

**AS-1**

## **ACCURATE SCRIBE**

Instructions: Place the item being installed against the installation surface positioned at the location at which it is to be installed. Set the spacing between the back of the guide-legs and the pencil point of the ACCURATE SCRIBE equal to the widest spacing between the item and the surface. Tighten the knurled nut to lock the setting. Place the back of the ACCURATE SCRIBE guides against the surface and slide it along the surface so that the pencil marks a line on the item. The pencil line will be parallel to the surface and will match its contour. Trim to the pencil line to obtain a perfect fit.
