications. The 1200 lb (544 kg) Lock provides an electrical enclosure with pre-drilled and tapped conduit holes on the top, bottom, side, and back, providing easy wiring and installation. The 600 lb (272 kg) Lock includes a built-in cable assembly for all wiring connections.

**DKML-S6\* DKSL-M20 DKML-M6 DKML-M3 DKML-S3**

\*Also available for dual doors

*Electric Locks can be mounted anywhere, at any angle, and the simplicity of nonmoving parts assures a long life without the need for maintenance.*

## KEY FEATURES:

- Fast and easy installation
- No residual magnetism
- Fail-safe operation assures that fire exit paths are unlocked during power outages
- MOV surge protection guards locks from transient voltage spikes

### Gate

- Pre-drilled/tapped electrical enclosure conduit holes
- Mounting brackets are pre-drilled/tapped for easy welding of the gate and assembly to the Mag Lock (brackets included), making for easy installation, repairs, and replacement
- Built-in Relay on select models for Gate Lock Status Indication

### Door

- LED (R/G) lock status indicates if the lock is secured (green) or not secured (red)
- Built-in time delay eliminates the need for costly add-on exit delay timers

### Fail-Safe

To ensure fire exit paths are unlocked during power outages

### No Moving Parts

To wear out or break, which assures a locking device with an extremely long life

**Quick Release**  
Pop button assures instant release when power to lock is removed

**Mortise Mount**  
Style available

**Holding Force**  
600 to 1200 lb  
(272 to 544 kg)

# ELECTRIC LOCKS STRIKES AND DEADBOLTS

## STRIKES AND BOLTS TO HELP YOU FEEL SAFE

**DKEB**  
Deadbolt

**DKES-C1**  
Strike

**DKES-C2**  
Strike

Electric Strikes offer an economical way to secure standard doors and are suitable for most cylindrical door locks.

Fail-safe and fail-secure Strikes are available. Electric Deadbolts provide superior security and safety, and include fail-safe operation for doors and gates. Deadbolt options include Lock Sensor, Door Sensor or Lock and Door Sensor models to indicate status of the lock (locked, unlocked) and/or door (open, closed).

Control door access via Access Devices such as Card Readers, or approve access on an individual basis.

## KEY FEATURES:

### Electric Strikes

- Suitable for most cylindrical door locks
- Easily retrofit into most door or gate frames
- Operate on 12 volt DC power
- Door Strikes are available in both fail-safe and fail-secure models

### Electric Dead Bolts

- Provide superior security and safety with fail-safe operation
- Operate on 12 volt DC power
- 5/8 inch (15.8 mm) stainless steel bolt with 5/8 inch (15.8 mm) throw
- Automatic re-lock adjustable from 0-5 seconds
- Options include Lock Sensor, Door Sensor, or Lock and Door Sensor models to indicate status of the lock (locked, unlocked) and/or door (open, closed)

**Fail-Safe**  
to ensure fire exit paths are  
unlocked during power outages

**Economical**  
Electric Door and Gate Locks  
provide safety and security

**Automatic Re-lock**  
Adjustable from 0-5 seconds

**Stainless Steel**  
bolt is 5/8" thick  
with 5/8" throw

Max Codes	1000	1250	16,000	6 (5-digit) 1000 (4-digit)	2	N / A
Programmable Facility Codes	10	4095	10	N / A	N / A	N / A
Anti-Pass Back	Timed APB	N / A	N / A	N / A	N / A	N / A
Transaction Buffer	3656	2300	N / A	N / A	N / A	N / A
Live Transaction Capability	To Printer	To Printer	N / A	N / A	N / A	N / A
Time Zones	4	10		2 Inputs	No	N / A
Hold Open Capability	Yes	No	No	4-Digit Hold Code	4-Digit Hold Code	Model 1210 Only
Output	1 Relay	1 Relay	1 Relay	2 Relays	1 Relay	Switch
Max Access Points	1	1	1	2	1	1
Power	16 VAC or 12-24 VDC	12-24 VAC/DC	12-24 VAC/DC	16 VAC	12-24 VAC/DC	N / A
Range	2 - 4 inches	50 - 75 feet	50 - 75 feet	N / A	N / A	N / A
LED / Beeper	LED & Beeper	LED Only	LED Only	Beeper	Beeper	N / A
Operating Temperature	-10°F to 140°F (-23°C to 60°C)	-10°F to 140°F (-23°C to 60°C)	-10°F to 140°F (-23°C to 60°C)	-10°F to 140°F (-23°C to 60°C)	-10°F to 140°F (-23°C to 60°C)	-10°F to 140°F (-23°C to 60°C)

## LOCKS

Door & Gate Locks										
					Feature					
Series	Model	Type	Holding Force	Mounting	LED Grn/Red	Relay	Delay Timer	Release	Power	Typical Use
DKML-S12-	1	Magnetic	1200 lb 544 kg	Surface	X		X	Fail-Safe	12 VDC	Single Doors
	1L				X	X				
	1LT				X	X				
	2				X		X	X	24 VDC	Double Doors
	2L				X	X				
	2LT					X				
DKML-S6-	1	Magnetic	600 lb 272 kg	Surface	X		X	Fail-Safe	12 VDC	Single Doors
	1L				X	X				
	1LT				X	X				
	2				X		X	X	24 VDC	Double Doors
	2L				X	X				
	2LT					X				
DKML-M6-	1	Magnetic	600 lb 272 kg	Mortise			X	Fail-Safe	12 VDC 24 VDC	Single Doors
	1L					X				
	1LT					X				
DKML-S3- DKML-M3	1	Magnetic	300 lb 136 kg	Surface				Fail-Safe	12 VDC 24 VDC	Single Doors
	1			Mortise						
DKSL-M20-	1L	Magnetic / Shear	2000 lb 907 kg	Mortise		X	X	Fail-Safe	12 VDC 24 VDC	Single Door
DKGL-S12-	1	Magnetic	1200 lb 544 kg	Surface		X		Fail-Safe	12 VDC 24 VDC	Single Gates
	1L									
DKGL-S6-	1	Magnetic	600 lb 272 kg	Surface				Fail-Safe	12 VDC 24 VDC	Single Gates

Electric Locks Strikes And Deadbolts									
					Feature				
Series	Model	Type	Mounting	Lock Sensor	Door Sensor	Release	Power	Typical Use	Bolt / Keeper
