**Note**

Aluminum mill finish upper tracks cannot be used in combination with clip-on fascia. Order retaining bolts and screws for upper track **5** and mounting rails **16**, **17**, **18** and **19** separately. The retaining bolts must be glued in place; the retaining screws have to be countersunk before screwing in. For wall to wall applications the upper track and mounting rail must be fixed in place with glue points. Either 2 retaining bolts or 2 retaining screws are needed to hold one upper track in place.
