Presenting the ISONAS Crystal EasyWeb™ Access Control System

Use a Web-Browser to maintain and monitor the ISONAS Crystal Access Control System.
Simplifies the job for the ISONAS system's end-user.

Industry leading advantages:

- Common end-user tasks are simplified, and presented thru the user's web-browser.
- Application is available from anywhere on the users network.
- No software to install on the user's workstation
- Works in parallel with the full-featured Crystal Matrix™ Access Control software package
- Multiple user logon levels allowing selection of the features authorized for each user
- Allows the end-user to email the system administrator for support

The ISONAS Crystal EasyWeb application lets users control, monitor and configure the ISONAS Access Control System (ACS) with unmatched ease, from anywhere on the network.

Through a web browser, users can:

- Maintain the ACS system's personnel database
- Monitor and control the current status of the doors within the system
- Review the ACS system's historical data
- Review the roster of who is currently logged into the facility
- Configure the customer's access control business rules
