

Compliance

Highest safety standards.

All Elcoma bars are fabricated to meet the requirements of ASTM #f446-85 with 1 1/2" wall clearance and comply with ANSI A117.1-1986 Making buildings accessible to handicapped.

Elcoma grab bars and safety rails have a wall to bar nominal offset distance of 1.5" (38mm). All 1.25" (32mm) and 1.5" (38mm) dia. bars have been designed and tested to withstand 1300 lbs. of downward load when properly installed. This exceeds HUD, FHA, VA, ADA and other federal, provincial and local codes.

Our continuance safety commitment.

Elcoma Metal continues to keep up with the ever changing code compliance. Its an important part of our business model to provide our customers with products that are not only up to date with code requirements but also to provide high quality products that are safe for your home or project.
