### Section 3 - Health Hazard Data

**Threshold Limit Value**PEL for Ortho-dichlorobenzene: C-300mg/m<sup>3</sup>TLV for oil mist = 5mg/m<sup>3</sup>

**Effects of Overexposure** Inhalation is the most likely method of exposure. Minimal effects are expected at levels below the TLV of components. Dizziness, drowsiness, coughing, nasal or throat irritations at higher levels. Propane may act as a simple asphyxiant without other significant physiologic effects if the oxygen content is low. It is reported that O-Dichlorobenzene can cause liver and kidney damage in test animals.
