Kitchen Hardware

## K-12 Classic Kitchen Knobs

Our classic kitchen knob is made from solid brass and hand finished one at a time in your choice of seven different finishes with or without a lacquer coating. The K-12 is our most popular knob for a reason. It just feels right. The smooth rounded surface feels good on your hands-and the finish options allow you to dress it up and go modern or keep it casual for something traditional or rustic.

Kitchen knobs are provided with screws for  $\frac{3}{4}$ " thick wood. Please let us know if your wood thickness is bigger or smaller.

## Solid Brass Oval Knobs

A simple versatile solid brass oval knob. Use horizontally or vertically in any of our seven standard finishes and three lacquered finishes.

Perfectly suited for doors, drawers, spice drawers or jewelry cabinets. The smooth and elegant looks extends beyond style. The design is comfortable to grab and holds up through long-term, regular use.

## Smooth Elegant Knobs

Not all knobs are created equal. These CNC machined knobs out of the UK set the standard for elegance. The heft, the surface feel, the smooth round knob is truly something to behold. The polished nickel and dark antique finishes really bring out the surface finish with the K-5 series.

## Beehive Knobs

Much like the smooth elegant round knobs, the K-6 beehives are truly extraordinary. The beehive pattern is beautifully machined into the surface giving the knob a soft touch like few others. The grooves in the pattern create a gorgeous contrast within the finish. We think the polished nickel and light antique finishes work particularly well with these knobs.

## Forged Brass Bin Pulls

Mirroring decor and architecture from centuries past and present, bin pulls capture early American colonial, Victorian, Art Deco, and other well-known period styles.

Forged from solid brass, these bin pulls provide a clean, elegant look for kitchens and pantries. Available in two sizes and seven finishes, they are very smooth and wonderful to touch.

## Crescent Bin Pull

Classic yet contemporary, crescent bin pulls are crafted from a sand casting made in England. A choice of brass brass finishes and two nickel finishes give each handle a stylish, elegant character.

Each is mounted with machine screws. As the mounting hardware is not visible, each crescent pull blends seamlessly into your existing fixture.

## Pantry Latches

These turn of the century latches were used in butler pantries. The clean, simple shape makes them just as beautiful on country cabinets as they are on contemporary cabinetry.

Our latches have been around for quite some time, and over the years we've worked on the mechanism to make them at least as good as any latch on the market at any price.

Available in seven finishes, these latches are precision forged and hand finished. Slotted screws are provided with every latch. Phillips screws are available on request.

Introducing the Burbridge-the first of our new Studio Line of hardware. The Studio is a new direction for us-solid brass (as always), and beautifully detailed but at a more wallet friendly price. Sizes for the modern kitchen; with pulls and knobs for every kitchen application including your appliances.

The Burbridge comes in four unique finishes-each coated with a very durable electrophoretic coating.

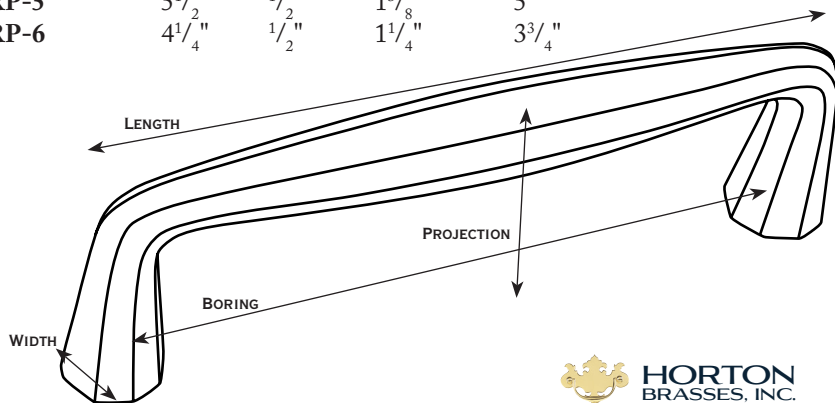

Available  
Finishes

Our most popular kitchen suite—the Bakes pull was designed by an English cabinetmaker working in America. The goal was for a simple design that could be historic or modern as needed.

The Bakes pull is a close copy of an antique icebox handle – scaled for use on modern cabinetry. Use them on cabinetry in your kitchen, laundry room and throughout the house.

Mounted either horizontally or vertically, these pulls make a bold statement and tie all areas of your room together.

Sand cast from solid brass in England, we hand finish them here in Connecticut.

Bakes

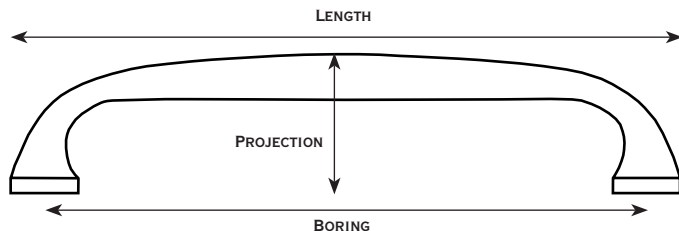

Bourneville

Bourneville is a small village south of Birmingham, England. You might know it today from its connection to the Cadbury family.

Historically, Bourneville had many stables and a thriving group of blacksmiths. The Bourneville range blends history through design with a profile that blends the shape of the smith's anvil with a chocolate drop.

Sand cast in the U.K., hand finished in our Connecticut factory.

Our Queslett Bin Pulls take their name from the Queslett region of Birmingham, where they were designed.

These sand cast pulls have a luxurious texture and substantial heft. Queslett Bin Pulls will look beautiful on your cabinetry with no mounting screws visible. Mix with other knobs and pulls from the Horton Brasses hardware collection or use the Queslett in a variety of sizes.

We think the largest works both horizontally and vertically and lends itself particularly well to dishwashers & fridges. The smallest is an absolutely darling fit for spice drawers and narrow pull-outs.

Queslett

Jefferson

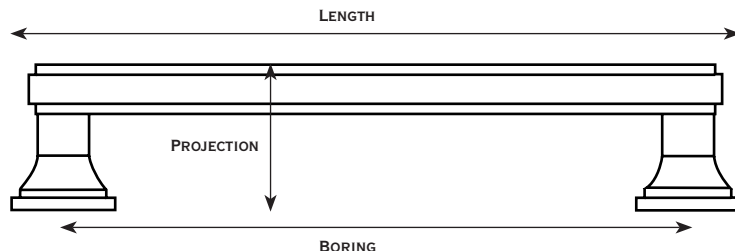

The Jefferson range looks great, but it feels even better. Precision machined in England with finishing done both in the UK and in our shop-the Jefferson may be our newest flagship. The design incorporates classic Art Deco elements and has a certain gravitas to it. Featured here in bright brass we think it also looks extraordinary in our dark antique finish-shown online.

The Longbridge pulls are named after the car manufacturing area of Birmingham that churned out millions of motor vehicles for over 100 years only to suddenly stop, lay dormant for years, before completely re-inventing itself as a center for design technology. Today it is thriving again with the magnificent Bourneville Art College and the huge Technology Park, all built on the site of the once famous car plant.

Each Longbridge pull is available in seven different finishes as well as three standard pull sizes and one matching knob.

*This collection is made to order. A 4-6 week lead time may apply.*

# Lincoln

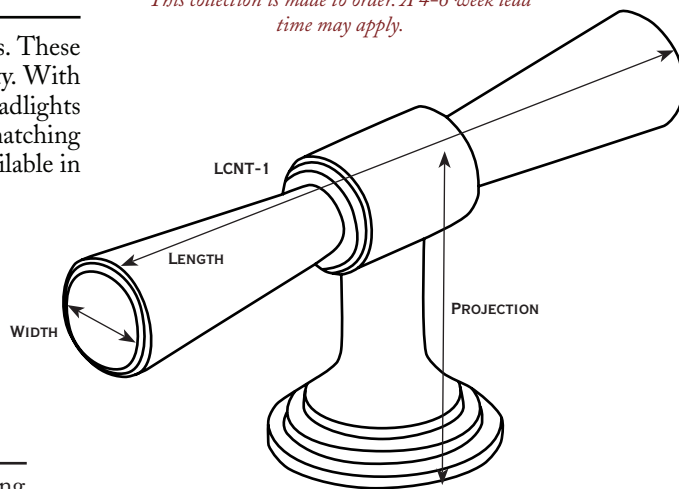

The Lincoln hardware range is fully machined out of solid brass. These pulls are inspired by the iconic Lincoln tunnel in New York City. With the decorative ends of the pulls intended to portray beaming headlights emerging into the night sky. Available in three lengths with a matching T-handle pull to complete the range. These Lincoln pulls are available in five brass finishes as well as two nickel finish options.

The Belgrave Middleway is a fast moving thoroughfare on the south side of Birmingham connecting Sparkbrook and Leebank, and passing through Balsall Heath. It is a main artery through many of the most cosmopolitan areas of Birmingham's inner city and is the proud home of the Birmingham Central Mosque. We have incorporated these diverse themes into our Belgrave pulls! The neo-classical design of these drawer pulls & cabinet knobs is something we feel works well with both modern and traditional designs.

Once, every city had an Odeon cinema as a feature of its landscape. In just 10 years between the founding of the chain in Birmingham and founder Oscar Deutsch's death in 1941, Odeon cinemas opened throughout Britain—more than half of them in new buildings. With their cloud piercing towers and sweeping lines, Odeons were a promise of the shapes and things to come.

A companion set for Sparkbrook, or perhaps a 'business associate' might be a better description given the engineered look created by an iconic diamond knurl. In post industrial revolution Birmingham, it was inner city areas like Leebank and Sparkbrook that provided much of the workforce for the factories of Britain's manufacturing heartland.

# Snowdrift

The image displays four pieces of modern hardware. Three are long, curved handles of varying lengths, and one is a small oval knob. They are all finished with a brushed metal texture and are arranged on a dark, reflective surface. The longest handle is at the back, followed by a medium-length one, and a short one in the foreground. The small knob is positioned to the right of the short handle. The lighting creates soft highlights on the curved surfaces and reflections on the dark background.

Quadrille

The word quadrille is derived from the Italian word, quadriglia meaning 'small square'. The term quadrille came to exist in the 17th century, within military parades, in which four horsemen performed special square-shaped formations. This performance became very popular, which led people to perform their own quadrille and by the 18th century it had become a lively dance with four couples, arranged in a square. These Quadrille square ring pulls are made of solid brass and come available in all seven of our house finishes.

*VT-71 Light Antique*

Classic style is created out of traditional craftsmanship with our cast brass bin pulls. Pouring molten brass into a special sand mold is the start of this dependable process. The brass cools down inside the mold, hardening in the process. Then, the mold is broken, with the parts cut off; and the brass is ground, tumbled, and carefully cleaned by hand. the result is a smooth, antique-style cast brass bin pull that can refurbish, modify, or finish a drawer, cabinet, or another kitchen fixture.

## Solid Brass Cupboard Knobs & Turns

Our solid brass cupboard turns and knobs are classics. Heavy and substantial, they grasp naturally even if your hands are covered with flour and oil.

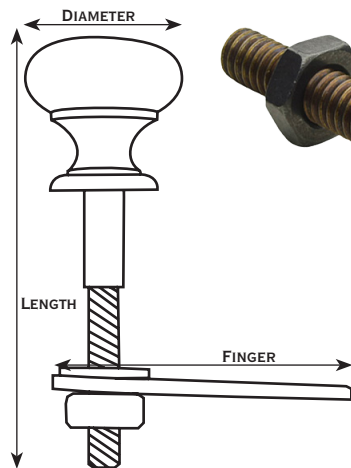

Cupboard turns are each fitted with a traditional brass shank, finger, nut, and washer. The knobs with a shank and nut function are the same as a typical cabinet knob, just with an old world appearance.

Cupboard turns are available in three sizes and in seven finishes.

# Brass & Nickel Hinges

## NM-3 Non-Mortised Hinge with Ball Tips

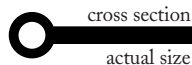

Our non-mortise hinge is simply the best non-mortise hinge available at any price. Machined from extruded brass, each is machined to precision tolerances. The hinge leaves measure  $1\frac{1}{2}$ " wide when open by  $2\frac{1}{2}$ " tall. Perfect for  $\frac{3}{4}$ " thick wood.

A back bevel of 2-3 degrees is required when installing any of our non mortised hinges onto your cabinets.

Available in all seven of our finishes with three different top options. Color matched brass screws are included with each pair.

NM-3 Antique

## NM-7 Non-Mortised Hinge with Flat Tops

Available  
Finishes

*NM-7 Antique*

The original NM-3 ball tipped non-mortised hinge proved so popular that we expanded the options a while back. The flat topped NM-7 variant may be better suited to shaker style kitchens and more modern designs. Machined from extruded brass, each is machined to precision tolerances. The hinge leaves measure  $1\frac{1}{2}$ " wide when open by  $2\frac{1}{2}$ " tall. Perfect for  $\frac{3}{4}$ " thick wood.

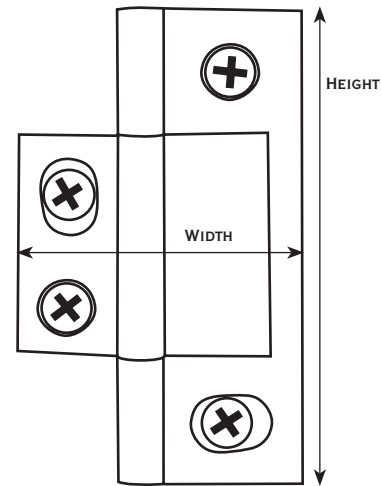

A back bevel of 2-3 degrees is required when installing any of our non mortised hinges onto your cabinets.

Available in all seven of our finishes with three different top options. Color matched brass screws are included with each pair.

## HH-2 Surface Mounted Hinge

Exquisite cast brass H Hinge in four sizes for flush mounted doors. You find H hinges most often on corner cupboards and entertainment centers. They are the easiest type of hinge to install on flush mount doors. Beautifully forged and machined for well fitted knuckles.

Sold per pair and a stock item in five different finishes. Nickel finishes are available as custom option. Each pair is supplied with all needed fasteners for installation.

Available  
Finishes

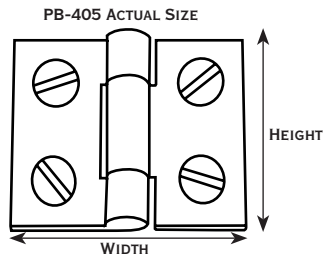

## PB-405 Small Box Hinge

Specialty devices call for specialty hardware. While other makers have discontinued such products, Horton Brasses considers the reproduction and restoration needs of our customers. Clock and box hinges fall within this limited but requested scope.

Made of solid brass, box hinges are requested for their small size—a necessity for jewelry boxes and similarly-small chests. The smooth, durable design makes such hinges a requirement. These hinges are sold per pair and come with all necessary fasteners.

Bed Hardware

## H-73 Bed Bolts

Bed bolts hold the posts and the rails of pencil post and other poster beds together. A billet of  $\frac{3}{8}$ " diameter steel is hot forged to create a  $\frac{3}{8}$ " square head with a built in  $\frac{15}{16}$ " flange. Each is supplied with a  $\frac{3}{4}$ " square nut. Our bolts and nuts have 16 threads per inch.

### Dimensions

	length	diameter
H-73 6"	6"	$\frac{3}{8}$ "
H-73 7"	7"	$\frac{3}{8}$ "

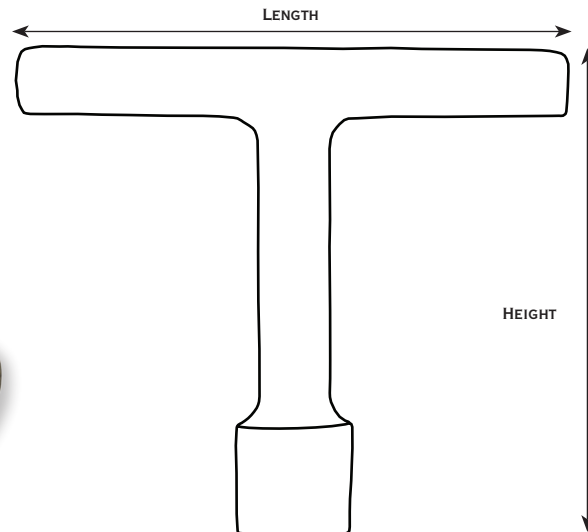

## BW-3 Bed Wrench

### Dimensions

	length	height
BW-3	$3\frac{13}{16}$ "	$3\frac{3}{8}$ "

Authentic bed hardware is hard to find. Luckily we offer a diverse selection of solid brass bed bolt covers, steel bed bolts, and bed irons for supporting your box spring, as well as this hand cast bronze bed wrench.

These cast bronze bed wrenches will fit our and all  $\frac{3}{8}$ " square head bed bolts.

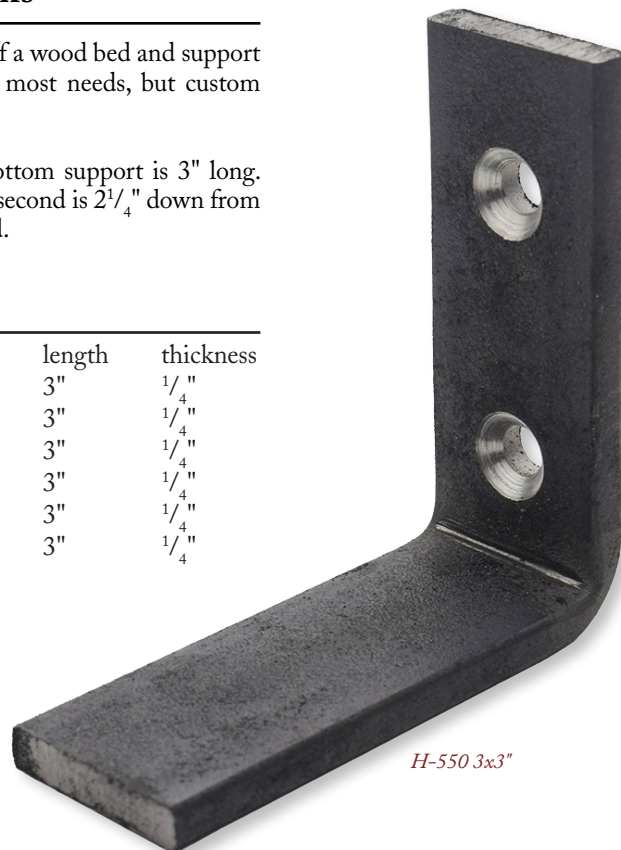

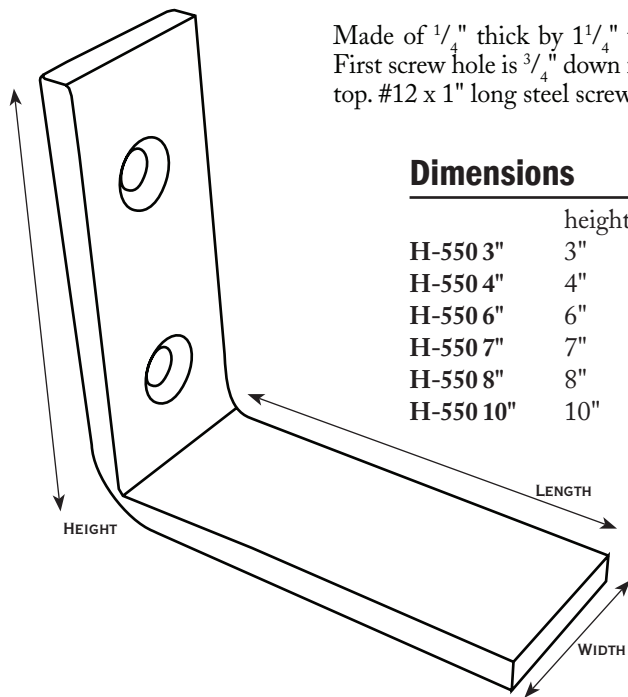

## H-550 Bed Irons

Bed irons mount on the inside of the rail of a wood bed and support the box spring. Six standard sizes satisfy most needs, but custom configurations are available.

Made of  $\frac{1}{4}$ " thick by  $1\frac{1}{4}$ " wide steel. Bottom support is 3" long. First screw hole is  $\frac{3}{4}$ " down from top and second is  $2\frac{1}{4}$ " down from top. #12 x 1" long steel screws are included.

### Dimensions

	height	width	length	thickness
H-550 3"	3"	$1\frac{1}{4}$ "	3"	$\frac{1}{4}$ "

[www.horton-brasses.com/bedboltcovers.asp](http://www.horton-brasses.com/bedboltcovers.asp)

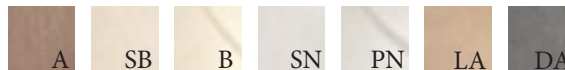

## Early American Bed Bolt Covers

Bed bolt covers hide the holes where the bed bolts enter the bed posts, and do so in a beautiful way. Beds need tightening periodically, and the cover can be swung up and the bolt exposed for tightening.

The H-33 is our most popular bed bolt cover. The bullseye pattern fits with many furniture styles and the heavy stock we use to make these gives them a cast appearance. Available in all seven of our finishes.

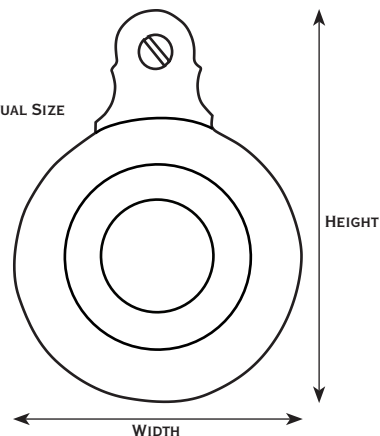

The H-23, H-33 and H-120 are made from heavier stock.

FP-3 $3\frac{1}{2}$ "	$3\frac{1}{2}$ "	2"
FP-4 4"	4"	$2\frac{1}{8}$ "

## Octagonal Flush Handle

The octagonal flush pulls are probably the most iconic campaign pattern hardware. Seen throughout the 1800's everywhere the British Empire went. Today we see them on furniture and built-in cabinetry. They sparkle in the modern nickel finishes as well.

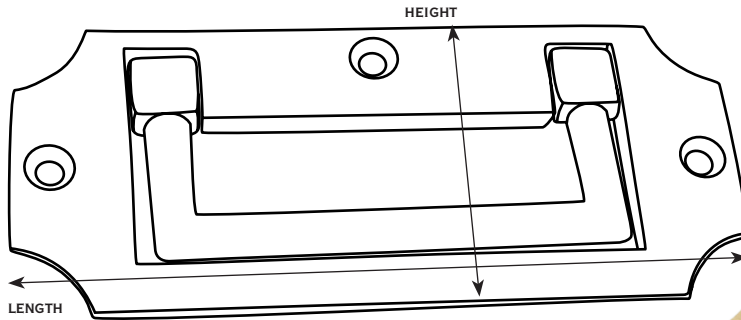

### Pull Sizes

#### OFP-1 $3\frac{1}{2}$ " Octagonal Flush Handle

$3\frac{1}{4}$ " length,  $1\frac{3}{4}$ " height

#### OFP-2 $4\frac{1}{2}$ " Octagonal Flush Handle

$4\frac{1}{2}$ " length,  $1\frac{7}{8}$ " height

Available  
Finishes

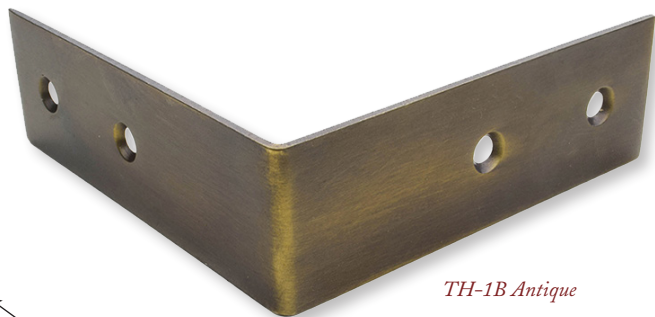

*OFP-2 Light Antique*

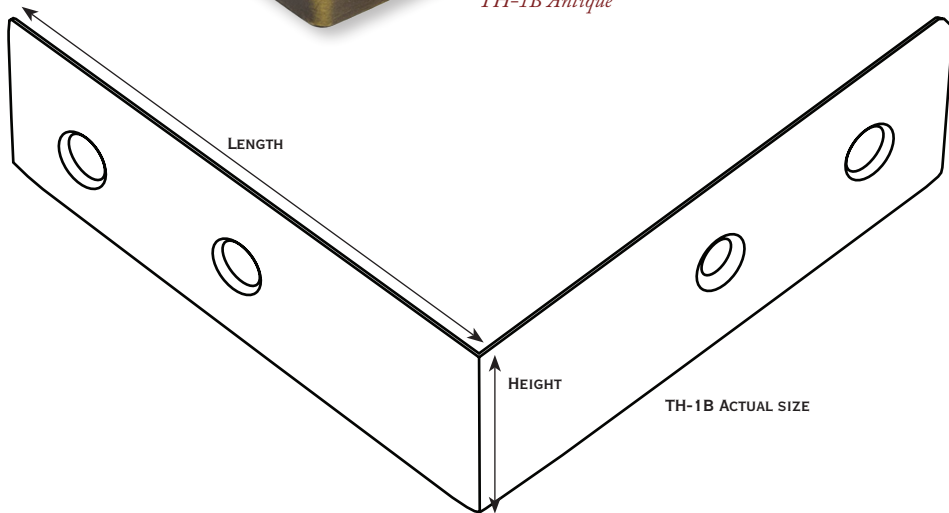

## L-Shaped Corner Brackets

Hardware from antique trunks and campaign style furniture is the template for our trunk corners. As durable and attractive furniture trim, these corners are crafted out of  $\frac{1}{16}$ " thick brass, with a finish hand-applied. Choose from antique, light antique, dark antique, semi-bright, nickel or bright finishes for a set. Long-lasting and dependable, all pieces are constructed well, instead of being flimsy stampings. This entire product line can be easily customized as well.

## Cast Brass Rosette Chest Lifts

Beautiful antique chest lifts in four sizes. Solid brass rosette back plates are attached by slotted brass wood screws. The smaller sizes are used on jewelry chests, silver chests, and boxes of all types. The large lifts are for trunks and the sides of case pieces.

Our chest lifts are designed to give a hand hold for moving a piece of furniture. It is not designed for bearing weight. Any piece of furniture should be lifted from the bottom and balanced with a chest lift.

## Pin Style Casters

Our pin style casters have a press fit shank. This shank would be inserted into a  $\frac{1}{4}$ " hole, and the deep wood screw style threads on the CA-4's will grip the hole as the wood expands and contracts.

CA-4 has a tapered 1" press fit pin for secure anchoring and the flange has 3 screws for mounting.

## Cup Casters for Tapered Legs

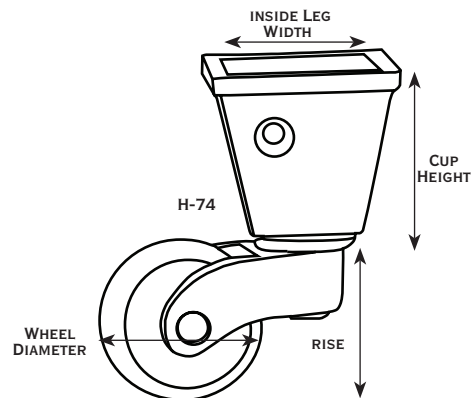

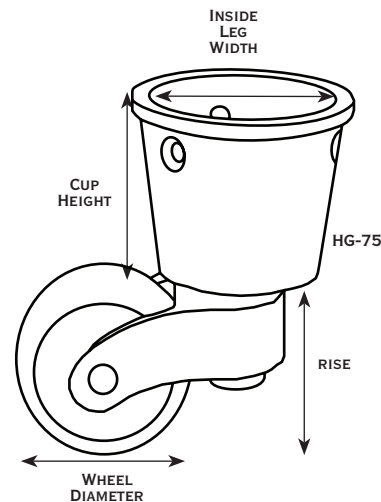

Not just a functional component of furniture, casters are a stylish and attractive addition to the base of a table, chair, or sofa and even modernize antique reproduction furniture without appearing anachronistic. A choice of finishes, as well as shapes, allows you to achieve the perfect blend between the furniture and hardware. Our casters are solid brass castings made in England and hand finished in our Connecticut factory. These are the finest casters on the market.

## H-43 Banjo Shaped Tip-Table Catch

Tip tables offer convenience for homeowners: With an attractive presentation, the top folds for easy and efficient storage. But, when in use, staying flat and stable is essential for the top, and our tip table catches offer an effective mechanism for doing so. Installed onto the underside of such furniture, tip table catches keep the top in a firm, usable position. When the parts of the catch are not snapped together, the tabletop sits upright.

## 3-Legged Table Spiders

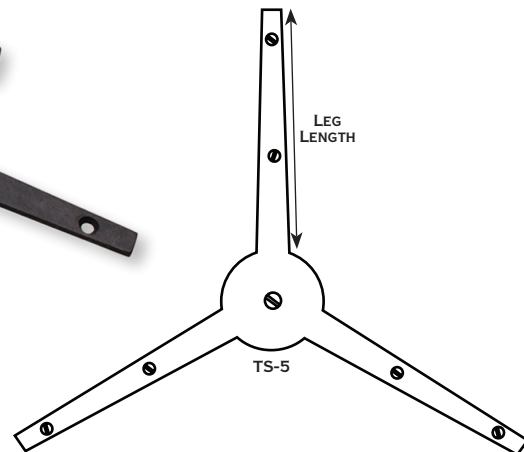

Used on 3 and 4 legged table bases, table spiders add strength and help prevent the legs from splaying. As tables age, the dovetails shrink and the legs can become more mobile than when they were first built-then the use of a spider becomes important.

Do you need a different size? Provide us with a pattern and we'll make one to your specs.

### Dimensions

## H-53 Card Table Hinge

Butler and card table trays are very unique hinges for very special applications. Our H-53 card table hinges were traditionally used on Federal and demilune card tables. These are *not* knife hinges. These mount on the side edges of a table. Typically, card tables are round, you will need to bend each leaf on the hinge in a vice to match the curve as needed.

## Desk Lock

LK-20 is a half mortise lock for the slant front of a desk or secretary. It differs from a traditional drawer lock because the selvedge is angled at 105 degrees instead of 90. Many woodworkers cut the rabbeted edge on a drop front at an angle to allow for expansion and contraction. Each lock is supplied with two antique finished steel keys.

# Escutcheons

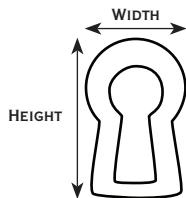

## Inset Escutcheons

Inset escutcheons are fitted into a keyhole and line it with brass. Generally used alone, an inset escutcheon provides the simplest approach to cleaning up the jagged wood edges of a keyhole. Available stock in five brass finishes with two nickel finishes being custom finishes.

## Round Escutcheons

With an elegant, classic look, round escutcheons are the perfect addition to your keyhole. Embellishing it with simple character, all round escutcheons add period look rarely seen today. As keyholes vary in size, so does our hardware. Choose from large and small round escutcheons, each made to fit around the opening in a door, drawer, or any keyhole in your home.

## Keyhole Pull

Have a keyhole not in use or without a lock? rather than keep it open, exposed and unsightly, embellish and close it with a keyhole pull. With an old-fashioned loop exterior, this little pull looks like a key, and can be used in a keyhole that has no lock. Transform that ordinary keyhole into another attractive, period aspect of your home's decor with one of our brass pulls.

Supplied with a screw for mounting. Available in five finishes.

## Rosette Pulls with Fancy Bails

Rosette pulls have been used by furniture makers for centuries. Never wrong and always elegant, they often work where nothing else does. These smooth cast brass handles, with rounded back plates, have been a furniture staple since the 18th century and are a perfect compliment to antique reproduction pieces.

### Dimensions

	length	back plate	height	projection	boring
<b>H-10FB</b>	4 $\frac{1}{8}$ "	1"	1 $\frac{7}{8}$ "	3 $\frac{3}{8}$ "	3"

# Chippendale

## CB-4 Chippendale Pulls

Chippendale period drawer pulls are ornately detailed pulls dating from the mid 1700's to the early 1800's. Each pull has one back plate, two posts, and two nuts and one bail, all made with solid brass.

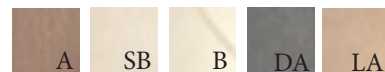

Chippendale pulls are available with your choice of a traditional post that fastens with a nut, measuring about  $1\frac{1}{4}$ " or with a machine screw fitting post, that fastens internally with a machine screw. The machine screw post is supplied with screws for  $\frac{3}{4}$ " wood. Please tell us if your wood is thinner or thicker.

### Dimensions

CHIPPENDALE

## C-602 Chippendale Pulls

Chippendale period drawer pulls are ornately detailed pulls dating from the mid 1700's to the early 1800's. Each pull has one back plate, two posts, and two nuts and one bail, all made with solid brass.

Chippendale pulls are available with your choice of a traditional post that fastens with a nut, measuring about  $1\frac{1}{4}$ " or with a machine screw fitting post, that fastens internally with a machine screw. The machine screw post is supplied with screws for  $\frac{3}{4}$ " wood. Please tell us if your wood is thinner or thicker.

## H-82 Eagle with Shield Hepplewhite

Delicate embossed oval pulls, stamped and finished one at a time. If you have existing holes, carefully measure from the middle of one hole to the middle of the other. Then choose a pull with the same boring as yours.

Hepplewhite pulls are available with your choice of a traditional post that fastens with a nut, measuring about  $1\frac{1}{4}$ " or with a machine screw fitting post, that fastens internally with a machine screw. If choosing MSF post, please tell us the thickness of the wood so we can supply you with the proper length screws.

Empire

## H-26 Empire Ring Pull

Ring pulls and round bail pulls became quite popular in the 1800's. The ring pulls here are popular on chests and servers just as they have been for more than 200 years. Remaining veracious to original patterns, all round pulls are hand finished in our Cromwell, Connecticut factory. Intricate details convey a unique character with each concentric circle design.

A perfect complement to cabinets, drawers, and furniture, all empire ring and bails pulls have a choice of five brass finishes, and a custom nickel finish is available.

# H-49 Empire Knobs

This Empire knob has exquisite detail - the stamping is breathtaking. Tiny inscribed lines form roping around the edge, with delicate beading wrapping the lines. These knobs will mount with a machine screw.

We supply this knob with a screw that will fit  $\frac{3}{4}$ " thick wood perfectly. If your wood is thicker or thinner, please tell us so we can provide different lengths.

These knobs are made in Italy, and finished by hand in the USA.

MISSION

## MS-29 Drawer Pull

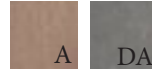

Our Arts & Crafts drawer pulls encapsulate simplicity. Although modern craftsmanship shapes each pull, timeless designs still pervade each shape, with faithful use of period patterns and shapes. Designed for several applications, our Arts & Crafts drawer handles offer a choice of angular mission and rounded ring pull styles.

# Ring Pulls

## RP-2 Victorian Ring Pull

Embodying styles of the late 19th century, angular Victorian ring pulls embellish and enhance furniture, drawers, cabinets and other aspects of your home with a distinctive period look. Horton Brasses remains true to period sensibilities, and for seamlessly blending in with decor, all Victorian style ring pulls and knobs are finished by hand in one of our five brass colors.

### Dimensions

## Round Ring Pulls

Round ring pulls are available in a wide range of sizes. The small rings can be used on spice drawers in a kitchen or in a media room for CD storage; use the larger ones on doors or drawers throughout a house. We make a finish for every decor. Made in England and finished by hand in our Connecticut factory.

## Dimensions

	height	projection	ring diameter
RP-3	1 $\frac{1}{8}$ "	1 $\frac{1}{2}$ "	7 $\frac{7}{8}$ "

**HORTON**  
BRASSES, INC.

## Oval Ring Pulls

Oblong, elegant, ovals—a new twist on an old favorite. Made from solid brass forgings in England, we offer them in two sizes and seven different finishes.

We make a finish for every decor. Semi bright and satin nickel are soft, warm finishes, while polished brass and polished nickel reflect and sparkle; daring the admirer to come closer. Antique brass and dark antique are dark finishes and will appeal to customers looking for that timeless piece of hardware.

## HDH-2 Clock Hinges

Specialty devices call for specialty hardware. While other makers have discontinued such products, Horton Brasses considers the reproduction and restoration needs of our customers. Clock and box hinges fall within this limited but requested scope.

Cast out of brass, clock hinges are an essential element that covers the face of a reproduction clock. Brass plates are mortised at the top and bottom, and thick pins go through the metal. The smooth, durable design makes such hinges a requirement.

## Mirror & Clock Rosettes

Once strictly relegated to clocks and mirrors, rosettes have evolved into an attractive and practical ornament for furniture and other facets of the home, such as trunks, windows, cabinets, and boxes. The elaborate metal trim adds a touch of style over damaged areas, and for finding the most accurate match, all brass rosettes are crafted with a choice of five hand applied finishes. A pin, provided, secures the clock or mirror rosette through the center.

Horton's Forge

## HF-2 Iron Grips

Traditional iron grips for every application. Fully hand forged by our smith in Tennessee, our grips are patterned off of early American originals. The 4" and 5" sizes were common throughout the 13 colonies. We've expanded the sizes to a 6" and a 12" for more usability. The 12" is great on appliances and large drawers. Appropriate in a variety of settings, from colonial kitchens, to log cabins, to carriage houses. Four sizes, 3 finial ends, in stock all the time. Custom variations available.

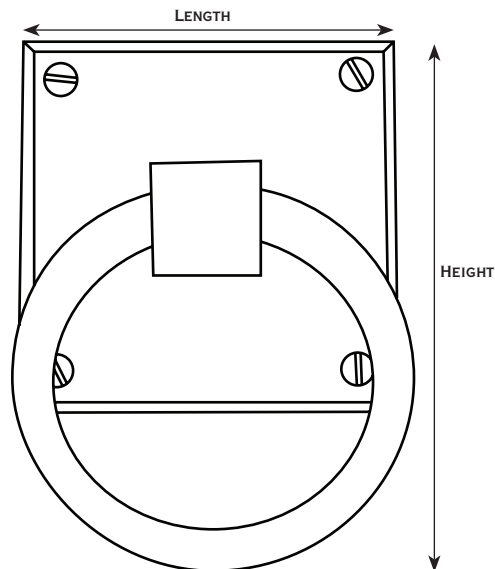

### Dimensions

	length	width	projection	hand space
HF-2 4"	4 <sup>3</sup> / <sub>8</sub> "	1 <sup>1</sup> / <sub>4</sub> "	1 <sup>1</sup> / <sub>8</sub> "	1"
HF-2 5"	5 <sup>3</sup> / <sub>8</sub> "	1 <sup>1</sup> / <sub>4</sub> "	1 <sup>1</sup> / <sub>4</sub> "	1 <sup>3</sup> / <sub>16</sub> "
HF-2 6"	6 <sup>1</sup> / <sub>4</sub> "	1 <sup>1</sup> / <sub>4</sub> "	1 <sup>5</sup> / <sub>8</sub> "	1 <sup>7</sup> / <sub>16</sub> "
HF-2 12"	12 <sup>3</sup> / <sub>8</sub> "	1 <sup>1</sup> / <sub>2</sub> "	1 <sup>3</sup> / <sub>4</sub> "	1 <sup>5</sup> / <sub>8</sub> "

## Iron Ring Pulls

Custom hand forged iron ring pulls, in three sizes for anything from cabinetry to barn doors. Each piece is hand forged one at a time, the old fashioned way: with a hammer, an anvil, and a coal fire. We chose a square backplate as the stock choice, but we can make it round, rectangular, or skip it altogether. Custom iron is limited only by imagination. Pyramid head screws are included with each pull.

### Dimensions

	length	height	ring diameter
HFR-1	1 $\frac{1}{2}$ "	2"	1 $\frac{1}{2}$ "
HFR-2	2 $\frac{1}{2}$ "	3 $\frac{5}{8}$ "	2 $\frac{1}{2}$ "
HFR-3	3 $\frac{1}{2}$ "	5"	3 $\frac{1}{2}$ "

**HORTON**  
BRASSES, INC.

## Forged Wire Pulls

One of our best selling styles of iron work. We've seen these pieces on everything from boxes to barns. As with all iron work, we can custom make them to fit your application if needed.

### Dimensions

	length	width	projection
HF-19	$1\frac{3}{8}$ "	$1\frac{1}{4}$ "	$1\frac{3}{16}$ "
HF-20	$2\frac{5}{8}$ "	$1\frac{1}{4}$ "	$1\frac{3}{8}$ "

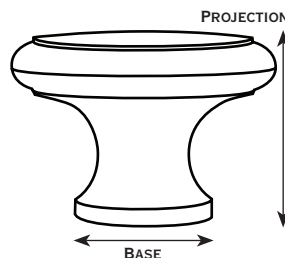

## Forged Iron Knobs

Knobs weren't, and aren't something that should be hand forged. Blacksmithing doesn't lend itself particularly well to producing spherical shapes. But you still need knobs. These French made knobs are machine turned and hand finished—they match our iron perfectly.

## Pewter Knobs

These turned pewter knobs look quite distinctive when combined with hand forged black iron hinges. The hues of gray compliment the hand-worked, blackened iron very nicely.

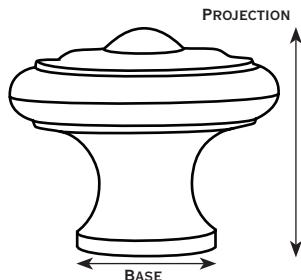

Each pewter knob is created with a pattern of concentric circles, with an aged appearance. The period look of matured pewter along with having an attractive, versatile style, all pewter knobs are comfortable to grip long-term. For adding a touch of style to furniture, drawers, or doors, choose from two sizes of antique-style pewter knobs.

## HF-14 Suffolk Latch Set

Hand forged latch sets were the primary door hardware throughout colonial America. Our smiths have been making these for us for decades. The HF-14 series is sized more for interior doors. Each piece is a work of art with a grip, thumber, catch, keeper, and bar. The HF-14G is simply a grip only-no hole for the thumber-often used on the opposite side of the HF-14 latch set. Available in regular and reverse bevel with three finial options.

*HF-14 Ball & Spear*

### Dimensions

	length	width	projection	hand space
HF-14	8"	2 <sup>1</sup> / <sub>8</sub> "	1 <sup>5</sup> / <sub>8</sub> "	1 <sup>1</sup> / <sub>2</sub> "

HF-14G	8"	2 <sup>1</sup> / <sub>8</sub> "	1 <sup>5</sup> / <sub>8</sub> "	1 <sup>1</sup> / <sub>2</sub> "

**HORTON**  
BRASSES, INC.

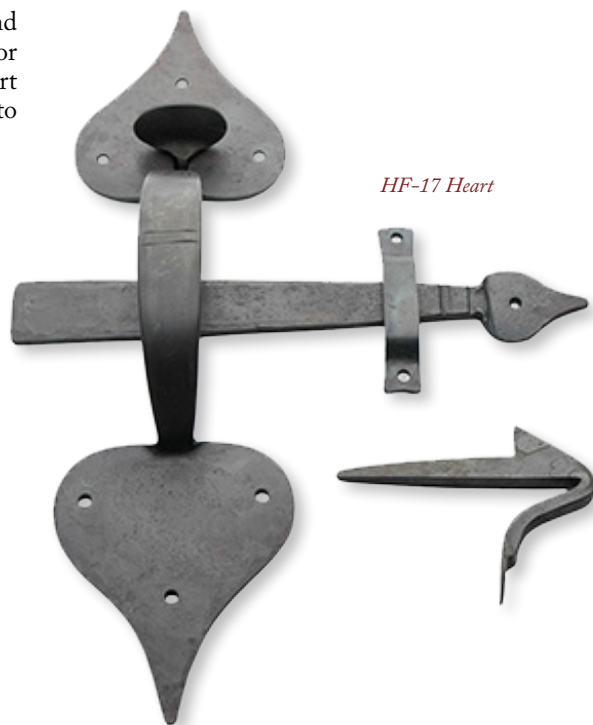

## HF-17 Suffolk Latch Set

The larger latch set to match the HF-14 series latches. The HF-17 and matching HG-17G are for exterior use in that they are sized for exterior doors. Built the same way as the HF-14 but with a few differences in the part design to make them better suited for heavy doors. As always, 3 finial ends to choose from-in stock and ready to ship.

### Dimensions

	length	width	projection	hand space
HF-17	$9\frac{5}{16}$ "	$3\frac{3}{8}$ "	$1\frac{3}{4}$ "	$1\frac{5}{8}$ "

HF-17G	$9\frac{5}{16}$ "	$3\frac{3}{8}$ "	$1\frac{3}{4}$ "	$1\frac{5}{8}$ "

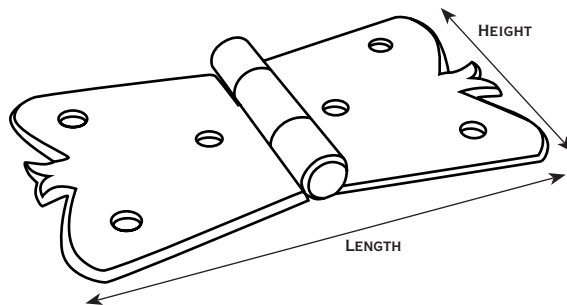

## HF-60 Lancaster County Butterfly Hinge

Butterfly hinges, also known as dovetail hinges, are frequently used on corner cupboards, kitchen cabinets, bible boxes, and candle boxes. Our selection offers an attractive assortment of rounded and angular shapes and a choice of sizes. For complementing your cabinet, box, or reproduction furniture with sturdiness and dependability and classic styles, include a set of our forged iron butterfly hinges.

All of our hand forged iron is made the old fashioned way-with a hammer, anvil, and a coal fire. Each piece is made one at a time.

## HF-12 Butterfly Hinges

Butterfly hinges, also known as dovetail hinges, are frequently used on corner cupboards, kitchen cabinets, bible boxes, and candle boxes. Our selection offers an attractive assortment of rounded and angular shapes and a choice of sizes. For complementing your cabinet, box, or reproduction furniture with sturdiness and dependability and classic styles, include a set of our forged iron butterfly hinges.

All of our hand forged iron is made the old fashioned way-with a hammer, anvil, and a coal fire. Each piece is made one at a time.

HF-63	3"	1½"

## Rat-Tail Hinges

Rat tail hinges are a very early style of surface mounted hinge-essentially each one is a little pintle hinge. They give corner cupboards, cabinetry, and pine furniture in particular an authentic colonial look. We make two versions-one for flush doors and one for offset ( $\frac{3}{8}$ " overlay) doors. There are a number of ways to make and install rat tails. Ours are made so that the 'flag' is fastened on the cabinet door-the 'tail' is secured via the wood screw and pintle on the cabinet frame. When done, the whole assembly is visible. We can easily custom make these larger, smaller, or with a different flag configuration.

### Dimensions

	flag length	flag height	tail length	overall height

RT-RO	2"	$1\frac{3}{8}$ "	4"	$3\frac{3}{4}$ "

RT-L

## HF-24 Cupboard Latch

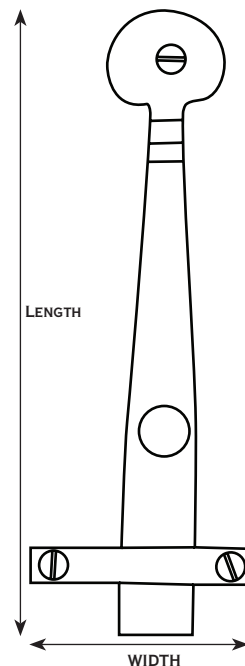

With a sturdy design and classic, antique-style look, cupboard latches secure smaller doors in place. For effectively keeping doors of food, supplies, or other items closed, these forged-iron latches are available in a variety of sizes, including standards and mini. Select from durable cupboard latches for right and left hinges.

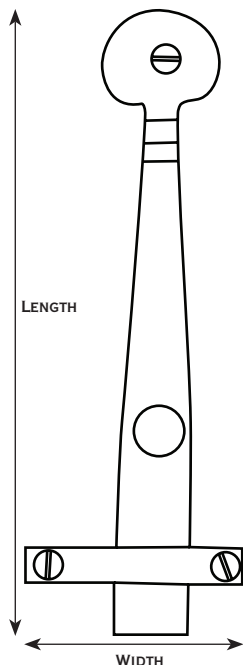

The HF-24 can only be opened from the outside.

### Dimensions

	length	width

HF-24S	$3\frac{3}{4}$ "	2"

## Dimensions

	length	width
HF-25L	$6\frac{5}{8}$ "	$2\frac{1}{16}$ "
HF-25R	$6\frac{5}{8}$ "	$2\frac{1}{16}$ "

## HF-25 Cupboard Latch

With a sturdy design and classic, antique-style look, cupboard latches secure smaller doors in place. For effectively keeping doors of food, supplies, or other items closed, these forged-iron latches are available in a variety of sizes, including standards and mini. Select from durable cupboard latches for right and left hinges.

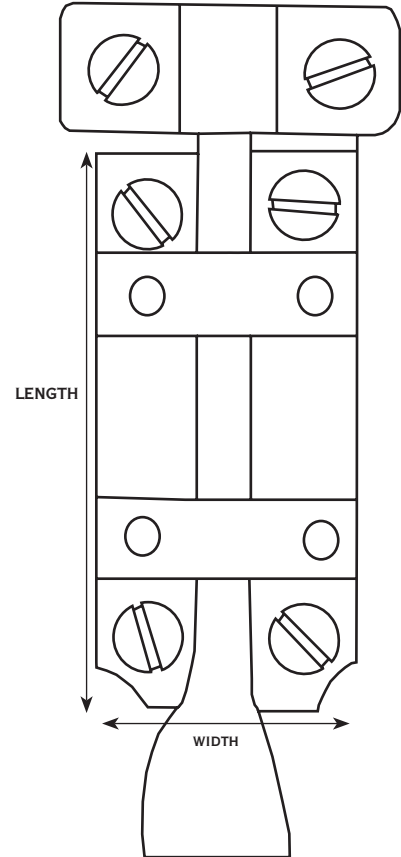

The HF-25 is identical to the HF-24 but has gracefully curved bar that comes through the door and allows the handle to be lifted (and the door opened) from the inside.

## HF-21 Small Slide Bolt

A slide bolt for virtually every application. The heavy duty HF-23 slide bolt is good for full sized doors and has a flat spring installed between the bolt and the plate-this allows it to be used in vertical applications. The slightly smaller HF-22 is good for lighter doors and horizontal applications. The even more delicate HF-21 is best suited for cabinetry and cupboard doors.

### Dimensions

	length	width	plate length	plate height
HF-21	$4\frac{1}{2}"$	$1\frac{1}{2}"$	$2\frac{7}{8}"$	$1\frac{1}{2}"$

HF-21 ACTUAL SIZE

## HF-22 Horizontal Slide Bolt

A slide bolt for virtually every application. The heavy duty HF-23 slide bolt is good for full sized doors and has a flat spring installed between the bolt and the plate-this allows it to be used in vertical applications. The slightly smaller HF-22 is good for lighter doors and horizontal applications. The even more delicate HF-21 is best suited for cabinetry and cupboard doors.

## HSP-1 Horizontal Iron Hasp with Hook

Fine forged hasps in three styles. Each one is fully forged by our blacksmiths. The HSP-1 has a horizontal keeper and hook, to keep closed. Perfect for use without a padlock. The HSP-2 has the same horizontal keeper without the hook. Finally the HSP-3 has a vertical keeper and no hook. Hasps are best suited to doors and chests.

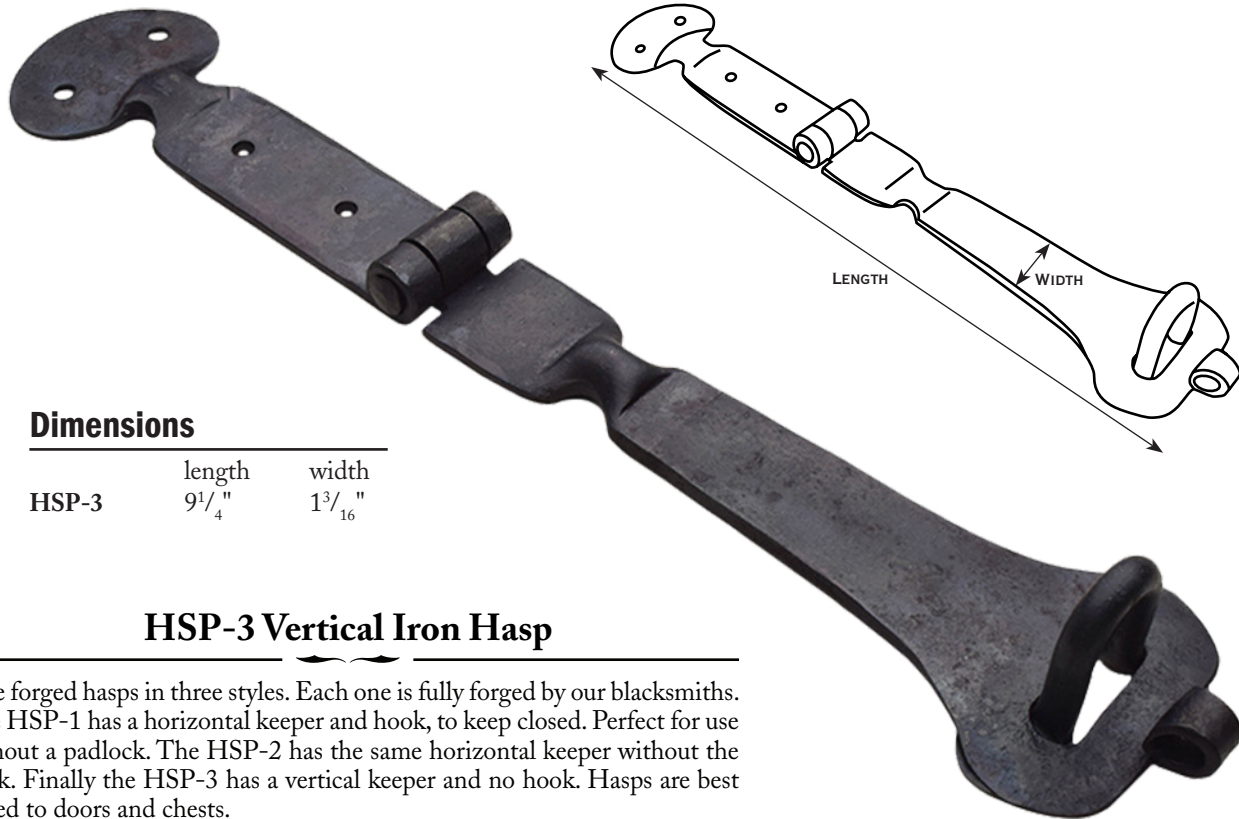

## Dimensions

	length	width
HSP-2	9 $\frac{1}{4}$ "	1 $\frac{3}{16}$ "

## HSP-2 Horizontal Iron Hasp

Fine forged hasps in three styles. Each one is fully forged by our blacksmiths. The HSP-1 has a horizontal keeper and hook, to keep closed. Perfect for use without a padlock. The HSP-2 has the same horizontal keeper without the hook. Finally the HSP-3 has a vertical keeper and no hook. Hasps are best suited to doors and chests.

### Dimensions

	length	width
HSP-3	$9\frac{1}{4}$ "	$1\frac{3}{16}$ "

## HSP-3 Vertical Iron Hasp

Fine forged hasps in three styles. Each one is fully forged by our blacksmiths. The HSP-1 has a horizontal keeper and hook, to keep closed. Perfect for use without a padlock. The HSP-2 has the same horizontal keeper without the hook. Finally the HSP-3 has a vertical keeper and no hook. Hasps are best suited to doors and chests.

## HF-9 Cupboard Strap Hinges

Small straps like these are made for use on cupboards, cabinet doors, and small interior doors (like closets or pantries). The butt plate comes set up to allow two mounting methods: surface mount it with the supplied pyramid head screws, or make a mortise and jamb mount it like a butt hinge. It works either way and both types of fasteners are included.

As with all iron work, each piece is completely hand forged by our smiths. The designs are based on colonial era ironwork. They are made, like the iron of old, to last forever. The HF-9 series hinges use 1" wide by  $\frac{1}{8}$ " thick material. The pin is  $\frac{3}{16}$ " diameter.

## Wrought Iron Snipe Hinges

Snipe hinges (also known as cotter pin, or staple hinges), are the earliest hinges we produce. Made from soft iron and thinned out to delicate proportions. There really is no way to date the originals, people have been making this type of hinge for about as long as people have been working with iron.

Snipe hinges are installed by pushing each half through a hole drilled at a slant through the boards from the back. The protruding points are spread apart, bent, and clinched back into the wood. Always predrill your holes! Wood splitting is likely to occur if you do not.

## Lift Off Door Butt Hinges

While we make a lot of exact copies of antique hardware, we don't want to produce designs that didn't work. Our iron butt hinges, in both lift off and fixed pins versions succeed where their predecessors failed. These hinges duplicate the look and feel of cast iron butt hinges from the middle to late 19<sup>th</sup> century. Those cast from iron hinges looked great, but they broke. The material was brittle and the casting process left air bubbles right in the metal. If you've ever owned or restored a home from this era, you know what happens. They snap.

### Dimensions

	width	height	pin
LO-17R	3"	3"	1/4"
LO-18L	3"	3"	1/4"

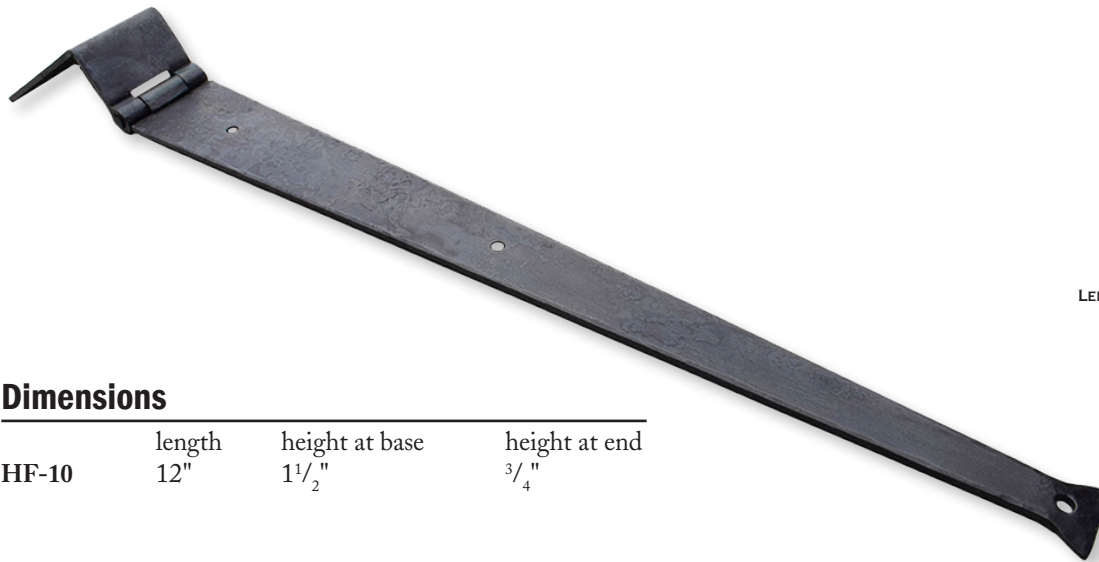

Our forged iron butt hinges serve the same purpose and look the part. But instead of casting brittle hinges—we start with heavy duty steel commercial butt hinges. First we burn all the ugly zinc off of them. Then we reforge them to create a period look with none of the downsides. We stock two sizes and are happy to make these to fit existing mortises in old doors and door jambs.

## HF-10 Blanket Chest Hinge

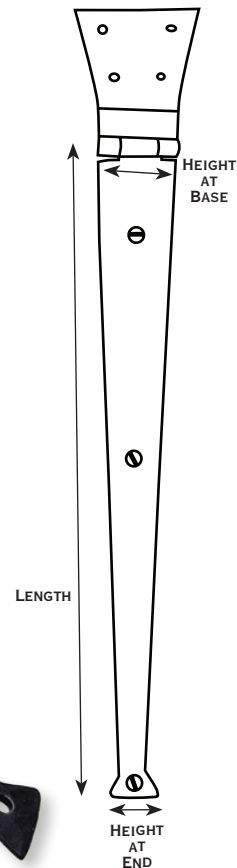

Handmade blanket chest hinges, also called dovetail hinges or fish tail hinges, are arguably the nicest way to hinge a trunk lid.

The dovetail mounts down inside the box and the strap mounts underneath the lid. The strap gives the hinge some added strength for heavy lids. These are sized for  $\frac{3}{4}$ " -  $\frac{7}{8}$ " thick wood. The strap is approximately 12" long. We are happy to make custom sized variations to fit your applications.

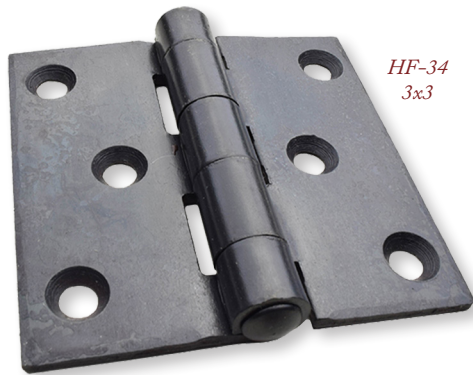

### Dimensions

## HF-11 Iron Hook

These iron hooks have a  $\frac{3}{4}$ " opening and a  $1\frac{7}{16}$ " projection. Screws are provided for full installation. Custom sizes are available on request.

### Dimensions

	height	projection	opening
HF-11	$3\frac{1}{2}$ "	$1\frac{7}{16}$ "	$\frac{3}{4}$ "

## HF-3 Screw-In Hook

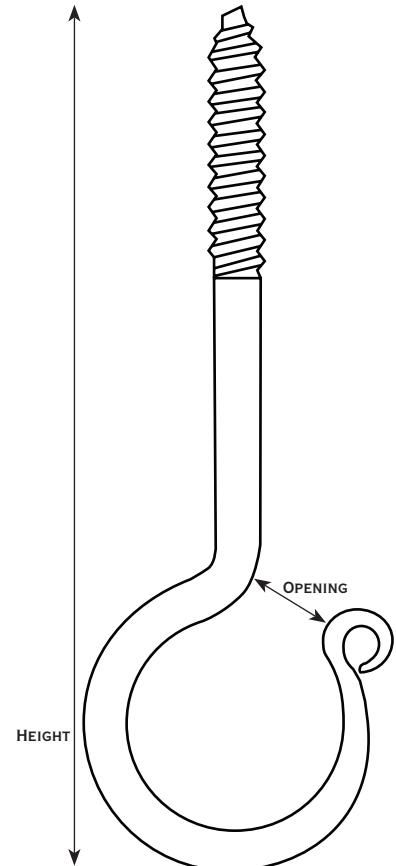

This screw in hook (also called a drive hook) has an inside opening of one inch. The top opening of the hook measures at half an inch. Essentially a straight screw with a hook at the end, this hardware offers extra support not possible through an ordinary screw or nail, and can be installed into a variety of wall and ceiling materials.

Very strong, often used for chandeliers and sconces. Although hand forged iron emphasizes strength, screw in hooks are helpful for smaller tasks. Install a set for hanging up decorations or plants.

### Dimensions

## HF-4 Chandelier and Crane Hook

S shaped hooks were used for many things. Crane hooks were originally used for hanging the stew pot from the crane in the kitchen fireplace, Chandelier hooks were generally used for suspending lighting.

Our S-shaped hooks are made from  $\frac{1}{4}$ " square iron, with a nice set of twists in the middle. These can be made in any length. Custom hooks take about 2-3 weeks. Stock hooks are shipped within 24 hours.

Chandelier iron S hooks are designed to support a chandelier, but is also handy for many other tasks. In addition you can link several hooks together. We keep the 6" length in stock at all times.

### Dimensions

	length	height	opening
HF-4	10"	$1\frac{3}{4}$ "	1"
HF-4S	6"	1"	$\frac{3}{8}$ "

## HF-5 Heart Hooks

With an attractive, classic look, heart hooks are equal parts practical, fun, and whimsical. A wrought iron design shows durability, while the heart ornament at the top gives each character. Choose from two styles: a solid, filled-in heart plate with a smaller hook attached, or a heart-shaped outline with a longer hook extending from the base. Both are screwed into a wall or surface.

The style and strength makes each heart hook look versatile. Improve your home with a set near the doorway, for hanging coats, purses, or hats, or inside the kitchen for utensils, potholders, cups, and other standard cooking supplies.

## HF-6 Gate Hooks

Leaving a gate or door open can be a safety hazard, from allowing intruders to enter easily to exposing supplies and items. Our iron gate hooks hold the door closed. Available in three sizes, our gate hooks extend across various indoor and outside uses. Add one to keep bedroom or bathroom doors closed or to hold any outside gate in place.

Find gate hooks with eye or staple options. The sturdy iron holds up through repeated use and firmly prevents a door or gate from being opened. The classic look of iron, as well, is inconspicuous and matches a variety of materials.

### Dimensions

	length	height

## HF-8 Wrought Iron HL-Hinges

Our H and HL hinges are fully made in a coal forge. The edges are beveled and the texture and quality of the forge work is very evident. Linseed oil is allowed to penetrate the iron and the resulting color is a natural, dark hue that shows the hand work well.

H and HL hinges are surface mounted with black pyramid head screws, which are included with each pair. We can make special sizes or hole configurations.

## HF-15 Door Strap Hinges

The ideal length for strap hinges is  $\frac{2}{3}$  of the width of the door, or more. These hinges can be surface mounted or jamb mounted, and instructions and screws for either application come with each order.

HF-15 hinges can be made in other lengths, just tell us what you need. If your door is quite heavy (more than 70lbs), consider using pintle hinges, as the pin size will be larger and strap material will be thicker.

## HF-40 Pintle Strap Hinges

Long, narrow, wrought iron straps for pintle hinges, these were common in New England. The HF-40 straps we keep in stock fit doors approximately 36" wide and are suitable for interior or exterior applications.

Our iron is hand forged in the traditional manner. The black color comes from heat and oil. If used outdoors iron will rust. If you are using any hand forged iron outside, you can choose to let the iron rust, wax, or oil it, or paint it. We are happy to paint the iron for you.

## HF-37 Jamb Mounted Pintle

Jamb mounted pintles are mortised into the jamb as any butt hinge is, and I recommend them highly for most applications. We also make the jamb plate any size you need. Supplied with  $2\frac{1}{4}$ " long black head screws.

Screw in pintles often called farmers pintles, are a commonly produced custom pintle configuration. They can be handy for duplicating the appearance of a driven pintle without the tricky installation. They do have a tendency to rotate once installed so we recommend them for lighter doors only.

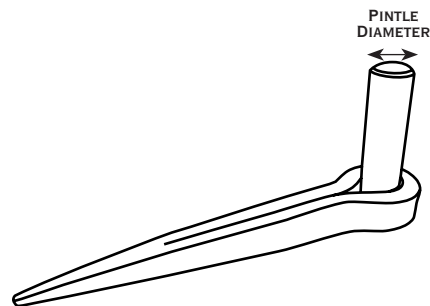

### Dimensions

	pintle/height	pintle diameter
HF-37	$1\frac{1}{2}$ "	$1\frac{1}{2}$ "

## HF-36 Driven Pintle

Jamb mounted pintles are mortised into the jamb as any butt hinge is, and I recommend them highly for most applications. We also make the jamb plate any size you need. Supplied with  $2\frac{1}{4}$ " long black head screws.

### Dimensions

	pintle/height	pintle diameter
HF-36	$1\frac{1}{2}$ "	$\frac{1}{2}$ "

## HF-35 Screw-In Pintle

Jamb mounted pintles are mortised into the jamb as any butt hinge is, and I recommend them highly for most applications. We also make the jamb plate any size you need. Supplied with  $2\frac{1}{4}$ " long black head screws.

Screw in pintles often called farmers pintles, are a commonly produced custom pintle configuration. They are the same as the HF-36 driven pintles, but instead of the spike for masonry they have a threaded lag screw end. They can be handy for duplicating the appearance of a driven pintle without the tricky installation. They do have a tendency to rotate once installed so we recommend them for lighter doors only.

### Dimensions

	pintle/height	pintle diameter
HF-35	$1\frac{1}{2}$ "	$\frac{1}{2}$ "

## HF-41 Dummy Strap Hinges

The HF-41 straps here are 'dummy straps'. A decorative option with period sensibilities, dummy hinges are not functioning hinges. They provide the beauty of a strap hinge on doors that are already hinged or don't need hinges, such as overhead garage doors. Add a beautiful period look to your door without removing existing fixtures with these ornamental dummy strap hinges. An old-fashioned, wrought iron style comes with a choice of three distinct shapes: heart, bean, and ball & spear.

### Dimensions

	length	width	thickness
HF-41	24"	1 1/2"	3/16"

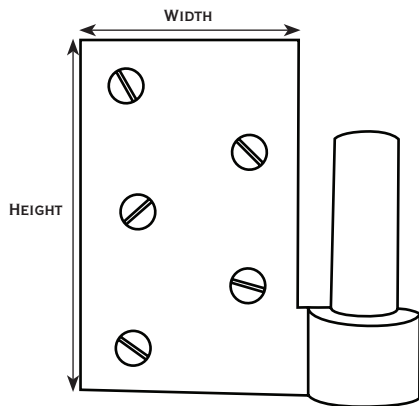

## Large Jamb Mounted Pintles

Jamb mounted pintles are the strongest type of pintle for wood jambs. They have a steel plate that is mortised into the jamb. They are no different to install than regular butt hinges and they work just as well. If you are working in brick or stone please call us to discuss driven pintles and other options.

### Dimensions

	width	height	pintle diameter
HF-47	$2\frac{7}{16}$ "	4"	$\frac{3}{4}$ "
HF-57	$2\frac{7}{16}$ "	$2\frac{1}{2}$ "	$\frac{7}{8}$ "

## Large Exterior Door Pintle Strap Hinges

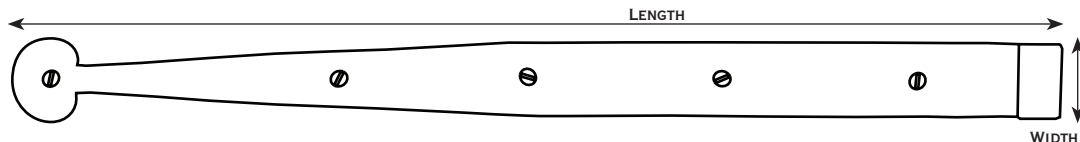

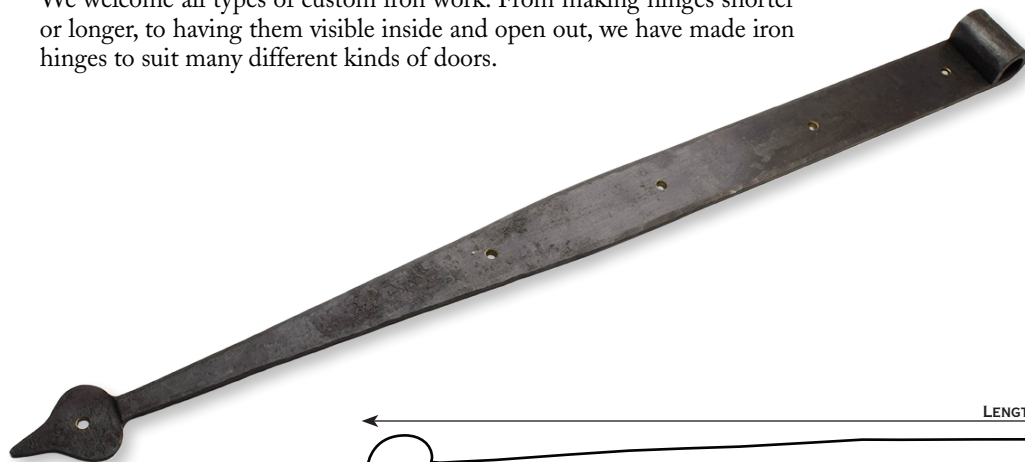

HF-42 strap hinges are very heavy duty hinges and can be used on doors up to about 40" wide and 200 pounds. They are suitable for the heaviest barn and carriage house doors and gates.

Each one is handmade with a hammer, anvil, and a coal fire. The black finish comes from heat and oil.

We welcome all types of custom iron work. From making hinges shorter or longer, to having them visible inside and open out, we have made iron hinges to suit many different kinds of doors.

### Dimensions

	length	width	thickness
HF-42	28"	2"	1/4"
HF-43	32"	2 1/4"	1/4"

## HF-50 Barn Door Cane Bolts

### Dimensions

	plate length	plate width	throw
HF-50U	13"	4"	4"
HF-50L	13"	4"	4"

When two doors come together without a post in the center of the opening, a cane bolt is needed. Usually the right door latches against the left door. The left door is 'fixed' shut by a bolt down into the floor or ground, and/or a bolt up above.

The wrought iron construction gives our cane bolts a strength and classic, versatile style that blends into and compliments a variety of woods and other materials. Choose from left and right cane bolts for improving the functionality of your home's or building's double doors.
