1. Apply to a clean, dry surface. Best when applied at temperatures between 40º F (5ºC) and 90º F (32º C).

2. Measure door or window and cut System-V™ weatherstrip to length.

3. Fold System-V™ weatherstrip into "V" shape with adhesive on the outside.

4. Peel paper backing while positioning System-V™ weather- strip in place so that "V" compresses when door or window is closed.

5. Stick System-V™ weatherstrip in place. Tape can be lifted for repositioning if needed.
