

Latch & Latch Extension Assembly

For proper installation, it is very important to assemble the latch extension on the latch in the position shown.

For 3 3/4" Backset

Fig. 1 From side W (Opposite to dead locking pin "B"), connect "C" to latch tail piece "T" and hold it

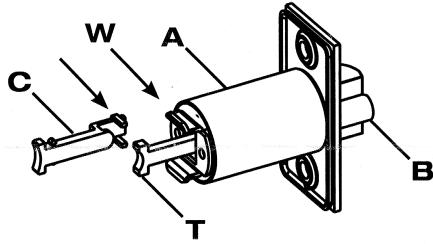

Fig. 2 Assemble "E" on "C". The end of "C" goes through rear slot of "E". Guide "F" to be under "C". Slide extension housing "E" on latch "A"

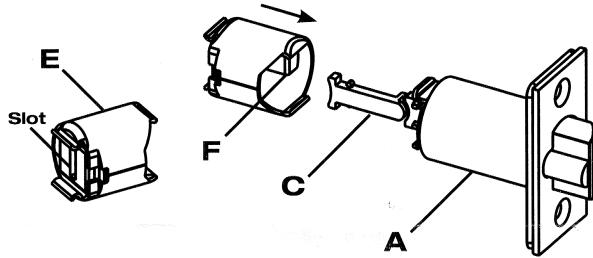

Fig. 3 After assembly, clearance "G" to be in the same side as dead locking pin "B".

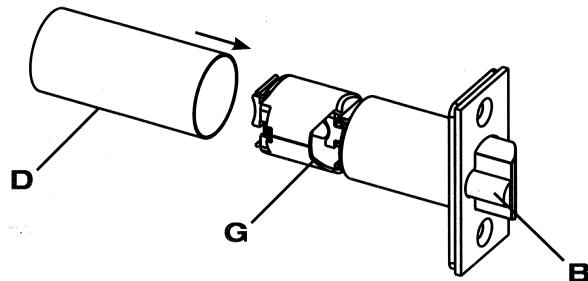

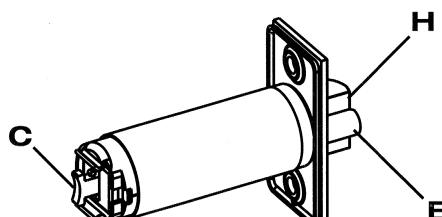

Fig. 4 Assemble sleeve "D" to hold both latch and latch extension.

Test the dead locking of the latch: Press and hold "B". Bolt "H" must block if pressed.

Test the retraction of the latch by pressing "B" and pulling on tail piece "T".

For 5" Backset

Fig. 1 From side W (Opposite to dead locking pin "B"), slide extension "C" on latch "A"

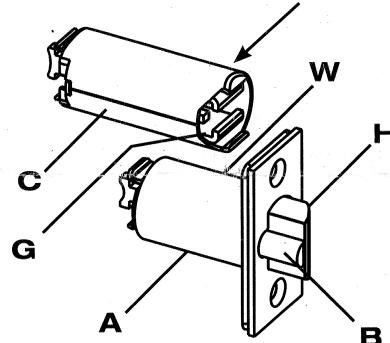

Fig. 2 Check the clearance "G" is in the same side as dead locking pin "B" after assembly.

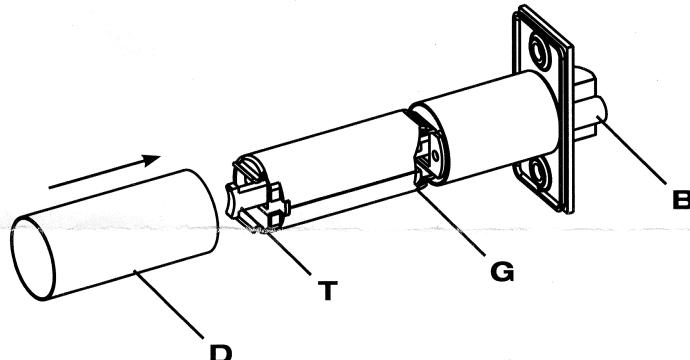

Fig. 3 Assemble sleeve "D" to hold both latch and latch extension.

Test the dead locking of the latch: Press and hold "B". Bolt "H" must block if pressed.

Test the retraction of the latch by pressing "B" and pulling on tail piece "T".
