

FIRE-RATED DOORS

FOR RESIDENTIAL & LIGHT COMMERCIAL USE

Do you need a Fire-Rated Door?

When considering a fire door, first determine if the door is for a Commercial or Residential application. Different doors are required for both applications and it is important to choose the correct one for your needs. Next, you need to review and verify the appropriate building codes in your area. This will help determine the specifications of the unit. Finally, determine if a fire label is required. This point should be found while you are reviewing the local building codes.

Laws and regulations can vary widely between states, cities, townships and municipalities. Always be sure to check with all regulating authorities to ensure the door unit you order and install complies with all applicable laws.

Typical Applications

The products found in this catalog are geared toward multi-family homes, condominiums, apartment buildings, and homes that need a fire rated entry based on local building codes.

Table of Contents

90-Minute vs. 20-Minute Units	3
Frames & Hardware Reference Guide	3
90-Minute Fire-Rated Steel Edge Doors	4
20-Minute Fire-Rated Wood Edge Doors	6
Therma-Tru 90-Minute Split Steel Frames	8
RSP 90-Minute Split Steel Frames	9
Therma-Tru 20-Minute Frames	8
Therma-Tru 90-Minute Hardware	10
Therma-Tru 20-Minute Hardware	11
RSP 90-Minute Hardware	12
Rough Openings	14
Educational Tools & Guided Selling	15

Reeb stocks products to meet most national and local code requirements for house-to-garage, multi-family and hotel/motel unit entries.

If you are interested in learning more about the products Reeb stocks to meet your fire-rated applications, visit learn.reeb.com/kb-category/light-commercial-door-products/

90-Minute vs. 20-Minute Units

A 90-minute unit will use a 90-minute door with a 90-minute frame.

90-minute rated doors have a full steel-edge creating a sturdier steel door. They are insulated with a polyurethane core. The doors are tested to withstand at least 90 minutes of fire exposure. The steel used will either be a 22- or 24-gauge steel. Choose between the Reeb Specialty Products (RSP) 90-Minute Steel-Edge Doors or the Therma-Tru 90-Minute Steel-Edge Doors.

A 20-minute unit will use a 90-minute or 20-minute door with a 20-minute frame.

An RSP 90-minute rated door allows for additional protection with a steel edge door. 20-minute rated doors have a wood edge and are insulated with a polyurethane core. They are tested to withstand a minimum of 20-minutes of fire exposure. Choose between the Therma-Tru 20-Minute Fiberglass or Steel Wood-Edge Doors.

Frames & Hardware

The frame and hardware used will be based on the door chosen. Make sure to reference the appropriate section.

The Reeb Specialty Products 90-Minute Steel-Edge Doors must be paired with the 90-minute RSP Split Steel Frame.

This frame has a large offering of sizes, sill options, and hinge finishes available. In addition, this door can be used with a 20-minute frame.

The Therma-Tru 90-Minute Steel-Edge Doors must be paired with the Therma-Tru Split Steel frame. The frame has a small size and hinge finish offering. This door cannot be paired with any other frame option.

The Therma-Tru 20-Minute Fiberglass or Steel Wood-Edge Doors pair with 20-minute frames.

Rough Openings

Therma-Tru®

Steel-Edge Series Fire Doors

Rough openings vary depending on the sill type and the door width. Sill options include a standard sill, no sill, and a public access (ADA) sill for both inswing and outswing units. Ensure the closure package jamb depth and sill application match what is needed in the field. The below measurements are the standards based on Reeb's stock of material.

Size	Standard Sill	No Sill	ADA Sill
2668	31" x 81-1/4"	N/A	N/A
2868	33" x 81-1/4"	33" x 80-1/8"	N/A
21068	35" x 81-1/4"	N/A	N/A
3068	37" x 81-1/4"	37" x 80-1/8"	37" x 80-5/8"
2870	33" x 85-1/4"	N/A	N/A
3070	37" x 85-1/4"	N/A	37" x 84-5/8"

Reeb® Specialty Products

Series Fire Doors

Rough openings vary depending on the sill type and the door width. Sill options include a standard sill, no sill, and a public access (ADA) sill for both inswing and outswing units. Ensure the closure package jamb depth and sill application match what is needed in the field. Below are the minimum drywall rough openings. For 7' doors, add 4" to the height dimensions and for 8' doors, add 16" to the height dimension.

Size	Standard Sill	No Sill	ADA Sill
2668	31-1/8" x 81-21/32"	31-1/8" x 80-13/32"	N/A
2868	33-1/8" x 81-21/32"	33-1/8" x 80-13/32"	N/A
21068	35-1/8" x 81-21/32"	35-1/8" x 80-13/32"	35-1/8" x 80-29/32"
3068	37-1/8" x 81-21/32"	37-1/8" x 80-13/32"	37-1/8" x 80-29/32"
