CONCEALED FASTENER THRESHOLDS

Our innovative new threshold designs feature a snap-on cover that conceals all fasteners in the opening, allowing for a smoother, more consistent threshold surface. These ADA-compliant, retrofittable models provide a flat area for a door bottom sweep or shoe to seal against.

Features:

- Snap cover conceals fasteners in the opening
- Suitable for retrofit applications
- Provides a flat surface for door bottom sweep or shoe to seal against
- Standard #10 zinc-plated steel fasteners; optional threshold fastener types available
- Provided with standard hole pattern in the recessed channel
- UL listed to UL10B and UL10C for positive pressure
- ADA compliant, meets ANSI J32100, J32130
- Replacement snap cover available (_6900SC)

Benefits:

- Aesthetically pleasing. Threshold surface is smooth and consistent
- Discourages tampering
- Acts as a non-combustible sill in the opening
- All models can be L- or U-notched to fit around the frame

APPLICATIONS

- Healthcare
- Hospitality
- Office Buildings
