BOTTOM PIVOT AND JAMB BRACKET

New Design— Will not lose adjustment in use!

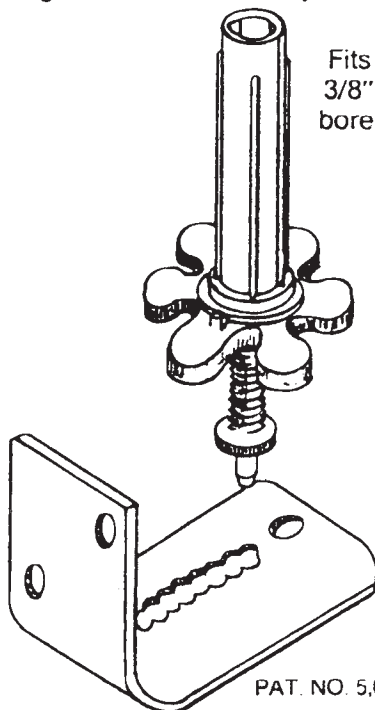

Easy Vertical Adjustment

Rotate thumbwheel on bottom pivot:
Left to lower,
Right to raise.

Adjusting wheel is locked by its unique design so doors cannot work down and fall out.

Vertical Adjustment DOES NOT CHANGE when door opens or closes.

Fits 3/8" bore.

Easy Horizontal Adjustment

Just lift and set down.
Horizontal adjustment is not disturbed by vertical adjustment.

Straight-sided pivot pin provides secure engagement into jamb bracket, gives three times the "jump" protection of "cone" style pivots.

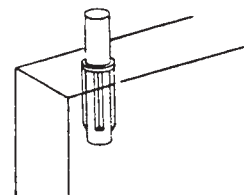

Once in place, it STAYS IN PLACE!

PAT. NO. 5,054,163

Newly designed Bottom Pivot System makes this the least expensive high performance Bifold hardware available! A Builder's delight — easy to install and no callbacks caused by "out of adjustment" failures.

Now you can start using Bifold doors again with confidence!

SOLID TOP PIVOT/GUIDE

Fits 3/8" hole.
Economical, simple and effective.
