## Announcing the Rockwood 556WS Windstorm Flush Bolt

Rockwood Manufacturing is pleased to announce the introduction of the 556WS Flush Bolt. Specially designed for windstorm applications, this new product utilizes the standard ANSI A115 flush bolt prep simplifying installation, and giving a clean finished appearance.

The 556WS flush bolt is a required element of a new In-Swing Door Pair solution from ASSA ABLOY Group brands including doors from Ceco®, Curries® and Fleming-Baron® and hardware from Corbin Russwin, SARGENT® and Yale®. This assembly is the first commercially available In-Swing solution to meet Hurricane Code requirements.

The Rockwood 556WS Windstorm Flush Bolt meets ANSI A156.16, L04251 and is UL Certified. It meets High Velocity Hurricane Zone (HVHZ) Requirements.

This product is part of an overall ASSA ABLOY windstorm solution or can be used stand-alone for security applications, including healthcare, universities, commercial buildings, hospitality and schools.

For additional information contact your local sales representative, ASSA ABLOY Door Security Solutions Representative, or call Rockwood Manufacturing Company at 800-458-2424.
