Company Story

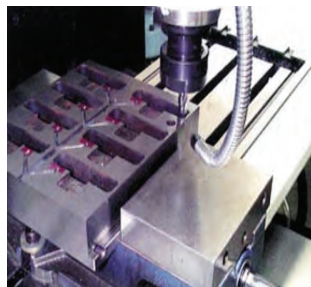

Welcome to Hughes Supply Company

The Hughes Supply Company was founded in 1973 by **Robert Ted Hughes**. Ted started with a simple philosophy; Provide customers with **Quality Products**, **Prompt Courteous Service**, and **Competitive Prices**.

Today, the **Hughes Supply Company** still manufactures high quality injection molded plastic parts on state-of-the-art equipment in our 130,000 square foot manufacturing facility located in Thomasville, NC. We operate around the clock production geared for both minimum and maximum production runs. Our 42 molding presses ranging from 50 to 750 tons are capable of producing precision tolerances out of virtually any thermoplastic material and in a wide variety of colors.

We are a **Plastic Component Manufacturer** specializing in custom molded plastics for all industries including *Display, Fencing, Furniture, Kitchen Cabinets, Window & Door*, etc. All our products are proudly made in America.

Our services include Injection Molding, In-house Tool & Die, Product Design, Automated Packaging, Hot Stamping, Heat Sealing, Pad Printing, 3D Printing, Sonic Welding, and Component Assembly.

Dowel Pins are used for the joining together of two pieces of wood, metal, plastic, etc., to prevent motion or slipping. Typical uses include frame and door construction, shelf location, case erecting and panel alignment. The **Hughes Supply Company** manufactures various dowel pin configurations to satisfy a wide variety of joinery and construction applications.

Hughes Supply Dowel Pins are made of Nylon for superior strength and longevity. Most of the standard configurations have opposing barbs to increase the holding power of the pin.

HUGHES SUPPLY

*Injection Molded Plastic
Manufacturing*

Drawer Back Bearings are used in conjunction with center mounted drawer rails. Drawer Back Bearings are made from HDPE, which stands for (High Density Polyethylene). The material is known for strength and durability. **Hughes Supply** manufactures drawer back bearings to work with both metal and wooden center mount rails.

Drawer back Bearings mount on the back of the drawer. When installed they capture the drawer rail and allow it to align and slide smoothly. Common applications include bedroom casegoods, RVs and underbed storage units.

*Hughes Supply Company
175 Kanoy Road
Thomasville, NC 27360*

Drawer Glides are used to allow drawers to open and close more smoothly when center mounted drawer slides are being used.

The **Hughes Supply Company** manufactures a variety of drawer glide configurations for use in Dressers, Chests, Night Stands, RVs and other casegoods.

Most of these high quality Drawer Glides are designed to be stapled inside of the drawer frame opening. They are made of high density polyethylene (HDPE) and come standard in Beige, Natural and Walnut.

*Hughes Supply Company
175 Kanoy Road
Thomasville, NC 27360*

HUGHES SUPPLY

*Injection Molded Plastic
Manufacturing*

Hughes Supply manufactures plastic drawer guide systems for use in promotionally priced casegoods. These drawer guides offer smooth sliding action for a fraction of the cost of the metal versions. This style of drawer guide is designed to screw to the inside of the case.

To utilize this type of drawer guide, a groove must be cut lengthwise on the outside of the drawer box on each side. The groove will allow the drawer to glide smoothly along the self lubricating plastic runner. These items are available in Beige, Black and Walnut.

*Hughes Supply Company
175 Kanoy Road
Thomasville, NC 27360*

Adjustable Drawer Slide Sockets are most commonly used in production cabinets to speed installation. The 10mm diameter dowels on the rear mounting plate are designed to work with pre-bored back panels.

The two piece socket design allows the drawer to self align and guarantees smooth and quiet operation. Designs available for both side and undermount applications.

To find the right drawer slide socket to fit your particular application, please contact your **Hughes Supply** representative.

HUGHES SUPPLY

Injection Molded Plastic Manufacturing

The **Hughes Supply** Company offers specialized packaging for our clients unique product applications. We operate four H-100 Auto bagging machines with the capacity to produce thousands of bags per day. We are capable of packaging up to six different items in each bag depending on the size and weight of the parts.

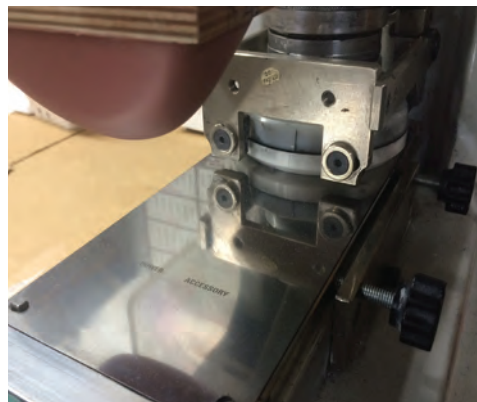

Pad Printing is available for a variety of applications. Pad printing is a decorative ink transfer application designed to mark and/or identify products. The ink transfer process is durable and delivers a high quality appearance. Printing can be done on flat, curved or angled surfaces.

The **Hughes Supply Company** has implemented **3D Printing** technology to offer our clients speed to market and economical product prototype development services from engineered CAD drawings. Consult your Hughes Supply Company representative for prototype development cost.
