# Make a statement!

Create a stunning design for your stairway with the confidence you are selecting quality parts that reflect premium engineering, delivered with the highest level of service.

Since 1993, Evermark has been an industry leader in the innovation, design, and manufacture of quality stair parts that maintain their beauty and integrity over time.

From owning our own factories—allowing us to stay on the leading edge of technology, while ensuring we maintain highest standards of quality and a healthy inventory. Evermark is committed to the highest level of dedication and attention in everything we do.

**With Evermark you can rest assured... no matter which of our stair parts you choose, you'll be making a smart investment that will fit your needs, your home and your family for a lifetime.**

# Stair Parts Selection Guide

## STEP 1: Choose Newel Post Style

### Over the Post

Pin top newels require handrail fittings that slide down on top of pins, creating a continuous rail system that is elegant to the touch.

### Post to Post

Block top and Box Newels allow rails to run between them, creating an added touch of detail to your staircase system. Handrail fittings may not be required.

## STEP 2: Choose Style of Balustrade

Pin Top Balusters

Square Top Balusters

Metal Balusters

## STEP 3: Choose Handrail Style

Handrail styles are matched to each Series based on architectural scale. Refer to individual Series pages to find the best handrail to match with your choice of baluster.

## 5015 • "Smart Stick" Pin Top Balusters • 1-1/4" Square Bottoms

### The SS-5015 "Smart Stick", an Evermark exclusive!

What's smart about the SS-5015 "Smart Stick?" The top and bottom pins are the same size, requiring the same size drill bit...meaning it's easier and quicker to install. That's good news for installers. The bottom pin is shorter and needs no trimming. The 3/4" pin top increases possible spacing of balusters by 1/4" while complying with the 4" maximum spacing in many building codes.

**Square Top Balusters:**  
Plowed Rail is the best choice when using square top balusters. This rail comes with fillet, which is cut to fit between the square tops of balusters.

Established in 1993

## Why Evermark?

Every Evermark product begins with a great idea for solving an existing homeowner, builder, or contractor problem.

Sometimes this means innovating an answer from scratch. Other times... it's finding novel, more durable, more effective, or more cost-efficient ways of making existing products better. It's this ability to see "gaps" and respond to them in a timely manner with top-quality offerings delivered with world-class service, that has made Evermark a premier manufacturer of stair parts, doors, railing and moulding, hinges and hardware—along with other solution-centric products—for almost three decades.

## Spring Bolt™ • Rail Connection System

1. Assemble Rail to Rail pieces as shown at right, rotating springs together.
2. Handrails or fittings will tighten together. Apply a thin film of wood glue for a permanent bond.

Scan QR Code to see video demonstration of the Spring Bolt
