GMS™
LOCK CYLINDERS

A PERFECT FIT

ABOUT GMS

Our commitments to quality, value, and customers' needs are the core values at GMS. Since inception, our business and reputation has been built on manufacturing the highest quality, most reliable products in the industry. With unwavering attention to detail, and meeting OEM specifications, we strive to make our products "The Perfect Fit" for all applications where our customers use our cylinders.

Our mission as a company is to be the preferred brand and market leader of lock cylinders and related products to aftermarket distributors and end users. We accomplish this by providing high quality, value priced products, with reliable and consistent service while bringing to the market new and innovative product solutions. In doing so we strive to operate in a respectful, honest and forthright manner with customers, suppliers, employees and other stakeholders in the company.

GMS continues to expand our product offering with needed alternatives to OEM products to fill customer needs. Our continued expansion of small and large format interchangeable core products provide our customers with high quality alternatives to high priced OEM products.

We pledge to provide our customers the best product, the best value, and best customer service in the industry so we can continue to be "The Perfect Fit" supplier for you.

GMS™
LOCK CYLINDERS

GENERAL INFORMATION

Numbering System

The GMS numbering system is shown in each section of the catalog.The necessary information required to ensure that you receive the right product each and every time is shown. In creating our numbering system we have attempted to make the numbering system as descriptive and intuitive as possible. All the information such as product type, length, keyway, finish, cam and keying requirements can easily be built into the product number of the product you desire.

Keying

GMS offers a wide array of keying options. Cylinders are usually stocked keyed alike in pairs. We also offer keyed random and zero bitted cylinders in a wide array of products. The cylinders are packaged with uncut keys to be used when pinning the cylinder. GMS also offers Master Keying, Grand Master Keying, Construction Keying and numerous other options. Please contact us for details.

Specifications

GMS cylinders are designed, engineered and manufactured to OEM specifications. This is something we do not compromise on. As a result you can have the utmost confidence that when keying into a system you will maintain the integrity of the system. Our cylinders will have the exact depth and spacing as originals at a fraction of the cost.

Cams for Mortise and Mortise T-Turn Cylinders

The cams shown below are actual size. All cams are interchangeable on GMS Mortise Cylinders and Mortise T-Turn Cylinders. Locktite is used in combination with the mortise screws to provide exceptional holding of the cam to the cylinder plug. CAM4 is to be used with G23, G45, A62, AST and ASV keyways.
