

HINGES & HARDWARE

How do you define a qualified supplier?

As Rockford Process Control planned for a successful future, one of the questions we asked ourselves was: "What do we need to look for in establishing supplier partnerships to assure that we have a dependable, trustworthy and competitive supply chain?"

Our answer was to find companies with:

- Experience and leadership
- Expertise with the products
- A high level of customer service
- Consistent quality, on-time delivery and competitive pricing

We believe that if this concept is important to our company's future success, it should be important to our customers as well. That is why this definition has become our mantra for serving our customers.

Experience and expertise count. In 1983, Paul Colloton and Dick Gleichman founded RPC with the determination that quality was not an aim but a direct result of a consistent commitment to hard work and listening to customer needs. In 1987, they acquired the institutional market leading National Lock Casework Hardware hinge product line from Amerock. An emphasis was put on updating equipment and improving the quality control. This product offering is still the recognized standard for the institutional, hospital and educational markets.

To better serve our customers varied needs, RPC acquired the assets of Terry Hinge and Hardware in 2007. The Terry brand has a 50 year heritage of providing manufactured and imported product lines.

As our name suggests, Rockford Process Control's main competitive advantages are:

- Design
- Manufacturing
- Quality control processes
- Customer satisfaction

To remain competitive in this global market we have our own fulltime staff in Asia tasked with finding the best factories to build product to our designs and specifications. We do "in factory" inspections during manufacture to insure product consistency and quality.

When you, or your customer's, production schedule and reputation depend on timely delivery of quality hinges and hardware, you can put your trust in Rockford Process Control.

Green Hinges for Green Cabinets

Now you can specify hinges for your project's commercial and institutional cabinets to be GREEN or qualify for LEED™ certification points. Rockford Process Control domestically manufactured hinges reduce your environmental impact in a variety of ways: we utilize steel with recycled content, fabricate the component parts using water soluble lubricants, recycle all material punched out of the product during the fabrication process and package in fully recyclable shipping containers. When you see the "American Flag" icon on the following pages you can be assured that the product was manufactured in our centrally located factory in Rockford, Illinois.

Rockford Process Control – Your Hardware Solution Provider

Custom and Special Product Solutions

RPC/TERRY wants to provide products to meet your specific needs. If you need an application specific hinge, pull, stamped bracket or other piece of hardware, please don't hesitate to contact RPC's Sales Manager at 815-966-2000 or email "sales@rockfordprocess.com" with your exact needs.

Our engineering staff will evaluate your need and help you design the right product for your application. For a competitive quote, please send us a sketch or sample of your custom part including material and quantity requirements. If you have a target price you need to meet, let us know and we will strive to meet or beat your target.

We are always seeking new products to expand our ability to serve our customers, old and new. Please let us know what your needs are so we can provide solutions for your needs.

Import Expertise

RPC/TERRY has our own staff in China to find the best supplier for a product. Our importing capabilities include providing on going quality control, refining manufacturing techniques and obtaining the best possible value for our customers. Please talk to us about becoming your direct container supplier for all of your high-volume product needs.

LIMITED WARRANTY

Rockford Process Control, Inc. (RPC) warrants its Hinges and hardware against defects in material and workmanship for a period of twelve (12) months from the date of shipment.

RPC will send the original consumer purchaser, without charge, a new RPC/TERRY Hinge to replace any defective RPC/TERRY Hinge subject to this warranty. RPC specifically does not warrant removal of the defective Hinge or installation of a new Hinge. This warranty does not cover Hinges that have been incorrectly installed, exposed to excessive loads or abuse in any way. This warranty is a warranty of hardware replacement only. No other warranty is expressed or implied.

ORDERING INFORMATION

This catalog represents the blending of two companies' product lines. To minimize confusion by our valued customers, we have retained RPC product numbers and TERRY product numbers. This eliminates the need for you, our customers, to make changes in your computer systems.

RPC part numbers consist of the Model Number followed by the finish code as shown to the right.

TERRY part numbers consist of a product type, product number and finish code:

Product Type	Product Number	Finish
H03	30200	66
Hinge	Model 30200	White

Standard and Custom Finishes for Casework Hinges, Pulls and Wire Doors

RPC's in-house powder coating system allows us to match colors to meet your color specification. Our powder coating process provides you with a durable, epoxy-based finish.

Finish Codes: To simplify manufacturing and inventory control, RPC/TERRY has reviewed and consolidated its finish offerings into Standard and Special colors. Standard colors will be stocked as noted for a given product.

Special colors are available. Special color requests are subject to lead times, minimum order size, special materials up-charges and custom set-up charges.

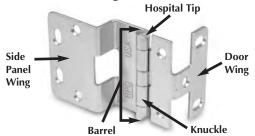

Please contact RPC Customer Service to discuss minimums, lead times and up-charges for your Special or Custom color requirements and for color samples.

HINGE TERMINOLOGY

Institutional Hinge

Door Mounting Configurations

Barrel: The portion of a hinge formed by knuckles of the door leaf and side panel leaf when joined by the pin.

Door Wing: In a five-knuckle hinge, it is the hinge leaf that is mounted to the door. It has two knuckles.

End Play: The amount of axial movement between the leaves measured parallel to the axial centerline of the pin.

Flush: A solid door that sits within the cabinet opening so that the front surface of the door is even with the front of the cabinet side panel.

Gauge: The thickness of the material from which a hinge is produced.

Hospital Tip: A hinge barrel whose ends are beveled towards each other.

Inset: Regarding Wire Doors: The wire door sets or rests inside the cabinet opening with the vertical members flush with the side panels. See Flush.

Knuckle: The curled hollow portion of a hinge through which the hinge pin is inserted. Also known as the curl.

Leaf: The segment of the hinge extending outward from the knuckle, which rotates around the hinge pin.

Leaf Width: The dimension from the centerline of the pin to the outside edge of the leaf measured perpendicular to the axial centerline of the pin.

Length: The dimension from one end of the hinge to the other measured parallel to the axial centerline of the pin.

Lipped: A door with a rabbet cut around the back edge of the door's perimeter. The back portion of the door recesses into the cabinet. The remaining front part of the door will overlay the cabinet side panel.

Non-Removable Pin: A hinge pin secured by a knurl on the pin and spun on both ends or by other means.

Onset: Regarding Wire Doors: The wire door frame sets or rests in front of the side panels.

Open Width: The dimension from one side of the hinge to the other outside edge measured perpendicular to the axial centerline of the pin.

Overlay: A door which is mounted to the front of the cabinet and covers a portion of the cabinet side panel.

Pin: The wire or rod which extends through the hinge about which the leaves revolve. The pin holds the leaves of a hinge together.

Pin Types
Spun Pin
Loose Pin
Double Oval Pin
Sheared Tight Pin (no head)
Staked Pin

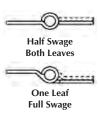

Pitch: The dimension from a point on the knuckle to the same point on an adjacent knuckle on the same leaf.

Reveal: In an overlay door mounting application, the exposed portion of the cabinet side panel not covered by the door when closed.

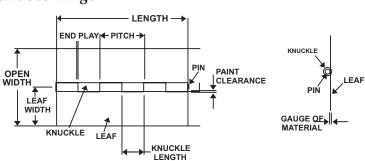

Side Panel Wing: In a five-knuckle hinge, it is the hinge leaf that is mounted to the cabinet side panel. It has three knuckles.

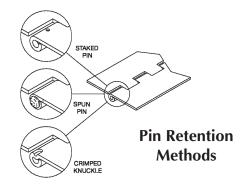

Side Play: The amount of movement of the leaves perpendicular to the axial centerline of the pin. Caused by excessive clearance between the pin and the inside diameter of the knuckle.

Swaging: Forming one or both leaves toward or beyond the centerline of the pin. Swaging reduces the distance between the leaves when the hinge is closed to a parallel position.

Continuous Hinge

THE ROCKFORD HINGE™

These hinges have been the industry standard for five-knuckle hinges for over 75 years! They exceed ANSI/BHMA 156.9 Grade 1 requirements.

Hospital tips, 2-3/4" height, 270° opening angle, drilled knuckle ID with Teflon coated pins. All mounting holes are countersunk for #8 flat head screws.

RPC GRAVITY LOCKS

Secondary locking system for partitioned, two-door cabinets, door automatically locks when shut. Eliminates the need and expense of a keyed door lock on one door. Bolt and bracket are mounted on the cabinet partition, strike plate is mounted to the door.

Part Numbers: GL01, GL02, GL03

GL01: 3/4" (19mm) Partition Thickness:

> GL02: 13/16" (20.6mm) GL03: 1" (25.4mm)

Bolt, bracket and strike plate are made of brushed 304 stainless steel lock, strike plate, one #9 x 2-1/2" Phillips pivot screw, two #6 x 1/2"

Phillips SMS, all screws are bright zinc plated.

Pack: B 250 cell packed/case

P 25 poly bagged/case

GL01, GL02, GL03

Packaged:

THREE-KNUCKLE, NON-MORTISE, INSTITUTIONAL HINGES

Hinge height: 2-3/4", same as five-knuckle hinges

WIRE DOORS

RPC wire doors are suitable for music room, instrument and uniform storage as well as other commercial applications. Choose from RPC's wide selection of standard size wire doors. We can also supply doors to meet your custom size requirements. RPC can match your standard or custom color choice using a durable powder coat finish.

The doorframe wire is 5/16" in diameter. Vertical door wires are 3/16" in diameter and have beveled ends to produce a clean, finished look.

Wire doors are supplied complete with 5-knuckle hinges, a hasp welded to the doorframe and a label holder welded to the vertical wires. A mating Cabinet Hasp - Inset (No. 2102) is included with each door. A No. 2103 Cabinet Hasp - Onset, may be substituted for use in onset applications.

Stay Close Wire Door Latch

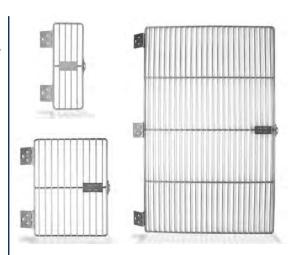

RPC now offers an enhanced stay close wire door latch option. The cabinet latch and door strike are constructed of 13 gauge steel and are available in a bright chrome finish. This system allows the doors to be used in either a right or left hand application. The contour of the latch allows it to travel over the hasp until it falls into a positive locked

position. This latching arrangement is available for both solid and wire grille doors. For security, the door can be locked with a padlock.

Ordering Information: To order wire doors with the Stay Close latch feature, add an "S" after the standard wire door part number (i.e., No. 2022S). The mating latch (left or right handed) will be included in your order.

WIRE DOORS

Typical wire door cabinet dimension and design configurations are shown below. Contact RPC application engineering with your questions or your special requirements. See back cover for contact information.

Applications for STANDARD WIRE DOORS

15 "A" Doors:	3 compartments wide inside dimension = 8.00" (203.2mm)			
(fig. 1)	5 compartments high inside dimension = 14.85" (377.2mm)			
9 "A", 1 "C" Doors:	3 compartments wide inside dimension = 8.00" (203.2mm)			
(fig. 2)	3 (top) compartments high inside dimension = 14.85" (377.2mm)			
	1 compartment high inside dimension = 25.67" (652mm)			
	1 spacer, recessed approx. 1", 5.03" high (25.4mm, 127.8mm)			
10 "B" Doors:	2 compartments wide inside dimension = 12.375" (314.3mm)			
(fig. 3)	5 compartments high inside dimension = 14.85" (377.2mm)			
6 "B", 1 "C" Doors:	2 compartments wide inside dimension = 12.375" (314.3mm)			
(fig. 4)	3 (top) compartments high inside dimension = 14.85" (377.2mm)			
	1 compartment high inside dimension = 25.67" (652mm)			
	1 spacer, recessed approx. 1", 5.03" high (25.4mm, 127.8mm)			
3 "C" Doors:	1 compartment wide inside dimension = 25.50" (647mm)			
(fig. 5)	3 compartments high inside dimension = 25.67" (652mm)			
2 "D" Doors:	1 compartment wide inside dimension = 25.50" (647mm)			
(fig. 6)	2 compartments high inside dimension = 38.63" (981.2mm)			
"E" Doors (pair):	Cabinet (outside dm): = 48"w x 30"d x 84"h (1219.2mm x 762mm x 2133.6mm)			
(fig. 7)	Toe Kick: 4"(101.5mm) from floor to bottom of shelf, recessed approx. 3" (76.2mm)			
	Vertical Members = 3/4" thick (19.1mm)			
	Top Horizontal Member = 3/4" thick (19.1mm)			
	Shelf 1" (25.4mm) thick, recessed approx. 1" (25.4mm)			
	1 compartment wide inside dimension = 46.50" (1118mm)			
	1 compartment high inside dimension = 78.25" (1987.6mm)			
1 "F" Door:	1 compartment wide inside dimension = 25.50" (647.7mm)			
(fig. 8)	1 compartment high inside dimension = 78.25" (1987.6mm)			

Cabinets for STANDARD WIRE DOORS

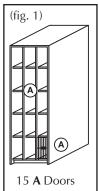

(fig. 1 thru 6, and fig. 8)

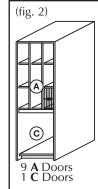

<u> </u>	
Cabinet: (outside dimensions):	27" w x depth x 84" h, w/ 4" toe kick (685mm x depth x 2134mm, w/ 101.6mm toe kick)
(outside difficilisions):	(86311111 x deptil x 213411111, w/ 101.811111 toe kick)
Vertical Members:	3/4" Thick (19.1mm)
Top Horizontal Member:	3/4" Thick (19.1mm)
Shelves:	1" (25.4mm) Thick, recessed

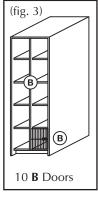

To Calculate WIRE DOORS for NON-STANDARD CABINETS

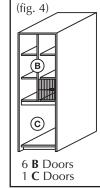

Door Width* inside compartment opening minus 9/16" (14.2mm) **Door Height.....** inside compartment opening plus 23/32" (18.3mm)

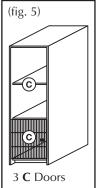

*If the inside compartment opening is greater than 36-9/16" (928.6mm) in width, two doors will be required, or if double compartment doors are desired, calculate the door width as follows: Inside compartment opening minus 27/32" (21.4mm) divided by 2.

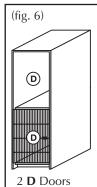

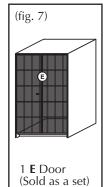

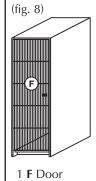

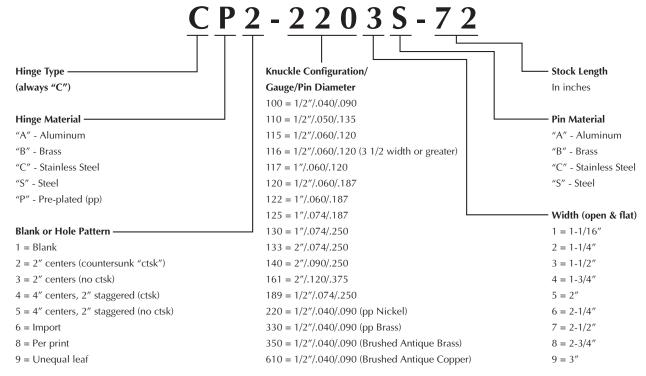

CONTINUOUS HINGES

Continuous Hinge Ordering Codes:

Example: CP2-22035-72 = Continuous hinge, pre-plated with 2" centers (ctsk), 1/2" joint length, .040" thickness, .090" pin diameter, 1 1/2" open width, steel pin material at 72 inches.

HOLE PATTERNS AND FINISHES

RPC has in-house powder coating capabilities for institutional and continuous hinges to be able to provide Brass quick turn-a-round. This permits us to offer custom colors and color matching hinges and pulls for the same cabinet.

Holes countersunk on 2" centers

Finishes:

Nickel Antique Copper **Antique Brass** Oil Rubbed Bronze **Custom Plating** Custom Powder Coated

Please contact our friendly and knowledgeable sales representatives when any need arises for an uneqal leaf, special hole pattern or nonstock finish. Our special hinges are the most competitively priced in the market!

Holes countersunk on 4" centers staggered

We have the capability to run a combination of holes and/or slots in-line on standard 2" and 4" centers.

Pack: 2000/case

M04-02901

Part Number: M04-02902-06 Rectangular Strike Plate

Length: 1-3/8" (34.9mm) Width: 1/2" (12.7mm)

Screw Size: #5

Pack: 2000/case

Antique copper only

M04-02902-06

Part Number: M04-02909 Round Strike Plate

Diameter: 19/32" (15.1mm)

Screw Size: #5
Pack: 2000/case

M04-02909

LID SUPPORTS

Part Number: LS3-61918-03

Hand: Reversible Tension: Adjustable 6-1/4" (158.8mm) Arm Length: 9/16" (14.3mm) Arm Width: Length Of Slot: 5-1/2" (139.7mm)

Screw Size: Pack: 100/case

Available in bright brass only

Part Numbers: LS3-6L919-03, LS3-6R919-03

Hand: 6L919 - left, 6R919 - right

Tension: Adjustable Arm Length: 6-1/4" (158.8mm) Arm Width: 9/16" (14.3mm) Length Of Slot: 5-1/2" (139.7mm)

#5 Screw Size: 200/case Pack:

Available in bright brass only

Part Numbers: LS3-6R929-03

Hand: right Tension: Adjustable Arm Length: 5" (127mm) Arm Width: 9/16" (14.3mm) Length Of Slot: 4-11/16" (119.1mm)

Screw Size: #5 Pack: 200/case

Available in bright brass only

Hand: Reversible Tension: Adjustable Arm Length: 6-3/4" (171.5mm) 3/4" (19mm) Arm Width: Length Of Slot: 6" (152.4mm) Screw Size:

Pack: 100/case

LID SUPPORTS

Part Numbers: LSX-R1525-06, LSX-L1525-06

Self-Balancing Heavy-Duty Lid Support, Side Mounted

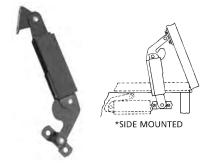

Hand: **R1525** – right, **L1525** - left

Tension: 35 lbs
Open Length: 6" (152.4mm)
Arm Width: 15/16" (23.8mm)

Screw Size: #6

Pack: 100/carton – 200/case

Available in statuary bronze only

LSX-R1525-06, LSX-L1525-06

Part Numbers: LS6-R1575-06, LS6-L1575-06 Self-Balancing Heavy-Duty Lid Support, Back Mounted

Hand: **R1575** – right, **L1575** - left

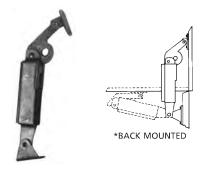

Tension: 35 lbs

Open Length: 6" (152.4mm)
Arm Width: 15/16" (23.8mm)

Screw Size: #6

Pack: 100/carton – 200/case

Available in statuary bronze only

LS6-R1575-06, LS6-L1575-06

Part Number: H02-CH000-03 (pair) Combination Hinge & Support

Hand: left & right Tension: none

 Open Length:
 3-3/4" (95.3mm)

 Arm Width:
 1" (25.4mm)

 Length Of Slot:
 5-1/2" (139.7mm)

Screw Size: #6
Pack: 50/case

Available in bright brass only

H02-CH000-03

Part Number: H08-96B05-03 Lid Hinge

Width: 2" (50.8mm)

Base Width: 3/4 - 1" (19mm - 25.4mm)

Return: 1/2" (12.7mm) Gauge: .070" (1.8mm)

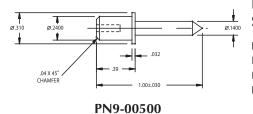

Screw Size: #6
Pack: 500/case

H08-96B05-03

SHUTTER PINS & SHELF PINS

Part Number: PN9-00500-01 Standard Shutter Pin

 Pin Diameter:
 .140" (3.6mm)

 Head Diameter:
 .240" (6.1mm)

 Full Length:
 1.035" (26.3mm)

 Pack:
 15000/case

 Nylon

B01-34056

Part Number: B01-34056 Spoon Type Shelf Support

Bore: 3/16" (5mm) Length: 3/4" (19mm) Width: 5/16" (7.9mm) Pack: 1000/case

Available in antique brass, bright brass or nickel only

B01-34050

Part Number: B01-34050 Spoon Type Shelf Support

Bore: 1/4" (6.5mm) Length: 3/4" (19mm) Width: 1/2" (7.9mm) Pack: 1000/case

Available in Antique brass, black nickle, bright brass or nickel only

B01-34072-03

Part Number: B01-34072-03 Spoon Type Shelf Support

Bore: 3/16" (5mm)
Length: 11/16" (17.5mm)
Pack: 8/bag, 1000 bags/case

Available in bright brass only

B08-34051-14

Part Number: B08-34051-14 Right Angle Shelf Rest With Quake Pin Hole

Bore: 1/4" (6.5mm)
Length: 23/32" (18.2mm)
Width: 33/64" (13.2mm)
Pack: 1000/case

Available in nickel only

SHUTTER PINS & SHELF PINS

Part Number: B03-3406X-14

Right Angle Shelf Rest With Quake Pin Hole

Bore: 3/16" (5mm)
Length: 23/32" (18.2mm)
Width: 33/64" (13.2mm)
Pack: 1000/case

Available in nickel only

B03-3406X-14

Part Number: B01-34060 Right Angle Shelf Rest

Bore: 3/16" (5mm) Length: 3/4" (19mm) Width: 1/2" (12.7mm) Pack: 1000/case

Available in antique copper or bright brass only

B01-34060

Part Number: B01-35060-03

Right Angle Shelf Rest With Hole & Slot

Bore: 3/16" (5mm)
Length: 3/4" (19mm)
Width: 1/2" (12.7mm)
Pack: 1000/case

Available in bright brass only

B01-35060-03

Part Number: B03-34070 Plastic Head Shelf Pin

Bore: 3/16" (5mm)
Length: 11/16" (17.5mm)
Width: 7/16" (11.1mm)
Pack: 1000/case

Available in clear, black, white, tan only

B03-34070

PILASTERS, CLIPS, STANDARDS & BRACKETS

Pilaster Standards Are Designed For Shelving & Bookcases For Surface Or Recessed Mounting

100 same size/case

Width: 5/8" (15.9mm)

Depth: 3/16" (4.8mm)

Length: Per part number

Adjustments: every 1/2" (12.7mm)

Finish: Bright zinc

Pack:

rart Numbers	Lengin
B01-58181-17	18"
B01-58241-17	24"
B01-58361-17	36"

Longth

Part Numbers

Part Number: B01-CLP11-17, B01-CLP12-17 Clips For B01-58xxx Pilaster Standards

Pack: **B01-CLP11-17** - 100/box

B01-CLP12-17 - 1000/case

Finish: Bright zinc

Wall Standards & Brackets For Surface Mounting

Width: 7/8" (22.2mm)

Depth: 11/16" (17.5mm)

Length: Per part number

Adjustments: every 1/2" (12.7mm)

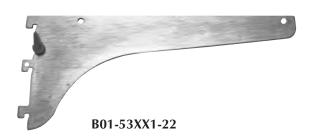

Finish: Bright zinc

Pack: 10/case

Part Numbers	Length
B01-59481-17	48"
B01-59721-17	72"

RPC-TERRY TERMS AND CONDITIONS

Payment Terms: Net 30 days on approved credit.

Freight: FOB, Rockford, Illinois.

RPC-TERRY Part Numbering: Please provide the complete part number and quantity when entering your order.

Minimum Order Quantity:

for specific details.

Institutional hinges are sold in case quantities only. For Special butt hinge, continuous hinge, shutter hinge or general casework hardware minimums, contact RPC Customer Service.

Minimum Order Amount: \$200.00 or an additional handling fee of \$25.00 will be assessed per order. Minimum order quantities for parts noted as Special will remain in effect. Contact RPC Customer Service

Both RPC and Terry part numbers may be combined to reach the \$200.00 minimum order amount.

Order Acceptance: Order acceptance is subject to credit approval.

Return Policy: Buyer's request for return of catalog product must be submitted in writing to Rockford Process Control. A Return Material Authorization (RMA) number will be issued to the Buyer as authorization from RPC to return the product. The RMA number must be referenced on all Buyer's shipping and debit memo documents prior to Buyer's shipment of product to RPC.

For return of saleable catalog product, a minimum restocking charge of 25% of the value of the returned product will apply. Return freight is to be prepaid by the Buver.

Product that is being returned due to defects in material or workmanship is to be shipped to RPC via best-way surface, freight collect.

Order Cancellations: Order cancellations must be submitted in writing and will be accepted only when reasonable and approved by Rockford Process Control. No cancellations will be accepted prior to 30 days of original ship date.

Pricing: Prices are subject to change without notice.

1 mm = .03937 inches

1 inch = 25.4 mm

1 meter = 3.2809 feet

1 kg = 2.2 lbs.

RPC Custom Manufacturing – Where Solutions Take Shape

Along with hinges, Rockford Process Control is known for our custom manufacturing capability supplying markets including ATV, Motorcycle, Golf Car, Construction Equipment, Seating, School Desk and Chair, Lawn and Garden with precision components manufactured to exacting specifications.

RPC's core strength is the ability to develop manufacturing processes to produce a part, no matter how complex, in order to consistently meet quality expectations as well as your on time delivery requirements.

Our primary manufacturing capabilities are:

- Component Welding
- Robotic Welding
- Tube Fabrication CNC Bending, Cutting & Notching
- Precision Metal Stamping
- CNC Machining
- In House Powder Coating
- Component Assembly

These processes are supported and fostered by RPC's manufacturing engineering expertise and our dedication to fully understand our customers' needs and to fulfill them.

Recently one of our customers came to us with a safety critical frame component that he had awarded to another supplier but wanted RPC to quote. Our well thought out and planned manufacturing process, and use of a dedicated manufacturing cell, convinced the customer we could meet their exacting component standards and the product start up deadline.

From the time the project was awarded, new capital equipment was purchased, parts were approved by the customer and production was delivered well within the customer's stringent time requirements. We were able to provide the customer with the solution they were looking for and a high level of confidence in RPC's manufacturing capability.

RPC is an ISO 9001:2000 Registered company. Our quality system assures customers of components, which meet their high product quality standards. Our engineering organization is very responsive to and supportive of our customers' needs. RPC engineering capabilities consist of manufacturability analysis, process engineering, VA/VE, prototyping, progressive tool design, and fixture & gage design and build.

Contact us today with your manufacturing project requirements. RPC has the necessary manufacturing and support attributes that you expect of your top performing suppliers.
