Heat and Household
Chemicals

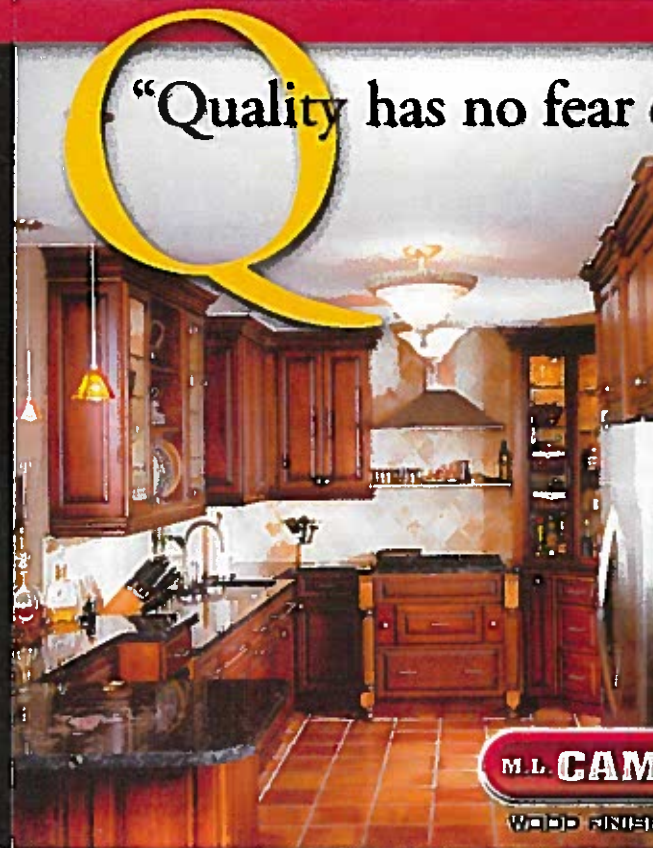

Provides exceptional
wear, mar and
scratch resistance

Protects the integrity
of the wood to
extend its life

Maintains superior
aesthetics for
years to come

M.L. CAMPBELL®

WOOD FINISHING SYSTEMS

We take Pride in our products

Every project we make is crafted with quality and pride. Using premium selected pattern grade woods that are kiln dried to 6%-8% moisture content, as the result of this careful selection process, we eliminate the usual cause of warpage, knots, grain swirls and high moisture content. Proper selection of quality woods and attention to the small details are the secrets to creating something with special value. Our products are made by North American craftsmen with seasoned woodworking skills, who pay attention to the small details that make a big difference in the end product. We are known for authentic classical North American design in artistic woodworking. Our products, like old friends and family, never wear out their welcome in homes of distinction.

One of the most important components of developing a long-lasting product with value is the finish that is used. That is why we use only premium quality M.L. Campbell finishes that are specially formulated to reveal the deep, long-lasting beauty of natural wood. We carefully apply these finishes to protect against scratches, abrasions, stains and moisture. These fine finishes from M.L. Campbell, developed the unique "feel appeal" that allows your hand to really experience the rich feel of a premium furniture grade finish that gives true value to the project.

We are very proud of our wood artisans, these masters of custom woodworking that we have in residence. We use the finest materials, the best tools and skilled craftsmen who turn their craft into long-lasting, quality, North American made wood products.

How to take proper care

FOR OVER 90 YEARS, M.L. Campbell has been manufacturing and selling quality wood finishes. This project has been finished with our latest generation product that combines European technology with North American ingenuity and style. Cared for properly, this item will remain both beautiful and functional for many years to come.

REMOVE DUST - Dust buildup, is made up of small airborne particles, may scratch or dull the surface if not removed correctly. Simply wipe the surface with a cloth dampened with a cleaning polish or mild detergent.

CLEAN - Fingerprints, cooking fumes, smoking residue, etc., accumulates on any finished surface. None of these contaminants will harm our finish, but they should be periodically removed to restore the finish to its original luster. Just wipe the surface with a cloth dampened with a non-wax containing polish or mild detergent solution. Avoid the use of ammonia based products or silicone oils as they may cause damage if used over a long period of time.

The finish is durable and resistant to most household spills. However, spills should be wiped up promptly to avoid potential problems.

Excessive prolonged exposure to direct sunlight, high temperatures and high humidity can cause damage to both the finish and the wood itself. These should be avoided.

Following these simple steps will keep your finished project looking like new for many years.
