#### EH-161 Extended Height Latch Bolt Hole

# Industry First! No more filling strikes!

- The EH (Extended Height) strike has an increased latch bolt hole height to allow for fluctuations in latch/strike locations.
- The centered hole gives an extra 1/4" to the top and bottom of the latch cut out (1/2" total)
- 4 7/8" x 1 1/4"
- 622, 630, DU Finish

EH-161	List Price
622	\$15.00
630	\$13.55
DU	\$13.05

#### **New Exit Sign**

- Provides visual, tactile and Grade 2 Braille information to assist all employees and visitors.
- Designed to meet Federal ADA / ADAAG guidelines for content, symbol design, text style, Braille translation and color contrast.
- Braille dots meet ADA requirements for size, shape and spacing.
- 6" x 9"
- · Matte-finish acrylic reduces reflections and glare for better visibility.
- · Includes adhesive mounting strips for easy installation.

HS 9070 38 List \$15.80

#### **FDT Frame Dimpler**

- · Aids in hollow metal door frame installation.
- Used when installing a new hollow metal frame in an existing masonry or stud opening.
- Hardened steel. Uses an Allen screw & wrench to smoothly add a dimple to the door.
- The FDT-1 makes the job an easy one with a professional looking fit to the fasteners.
- The tool is double-sided; after extensive use simply use the opposite side. Two allen screws and a long-arm allen wrench are also included.

#44-Classic Hospital Pull

All available in 630 (stainless), 622 (black), DU (dark bronze)
All products available with optional Anti-Microbial Coating on 630

#### Anti-Microbial Solutions

Three Options
Choose the Solution that's Right for You!

#### **Don-Jo AM Coating**

Don-Jo AM Coating can be applied to any product without change in appearance! It is an EPA registered durable, transparent coating. It kills bacteria, fungus, molds, and algae (Including MRSA, Strep, Staph & E-Coli).

It's molecularly bonded to the surface by a covalent bond, meaning it will not rub off. This durability means you don't have to worry about reapplying. It will be working for you and keeping you safe from microbes for years to come.

DJ-AM doesn't just kill the microbe like typical chemical cleaners, it mechanically destroys it. This mechanical disabling means that the risk of cross-contamination is decreased, as the microbe cannot be picked up and spread to other surfaces.

#### **Don-Jo CopperCoat**

Don-Jo CopperCoat antimicrobial solutions provide a one-time copper-based application on surfaces that works 24x7, never wears off, and kills 99.9% of bacteria\* in 2 hours.

CopperCoat uses CuVerro® antimicrobial copper, the first class of solid-surface material registered to make public health claims with both the EPA in the United States and PMRA in Canada. It is a chemical free, solid metal alloy coating.

Available on 630 (Stainless Steel) and 628 (Aluminum) products. 630 is recommended for exterior applications. This application alters the finish to appear similar to pewter and indicate the anti-microbial property.

#### Copper Zone Great Aftermarket Solution!

Add EPA Registered Anti-Microbial Copper to any product! Can be field applied or factory applied to any Don-Jo product.

Available in several sizes for use with pushes, pulls, plates, grab bars, etc.

High quality, high endurance adhesive backed copper sheets are simple to apply!
