

Goldberg Brothers, Inc.

Made in USA

Since 1897

Goldberg Barn Track

Sliding Track & Hardware

Goldberg is pleased to offer its new exposed roller style, sliding barn door track and hardware sets.

Flat track style with ball bearing rollers and mounting bolts.

Powder coated finished in Black, Silver, Rustic Brown, and Architectural Bronze.

400lb capacity per door.

Stainless Steel Series

Stainless Steel Kit

If you are looking for a more polished look, instead of the standard metallic style, we have a great alternative option. This new contemporary look is solid stainless steel barn door track hardware, with a #4 brushed finish, great for exterior or high moisture areas. And if you have an all glass door, that is no problem – kits are available for 3/8" and 1/2" thick glass. A two and four door bi-pass system is also available.

Stainless Steel Door Pull

Stainless Steel Lag Cover Caps

Accessories

Just like most homes, many barn door installations require customization to look and work exactly the way you want. Goldberg Brothers offers many different accessories to assist in the way your barn door opens and closes. From privacy latches to silent rollers, a Goldberg Brothers dealer will help provide guidance for every situation. Plus, take a look at the over 30 different decorative accent trims.

GOLDBERG BARN DOOR TRACK AND HARDWARE WARRANTY

One Year Manufacturer's Warranty

Goldberg Barn Door Track and Hardware sets come with a one year manufactures warranty for defective parts under normal installation and use. Warranty is subject to repair or replacement of defective part/s at manufacturers discretion and does not include installation costs.

Goldberg Brothers does not warrant the loss of finish at points where roller is in contact with track. Goldberg Barn Track is sold as a rustic finished hardware and Goldberg does not warranty the imperfections seen through the finish in the steel parts, it is part of the look.

This warranty does not include loss of defects caused by elements outside the control of Goldberg Brothers, Inc., such as:

- natural disasters
- weather
- fire
- water leakage
- abuse
- improper installation
- or anything else deemed out of the control of Goldberg Brothers, Inc.

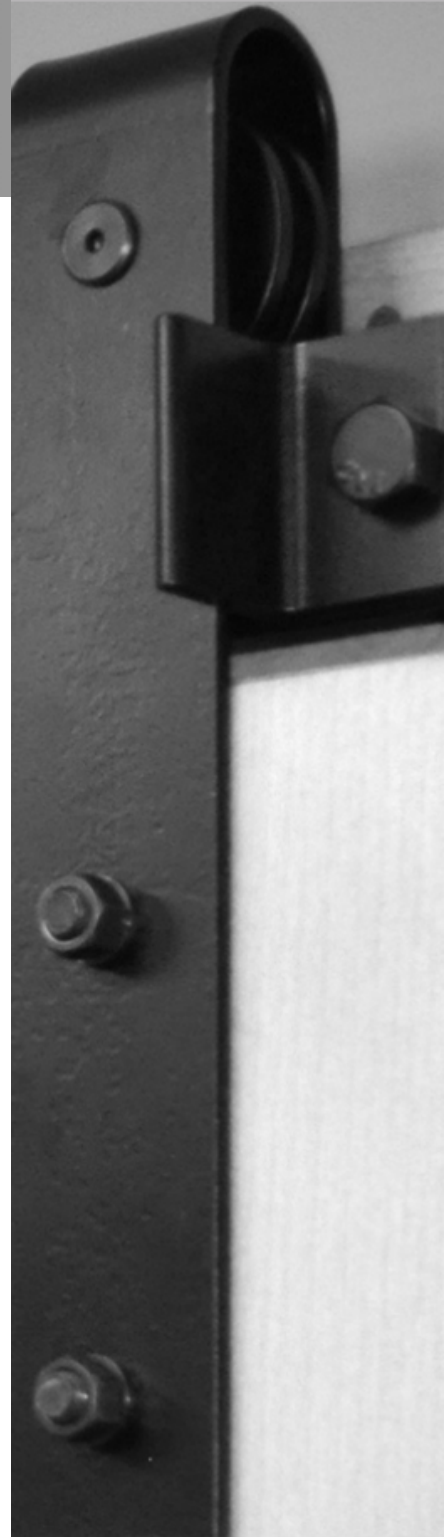

BARN DOOR HARDWARE KITS

Your Barn Doors Can't Move Without Them

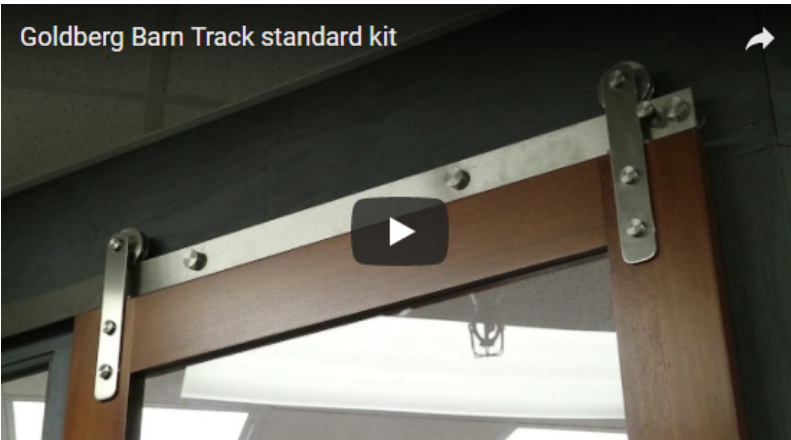

Our barn door hardware kits are what moves us. Complement your décor with [modern stainless steel sliding door hardware](#) or any of [ten beautiful color finishes](#), including Black, Silver, Rustic Brown and Architectural Bronze. These barn door hardware kits come standard with metal rollers, or you can place a custom order for factory-installed, silent rollers. We have kits made to fit both single and double doors and even nested doors. You can further customize your doors with these optional products, all sold separately or by special order:

- decorative accent trims
- door pulls
- privacy latches
- silent rollers
- installation templates
- top-mount hangers

Easy to Install

1. Hang Track on Wall

The best way to support a sliding barn door is with a continuous backer block in the wall. However, if that is not an option, you can mount a header board to the wall then attach the track to the header board. This also works nicely if casing, chair rail, or base board projects from the wall. Wall extensions are also available for this.

Just three sliding doors on a job saves you up to 50 square feet and eliminates the maintenance issues of a pocket door.

3. Hang Door on Track

2. Mount Hangers to Door

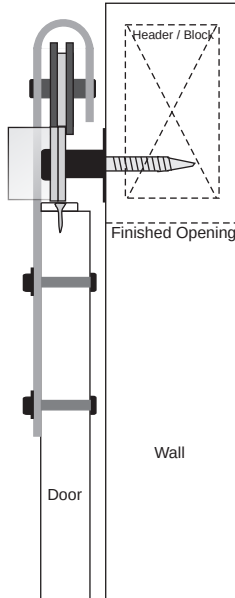

Goldberg Barn Track comes with ball bearing rollers, pre-drilled track, all mounting bolts, stops, anti-jump blocks, and floor guide. Double doors are as simple as butting two tracks together.

BARN TRACK BI-PASS HARDWARE SET

Details, Installation Information, and Layouts

Goldberg Brothers bypass barn door track

Goldberg Brothers, Inc.

Made in USA

Since 1897

Goldberg Barn Track

Bi-Pass Hardware Set

Goldberg Brothers is please to offer our new Bi-Pass exposed roller sliding track and hardware set in conjunction with our already popular standard systems.

Add this hardware set for the front sliding door/s of your system, while using standard hardware sets for the back door/s.

System requires extra track and mounting hardware for the front door, and either a built out soffit or our no soffit spacer kits.

Powder coated finished in Black, Silver, Rustic Brown, and Architectural Bronze.

400lb capacity per door.

Bi-Pass hardware sets are sold by door thickness and include these items.

Spacer Kits for non-soffit installs, are sold by door thickness and in packages of 6, enough for one track. Two or more packs required in most cases.

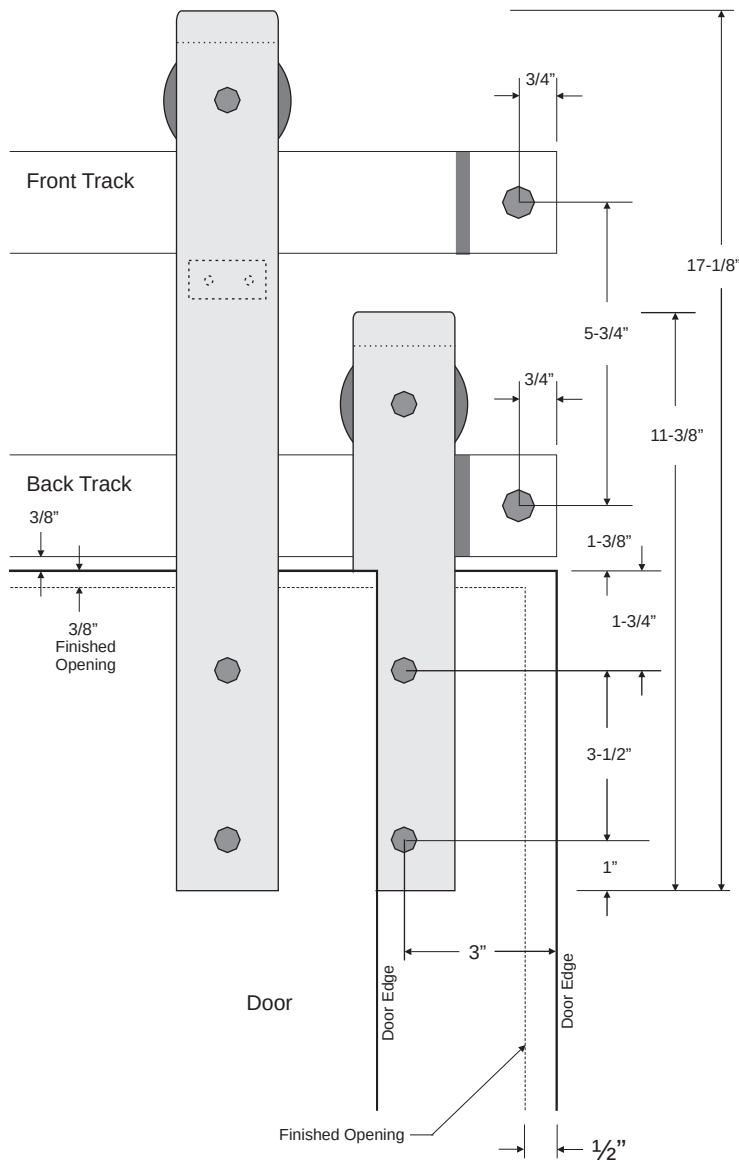

Made in USA

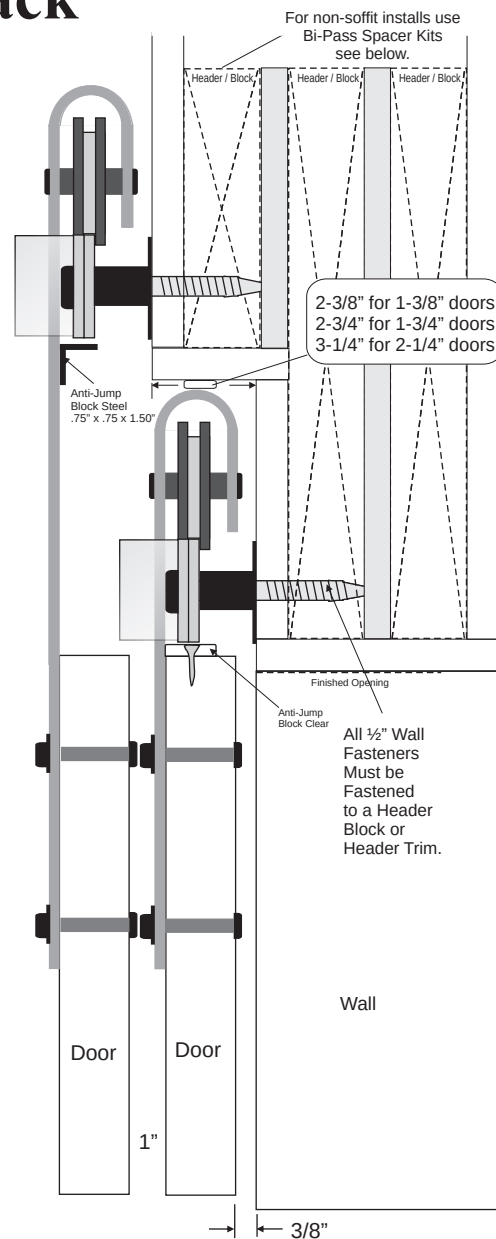

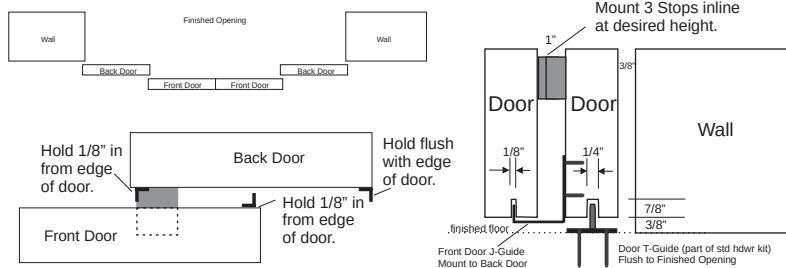

Bi-Pass Barn Track

Since 1897

Center Line of Back Track's Mounting Bolts =
 $1-3/4" + \text{Net Door Height Above Finished Floor}$
Center Line of Front Track is $5-3/4"$ Higher than Back Track.

Plum Door Before Fastening Door Guide to Floor.

Note: Standard installation of Barn Track only allows 3/8" gap between wall and door, this gap may not accommodate base or other trim mounted on the wall. If these trims are required, additional spacing at the track mounts will need to be added. (available for purchase) or a header track trim may be used (supplied by others).

Goldberg Barn Track Privacy Latches

You don't have to give up your privacy when using one of our barn track kits on a sliding bedroom or bathroom door. Our optional privacy latch offers a sturdy, simple solution for keeping that door shut when you want to be alone. This versatile latch can be mounted either on the door or on the wall, depending on how your door is installed and which side of the door you want to keep private. It does not require a key and it can be over-ridden in an emergency. Durable router templates are available for precise installation.

Goldberg Barn Track Silent Rollers

Sliding barn doors can make a bit of noise as the metal rollers glide along the metal track, which adds to the rustic charm. However, for rooms where silence is golden (like a baby's room or a reading room), you can order any Goldberg Barn Track kit with optional, factory-installed silent rollers.

6001SR6

(per set of 2 added to hardware sets)

Instead of metal, these rollers are made with Dupont™ Delrin® acetal resin, a high-tech polymer developed for its stiffness, strength and its suitability for precision manufacturing. Our silent rollers are available in black, only, but they can be substituted into any of our barn track kits. They must be installed at our factory, so please ask an authorized retailer to place a special order for you.

IMPORTANT: We do not recommend using resin rollers with doors weighing more than 200 pounds.

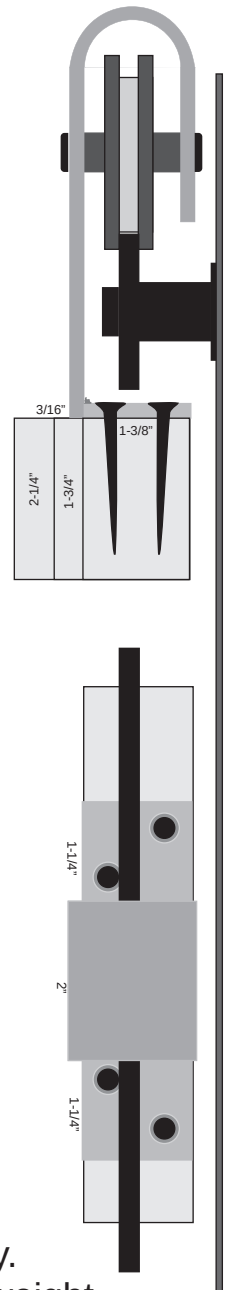

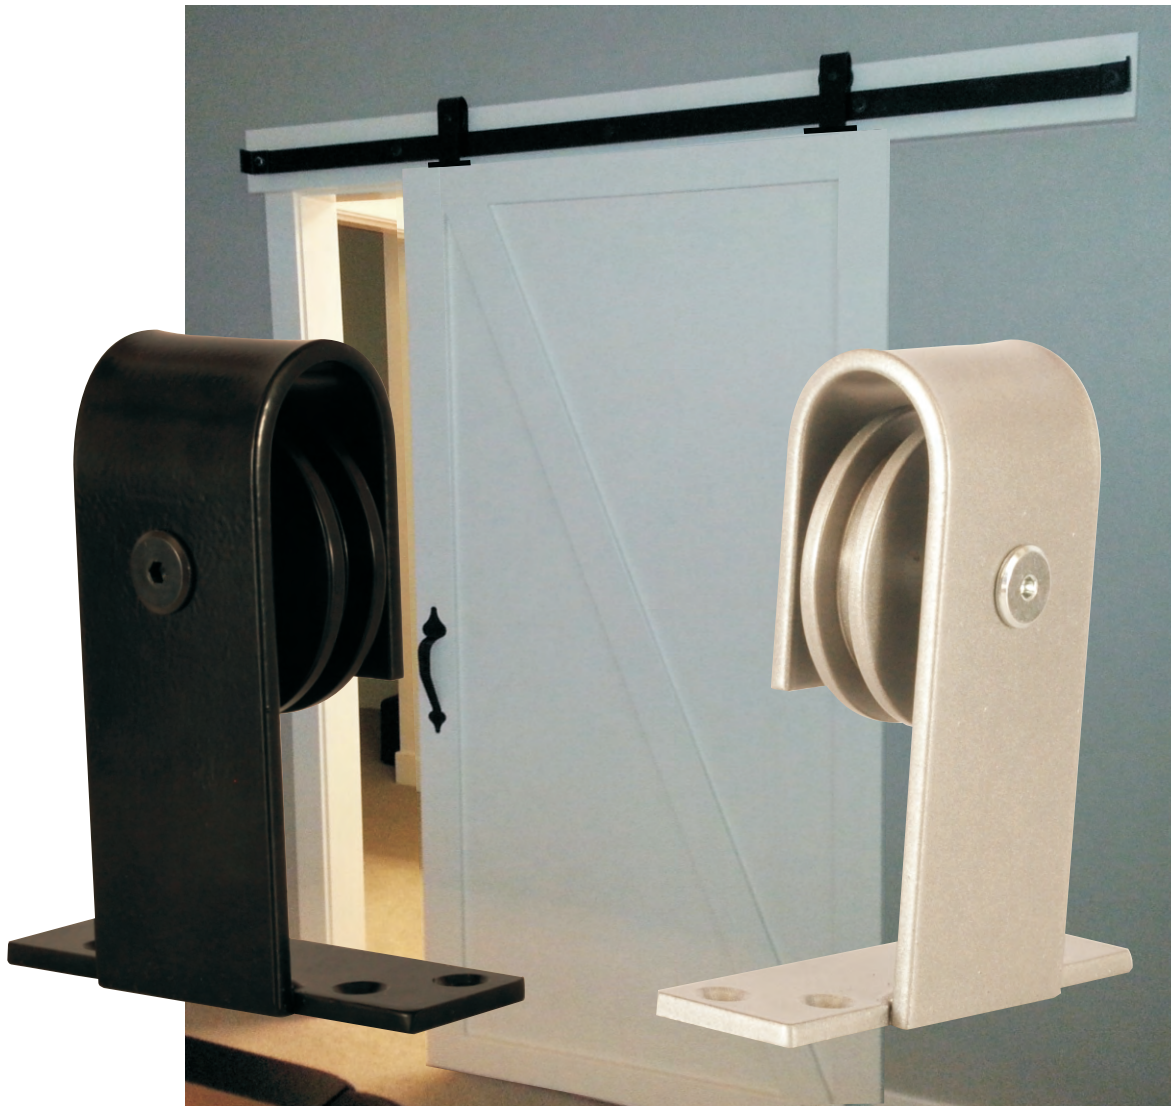

Goldberg Brothers, Inc.

Made in USA

Since 1897

Goldberg Barn Track Top Mount Roller Hanger

The Top Mount Roller is sold as a complete set or individually. If used as a complete set with no other strap hangers, the doors weight limit is reduced to 100lbs. These rollers work great on hollow core doors or as an additional hanger in the middle of very large doors, where there is not enough rail for the standard strap hanger. Fits all thicknesses of doors.

60010H-x (set) or **60010R-x** (individual)

Goldberg Barn Track Soft Stop

See Soft Stop in Action

What is Soft Stop?

A new soft close system from Goldberg Brothers for their Standard, MP, and Stainless Series hardware. Soft Stop allows barn doors to gently slow down and stop while opening and closing. Kits are sold in pairs to allow for smooth stopping on both ends of the track.

Features:

- ☐ Retrofits to existing Goldberg Brothers barn track systems
- ☐ Fits our Standard Series, Stainless Series and MP Series
- ☐ Installs in less than 10 minutes without removing the hardware already on your barn door – simply attach using the existing lag bolts
- ☐ Mechanism is completely hidden, so it will not affect the design aesthetics of your barn track hardware
- ☐ Made from durable custom manufactures steel – not plastic like other systems

GOLDBERG BROTHERS

SOFT STOP

Introducing Soft Stop, a new soft close system from Goldberg Brothers

Soft Stop allows barn doors to gently slow down and stop while opening and closing. The kits are sold in pairs for smooth stopping on both ends of the track. Soft Stop is designed to easily install on existing or new Goldberg track systems.

- Retrofits to your existing Goldberg Brothers barn track systems
- Fits our Standard Series, Stainless Series and MP Series
- Installs in less than 10 minutes without removing the hardware already on your barn door – simply attach using the existing lag bolts
- Mechanism is completely hidden, so it will not affect the design aesthetics of your barn track hardware
- Made from durable custom manufactured steel – not plastic like other systems
