PRODUCT DESCRIPTION

Linear's Model CCM-2A (P/N ACP00936A) CCTV camera can be installed inside the RE-2 Residential Telephone Entry System. The camera provides a video signal for viewing the area in front of the entry system.

The camera is continuously powered by the RE-2. Focus has been factory adjusted to a range of three to four feet. No adjustment is needed.

The **CAMERA** connector is used to connect the camera to the RE-2. The 3-conductor cable routes power to, and video from the camera.

The RE-2 provides a video jack for connection to a video cable with a Type "BNC" connector. Up to 400 feet of 75-ohm RG-59 video cable can be used. Longer cable runs may require the use of a video amplifier.

NOTE: If camera is being installed on an existing installation, system power should be off prior to installing the camera.

1. REMOVE THE COVER PLATE

REMOVE THE FOUR
SECURITY SCREWS
TO OPEN THE CASE

2. PREPARE TO MOUNT THE CAMERA

REMOVE THE SIX CIRCUIT
BOARD RETAINING SCREWS
AND FLIP THE CIRCUIT BOARD UP
