

## ***The Aluminum Door Jamb Reinforcer***

# **STRIKE GARD**

***Used to repair an aluminum door jamb that has been damaged due to a break-in, or to reinforce a jamb as extra protection against forced entry.***

*This Strike/Cylinder Gard package can be an easy add on sale when installing, servicing or changing the combinations on aluminum doors.*

### ***Features***

- Thin flat design will allow strike to be installed on door frame and not rub the door.
- Mounts to door jamb with steel pop rivets (supplied).
- Packed with our CGA or CGD Cylinder Gard at no extra charge to make an aluminum door security package.
- Will work with W&F and Reflectolite type locks or punch out the "Knock-Out" and use with Adams Rite type swing bolt locks.
- Will fit 4" or 4-1/2" wide jambs.

### ***Installation***

Easily installed by drilling six No. 20 holes in the door frame and using the steel pop rivets supplied with the strike.

### ***Material***

14 Gauge cold rolled steel 2-15/16" x 8"l.  
Approximately 5/64" thick.

#### ***Part No.***
